DIDACTIC POETRY — LUIS DE ESCOBAR. — CORELAS. — TORRE. — DIDACTIC PROSE. — VILLALOBOS — OLIVA — SEDEÑO — SALAZAR. — LUIS MEXIA. — PEDRO MEXIA — NAVARRA — URREA — PALACIOS RUBIOS — VANEGAS — JUAN DE AVILA — ANTONIO DE GUEVARA. — DIÁLOGO DE LAS LENGUAS. — PROGRESS OF THE CASTILIAN FROM THE TIME OF JOHN THE SECOND TO THAT OF THE EMPEROR CHARLES THE FIFTH.

WHILE an Italian spirit, or at least an observance of Italian forms, was beginning so decidedly to prevail in Spanish lyric and pastoral poetry, what was didactic, whether in prose or verse, took directions somewhat different.

In didactic poetry, among other forms, the old one of question and answer, known from the age of Juan de Mena, and found in the *Cancioneros* as late as Bada-joz, continued to enjoy much favor. Originally, such questions seem to have been riddles and witticisms; but in the sixteenth century they gradually assumed a graver character, and at last claimed to be directly and absolutely didactic, constituting a form in which two remarkable books of light and easy verse were produced. The first of these books is called “The Four Hundred Answers to as many Questions of the Illustrious Don Fadrique Enriquez, the Admiral of Castile,

and other Persons.”<sup>1</sup> It was printed three times in 1545, the year \* in which it first appeared, and had undoubtedly a great success in the class of society to which it was addressed, and whose manners and opinions it strikingly illustrates. It contains at least twenty thousand verses, and was followed, in 1552, by another similar volume, chiefly in prose, and promising a third, which, however, was never published. Except five hundred proverbs, as they are inappropriately called, at the end of the first volume, and fifty glosses at the end of the second, the whole consists of such ingenious questions as a distinguished old nobleman in the reign of Charles the Fifth and his friends might imagine it would amuse or instruct them to have solved. They are on subjects as various as possible, — religion, morals, history, medicine, magic, — in short, whatever could occur to idle and curious minds ; but they were all sent to an acute, good-humored Minorite friar, Luis de Escobar, who, being bed-ridden with the gout and other grievous maladies, had nothing better to do than to answer them.

His answers form the body of the work. Some of them are wise and some foolish, some are learned and some absurd ; but they all bear the impression of their age. Once we have a long letter of advice about a godly life, sent to the Admiral, which, no doubt, was well suited to his case ; and repeatedly we get complaints from the old monk himself of his sufferings, and accounts of what he was doing ; so that from different parts of the two volumes it would be possible to

<sup>1</sup> My copy is entitled, Vol. I., *Las Quatrocientos Respuestas a otras tantas Preguntas que el illustrissimo (sic) Señor Don Fadrique Enriquez, Almirante de Castilla y otras diversas personas embiaron a preguntar al autor, ec.,* 1545 ; printed in folio at Zaragoza, ff. 122, blk. let. two and three columns. Vol. II., *La Segunda Parte de las Quatrocientos Respuestas, ec.* En Valladolid, 1552. Folio, ff. 245, blk. let. two columns. More than half in prose.

collect a tolerably distinct picture of the amusements of society, if not its occupations, about the court, at the period when they were written. The poetry is in many respects not unlike that of Tusser, who was contemporary with Escobar, but it is better and more spirited.<sup>2</sup>

\* The second book of questions and answers to \* 5 which we have referred is graver than the first.

It was printed the next year after the great success of Escobar's work, and is called "Three Hundred Questions concerning Natural Subjects, with their Answers," by Alonso Lopez de Corelas, a physician, who had more learning, perhaps, than the monk he imitated, but is less amusing, and writes in verses neither so well constructed nor so agreeable.<sup>3</sup>

Others followed, like Gonzalez de la Torre, who in 1590 dedicated to the heir-apparent of the Spanish

<sup>2</sup> Escobar was of the family of that name at Sahagun, but lived in the convent of St Francis at Rioseco, a possession of the great Admiral. This he tells us in the Preface to the Second Part. Elsewhere he complains that many of the questions sent to him were in such bad verse that it cost him a great deal of labor to put them into a proper shape, and it must be admitted that both questions and answers generally read as if they came from one hand. Sometimes a long moral dissertation occurs, especially in the prose of the second volume, but the answers are rarely tedious from their length. Those in the first volume are the best, and Nos 280, 281, 282, are curious, from the accounts they contain of the poet himself, who must have died after 1552. In the Preface to the first volume, he says the Admiral died in 1538. If the whole work had been completed, according to its author's purpose, it would have contained just a thousand questions and answers. For a specimen we may take No 10 (Quatrocienas Preguntas, Caragoña, 1545, folio) as one of the more ridiculous, where the Admiral asks how many keys Christ gave to St. Peter; and No 190 as one of the better sort, where the Admiral asks

whether it be necessary to kneel before the priest at confession, if the penitent finds it very painful, to which the old monk answers gently and well, —

He that, through suffering sent from God above,  
Confessing, kneels not, still commits no sin,  
But let him cherish modest, humble love,  
And that shall purify his heart within

The fifth part of the first volume consists of riddles in the old style, and, as Escobar adds, they are sometimes truly very old riddles; so old, that they must have been generally known.

The Admiral to whom these "Respuestas" were addressed was the stout old nobleman who, during one of the absences of Charles V, was left Regent of Spain, and who ventured to give his master counsels of the most plain-spoken wisdom (Salazar, *Dignidades*, 1618, Lib. III c 15, Ferrer del Rio, *Decadencia de España*, 1850, pp. 16, 17)

<sup>3</sup> The Volume of Corelas "Trezientas Preguntas" (Valladolid, 1546, 4to) is accompanied by a learned prose commentary in a respectable didactic style. There seems to have been an earlier edition the same year, containing only two hundred and fifty questions and answers (See Salva's Catalogues, 1826 and 1829, Nos. 1236, 3304.)

throne a volume of such dull religious riddles as were admired a century before.<sup>4</sup> But nobody, who wrote in this peculiar didactic style of verse, equalled Escobar, and it soon passed out of general notice and regard.<sup>5</sup>

In prose, about the same time, a fashion appeared of imitating the Roman didactic prose-writers, just as those writers had been imitated by Castiglione, Bembo,

\* 6 Giovanni \* della Casa, and others in Italy. The impulse seems plainly to have been communicated to Spain by the moderns, and not by the ancients. It was because the Italians led the way that the Romans were imitated, and not because the example of Cicero and Seneca had, of itself, been able to form a prose school, of any kind, beyond the Pyrenees.<sup>6</sup> The fashion was not one of so much importance and influence as that introduced into the poetry of the nation; but it is worthy of notice, both on account of its results during the reign of Charles the Fifth, and on account of an effect more or less distinct which it had on the prose style of the nation afterwards.

The eldest among the prominent writers produced by this state of things was Francisco de Villalobos, of whom we know little except that he belonged to a family which, for several successive generations, had been devoted to the medical art; that he was himself the physician, first of Ferdinand the Catholic,<sup>7</sup> and then of

<sup>4</sup> *Docientes Preguntas, etc., por Juan Gonzalez de la Torre, Madrid, 1590, 4to.*

<sup>5</sup> I should rather have said, perhaps, that the *Preguntas* were soon restricted to the fashionable societies and academies of the time, as we see them wittily exhibited in the first *jornada* of Calderon's "*Secreto á Voces*"

<sup>6</sup> The general tendency and tone of the didactic prose-writers in the reign of Charles V. prove this fact; but the Discourse of *Morales*, the historian, prefixed to the works of his uncle, Fer-

nan Perez de Oliva, shows the way in which the change was brought about. Some Spaniards, it is plain from this curious document, were become ashamed to write any longer in Latin, as if their own language were unfit for practical use in matters of grave importance, when they had, in the Italian, examples of entire success before them. (*Obras de Oliva, Madrid, 1787, 12mo, Tom. I. pp. xvi–xlvii*)

<sup>7</sup> There is a letter of Villalobos, dated at Calatayud, October 6, 1515, in which he says he was detained in that city by

Charles the Fifth ; that he published, as early as 1498, a poem on his own science, in five hundred stanzas, founded on the rules of Avicenna ;<sup>8</sup> and that he continued to be known as an author, chiefly on subjects connected with his profession, till 1543, before which time he had become weary of the court, and sought a voluntary retirement, in which he died, above seventy years old.<sup>9</sup> His translation of the “Amphitryon” of Plautus belongs rather to the theatre, but, like that of Oliva, soon to be mentioned, \* produced no \* 7 effect there, and, like his scientific treatises, demands no especial notice. The rest of his works, including all that belong to the department of elegant literature, are to be found in a volume of moderate size, which he dedicated to the Infante Don Luis of Portugal.

The chief of them is called “Problems,” and is divided into two tractates : the first, which is very short, being on the Sun, the Planets, the Four Elements, and the Terrestrial Paradise ; and the last, which is longer, on Man and Morals, beginning with an essay on Satan, and ending with one on Flattery and Flatterers, which is especially addressed to the heir-apparent of the crown of Spain, afterwards Philip the Second. Each of these subdivisions, in each tractate, has eight lines of the old Spanish verse prefixed to it, as its Problem, or text, and the prose discussion which follows, like a gloss, constitutes the substance of the work. The whole is of a very miscellaneous character ; most of it grave, like the es-

the king’s severe illness. (Obras, Cara-  
goa, 1544, folio, f. 71, b) This was the illness of which Ferdinand died in less than four months afterward.

<sup>8</sup> Mendez, *Typographía*, p 249 An-  
tomo, Bib. Vetus, ed Bayer, Tom. II.  
p 344, note

<sup>9</sup> He seems, from the letter just no-

ticed, to have been displeased with his position as early as 1515 , but he must have continued at court above twenty years longer, when he left it poor and disheartened. (Obras, f. 45 ) From a passage two leaves further on, I think he left it after the death of the Em-  
press, in 1539.

says on Knights and Prelates, but some of it amusing, like an essay on the Marriage of Old Men.<sup>10</sup> The best portions are those that have a satirical vein in them; such as the ridicule of litigious old men, and of old men that wear paint.<sup>11</sup>

A Dialogue on Intermittent Fevers, a Dialogue on the Natural Heat of the Body, and a Dialogue between the Doctor and the Duke, his patient, are all quite in the manner of the contemporary didactic discussions of the Italians, except that the last contains passages of a broad and free humor, approaching more nearly to the tone of comedy, or rather of farce.<sup>12</sup> A treatise that follows, on the Three Great Annoyances of much talking, much disputing, and much laughing,<sup>13</sup> and a

\* 8 \* grave discourse on Love, with which the volume ends, are all that remain worth notice. They have the same general characteristics with the rest of his miscellanies; the style of some portions of them being distinguished by more purity and more pretensions to dignity than have been found in the earlier didactic prose-writers, and especially by greater clearness and exactness of expression. Occasionally, too, we meet with an idiomatic familiarity, frankness, and spirit, that are very attractive, and that partly compensate us for

<sup>10</sup> If Poggio's trifle, "An Seni sit Uxor ducenda," had been published when Villalobos wrote, I should not doubt he had seen it. As it is, the coincidence may not be accidental, for Poggio died in 1449, though his Dialogue was not, I believe, printed till the present century.

<sup>11</sup> The Problemas constitute the first part of the Obras de Villalobos, 1544, and fill thirty-four leaves. A few poems by Villalobos may be found in the Cancionero of 1554 (noticed *ante*, Vol I p 393, n.), but they are of much less worth than his prose, and the best of his works are reprinted in the Biblioteca

ca de Autores Españoles, Tom XXXVI. 1855

<sup>12</sup> Obras, f. 35

<sup>13</sup> I have translated the title of this Treatise "The Three Great Annoyances." In the original it is "The Three Great —," leaving the title, says Villalobos in his *Prólogo*, unfinished, so that everybody may fill it up as he likes. Among the MSS of the Academy of History at Madrid is an amusing "Coloquio" by Villalobos on a medical question, and some of his pleasant letters. See Spanish translation of this History, Tom II. p 506.

the absurdities of the old and forgotten doctrines in natural history and medicine, which Villalobos inculcated because they were the received doctrines of his time.

The next writer of the same class, and, on the whole, one much more worthy of consideration, is Fernan Perez de Oliva, a Cordovese, who was born about 1492, and died, still young, in 1530. His father was a lover of letters ; and the son, as he himself informs us, was educated with care from his earliest youth. At twelve years of age, he was already a student in the University of Salamanca ; after which he went, first, to Alcalá, when it was in the beginning of its glory ; then to Paris, whose University had long attracted students from every part of Europe ; and finally to Rome, where, under the protection of an uncle at the court of Leo the Tenth, all the advantages to be found in the most cultivated capital of Christendom were accessible to him.

On his uncle's death, it was proposed to him to take several offices left vacant by that event ; but loving letters more than courtly honors, he went back to Paris, where he taught and lectured in its University for three years. Another Pope, Adrian the Sixth, was now on the throne, and, hearing of Oliva's success, endeavored anew to draw him to Rome ; but the love of his country and of literature continued to be stronger than the love of ecclesiastical preferment. He returned, therefore, to Salamanca ; \* became one of the \* 9 original members of the rich "College of the Archbishop," founded in 1528 ; and was successively chosen Professor of Ethics in the University, and its Rector. But he had hardly risen to his highest distinctions, when he died suddenly, and at a moment when so

many hopes rested on him that his death was felt as a misfortune to the cause of letters throughout Spain.<sup>14</sup>

Oliva's studies at Rome had taught him how successfully the Latin writers had been imitated by the Italians, and he became anxious that they should be no less successfully imitated by the Spaniards. He felt it as a wrong done to his native language, that almost all serious prose discussions in Spain were still carried on in Latin, rather than in Spanish.<sup>15</sup> Taking a hint, then, from Castiglione's "Cortigiano," and opposing the current of opinion among the learned men with whom he lived and acted, he began a didactic dialogue on the Dignity of Man, formally defending it as a work in the Spanish language written by a Spaniard. Besides this, he wrote several strictly didactic discourses: one on the Faculties of the Mind and their Proper Use; another urging Córdova, his native city, to improve the navigation of the Guadalquivir, and so obtain a portion of the rich commerce of the Indies, which was then monopolized by Seville; and another, that was delivered at Salamanca, when he was a candidate for the chair of moral

<sup>14</sup> The most ample life of Oliva is in Rezabal y Ugaite, "Biblioteca de los Escritores, que han sido individuos de los seis Colegios Mayores" (Madrid, 1805, 4to, pp. 239, etc.) But all that we know about him, of any real interest, is to be found in the exposition he made of his claims and merits when he contended publicly for the chair of Moral Philosophy at Salamanca. (Obras, 1787, Tom II pp. 26-51.) In the course of it, he says his travels all over Spain and out of it, in pursuit of knowledge, had amounted to more than three thousand leagues.

<sup>15</sup> Obras, Tom I p. xxii. Luis de Leon was of the same mind at the same period, but his opinion was not printed until later. See *post*, Chap IX. note 12. But Latin continued to be exclusively the language of the Spanish Universities for above two centuries longer.

In an anonymous controversial pamphlet published at Madrid in 1789, and entitled "Carta de Paracuellos," we are told (p. 29), "Los años pasados el Consejo de Castilla mandó a las Universidades del Reyno que, en las funciones literarias, *solo* se hablase en Latin Bien mandado, ec" And yet, the injudiciousness of the practice had been ably set forth by the well-known scholar, Pedro Simon de Abil, in an address to Philip II, as early as 1589, and the reasons against it stated with force and precision. See his "Apunamientos de como se devien reformar las doctrinas y la manera de enseñallas." Editions of this sensible tract were also printed in 1769 and 1817,—the last, with notes and a preliminary discourse by José Clemente Carriero, seems to have had some effect on opinion.

philosophy ; \* in all which his nephew, Morales, \* 10 the historian, assures us it was his uncle's strong desire to furnish practical examples of the power and resources of the Spanish language.<sup>16</sup>

The purpose of giving greater dignity to his native tongue, by employing it, instead of the Latin, on all the chief subjects of human inquiry, was certainly a fortunate one in Oliva, and soon found imitators. Juan de Sedeño published, in 1536, two prose dialogues on Love and one on Happiness ; the former in a more graceful tone of gallantry, and the latter in a more philosophical spirit and with more terseness of manner than belonged to the age.<sup>17</sup> Francisco Cervantes de Salazar, a man of learning, completed the dialogue of Oliva on the Dignity of Man, which had been left unfinished, and, dedicating it to Fernando Cortés, published it in 1546,<sup>18</sup> together with a long prose fable by Luis Mexia, on Idleness and Labor, written in a pure and somewhat elevated style, but too much indebted to the " Vision " of the Bachiller de la Torre.<sup>19</sup> Fadrique Ceriol in 1559 printed, at Antwerp, an ethical and

<sup>16</sup> The works of Oliva have been published at least twice, the first time by his nephew, Ambrosio de Morales, 4to, Córdova, in 1585, and again at Madrid, 1787, 2 vcls, 12mo. In the Index Ex-purgatorius, (1667, p 424,) they are forbidden to be read, "till they are corrected," — a phrase which seems to have left each copy of them to the discretion of the spiritual director of its owner. In the edition of 1787, a sheet was cancelled, in order to get rid of a note of Morales. See Index of 1790.

In the same volume with the minor works of Oliva, Morales published fifteen moral discourses of his own, and one by Pedro Valles of Córdova, none of which have much literary value, though several, like one on the Advantage of Teaching with Gentleness, and one on the Difference between Genius and Wisdom, are marked with excellent sense. That of Valles is on the

Sedeño was a soldier, and served in Italy.

<sup>18</sup> The whole Dialogue — both the part written by Oliva and that written by Francisco Cervantes — was published at Madrid (1772, 4to) in a new edition by Cerdá y Rico, with his usual abundant, but awkward, prefaces and annotations.

political work entitled "Counsel and Councillors for a Prince," which was too tolerant to be successful \* 11 \* in Spain, but was honored and translated abroad.<sup>20</sup> Pedro de Navarra published, in 1567, forty Moral Dialogues, partly the result of conversations held in an *Academia* of distinguished persons, who met, from time to time, at the house of Fernando Cortés.<sup>21</sup> Pedro Mexia, the chronicler, wrote a Silva, or Miscellany, divided, in later editions, into six books, and sub-

<sup>21</sup> *Diálogos muy Subtiles y Notables*, etc , por D Pedro de Navarra, Obispo de Comenge, Caragoça, 1567, 12mo, 118 leaves The first five Dialogues are on the Character becoming a Royal Chronicler , the next four on the Differences between a Rustic and a Noble Life , and the remaining thirty-one on Preparation for Death , — all written in a pure, simple Castilian style, but with little either new or striking in the thoughts Their author says, it was a rule of the *Academia* that the person who arrived last at each meeting should furnish a subject for discussion, and direct another member to reduce to writing the remarks that might be made on it, — Cardinal Poggio, Juan d' Estuñiga, knight-commander of Castile, and other persons of note, being of the society Navarra adds, that he had written two hundred dialogues, in which there were "few matters that had not been touched upon in that excellent Academy," and notes especially that the subject of "Preparation for Death" had been discussed after the decease of Cobos, a confidential minister of Charles V , and that he himself had acted as secretary on the occasion. Traces of anything contemporary are, however, rare in the forty dialogues he printed , — the most important that I have noticed relating to Charles V. and his retirement at Yuste, which the good Bishop seems to have believed was a sincere abandonment of all worldly thoughts and passions I find nothing to illustrate the character of Cortés,

except the fact that such meetings were held at his house Cervantes, in his *Don Quixote*, (Parte II c 18,) calls him — perhaps on this account, perhaps for the sake of a play upon words — "cortesissimo Cortés" Certainly I know nothing in the character or life of this ferocious *conquistador* which should entitle him to such commendation, except the countenance he gave to this *Academia*

The fashion of writing didactic *dialogues* in prose was common at this period in Spain, and indeed until after 1600, as Gayangos has well noted in his translation of this History, (Tom II pp 508 - 510,) citing in proof of it the names of a considerable number of authors, most of whom are now forgotten, but the best of whom, that I have not elsewhere noticed, are Diego de Salazar, 1536 , Francisco de Miranda y Villaña, 1582 , Bernardino de Escalante, 1583 , Francisco de Valdés, 1586 , Juan de Guzman, 1589 , Diego Nuñez de Alva, 1589 , and Sancho de Lodoño, 1593 Of these, I should distinguish Nuñez de Alva, whose dialogues, in the copy I use, are entitled "Dialogos de Diego Nuñez de Alva de la Vida del Soldado en que se cuentan la conjuracion y pacificacion de Alamaña con todas las batallas, encuentros y escaramuzas que en ello acontecieron en los años de 1546, y 7, ec (En Salamanca, Andrea de Portinaris, Dialogo primero, 1552, Dialogo segundo, 1553" But the complete edition is Cuenca, 1589 ) It is written in a pure and spirited style, and is not without value for its record of historical facts ; but it is chiefly interesting for what it tells us of a soldier's life in the time of Charles V., — so different from what it is in our days.

divided into a multitude of separate essays, historical and moral ; declaring it to be the first work of the kind in Spanish, which, he says, he considers quite as suitable for such discussions as the Italian.<sup>22</sup>

\* To this, which may be regarded as an imitation of Macrobius or of Athenæus, and which was printed in 1543, were added, in 1548, six didactic dialogues,—curious, but of little value,—in the first of which the advantages and disadvantages of having regular physicians are agreeably set forth, with a lightness and exactness of style hardly to have been expected.<sup>23</sup> And finally, to complete the short list, Urrea, a favored soldier of the Emperor, and at one time viceroy of Apulia,—the same person who made the poor translation of Ariosto mentioned in *Don Quixote*,—published, in 1566, a Dialogue on True Military Honor, which is written in a pleasant and easy style, and contains, mingled with the notions of one who says he trained himself for glory by reading romances of chivalry, not a few amusing anecdotes of duels and military adventures.<sup>24</sup>

<sup>22</sup> *Silva de Varia Lección, por Pedro Mexia*. The first edition (Sevilla, 1543, fol.) is in only three parts. Another, which I also possess, is of Madrid, 1669, and in six books, filling about 700 closely printed quarto pages, but the fifth and sixth books were first added, I think, in the edition of 1554, two years after his death, and do not seem to be his. It was long very popular, and there are many editions of it, besides translations into Italian, German, French, Flemish, and English. One English version is by Thomas Forescue, and appeared in 1571. (Warton's Eng Poetry, London, 1824, 8vo, Tom IV p 312.) Another, which is anonymous, is called "The Treasure of Ancient and Modern Times, etc., translated out of that worthy Spanish Gentleman, Pedro Mexia, and Mr. Francisco Sansovino, the Italian," etc. (Lon-

don, 1613, fol.) It is a curious mixture of similar discussions by different authors, Spanish, Italian, and French. Mexia's part begins at Book I c 8

<sup>23</sup> The earliest edition of the Dialogues, I think, is that of Seville, 1548, which I use as well as one of 1562, both 12mo, lit. got. The second dialogue, which is on "Inviting to Feasts," is amusing, but the last, which is on subjects of physical science, such as the causes of thunder, earthquakes, and comets, is nowadays only curious or ridiculous. At the end of the Dialogues, and sometimes at the end of old editions of the *Silva*, is found a free translation of the Exhortation to Virtue by Isocrates, made from the Latin of Agricola, because Mexia did not understand Greek. It is of no value.

<sup>24</sup> *Diálogo de la Verdadera Honra Militar, por Gerónimo Jiménez de Ur-*

Both of the works of Pedro Mexia, but especially his *Silva*, enjoyed no little popularity during the sixteenth and seventeenth centuries; and, in point of style, they are certainly not without merit. None, however, of the productions of any one of the authors last mentioned had so much force and character as the first part of the *Dialogue on the Dignity of Man*. And

yet Oliva was certainly not a person of a commanding genius. \*His imagination never warms into poetry; his invention is never sufficient to give new and strong views to his subject; and his system of imitating both the Latin and the Italian masters rather tends to debilitate than to impart vigor to his thoughts. But there is a general reasonableness and wisdom in what he says that will and often satisfy us; and these, with his style, which, though sometimes declamatory, is yet, on the whole, pure and well settled, and his happy idea of defending and employing the Castilian, then coming into all its rights as a living language, have had the effect of giving him a more lasting reputation than that of any other Spanish prose-writer of his time.<sup>25</sup>

rea There are editions of 1566, 1575, 1661, etc (Latassa, Bib Arag Nueva, Tom I p 264) Mine is a small quarto volume, Zaragoza, 1642 One of the most amusing passages in the *Dialogue of Urrea* is the one in Part First, containing a detailed statement of everything relating to the duel proposed by Francis I. to Charles V. There are verses by him in the *Cancionero* of 1554, (noticed *ante*, Vol I p 393, n,) and in the Library of the University of Zaragoza there are, in MS, the second and third volumes of a *Romance of Chivalry* by him, entitled "Don Clarisel de las Flores" See Spanish translation of this History, Tom. II. p 511

<sup>25</sup> As late as 1592, when the "Conversion de la Magdalena," by Pedro Malon de Chaire, was published, the

opposition to the use of the Castilian in grave subjects was continued. He says people talked to him as if it were "a sacrilege" to discuss such matters except in Latin (f 15) But he replies, like a true Spaniard, that the Castilian is better for such purposes than Latin or Greek, and that he trusts before long to see it as widely spread as the arms and glories of his country (f 17) On the other hand, in 1543, a treatise on Holy Affections, — "Ley de Amor Sancto, — written by Francisco de Ossuna, with great purity of style, and sometimes with fervent eloquence, was published without apology for its Castilian, and dedicated to Francisco de Cobos, a confidential secretary of Charles V, adverted to in note 21 I think Ossuna was dead when this treatise appeared.

The same general tendency to a more formal and elegant style of discussion is found in a few other ethical and religious authors of the reign of Charles the Fifth that are still remembered; such as Palacios Rubios, who wrote an essay on Military Courage, for the benefit of his son;<sup>26</sup> Vanegas, who, under the title of "The Agony of Passing through Death," gives us what may rather be considered an ascetic treatise on holy living;<sup>27</sup> and Juan de Avila, sometimes called the Apostle \* of Andalusia, \* 14 whose letters are fervent exhortations to virtue and religion, composed with care and often with eloquence, if not with entire purity of style.<sup>28</sup>

The author in this class, however, who, during his lifetime, had the most influence, was Antonio de Guevara, one of the official chroniclers of Charles the Fifth. He was a Biscayan by birth, and passed some of his earlier years at the court of Queen Isabella.

<sup>26</sup> A full account of Juan Lopez de Vivero Palacios Rubios, who was a man of consequence in his time, and engaged in the famous compilation of the Spanish laws called "Leyes de Toro," is contained in Rezabal y Ugarte (Biblioteca, pp 266-271) His works in Latin are numerous, but in Spanish he published only "Del Esfuerzo Belico Heroico," which appeared first at Salamanca in 1524, folio, but of which there is a beautiful Madrid edition, 1793, folio, with notes by Francisco Morales

<sup>27</sup> Antonio, Bib Nov, Tom. I. p 8 He flourished about 1531-1545. His "Agonía del Triánsito de la Muerte," a glossary to which, by its author, is dated 1543, was first printed from his corrected manuscript many years later. My copy, which seems to be of the first edition, is dated Alcalá, 1574, and is in 12mo. The treatise called "Diferencias de Libros que ay en el Universo," by the same author, who, however, here writes his name Venegas, was finished in 1539, and printed at Toledo in 1540, 4to. It is written in

a good style, though not without conceits of thought and concerted phrases. But it is not, as its title might seem to imply, a criticism on books and authors, but the opinion of Vanegas himself, how we should study the great books of God, nature, man, and Christianity. It is, in fact, intended to discourage the reading of most of the books then much in fashion, and deemed by him bad

<sup>28</sup> He died in 1569. In 1534 he was in the prisons of the Inquisition, and in 1559 one of his books was put into the Index Expurgatorius. Nevertheless, he was regarded as a sort of Saint. (Llorente, Histoire de l'Inquisition, Tom II pp 7 and 423) His "Cáritas Espirituales" were not printed, I believe, till the year of his death. (Antonio, Bib Nova, Tom I pp 639-642) His treatises on Self-knowledge, on Prayer, and on other religious subjects, are equally well written, and in the same style of eloquence. A long life, or rather eulogy, of him is prefixed to the first volume of his works, (Madrid, 1595, 4to,) by Juan Diaz.

In 1528 he became a Franciscan monk ; but, enjoying the favor of the Emperor, he seems to have been transformed into a thorough courtier, accompanying his master during his journeys and residences in Italy and other parts of Europe, and rising successively, by the royal patronage, to be court preacher, Imperial historiographer, Bishop of Guadix, and Bishop of Mondoñedo. He died in 1545.<sup>29</sup>

His works were not very numerous, but they were fitted to the atmosphere in which they were produced, and enjoyed at once a great popularity. His "Dial for Princes, or Marcus Aurelius," first published in 1529, and the fruit, as he tells us, of eleven years' labor,<sup>30</sup> was not only often reprinted in Spanish, but was translated into Latin, Italian, French, and English ; in each of which last two languages it appeared many times before the end of the century.<sup>31</sup> It is a kind

of romance, founded on the life and character  
 \* 15 of Marcus Aurelius, and resembles, \* in some  
 points, the "Cyropædia" of Xenophon ; its pur-  
 pose being to place before the Emperor Charles the  
 Fifth the model of a prince more perfect for wisdom  
 and virtue than any other of antiquity. But the  
 Bishop of Mondoñedo adventured beyond his preroga-  
 tive. He pretended that his Marcus Aurelius was  
 genuine history, and appealed to a manuscript in  
 Florence, which did not exist, as if he had done little  
 more than make a translation of it. In consequence

<sup>29</sup> A life of Guevara is prefixed to the edition of his *Epistolas*, Madrid, 1673, 4to, but there is a good account of him by himself in the *Prólogo* to his "Menosprecio de Corte."

<sup>30</sup> See the argument to his "Década de los Césares."

<sup>31</sup> Watt, in his "Bibliotheca Britannica," and Brunet, in his "Manuel du Libraire," give quite ample lists of the

different editions and translations of the works of Guevara, showing their great popularity all over Europe. In French the number of translations in the sixteenth century was extraordinary. See *La Croix du Maine et du Verdier, Bibliothèques*, (Paris, 1772, 4to, Tom. III. p. 123,) and the articles there referred to.

of this, Pedro de Rua, a professor of elegant literature in the college at Soria, addressed a letter to him, in 1540, exposing the fraud. Two other letters followed, written with more freedom and purity of style than anything in the works of the Bishop himself, and leaving him no real ground on which to stand.<sup>32</sup> He, however, defended himself as well as he was able; at first cautiously, but afterwards, when he was more closely assailed, by assuming the wholly untenable position that all ancient profane history was no more true than his romance of Marcus Aurelius, and that he had as good a right to invent for his own high purposes as Herodotus or Livy. From this time he was severely attacked; more so, perhaps, than he would have been if the gross frauds of Annius of Viterbo had not then been recent. But, however this may be, it was done with a bitterness that forms a strong contrast to the applause bestowed in France, near the end of the eighteenth century, upon a somewhat similar work on the same subject by Thomas.<sup>33</sup>

<sup>32</sup> There are editions of the *Cartas del Bachiller Rua*, Burgos, 1549, 4to, and Madrid, 1736, 4to, and a life of him in Bayle, *Dict Historique*, Amsterdam, 1740, folio, Tom IV p 95. The letters of Rua, or Rhua, as his name is often written, are respectable in style, though their critical spirit is that of the age and country in which they were written. The short reply of Guevara following the second of Rua's letters is not creditable to him.

There are several amusing hits at Guevara in the chronicle of Francesillo de Zuñiga, the witty fool of Charles V. Ex gr in Chap LXXXIV. he says that there was a great stir at court about the wonders of a deep cave near Burgos, in which a hidden miraculous voice would give answers to questions put to it. Many persons visited it. Among the rest Guevara went with a party, and when his turn came to put

questions, the satirical chronicler says that he inquired "Quería saber, Señora Voz, si tengo de ser mejorado en algún obispado, e que fuese presto . . . e si han de creer todo lo que yo escribo?" But, setting the jests of Francesillo aside, Guevara was, no doubt, as Ferren del Rio says of him, "hombre de escasissima conciencia" In his youth he seems to have been a rake (*Decadencia de España*, 1850, pp 139, sqq.) How shamelessly intolerant and cruel he afterwards became, we have already seen, *ante*, Period I, Chap. XXIV note 8

<sup>33</sup> Antonio, in his article on Guevara, (*Bib Nova*, Tom I p 125,) is very severe, but his tone is gentle compared with that of Bayle, (*Dict Hist*, Tom. II. p. 681,) who always delights to show up any defects he can find in the characters of priests and monks. There are editions of the *Relox de Principes* of 1529, 1532, 1537, etc.

After all, however, the “Dial for Princes” is  
 \* 16 little \* worthy of the excitement it occasioned.

It is filled with letters and speeches, ill-conceived and inappropriate, and is written in a formal and inflated style. Perhaps we are now indebted to it for nothing so much as for the beautiful fable of “The Peasant of the Danube,” evidently suggested to La Fontaine by one of the discourses through which Guevara endeavored to give life and reality to his fictions.<sup>34</sup>

In the same spirit, though with less boldness, he wrote his “Lives of the Ten Roman Emperors”; a work which, like his Dial for Princes, he dedicated to Charles the Fifth. In general, he has here followed the authorities on which he claims to found his narrative, such as Dion Cassius and the minor Latin historians, showing, at the same time, a marked desire to imitate Plutarch and Suetonius, whom he announces as his models. But he has not been able entirely to resist the temptation of inserting fictitious letters, and even unfounded stories; thus giving a false view,

Thos North, the well-known English translator, translated the “Relox” in three books, adding, inappropriately, as a “fowerth,” the “Despertador de Cortesanos,” and dedicating the whole, in 1557, to Queen Mary, then wife of Philip II. It was the work of his youth, he says, when he was a student of Lincoln’s Inn, but it contains much good old English idiom. My copy is in folio, 1568.

<sup>34</sup> La Fontaine, *Fables*, Lib. XI fab. 7, and Guevara, *Relox*, Lib. III c 3. The speech which the Spanish Bishop, the true inventor of this happy fiction, gives to his *Rústico de Germania* is, indeed, too long; but it was popular. Tirso de Molina, after describing a peasant who approached Xerxes, says in the Prologue to one of his plays,

In short,  
 He represented to the very life

The Rustic that so boldly spoke  
 Before the Roman Senate

*Cigarrales de Toledo*, Madrid, 1624, 4to, p. 102.

La Fontaine, however, did not trouble himself about the original Spanish or its popularity. He took his beautiful version of the fable from an old French translation, made by a gentleman who went to Madrid in 1526 with the Cardinal de Grammont, on the subject of Francis the First’s imprisonment. It is in the rich old French of that period, and La Fontaine often adopts, with his accustomed skill, its picturesque phraseology. I suppose this translation is the one cited by Brunet as made by René Bertaut, of which there were many editions. Mine is of Paris, 1540, folio, by Galliot du Pré, and is entitled “*L’Orloge des Princes, traduct Despaignol en Langage François*,” but does not give the translator’s name.

if not of the facts of history, at least of some of the characters he records. His style, however, though it still wants purity and appropriateness, is better and more simple than it is in his romance on Marcus Aurelius.<sup>35</sup>

\* Similar characteristics mark a large collection of Letters printed by him as early as 1539. \*17 Many of them are addressed to persons of great consideration in his time, such as the Marquis of Pescara, the Duke of Alva, Iñigo de Velasco, Grand Constable of Castile, and Fadrique Enriquez, Grand Admiral. But some were evidently never sent to the persons addressed, like the loyal one to Juan de Padilla, the head of the *Comuneros*, and two impertinent letters to the Governor Luis Bravo, who had foolishly fallen in love in his old age. Others are mere fictions, among which are a correspondence of the Emperor Trajan with Plutarch and the Roman Senate, which Guevara vainly protests he translated from the Greek, without saying where he found the originals,<sup>36</sup> and a long epistle about Lais and other courtesans of antiquity, in which he gives the details of their conversations as if he had listened to them himself. Most of the letters, though

<sup>35</sup> The "Decada de los Césares," with the other treatises of Guevara here spoken of, except his Epistles, are to be found in a collection of his works first printed at Valladolid in 1539, of which I have a copy, as well as one of the edition of 1545. Guevara seems to have been as particular about the typographical execution of his works as he was about his style of composition. Besides the above, I have his *Epistolas* 1539, 1542, 1543, his *Oratorio de Religiosos*, 1543, 1545, and his *Monte Calvario*, 1543, 1549, — all grave black-letter folios, printed in different cities and by different printers, but all with an air of exactness and finish that is quite remarkable, and, I suspect, quite characteristic of the author.

The translation of the "Década," by Edward Hellowes, published 1577, and dedicated to Queen Elizabeth, is not so good as North's translation of the "Relox," but it is worth having. I have Italian versions of several of Guevara's works, but they seem of no value.

<sup>36</sup> These very letters, however, were thought worth translating into English by Sir Geoffrey Fenton, and are found ff. 68 – 77 of a curious collection taken from different authors and published in London, (1575, 4to, black-letter,) under the title of "Golden Epistles." Edward Hellowes had already translated the whole of Guevara's Epistles in 1574; which were again translated, but not very well, by Savage, in 1657.

they are called “Familiar Epistles,” are merely essays or disputations, and a few are sermons in form, with an announcement of the occasions on which they were preached. None has the easy or natural air of a real correspondence. In fact, they were all, no doubt, prepared expressly for publication and for effect; and, notwithstanding their stiffness and formality, were greatly admired. They were often printed in Spain; they were translated into all the principal languages of Europe; and, to express the value set on them, they were generally called “The Golden Epistles.” But, notwithstanding their early success, they have long been disregarded, and only a few passages that touch the affairs of the time or the life of the Emperor can now

be read with interest or pleasure.<sup>37</sup>

\* 18 \* Besides these works, Guevara wrote several formal treatises. Two are strictly theological.<sup>38</sup> Another is on the Inventors of the Art of Navigation and its Practice;—a subject which might be thought foreign from the Bishop’s experience, but with which, he tells us, he had become familiar by having been much at sea, and visited many ports on the Mediterranean.<sup>39</sup> Of his two other treatises, which are all

<sup>37</sup> *Epistolas Familiares de D. Antonio de Guevara*, Madrid, 1673, 4to, p 12, and elsewhere Cervantes, *en passant*, gives a blow at the letter of Guevara about Lais, in the *Prólogo* to the first part of his *Don Quixote*.

<sup>38</sup> One of these religious treatises is entitled “Monte Calvario,” 1542, translated into English in 1595; and the other, “Oratorio de Religiosos,” 1543, which is a series of short exhortations or homilies, with a text prefixed to each. The first is ordered to be expurgated in the Index of 1667, (p 67,) and both are censured in that of 1790.

<sup>39</sup> Hellowes translated this, also, and printed it in 1578. (Sir E. Brydges, *Censura Literaria*, Tom. III. 1807, p.

210 ) It is an unpromising subject in any language, but in the original Guevara has shown some pleasantry, and an easier style than is common with him. Much interest for the sciences connected with navigation was awakened at Seville by the intercourse of that city with America in the time of Charles V., when Guevara lived there. It is believed that the first really useful maritime charts were made there (Havemann, p 173) The “Arte de Navegar” of Pedro de Medina, printed at Seville in 1545 and early translated into Italian, French, and German, is said to have been the first book published on the subject. See *Literatura Española . . . en el Prefacio de N. Antonio, ec.*, 1787, p 56, note.

that remain to be noticed, one is called “Contempt of Court Life and Praise of the Country”; and the other, “Counsels for Favorites and Teachings for Courtiers.” They are moral discussions, suggested by Castiglione’s “Courtier,” then at the height of its popularity, and are written with great elaborateness, in a solemn and stiff style, bearing the same relations to truth and wisdom that Arcadian pastorals do to nature.<sup>40</sup>

All the works of Guevara show the impress of their age, and mark their author’s position at court. They are burdened with learning, yet not without proofs of experience in the ways of the world; — they often show good sense, but they are monotonous from the stately dignity he thinks it necessary to assume on his own account, and from the rhetorical ornament by which he hopes to commend them to the regard of his readers. Such as they are, however, they illustrate and exemplify more truly, perhaps, than anything else of their age, the style of writing most in favor at the court of Charles the Fifth, especially during the latter part of that monarch’s reign.

But by far the best didactic prose work of this period, though unknown and unpublished till two centuries afterwards, \* is that commonly cited \* 19 under the simple title of “The Dialogue on Languages”; — a work which, at any time, would be deemed remarkable for the naturalness and purity of its style, and is peculiarly so at this period of formal and elaborate eloquence. “I write,” says its author, “as I speak; only I take more pains to think what I have to say, and then I say it as simply as I can; for, to my mind, affectation is out of place in all languages.” Who

it was that entertained an opinion so true, but in his time so uncommon, is not certain. Probably it was Juan de Valdés, a person who has sometimes been said, but not, I think, justly, to have embraced the opinions of the Reformation. He was educated at the University of Alcalá, and during a part of his life possessed not a little political consequence, being much about the person of the Emperor. It is not known what became of him afterwards; but he probably died in 1540, six years before Charles the Fifth attempted to establish the Inquisition in Naples, where Valdés lived long, and, therefore, it is not likely that he was seriously molested while he was there, although his opinions were certainly not always such as the Spanish Church exacted.<sup>41</sup>

The Dialogue on Languages is supposed to be carried on between two Spaniards and two Italians, at a country-house on the sea-shore, near Naples, and is an acute discussion on the origin and character of the Castilian. Parts of it are learned, but in these the author sometimes falls into errors;<sup>42</sup> other parts are lively and entertaining; and yet others are full of good sense and sound criticism. The principal personage — the one who gives all the instructions and explanations — is named Valdés; and, from this circumstance, \* 20 as well as from some intimations in the \* Dialogue itself, it may be inferred that Juan de Valdés was its author, and that it was written before

<sup>41</sup> Llorente (*Hist. de l'Inquisition*, Tom. II. pp. 281 and 478) makes some mistakes about Valdés, of whom accounts are to be found in McCrie's "Hist. of the Progress, etc., of the Reformation in Italy," (Edinburgh, 1827, 8vo, pp. 106 and 121,) and in his "Hist. of the Progress, etc., of the Reformation in Spain" (Edinburgh, 1829, 8vo, pp. 140 - 146). Valdés is

supposed to have been an anti-Trinitarian, but McCrie does not admit it

<sup>42</sup> His chief error is in supposing that the Greek language once prevailed generally in Spain, and constituted the basis of an ancient Spanish language, which, he thinks, was spread through the country before the Romans appeared in Spain.

1536; <sup>43</sup> — a point which, if established, would account for the suppression of the manuscript, as the work of one inclined to heresy. In any event, the Dialogue was not printed till 1737, and therefore, as a specimen of pure and easy style, was lost on the age that produced it.<sup>44</sup>

<sup>43</sup> The intimations alluded to are that the Valdés of the Dialogue had been at Rome, that he was a person of some authority, and that he had lived long at Naples, and in other parts of Italy. He speaks of Garcilasso de la Vega as if he were alive, and Garcilasso died in 1536. Llorente, in a passage just cited, calls Valdés the author of the "Diálogo de las Lenguas", and Clemencin — a safer authority — does the same, once, in the notes to his edition of *Don Quixote*, (Tom IV p 285,) though in other notes he treats it as if its author were unknown.

<sup>44</sup> The "Diálogo de las Lenguas" was not printed till it appeared in Mayans y Siscar, "Orígenes de la Lengua Española," (Madrid, 1737, 2 tom. 12mo,) where it fills the first half of the second volume, and is the best thing in the collection. Probably the manuscript had been kept out of sight, as the work of a heretic. Mayans says that it could be traced to Zurita, the historian, and that, in 1736, it was purchased for the Royal Library, of which Mayans himself was then librarian. Gayangos says it is now in the British Museum, but this is a mistake. It is a modern copy that is there, numbered "9939, 4to, Additional MSS." One leaf was wanting, — probably an expurgation, — which Mayans could not supply, and, though he seems to have believed Valdés to have been the author of the Dialogue, he avoids saying so, — perhaps from an unwillingness to attract the notice of the Inquisition to it (Orígenes, Tom I pp 173-180.) Iriarte, in the "Aprobacion" of the collection, treats the "Diálogo" as if its author were quite unknown.

Since the preceding part of this note, and what relates to the same subject in the text, were published, in 1840, more has become known about it, and I will, therefore, give the result as it stands in 1864.

There were two brothers Valdés, — Juan and Alfonso, — twins, and so remarkably alike in character as well as in external appearance that Erasmus, speaking of them in a letter dated March 1, 1528, says they did not seem to be twins, but to be absolutely one person, — "non duo gemelli, sed idem prorsus homo." They were both secretaries to Charles V, both went with him to Germany and Italy; and they both were men of talent and power, who wrote and taught in a liberal and wise spirit, rare always, and especially in a period like the troubled one in which they lived. From such a remarkable series of resemblances, and from the fact that opinions such as they entertained could not, in their own times, be very frankly and fully set forth, the two twin brothers have not infrequently been confounded as to the events of their lives and as to the authorship of their respective works.

That Juan wrote the remarkable Dialogue on the Language there can be no just doubt. Since the account given of it in the text was published in 1840, a much better edition of the work has been published with the imprint of Madrid, 1860, prepared from the manuscript preserved in the National Library there, which is the one used by Mayans in 1737, and the only old one known to exist. It settles this question of the authorship, and renders it probable that the work itself was originally entitled, as it ought to be, "Diálogo de la Lengua," in the singular number, and not "Diálogo de las Lenguas," in the plural, — relating, as it really does, to the Spanish language alone, although reference is necessarily made in its discussions to other languages. But, besides the well-considered examination of these points in the preface of this edition, it contains above a thousand different readings, important and unimportant, all noted in the margin, and

\*21 \*For us it is important, because it shows, with more distinctness than any other literary monument of its time, what was the state of the Spanish language in the reign of the Emperor Charles the

showing, as does everything in relation to the preparation of the work, great care and patience

Juan de Valdés wrote other works that are chiefly or wholly, like his expositions of St. Paul, religious and theological. Of these, the most important, I suppose, are his "Alfabeto Cristiano" and his "Ciento y Diez Consideraciones," both intended for Christian edification, and the last very comprehensive in its character. But unhappily we possess neither of them as their author wrote them in his pure Castilian, for having been prepared especially for the benefit of Italian friends, the first was published in Italian, without date of place, in 1546, and the last at Basle in 1550, from which they have passed successively into the other modern languages, and, among the rest, into the Spanish. His "Consideraciones," in the English version of Nicholas Ferrar, was published at Oxford in 1638, and at Cambridge in 1646, with notes by Herbert, the pious poet of the Temple. See Izaak Walton's Life of Herbert, 1819, p. 266, noting, however, that good Izaak is mistaken in what he says about Valdés.

Of the works of Alfonso Valdés, two are especially worth notice, which, until lately, were supposed to have been written by his *alter ego*, Juan, and which, even in the new edition of the "Diálogo de la Lengua," are claimed, on internal evidence, to be partly from his hand.

They commonly appear under the simple title of "Dos Dialogos," as they were originally published s. d. about 1530. The first of them is a dialogue between Mercury, Charon, and sundry souls newly arrived on the banks of the Styx, and must have been written as late as 1528, since it contains a letter from Charles V dated in that year. The other is a dialogue between a young man named Lactancio, who may represent the author, and an ecclesiastic in a military dress fresh from Rome, where, amidst the confusion and violence of its recent capture, monks and

priests served and dressed as soldiers. These two persons, both Spaniards, meet accidentally in a public square of Valladolid, and, retiring for quietness into a neighboring church, carry on a free and full discussion of the troubles of their time, the report of which constitutes the substance of the "Diálogo." It was probably written in 1528, and was certainly known in 1529, because in that year Alfonso Valdés is rebuked as its author for his heretical opinions by Castiglione, the Pope's Nuncio in Spain, who tells him that if he were to visit Germany he would be heartily welcomed by Luther.

Both of these curious and interesting discussions were intended to defend the Emperor in whatever relates to the capture of Rome and the challenge of Francis I, — recent events which were then in the mouths of all men. In each we have not a few important facts touching what had occurred within their author's knowledge, and still more frequently glimpses of the state of opinion and feeling at a period of the greatest excitement and anxiety. In each, too, there is a large admixture of the spirit of religious controversy, but though the vices of the priesthood and the low condition of Christianity in the world are freely exposed in many passages, I do not think that Valdés can be accounted a Protestant, as he has often been; for although the tone of his mind and character is eminently spiritual, and although his opinions are full of temperance and wisdom, still his admiration for the Emperor is unbounded and his submission to the Pope and the Church complete. The charm of both the Dialogues, therefore, consists in their pure and spirited style, their point and humor, and their exhibition, by quaint details and remarkable facts, of the very form and pressure of the extraordinary times to which they relate. They were prepared and published anew in 1850, without date of place, but I suppose in Madrid, by the same person who in 1860 prepared and edited the "Diálogo de la Lengua."

Fifth; a circumstance of consequence to the condition of the literature, and one to which we therefore turn with interest.

As might be expected, we find, when we look back, that the language of letters in Spain has made material progress since we last noticed it in the reign of John the Second. The example of Juan de Mena had been followed, and the national vocabulary had been enriched during the interval of a century, by successive poets, from the languages of classical antiquity. From other sources, too, and through other channels, important contributions had flowed in. From America and its commerce had come the names of those productions which half a century of intercourse had brought to Spain, and rendered familiar there,—terms few, indeed, in number, but of daily use.<sup>45</sup> From Germany and the Low Countries still more had been introduced by the accession of Charles the Fifth,<sup>46</sup> who, to the great annoyance of his Spanish subjects, arrived in Spain surrounded by foreign courtiers, and speaking with a stranger accent the language of the country he was called to govern.<sup>47</sup> A few words, too, had come acci-

For what relates to the brothers Valdés, see the editions of the “Ciento y Diez Consideraciones,” 1855 and 1863, the edition of the “Alfabeto Cristiano,” 1861, that of the “Diálogo de la Lengua,” 1860, and that of the “Dos Diálogos,” 1850,—all, I suppose, printed in Madrid, though not all so designated by their editors, Don Luis de Usoz y Río and Benjamin B. Wiffen, a Quaker gentleman living near Bedford, and brother of the translator of Garcilasso de la Vega. See, also, the interesting discussion relating to the brothers Valdés in M. Young’s “Life and Times of Aomio Paleario,” London, 1860, 8vo, Vol. I. pp 201–238 and 547–551

A Life of Juan de Valdés, containing everything that can probably be known

of him, was written by Friend Wiffen and published in London in 1865, but I had not the benefit of it when the preceding remarks were prepared, as that was a year earlier. Indeed, though the Life by Wiffen contains much that is important about the political and religious character of Valdés, I found nothing in it to add to my notice of him as a man of letters.

<sup>46</sup> *Ibid.* p. 98

<sup>47</sup> Sandoval says that Charles V suffered greatly in the opinion of the Spaniards, on his first arrival in Spain, because, owing to his inability to speak Spanish, they had hardly any proper intercourse with him. It was, he adds, as if they could not talk with him at

dentially from France ; and now, in the reign of Philip the Second, a great number, amounting to the most considerable infusion the language had received since the time of the Arabs, were brought in through the intimate connection of Spain with Italy and the increasing influence of Italian letters and Italian culture.<sup>48</sup>

\* 22 \* We may therefore consider that the Spanish language at this period was not only formed, but that it had reached substantially its full proportions, and had received all its essential characteristics. Indeed, it had already for half a century been regularly cared for and cultivated. Alonso de Palencia, who had long been in the service of his country as an ambassador, and was afterwards its chronicler, published a Latin and Spanish Dictionary in 1490 ; the oldest in which Castilian definitions and etymologies are to be found.<sup>49</sup> This was succeeded, two years later, by the first Castilian Grammar, the work of An-

all Historia, Anvers, 1681, folio, Tom. I p 141 When he undertook to hear causes in chancery he found himself still more uncomfortably situated (Argensola, Anales de Aragon, Zaragoza, 1630, folio, Tom I p 441) The Cortes, perhaps, remembered this when Philip II came to the throne, and they made it their very first petition to him to live always in Spain Capitulos y Leyes, Cortes de Valladolid, Valladolid, 1558, f 1

<sup>48</sup> Mayans y Siscar, Orígenes, Tom II pp 127-133 The author of the Diálogo urges the introduction of a considerable number of words from the Italian, such as *discurso, facultar, fantasía, novela*, etc., which have long since been adopted and fully recognized by the Academy Diego de Mendoza, though partly of the Italian school, objected to the word *centinela* as a needless Italianism, but it was soon fully received into the language. tonio de Lebrixia, who had before published a Latin Grammar in the Latin language, and translated it for the benefit, as he tells us, of the ladies of the court.<sup>50</sup> Other similar and equally successful attempts followed. A purely Spanish Dictionary by Lebrixia, the first of its kind, appeared in 1492, and a Dictionary for ecclesiastical purposes, in both Latin and Spanish, by Santa Ella, succeeded it in 1499; both often reprinted afterwards, and long regarded as standard authorities.<sup>51</sup> All these works, so important for the consolidation of the language, and so well constructed that successors to them were not found till above a century later,<sup>52</sup> were, it should be observed, produced under the direct and personal patronage of Queen Isabella, who, in this, as in so many other ways, gave proof at once of her far-sightedness in affairs of \* state, and \* 23 of her wise tastes and preferences in whatever regarded the intellectual cultivation of her subjects.<sup>53</sup>

The language thus formed was now fast spreading throughout the kingdom, and displacing dialects some of which, as old as itself, had seemed, at one period, destined to surpass it in cultivation and general prevalence. The ancient Galician, in which Alfonso the Wise was educated, and in which he sometimes wrote, was now known as a polite language only in Portugal, where it had risen to be so independent of the stock from which it sprang as almost to disavow its origin. teenth century were felt through the whole Peninsula, claimed, at this period, something of their earlier dignity only below the last range of hills on the coast of the Mediterranean. The Biscayan alone, unchanged as the mountains which sheltered it, still preserved for itself the same separate character it had at the earliest dawnings of tradition,—a character which has continued essentially the same down to our own times.

But, though the Castilian, advancing with the whole authority of the government, which at this time spoke to the people of all Spain in no other language, was heard and acknowledged throughout the country as the language of the state and of all political power, still the popular and local habits of four centuries could not be at once or entirely broken up. The Galician, the Valencian, and the Catalonian continued to be spoken in the age of Charles the Fifth, and are spoken now by the masses of the people in their respective provinces, and to some extent in the refined society of each. Even Andalusia and Aragon have not yet emancipated themselves completely from their original idioms; and, in the same way, each of the other grand divisions of the country, several of which were at one time independent kingdoms, are still, like Estremadura and La Mancha, distinguished by peculiarities of phraseology and accent.<sup>54</sup>

\* 24 \* Castile, alone, and especially Old Castile, claims, as of inherited right, from the beginning of the fifteenth century, the prerogative of speaking absolutely pure Spanish. Villalobos, it is true, who was always a flatterer of royal authority, insisted that

<sup>54</sup> It is curious to observe that the author of the “*Diálogo de las Lenguas*,” (Orígenes, Tom. II. p. 31,) who wrote about 1535,—Mayans, (Origines, Tom. I. p. 8,) who wrote in 1737,—and Sarmiento, (Memorias, p 94,) who wrote about 1760, all speak of the character of the Castilian and the prevalence of the dialects in nearly the same terms.

this prerogative followed the residences of the sovereign and the court;<sup>55</sup> but the better opinion has been that the purest form of the Castilian must be sought at Toledo,—the Imperial Toledo, as it was called,—peculiarly favored when it was the political capital of the ancient monarchy in the time of the Goths, and consecrated anew as the ecclesiastical head of all Christian Spain, the moment it was rescued from the hands of the Moors.<sup>56</sup> It has even been said that the supremacy of this venerable city in the purity of its dialect was so fully settled, from the first appearance of the language, as the language of the state in the thirteenth century, that Alfonso the Wise, in a Cortes held there, directed the meaning of any disputed word to be settled by its use at Toledo.<sup>57</sup> But, however this may be, there is no question that, from the time of Charles the Fifth to the present day, the Toledan has been considered, on the whole, the normal form of the national \* language, and \* 25 that, from the same period, the Castilian dia-

<sup>56</sup> See Mariana's account of the glories of Toledo, Historia, Lib XVI c. 15, and elsewhere. He was himself from the kingdom of Toledo, and often boasts of its renown. Cervantes, in Don Quixote, (Parte II c 19,) implies that the Toledan was accounted the purest Spanish of his time. It still claims to be so in ours.

<sup>57</sup> "Also, at the same Cortes, the same King, Don Alfonso X, ordered, if thereafter there should be a doubt in any part of his kingdom about the meaning of any Castilian word, that reference thereto should be had to this city as to the standard of the Castilian tongue, [como á metio de la lengua Castellana,] and that they should adopt the meaning and definition here given to such word, because our tongue is more perfect here than elsewhere."

(Francisco de Pisa, Descripcion de la Imperial Ciudad de Toledo, ed Thomas Tamaio de Vargas, Toledo, 1617, fol, Lib I. c 36, f 56) The Cortes here referred to is said by Pisa to have been held in 1253; in which year the Chronicle of Alfonso X (Valladolid, 1554, fol, c 2) represents the king to have been there (See, also, Paton, Eloquencia Española, 1604, f 12)

A similar legal as well as traditional claim for the supremacy of the Toledan dialect is set up in the "Historia de Tobias," a poem by Caudivilla Santaren, 1615, Canto XI, where, speaking of Toledo, he says.—

Entre otros muchos bienes y favores  
Quel soberano Dio hizo a esta gente  
Fue darle su Castellano castamente.  
De hablar su Castellano castamente.  
Y assi por justa ley de Emperadores,  
Se ordenó, que, si alguno, estando ausente,

Quel que se usa en Toledo guardasse

lect, having vindicated for itself an absolute supremacy over all the other dialects of the monarchy, has been the only one recognized as the language of the classical poetry and prose of the whole country.<sup>58</sup>

<sup>58</sup> From the time of Charles V., too, and as a natural result of his conquests and influence throughout Europe, the Spanish language became known and admired abroad, as it had never been before Marguerite de Valois, sister of Francis I., who went, in 1525, to Madrid and consoled her brother in his captivity there, says. *Le Langage Castillan est sans comparaison mieux déclarant cette passion d'amour que n'est le François* (Heptaméron, Journée III, Nouvelle 24, ed. Paris, 1615, p. 263) And Domenichi, in Ulloa's translation of his *Razonamiento de Empresas Militares*, (Leon. de Francia, 1561, 4to, p. 175,) says of the Spanish, "Es lengua

muy comun a todas naciones," — a striking fact for an Italian to mention. Richelieu liked to write in Spanish (Havemann, p. 312) The marriage of Philip II. with Mary Tudor carried the Spanish to the English Court, where for a time it had some vogue, and Charles himself, as Emperor, spread it through Germany, as he did, in other ways and from other similar influences, through Flanders and Italy. Other curious facts of the same sort, showing the spread of Spanish in Italy and France about the middle of the sixteenth century, may be found in the *Prologo* to Paton's *Eloquencia Espanola*, 1604, pp. 7, sqq.

AT the beginning of the sixteenth century, it is obvious that the age for chronicles had gone by in Spain.<sup>1</sup> Still it was thought for the dignity of the monarchy that the stately forms of the elder time should, in this as in other particulars, be kept up by public authority. Charles the Fifth, therefore, as if his ambitious projects as a conqueror were to find their counterpart in his arrangements for recording their success, had several authorized chroniclers, all men of consideration and learning. But the shadow on the dial would not go back at the royal command. The greatest monarch of his time could appoint chroniclers, but he could not give them the spirit of an age that was past. The chronicles he demanded at their hands were either never undertaken or never finished. Antonio de Guevara, one of the persons to whom these duties were assigned, seems to have been singularly conscientious in the devotion of his time to them; for we are told that, by his will, he ordered the

<sup>1</sup> One proof that the age of chronicling was gone by may be found in the burlesque chronicle of a court-fool, in the early part of the reign of Charles V., entitled "Crónica de Don Francésillo de Zuñiga, criado privado bienquisto y predicador del Emperador Carlos V. dirigida a su Majestad por el mismo Don Francés". It was first published in Vol. XXXVI. of the Bib-

lioteca de Autores Españoles, 1855. It was no fool that wrote it, nor the few letters that follow, though he bore that title at court, and enjoyed its privileges. The style is easy and the language pure, but there is less finish than wit in it, and more sense than historical facts. It is what its title implies, a caricature of the chronicling style then going out of fashion.

salary of one year, during which he had written nothing of his task, to be returned to the Imperial treasury.

This, however, did not imply that he was \* 27 a successful \* chronicler.<sup>2</sup> What he wrote was

not thought worthy of being published by his contemporaries, and would probably be judged no more favorably by the present generation, unless it discovered a greater regard for historical truth, and a simpler style, than are found in his discussions on the life and character of the Emperor Marcus Aurelius.<sup>3</sup>

Florian de Ocampo, another of the more distinguished of the chroniclers, showed a wide ambition in the plan he proposed to himself; beginning his chronicles of Charles the Fifth as far back as the days of Noah's flood. As might have been foreseen, he lived only so long as to finish a small fragment of his vast undertaking; — hardly a quarter part of the first of its four grand divisions.<sup>4</sup> But he went far enough to show how completely the age for such writing was passed away.<sup>5</sup> Not that he failed in credulity; for of that he had more than enough. It was not, however, the poetical credulity of his predecessors, trusting to the old national traditions, but an easy faith, that believed in the wearisome forgeries called the works of Berosus and Manetho,<sup>6</sup> which had been discredited from their first appearance half a century before, and

<sup>5</sup> The first edition of the first four books of the Chronicle of Ocampo was

published at Zamora, 1544, in a beautiful black-letter folio, and was followed by an edition of the whole at Medina del Campo, 1553, folio. The best, I suppose, is the one published at Madrid, 1791, in 2 vols 4to

yet were now used by Ocampo as if they were the probable, if not the sufficient records of an uninterrupted succession of Spanish kings from Tubal, a grandson of Noah. Such a credulity has no charm about it. But, besides this, the work of Ocampo, in its very structure, is dry and absurd; and, being written in a formal and heavy style, it is all but impossible to read it. He died in 1555, the year the Emperor abdicated, leaving us little occasion to regret that \*he had brought his annals of Spain no \*28 lower down than the age of the Scipios.<sup>7</sup>

Juan Ginez de Sepúlveda was also charged by the Emperor fitly to record the events of his reign;<sup>8</sup> and so was Pero Mexia;<sup>9</sup> but the history of the former, which was first published by the Academy in 1780, is in Latin, while that of Mexia, written, apparently, after 1545, and coming down to the coronation at Bologna, has been published only in part.<sup>10</sup> A larger

He was not appointed Historiographer till 1548. See notices of him by Pacheco, in the *Semanario Pintoresco*, 1844, p 406. He died in 1552. The History of the Emperor, which breaks off with Book V, is among the MSS in the National Library at Madrid, and the second Book of it, relating to the war of the *Comunidades* in Castile, may be found in the *Bib de Autores Españoles* (Tom XXI, 1852). The whole is much praised by Ferrer del Río for its skilful arrangement and pure and dignified style, and ought to be published, but the portion given to us is outrageously loyal.

From the time of Charles V there seem generally to have been chroniclers of the kingdom and occasionally chroniclers of the personal history of its kings. At any rate, that monarch had Ocampo and Garibay for the first purpose, and Guevara, Sepúlveda, and Mexia for the second. Lorenço de Padilla, Archdeacon of Malaga, is also mentioned by Dormer (*Progresos*, Lib. II c. 2) as one of his chroniclers. In-

history, however, by the last author, consisting of the lives of all the Roman Emperors from Julius Cæsar to Maximilian of Austria, the predecessor of Charles the Fifth, which was printed several times, and is spoken of as an introduction to his Chronicle, shows, notwithstanding its many imperfections of style, that his purpose was to write a true and well-digested history, since he generally refers, under each reign, to the authorities on which he relies.<sup>11</sup>

Such works as these prove to us that we have reached the final limit of the old chronicling style, and that we must now look for the appearance \* 29 of the different forms of \* regular historical composition in Spanish literature. But, before we approach them, we must pause a moment on a few histories and accounts of the New World, which, during the reign of Charles the Fifth, were of more importance than the imperfect chronicles we have just noticed of the Spanish empire in Europe. For as soon as the adventurers that followed Columbus were landed on the western shores of the Atlantic, we begin to find narratives, more or less ample, of their discoveries and settlements: some written with spirit, and even in good taste; others quite unattractive in their style; but nearly all interesting from their subject and their materials, if from nothing else.

In the foreground of this picturesque group stands, as the most brilliant of its figures, Fernando Cortés, called, by way of eminence, *El Conquistador*, the Conqueror. He was born of noble parentage, and carefully bred; and though his fiery spirit drove him from

deed, it does not seem easy to determine how many enjoyed the honor of that title. Porreño says Philip II. was too modest to have a chronicler. *Dichos, etc.*, 1666, p. 130

<sup>11</sup> The first edition appeared in 1545. The one I use is of Anvers, 1561, fol. The best notice of his life, perhaps, is the article about him in the *Biographie Universelle*.

Salamanca before his education could be completed, and brought him to the New World, in 1504, when he was hardly nineteen years old,<sup>12</sup> still the nurture of his youth, so much better than that of most of the other American adventurers, is apparent in his voluminous documents and letters, both published and unpublished. Of these, the most remarkable were, no doubt, four or five long and detailed Reports to the Emperor on the affairs of Mexico ; the first of which was dated, it is said, in 1519, and the last in 1526.<sup>13</sup> The four known to be his are well written, and \* have a \* 30 business-like air about them, as well as a clearness and good taste, which remind us sometimes of the “*Relazioni*” of Machiavelli, and sometimes of Cæsar’s Commentaries. His letters, on the other hand, are occasionally more ornamented. In an unpublished one, written about 1533, and in which, when his fortunes were waning, he sets forth his services and his

<sup>12</sup> He left Salamanca two or three years before he came to the New World, but old Beinal Diaz, who knew him well, says “He was a scholar, and I have heard it said he was a Bachelor of Laws, and when he talked with lawyers and scholars, he answered in Latin. He was somewhat of a poet, and made *coplas* in metre and in prose, [en metro y en prosa,]” etc (Conquista, 1632, c 203.) It would be amusing to see poems by Cortés, and especially what the rude old chronicler calls *coplas en prosa*, but he knew about as much concerning such matters as Mons Jourdain. Cortés, however, was always fond of the society of cultivated men. In his house at Madrid, (see *ante*, p 11, n 21,) after his return from America, was held one of those *Academias* which were then beginning to be imitated from Italy

<sup>13</sup> The printed “*Relaciones*” may be found in Ba cia, “*Historiadores Primitivos de las Indias Occidentales*,” (Madrid, 1749, 3 tom , folio,) — a collection published after its editor’s death,

and very ill arranged. Barcia was a man of literary distinction, much employed in affairs of state, and one of the founders of the Spanish Academy. He died in 1743 (Baena, *Hijos de Madrid*, Tom I p 106.) For the last and unpublished “*Relacion*” of Cortés, as well as for his unpublished letters, I am indebted to my friend Mr Prescott, who has so well used them in his “*Conquest of Mexico*”

Since this note was first published, (1849,) the last *Relacion* has been printed, (Bib de Autores Españos, Tom XXII 1852,) and is found to be dated September 3, 1526. A letter from the “*Justicia y Regimiento*” of Vera Cruz, dated July 10, 1519, is prefixed to this series of four, as if it were itself the first *Relacion* : and perhaps it may thus have given rise originally to the idea that a *Relacion* of Cortés was lost, when it was never written. It seems to me likely that there never were but four by Cortés himself, although the one by the *Justicia*, 1519, is of similar character and authority.

wrongs, he pleases himself with telling the Emperor that he “keeps two of his Majesty’s letters like holy relics,” adding that “the favors of his Majesty towards him had been quite too ample for so small a vase”;— courtly and graceful phrases, such as are not found in the documents of his later years, when, disappointed and disgusted with affairs and with the court, he retired to a morose solitude, where he died in 1554, little consoled by his rank, his wealth, or his glory.

The marvellous achievements of Cortés in Mexico, however, were more fully, if not more accurately, recorded by Francisco Lopez de Gomara,— the oldest of the regular historians of the New World,<sup>14</sup>— who was born at Seville in 1510, and was, for some time, Professor of Rhetoric at Alcalá. His early life, spent in the great mart of American adventurers, seems to have given him an interest in them and a knowledge of their affairs, which led him to write their history; and a residence in Italy, to which he refers more than once, and during which, in Venice and Bologna, he became familiar with such remarkable men as Saxo Grammaticus and Olaus Magnus, enlarged his knowledge beyond the common reach of Spanish scholars of his time, and fitted him better for his task than he could have been fitted at home. The works he pro-

duced, besides one or two of less consequence,

\* 31 \* were, first, his “History of the Indies,” which, after the Spanish fashion, begins with the creation of the world, and ends with the glories of Spain, though it is chiefly devoted to Columbus and the discovery and conquest of Peru; and, second, his “Chronicle of New Spain,” which is, in truth, merely the His-

tory and Life of Cortés, and which, with this more appropriate title, was reprinted by Bustamante, in Mexico, in 1826.<sup>15</sup> As the earliest records that were published concerning affairs which already stirred the whole of Christendom, these works had, at once, a great success, passing through two editions almost immediately, and being soon translated into French, English, and Italian.

But, though Gomara's style is easy and flowing, both in his mere narration and in those parts of his works which so amply describe the resources of the newly discovered countries, he did not succeed in producing anything of permanent authority. He was the secretary of Cortés, and was misled by information received from him, and from other persons, who were too much a part of the story they undertook to relate to tell it fairly.<sup>16</sup> His mistakes, in consequence, are great and frequent, and were exposed with much zeal by Bernal Diaz, an old soldier, who, having already been twice to the New World, went with Cortés to Mexico in 1519,<sup>17</sup> and fought there so often and

<sup>15</sup> The two works of Gomara may be well consulted in Barcia, "Historiadores Primitivos," Tom II, which they fill, and in Vol. XXII of the Biblioteca de Ribadeneira. They were first printed in 1552, 1553, and 1554; and though, as Antonio says, (Bib Nov., Tom I p 437,) they were at once forbidden to be either reprinted or read, four editions of them appeared before the end of the century. They were also translated into English, Italian, and French, and printed several times in each language.

<sup>16</sup> "About this first going of Cortés as captain on this expedition, the ecclesiastic Gomara tells many things grossly untrue in his history, as might be expected from a man who neither saw nor heard anything about them, except what Fernando Cortés told him and gave him in writing; Gomara being

his chaplain and servant, after he was made Marquis and returned to Spain the last time" Las Casas, (Historia de las Indias, Parte III. c. 113, MS,) a prejudiced witness, but, on a point of fact within his own knowledge, one to be believed.

<sup>17</sup> See "Historia Verdadera de la Conquista de la Nueva España, por el Capitan Bernal Diaz del Castillo, uno de los Conquistadores," Madrid, 1632, folio, cap 211. It was prepared for publication by Alfonso Ramon, or Remon, who wrote the History of the Order of Mercy and many other works, including dramas. Conf. N Ant., Bib Nov., Tom. I. p 42. But his edition (1632) does not seem to have been printed from a complete manuscript, and the more recent one of Cano, in four volumes, is mutilated from that of 1632. But it is reprinted in Ruba-

\* 32 so \* long, that, many years afterwards, he declared he could not sleep in any tolerable comfort without his armor.<sup>18</sup> As soon as he read the accounts of Gomara, which, in his opinion, gave too much honor to Cortés and too little to Cortés's companions and captains, he set himself sturdily at work to answer them, and in 1568 completed his task.<sup>19</sup> The book he thus produced is written with much garrulity, and runs, in a rude style, into wearisome details; but it is full of the zealous and honest nationality of the old chronicles, so that while we are reading it we seem to be carried back into the preceding ages, and to be again in the midst of a sort of fervor and faith which, in writers like Gomara and Cortés, we feel sure we are fast leaving behind us.

Among the persons who early came to America, and have left important records of their adventures and times, one of the most considerable was Gonzalo Fernandez de Oviedo y Valdés. He was born at Madrid, in 1478,<sup>20</sup> and, having been well educated at the court of Ferdinand and Isabella, as one of the *mozos de cámara* of Prince John, was sent out in 1513 as a supervisor of gold-smeltings, to *Tierra Firme*,<sup>21</sup> where, except

<sup>18</sup> He says he was in one hundred and nineteen battles, (f 254, b,) — that is, I suppose, fights of all kinds, — and that, of the five hundred and fifty who went with him to Mexico in 1519, five were living when he wrote at Guatemala, in 1568, f 250, a

<sup>19</sup> It was dedicated to Philip IV. Some of its details are quite amusing. He gives even a list of the individual horses that were used on the great expedition of Cortés, and often describes the separate qualities of a favorite

charger as carefully as he does those of his rider. His accuracy, however, — bating accidents from the lapse of time, — is remarkable. Sayas (Anales de Aragon, 1667, c 30, p 218) bears witness to it, and is a good authority.

<sup>20</sup> "Yo naci año de 1478," he says, in his "Quinquagenas," when noticing Pedro Fernandez de Córdoba, and he more than once speaks of himself as a native of Madrid. He says, too, expressly, that he was present at the surrender of Granada, and that he saw Columbus at Barcelona, on his first return from America, in 1493. Quinquagenas, MS.

<sup>21</sup> "Veedor de las Fundiciones de Oro," he describes himself in the Proemio of his work presented to Charles

occasional visits to Spain and to different Spanish possessions in America, he lived nearly forty years, devoted to the affairs of the New World. Oviedo seems, from his youth, to have had a passion for knowing remarkable persons as well as for writing about them; and, besides several less considerable \*works, among which were imperfect chronicles of Ferdinand and Isabella, and of Charles the Fifth, and a life of Cardinal Ximenes,<sup>22</sup> he prepared two of no small value.

The most important of these two is the "General and Natural History of the Indies," filling fifty books, of which the first portions, embracing twenty-one, were published in 1535. As early as 1525, when he was at Toledo, and offered Charles the Fifth a summary of the History of the Spanish Conquests in the New World, which was published three years later, he speaks of his desire to have his larger work printed. But it appears, from the beginning of the thirty-third book and the end of the thirty-fourth, that he was still employed upon it in 1547 and 1548; and it is not unlikely, from the words with which he concludes the thirty-seventh, that he kept each of its larger divisions open, and continued to make additions to them nearly to the time of his death.<sup>23</sup>

V, in 1525 (Barcia, Tom I); and long afterwards, in the opening of Book XLVII of his *Historias*, MS, he still speaks of himself as holding the same office

<sup>22</sup> I do not feel sure that Antonio is not mistaken in ascribing to Oviedo a *separate* life of Cardinal Ximenes, because the life contained in the "Quinquagenas" is so ample; but the *Chronicles of Ferdinand and Isabella, and Charles V*, are alluded to by Oviedo himself in the *Proemio to Charles V*. Neither has ever been printed.

<sup>23</sup> He calls it, in his letter to the

Emperor, at the end of the "Sumario," in 1525, "La General y Natural Historia de las Indias, que de mi mano tengo escrita"; — in the Introduction to Lib. XXXIII he says, "En treinta y cuatro años que ha que estoy en estas partes"; — and in the ninth chapter, which ends Lib. XXXIV, we have an event recorded with the date of 1548, — so that, for these three-and-twenty years, he was certainly employed, more or less, on this great work. But at the end of Book XXXVII he says, "Y esto baste quanto a este breve libro del numero treinta y siete, hasta que el

He tells us that he had the Emperor's authority to demand, from the different governors of Spanish America, the documents he might need for his work;<sup>24</sup> and, as his divisions of the subject are those which naturally arise from its geography, he appears to have gone judiciously about his task. But the materials he

was to use were in too crude a state to be \* 34 easily manageable, and the whole \* subject was too wide and various for his powers. He falls, therefore, into a loose, rambling style, instead of aiming at philosophical condensation; and, far from an abridgment, which his work ought to have been, he gives us chronicling, documentary accounts of an immense extent of newly discovered country, and of the extraordinary events that had been passing there,— sometimes too short and slight to be satisfactory or interesting, and sometimes too detailed for the reader's patience. He was evidently a learned man, and maintained a correspondence with Ramusio, the Italian geographer, which could not fail to be useful to both parties.<sup>25</sup> And he was desirous to write in a good and eloquent style, in which he sometimes succeeded. He has, therefore, on the whole, produced a series of accounts of the natural condition, the aboriginal inhab-

tiempo nos avise de otras cosas que en el se acrecuentan", from which I infer that he kept each book, or each large division of his work, open for additions, as long as he lived, and therefore that parts of it *may* have been written as late as 1557.

<sup>24</sup> "I have royal orders that the governors should send me a relation of whatever I shall touch in the affairs of their governments for this History" (Lib. XXXIII., Introd., MS.) I apprehend Oviedo was the first authorized Chronicler of the New World; an office which was at one period better paid than any other similar office in the kingdom, and was held, at different

times, by Herrera, Tamayo, Solis, and other writers of distinction. It ceased, I believe, with the creation of the Academy of History.

<sup>25</sup> "We owe much to those who give us notice of what we have not seen or known ourselves; as I am now indebted to a remarkable and learned man, of the illustrious Senate of Venice, called Secretary Juan Bautista Ramusio, who, hearing that I was inclined to the things of which I here treat, has, without knowing me personally, sought me for his friend, and communicated with me by letters, sending me a new geography," etc (Lib. XXXVIII., MS.)

itants, and the political affairs, of the wide-spread Spanish possessions in America, as they stood in the middle of the sixteenth century, which is of great value as a vast repository of facts, and not wholly without merit as a composition.<sup>26</sup>

<sup>26</sup> As a specimen of his manner I add the following account of Almagro, one of the early adventurers in Peru, whom the Pizarros put to death in Cuzco, after they had obtained uncontrolled power there. "Therefore hear and read all the authors you may, and compare, one by one, whatever they relate, that all men, not kings, have freely given away, and you shall surely see how there is none that can equal Almagro in this matter, and how none can be compared to him, for kings, indeed, may give and know how to give whatever pleaseth them, both cities and lands, and lordships, and other great gifts, but that a man whom yesterday we saw so poor that all he possessed was a very small matter should have a spirit sufficient for what I have related, — I hold it to be so great a thing that I know not the like of it in our own or any other time. For I myself saw, when his companion, Pizarro, came from Spain, and brought with him that body of three hundred men to Panamá, that, if Almagro had not received them, and shown them so much free hospitality with so generous a spirit, few or none of them could have escaped alive; for the land was filled with disease, and the means of living were so dear that a bushel of maize was worth two or three *pesos*, and an *arroba* of wine six or seven gold pieces. To all of them he was a father, and a brother, and a true friend, for, inasmuch as it is pleasant and grateful to some men to make gain, and to heap up and to gather together moneys and estates, even so much and more pleasant was it to him to share with others and to give away, so that the day when he gave nothing he accounted it for a day lost. And in his very face you might see the pleasure and true delight he felt when he found occasion to help him who had need. And since, after so long a fellowship and friendship as there was between these two great leaders, from the

days when their companions were few and their means small, till they saw themselves full of wealth and strength, there hath at last come forth so much discord, scandal, and death, well must it appear matter of wonder even to those who shall but hear of it, and much more to us, who knew them in their low estate, and have no less borne witness to their greatness and prosperity" (General y Natural Historia de las Indias, Lib. XLVII, MS.) Much of it is, like the preceding passage, in the true, old, rambling, moralizing, chronicling vein

Since the preceding account of the "Historia General" of Oviedo was printed, (1849,) the whole work has been published by the Spanish Academy of History, in four rich folio volumes, Madrid, 1851-1855, edited by Don José Amador de los Ríos. The Prefatory notice contains a Life of Oviedo, with an account of his works, among which are two that have been published, and should be at least mentioned. The first is "Claribalte," composed during a period when Oviedo was out of favor at court, and printed at Valencia in 1519, — a book which it is singular he should have written, because it is a Romance of Chivalry, and, in the latter part of his life, when such fictions were at the height of their favor, nobody treated them with more severity than he did. The other is an ascetic work, entitled "Reglas de la Vida," which, he says, he translated from the Tuscan, and which was printed at Seville in 1548, but which is now become so rare that Sr. Amador has never seen it, and does not determine precisely what it was, nor who was its original author. Of the works in manuscript, which, besides the two Quinquagenas, amount to six, we should, I suppose, be most curious to see the account Oviedo prepared of the occurrences and gossip at the court of Madrid during the captivity of Francis I, in 1525.

fruit of his old age, is devoted to fond recollections of his native country, and of the distinguished men he had known there. He calls it "Batallas y Quinquagenas," and it consists of a series of dialogues, in which, with little method or order, he gives gossiping accounts of the principal families that figured in Spain during the times of Ferdinand and Isabella and Charles the Fifth, mingled with anecdotes and recollections, such as — not without a simple-hearted exhibition of his own vanity — the memory of his long and busy life could furnish. It appears from the Dialogue on Cardinal Ximenes, and elsewhere, that he was employed on it as early as 1545;<sup>27</sup> but the year

1550 occurs yet more frequently among the

\* 36 dates of its imaginary conversations,<sup>28</sup> and it \* is probable that he continued to add to it, as he did to his History, until near the end of his life, for it seems still imperfect. He died at Valladolid in 1557.

But, both during his life, and after his death, Oviedo had a formidable adversary, who, pursuing nearly the same course of inquiries respecting the New World, came almost constantly to conclusions quite opposite. This was no less a person than Bartolomé de las Casas, or Casaus, the apostle and defender of the Amer-

<sup>27</sup> "En este que estamos de 1545" Batallas y Quinquagenas, MS, El Cardenal Cisneros

<sup>28</sup> As in the Dialogue on Juan de Silva, Conde de Cifuentes, he says, "En este año en que estamos 1550"; and in the Dialogue on Mendoza, Duke of Infantado, he uses the same words, as he does again in that on Pedro Fernández de Córdoba. There is an excellent note on Oviedo in Vol I p 112 of the American edition of "Ferdinand and Isabella," by my friend Mr. Prescott, to whom I am indebted for the manuscript of the Batallas y Quinquagenas, as well as of the Historia. The

"Batallas y Quinquagenas" are not to be confounded with a poem which Oviedo entitled "Las Quinquagenas," on the distinguished Spaniards of all times, and which he completed in 1556, in one hundred and fifty stanzas of fifty lines each, or seven thousand five hundred lines in all, — an error into which I fell in the first edition of this work, owing chiefly to an obscurity in the account of the two Quinquagenas by Clemencin, in his *Elogio* on Queen Isabella. It is much to be desired that both should be published, and we can have no accurate idea of them till they are.

ican Indians,<sup>29</sup> — a man who would have been remarkable in any age of the world, and who does not seem yet to have gathered in the full harvest of his honors. He was born in Seville, probably in 1474; and, in 1502, having gone through a course of studies at Salamanca, embarked for the Indies, where his father, who had been there with Columbus nine years earlier, had already accumulated a decent fortune.

The attention of the young man was at once drawn to the condition of the natives, from the circumstance that one of them, given to his father by Columbus, had been attached to his own person as a slave, while he was still at the University; and he was not slow to learn, on his arrival in Hispaniola, that their gentle natures and slight frames had already been subjected, in the mines and in other forms of toil, to a servitude so harsh that the original inhabitants of the island were rapidly wasting away under the severity of their labors. From this moment he devoted his life to their emancipation. In 1510 he took holy orders, and continued as a priest, and, for a short time, as Bishop of Chiapa, nearly forty years, to teach, strengthen, and console, the suffering flock committed to his charge. Six times, at least, he crossed the Atlantic, in order to persuade the government of Charles the Fifth to ameliorate their condition, and always with more or less \* success. At last, but not until \* 37 1547, when he was above seventy years old, he established himself at Valladolid, in Spain, where he passed the remainder of his serene old age, giving it freely to the great cause to which he had devoted the

<sup>29</sup> The family was originally French, spelling its name Casaus, but it appears in Spanish history as early as 1253, in the Repartimiento of Seville. (Zuñiga, *Anales de Sevilla*, 1677, p. 75.) In the

Chronicle of John II its descendants are called Las Casas, and Fr Bartolomé wrote his name both ways. Later they reverted to the original spelling. Gudiol, *Familia de los Guiones*, 1577, f. 98.

freshness of his youth. He died, while on a visit of business, at Madrid, in 1566, at the advanced age, as is commonly supposed, of ninety-two.<sup>30</sup>

Among the principal opponents of his benevolence were Sepúlveda, — one of the leading men of letters and casuists of the time in Spain, — and Oviedo, who, from his connection with the mines and his share in the government of different parts of the newly discovered countries, had an interest directly opposite to the one Las Casas defended. These two persons, with large means and a wide influence to sustain them, intrigued, wrote, and toiled against him, in every way in their power. But his was not a spirit to be daunted by opposition or deluded by sophistry and intrigue ; and when, in 1519, in a discussion with Sepúlveda concerning the Indians, held in the presence of the young and proud Emperor Charles the Fifth, Las Casas said, “It is quite certain that, speaking with all the respect and reverence due to so great a sovereign, I would not, save in the way of duty and obedience as a subject, go from the place where I now stand to the opposite corner of this room, to serve your Majesty, unless I believed I should at the same time serve God,”<sup>31</sup>

<sup>30</sup> There is a valuable life of Las Casas in Quintana, “Vidas de Españoles Célebres” (Madrid, 1833, 12mo, Tom III. pp 255–510) The seventh article in the Appendix, concerning the connection of Las Casas with the slave-trade, will be read with particular interest ; because, by materials drawn from unpublished documents of unquestionable authenticity, it makes it certain that, although at one time Las Casas favored what had been begun earlier, — the transportation, I mean, of negroes to the West Indies, in order to relieve the Indians, — as other good men in his time favored it, he did so under the impression that, according to the law of nations, the negroes thus brought to America were both rightful captives

taken by the Portuguese in war and rightful slaves. But afterwards he changed his mind on the subject. He declared “the captivity of the negroes to be as unjust as that of the Indians,” — “ser tan injusto el cautiverio de los negros como el de los Indios,” — and even expressed a fear that, though he had fallen into the error of favoring the importation of black slaves into America from ignorance and good-will, he might, after all, fail to stand excused for it before the Divine Justice. Quintana, Tom III p 471.

<sup>31</sup> Quintana, Españoles Célebres, Tom. III. p 321 I think, but am not sure, that Quintana does not say Las Casas was made a chaplain of Charles V. out of personal regard, — a circumstance

— when he said this, he uttered a sentiment \* that really governed his life, and constituted \* 38 the basis of the great power he exercised. His works are pervaded by it. The earliest of them, called “A very Short Account of the Ruin of the Indies,” was written in 1542,<sup>32</sup> and dedicated to the Prince, afterwards Philip the Second; — a tract in which, no doubt, the sufferings and wrongs of the Indians are much overstated by the indignant zeal of its author, but still one whose expositions are founded in truth, and by their fervor awakened all Europe to a sense of the injustice they set forth. Other short treatises followed, written with similar spirit and power, especially those in reply to Sepúlveda; but none was so often reprinted, either at home or abroad, as the first,<sup>33</sup> and none ever produced so deep and solemn an effect on the world. They were all collected and published in 1552; and, besides being translated into other languages at the time, an edition in Spanish, and a French version of the whole, with two more treatises than were contained in the first collection, appeared at Paris in 1822, prepared by Llorente.

mentioned by Argensola, who, it should be added, gives a fair and interesting account of the Apostle to the Indians, so far as his *Histoiry of Aragon* comes down *Anales de Aragon*, Tom. I. 1630, p 547

<sup>32</sup> Quintana (p 413, note) doubts when this famous treatise was written, but Las Casas himself says, in the opening of his “*Brevísima Relacion*,” that it was written in 1542, and at the end it is noted as finished at Valencia, December 8, 1542; an “*Adicion*” or postscript following, which is dated 1546 in the copy I use.

<sup>33</sup> This important tract continued long to be printed separately, both at home and abroad. I use a copy of it in double columns, Spanish and Italian, Venice, 1643, 12mo; but, like the rest, the “*Brevísima Relacion*” may be consulted in an edition of the Works of

Las Casas by Llorente, which appeared at Paris in 1822, in 2 vols, 8vo, in the original Spanish, almost at the same time with his translation of them into French. It should be noticed, perhaps, that Llorente’s version is not always strict, and that the two new treatises he imputes to Las Casas, as well as the one on the Authority of Kings, are not absolutely proved to be his.

The translation referred to above appeared, in fact, the same year, and at the end of it an “*Apologie de Las Casas*,” by Grégoire, with letters of Funes and Mier, and notes of Llorente to sustain it, — all to defend Las Casas on the subject of the slave-trade, but Quintana, as we have seen, has gone to the original documents, and leaves no doubt, both that Las Casas once favored it, and that he altered his mind afterwards.

The great work of Las Casas, however, still remains inedited,— a General History of the Indies from 1492 to 1520, begun by him in 1527 and finished in 1561, but of which he ordered that no portion should be published within forty years of his death.

\* 39 \* Like his other works, it shows marks of haste and carelessness, and is written in a rambling style; but its value, notwithstanding his too fervent zeal for the Indians, is great. He had been personally acquainted with many of the early discoverers and conquerors, and at one time possessed the papers of Columbus, and a large mass of other important documents, which are now lost. He says he had known Cortés “when he was so low and humble, that he besought favor from the meanest servant of Diego Velasquez”; and he knew him afterwards, he tells us, when, in his pride of place at the court of the Emperor, he ventured to jest about the pretty corsair’s part he had played in the affairs of Montezuma.<sup>34</sup> He knew, too, Gomara and Oviedo, and gives at large his reasons for differing from them. In short, his book, divided into three parts, is a great repository, to which Herrera, and through him all the historians of the Indies since, have resorted for materials; and without which the history of the earliest period of the Spanish settlements in America cannot even now be properly written.<sup>35</sup>

But it is not necessary to go further into an examina-

<sup>34</sup> “Todo esto me dixo el mismo Cortés con otras cosas cerca dello, despues de Marques, en la villa de Monçon, estando alli celebrando cortes el Emperador, año de mil y quinientos y quarenta y dos, riendo y mosfando con estas formales palabras, a la mi fé andubé por alli como un gentil cosario” (Historia General de las Indias, Lib. III. c 115,

MS.) It may be worth noting, that 1542, the year when Cortés made this scandalous speech, was the year in which Las Casas wrote his Brevisima Relacion

tion of the old accounts of the discovery and conquest of Spanish America, though there are many more which, like those we have already considered, are partly books of travel through countries full of wonders, partly chronicles of adventures as strange as those of romance; frequently running into idle and loose details, but as frequently fresh, picturesque, and manly, in their tone and coloring, and almost always striking from the facts they record and the glimpses they give of manners and character. Among those that might be added are the stories by Vaca of his shipwreck and ten years' captivity in Florida, from 1527 to 1537, and his subsequent government

\* for three years of the Rio de la Plata;<sup>86</sup> the \* 40 short account of the conquest of Peru, written by Francisco de Xerez, Secretary of Francisco de Pizarro,<sup>87</sup> and the ampler one, of the same wild achievements, which Augustin de Çarate began on the spot, and was prevented by Carvajal, an officer of Gonzalo de Pizarro, from finishing till after his return home.<sup>88</sup>

<sup>86</sup> The two works of Alvar Nuñez Cabeza de Vaca, namely, his "Naufragios," and his "Comentarios y Sucesos de su Gobieino en el Rio de la Plata," were first printed in 1555, and are to be found in Barcia, *Historiadores Primitivos*, Tom I, and in the Biblioteca de Autores Españoles, Tom XXII, 1852. They are wild and romantic accounts of extraordinary adventures and sufferings, particularly the *Naufragios*, where (Chap. XXII) the author seems to think he not only cured the sick by divine interposition, but that, in one instance, he raised the dead. But, however this may be, he was evidently a man of great courage and constancy, and of an elevated and generous nature.

<sup>87</sup> The work of Francisco de Xerez, "Conquista del Perú," written by order of Francisco Pizarro, was first published in 1534 and 1547, and is to be found in Ramusio, (Venezia, ed. Giunti, folio,

Tom III,) and in Barcia's collection (Tom. III) It ends in Barcia with some poor verses in defence of Xerez, by a friend, which are ampler and more important in the original edition, and contain notices of his life. They are reprinted in the Biblioteca de Autores Españoles, Tom XXVI, 1853, and Gayangos conjectures them to have been written by Oviedo.

<sup>88</sup> "Historia del Descubrimiento y Conquista del Perú," first printed in 1555, and several times since. It is in Barcia, Tom. III, and in the Biblioteca de Autores Españoles, Tom XXVI, 1853, and was translated into Italian by Ulloa. Çarate was sent out by Charles V. to examine into the state of the revenues of Perú, and brings down his accounts as late as the overthrow of Gonzalo Pizarro. See an excellent notice of Çarate at the end of Mr Prescott's last chapter on the Conquest of Peru.

But they may all be passed over, as of less consequence than those we have noticed, which are quite sufficient to give an idea, both of the nature of their class and the course it followed,— a class much resembling the old chronicles, but yet one that announces the approach of those more regular forms of history for which it furnishes abundant materials.

Pedro Cieza de Leon, also, who lived above seventeen years in Peru, published at Seville, in 1553, an important work on that country, entitled "Primera Parte de la Chronica del Peru," intending to complete and publish it in three other parts, but died in 1560, *re infecta*, at the age of forty-two. The first part is reprinted in the Biblioteca

de Autores Espanoles, Tom XXVI., and the MS of the *third* part is said to be in the possession of James Lenox, Esq., New York. Gayangos notices, also, a small publication in eight leaves, in the British Museum, entitled *La Conquista del Peru*, which he thinks is like a gazette, and may have been the first publication on the subject.

THEATRE. — INFLUENCE OF THE CHURCH AND THE INQUISITION. — MYSTERIES. — CASTILLEJO, OLIVA, JUAN DE PARIS, AND OTHERS — POPULAR DEMANDS FOR DRAMATIC LITERATURE — LOPE DE RUEDA. — HIS LIFE, COMEDIAS, COLOQUIOS, PASOS, AND DIALOGUES IN VERSE — HIS CHARACTER AS FOUNDER OF THE POPULAR DRAMA IN SPAIN. — JUAN DE TIMONEDA.

THE theatre in Spain, as in most other countries of modern Europe, was early called to contend with formidable difficulties. Dramatic representations there, perhaps more than elsewhere, had been for centuries in the hands of the Church; and the Church was not willing to give them up, especially for such secular and irreligious purposes as we have seen were apparent in the plays of Naharro. The Inquisition, therefore, already arrogating to itself powers not granted by the state, but yielded by a sort of general consent, interfered betimes. After the publication of the Seville edition of the “*Propaladia*,” in 1520, — but how soon afterward we do not know, — the representation of its dramas was forbidden, and the interdict was continued till 1573.<sup>1</sup> Of the few pieces written in the early part of the reign of Charles the Fifth, nearly all, except those on strictly religious subjects, were laid under the ban of the Church; several, like the “*Orfea*,” 1534, and the “*Custodia*,” 1541, being now known to have

<sup>1</sup> In the edition of Madrid, 1573, 18mo, we are told, “*La Propaladia* estava prohibida en estos reynos, años *avia*”, and Martinez de la Rosa (*Obras*, Paris, 1827, 12mo, Tom. II. p 382) says that this prohibition was laid soon after 1520, and not removed till August,

1573 The period is important; but I suspect the authority of Martinez de la Rosa, for its termination is merely the permission to print an edition, which is dated 21st August, 1573; an edition, too, which is, after all, expurgated severely.

existed only because their names appear in the  
 \* 42 Index Expurgatorius;<sup>2</sup> and others, \* like the  
 “Amadis de Gaula” of Gil Vicente, though  
 printed and published, being subsequently forbidden  
 to be represented.<sup>3</sup>

The old religious drama, meantime, was still upheld by ecclesiastical power. Of this we have sufficient proof in the titles of the Mysteries that were from time to time performed, and in the well-known fact that, when, with all the magnificence of the court of Charles the Fifth, the infant heir to the crown, afterwards Philip the Second, was baptized at Valladolid, in 1527, five religious plays, one of which was on the Baptism of Saint John, constituted a part of the gorgeous ceremony.<sup>4</sup> Such compositions, however, did not advance the drama, though perhaps some of them, like that of Pedro de Altamira, on the Supper at Emmaus, are not without poetical merit.<sup>5</sup> On the contrary, their tendency must have been to keep back

<sup>2</sup> These are in the “Catálogo” of L. F. Moratin, Nos 57 and 63, *Obras*, Madrid, 1830, 8vo, Tom I Parte I

<sup>3</sup> The fate of this long, heroic, and romantic drama of Gil Vicente, in Spanish, is somewhat singular. It was forbidden by the Inquisition, we are told, as early as the Index Expurgatorius of 1549 [1559?], but it was not printed at all till 1562, and not separately till 1586. By the Index of Lisbon, 1624, it is permitted, if expurgated, and there is an edition of it of that year at Lisbon. As it was never printed in Spain, the prohibition there must have related chiefly to its representation. Barbosa, Bib. Lusitana, Tom. II. p. 384.

<sup>4</sup> The account of this ceremony, and the facts concerning the dramas in question, are given by Sandoval, “Historia de Carlos V,” (Anvers, 1681, fol., Tom. I. p. 619, Lib. XVI. § 13,) and are of some consequence in the history of the Spanish drama.

It may also be worth notice that when Maximilian II., of Germany, was married to Mary, eldest daughter of Charles V., at Valladolid, in 1548, Philip being present at the festivities, and Maximilian having been educated in Spain, the theatrical entertainment thought proper for the occasion was yet one of the comedies of Ariosto, in the original, which, we are told, was represented “con todo aquel aparato de teatro y escenas que los Romanos las solian representar, que fue cosa muy real y sumptuosa” (Calvete de Estrella, *Viage de Phelipe, Hijo del Emperador Carlos V.*, ec. Anvers, folio, 1552, f 2, b.) There can be no doubt, I suppose, that a Spanish play would have been selected, if one suitable could have been found for so brilliant a Spanish audience, collected on an occasion appealing so strongly to national feelings.

<sup>5</sup> It was printed in 1523, and a sufficient extract from it is to be found in Moratin, *Catálogo*, No. 36.

theatrical representations within their old religious purposes and limits.<sup>6</sup>

\* Nor were the efforts made to advance them in other directions marked by good judgment or permanent success. We pass over the "Costanza" by Castillejo, which seems to have been in the manner of Naharro, and is assigned to the year 1522,<sup>7</sup> but which, from its indecency, was never published in full, and is now probably lost; and we pass over the free versions made about 1530, by Perez de Oliva, Rector of the University of Salamanca, from the "Amphytrion" of

<sup>6</sup> A specimen of the Mysteries of the age of Charles V may be found in an extremely rare volume, without date, entitled, in its three parts, "Triaca del Alma," "Triaca de Amor," and "Triaca de Tristes," — or, Medley for the Soul, for Love, and for Sadness. Its author was Marcelo de Lebrixia, son of the famous scholar Antonio, and the dedication and conclusion of the first part imply that it was composed when the author was forty years old, — after the death of his father, which happened in 1522, and during the reign of the Emperor, which ended in 1556. The first part, to which I particularly allude, consists of a "Mystery" on the Incarnation, in above eight thousand short verses. It has no other action than such as consists in the appearance of the angel Gabriel to the Madonna, bringing Reason with him in the shape of a woman, and followed by another angel, who leads in the Seven Virtues; — the whole piece being made up out of their successive discourses and exhortations, and ending with a sort of summary, by Reason and by the Author, in favor of a pious life. Certainly, so slight a structure, with little merit in its verses, could do nothing to advance the drama of the sixteenth century. It was, however, intended for representation. "It was written," says its author, "for the praise and solemnization of the Festival of Our Lady's Incarnation; so that it may be acted as a play [la puedan por farça representar] by devout nuns in their convents, since no men appear in it, but only angels and young damsels."

It should be noted that the word *Mystery*, as here used, has sometimes been thought to indicate its origin from *minsterium*, because it was performed by the *ministers* of the church, and not because it set forth the mysteries of religion, according to its accustomed use in France, where we have "Le Mistère de la Passion," etc.

The second part of this singular volume, which is more poetical than the first, is against human and in favor of Divine love, and the third, which is very long, consists of a series of consolations, deemed suitable for the different forms of human sorrow and care; — these two parts being necessarily didactic in their character. Each of the three is addressed to a member of the great family of Alva, to which their author was attached, and the whole is called by him *Triaca*, a word which means *Treacle*, or *Antidote*, but which Lebrixia says he uses in the sense of *Ensalada*, — *Salad*, or *Medley*. The volume, taken as a whole, is as strongly marked with the spirit of the age that produced it as the contemporary *Cancioneros Generales*, and its poetical merit is much like theirs.

<sup>7</sup> Moratin, *Catálogo*, No 35, and *ante*, Vol I p 463, n 6. A short extract from it is given by Moratin, and Wolf, in his tract on Castillejo, (1849, p 10,) says that still more was published in 1542, under the pseudonyme of Fray Nidel; but Gallardo gives the best account of the whole in a letter to Gayangos, to be found in the Spanish translation of this work, Tom. II. p. 500.

Plautus, the "Electra" of Sophocles, and the "Hecuba" of Euripides, because they fell, for the time, powerless on the early attempts of the national theatre, which had nothing in common with the spirit of antiquity.<sup>8</sup> But a single play, printed in 1536, should be noticed, as showing how slowly the drama made progress in Spain.

It is called "An Eclogue," and is written by Juan de Paris, in *versos de arte mayor*, or long verses divided into stanzas of eight lines each, which show, in their

\* 44 careful \* construction, not a little labor and art.<sup>9</sup>

It has five interlocutors: an esquire, a hermit, a young damsel, a demon, and two shepherds. The hermit enters first. He seems to be in a meadow, musing on the vanity of human life; and, after praying devoutly, determines to go and visit another hermit. But he is prevented by the esquire, who comes in weeping and complaining of ill treatment from Cupid, whose cruel character he illustrates by his conduct in the cases of Medea, the fall of Troy, Priam, David, and Hercules; ending with his own determination to abandon the world and live in a "nook merely monastical." He accosts the hermit, who discourses to him on the follies of love, and advises him to take religion and works of devotion for a remedy in his sorrows. The young man determines to follow counsel so wise, and they enter the hermitage together. But they are no

<sup>8</sup> Oliva died in 1533; but his translations were not printed till 1585. Those from Sophocles, Euripides, and Plautus are too free. Montiano praises them for their pure style, but Moratin rebukes Oliva for his adventurous and undramatic alterations.

<sup>9</sup> This extremely curious drama, of which a copy was kindly lent to me by Mons H Ternaux-Compans, of Paris, is entitled "Egloga nuevamente com-

posta por Juan de Paris, en la qual se introducen cinco personas un Escudero llamado Estacio, y un Hemitaño, y una Moça, y un Diablo, y dos Pastores, uno llamado Vicente y el otro Cremon" (1536). It is in black-letter, small quarto, 12 leaves, without name of place or printer; but, I suppose, printed at Zaragoza, or Medina del Campo. Wolf says there is a copy dated 1551 in the Munich Library.

sooner gone than the demon appears, complaining bitterly that the esquire is likely to escape him, and determining to do all in his power to prevent it. One of the shepherds, whose name is Vicente, now comes in, and is much shocked by the glimpse he has caught of the retiring spirit, who, indeed, from his description, and from the woodcut on the title-page, seems to have been a truly fantastic and hideous personage. Vicente, thereupon hides himself; but the damsel, who is the lady-love of the esquire, enters, and, after drawing him from his concealment, holds with him a somewhat metaphysical dialogue about love. The other shepherd, Cremon, at this difficult point interrupts the discussion, and has a rude quarrel with Vicente, which the damsel composes; and then Cremon tells her where the hermit and the lover she has come to seek are to be found. All now go towards the hermitage. The esquire, overjoyed, receives the lady with open arms and cries out,—

\* But now I abjure this friardom poor,  
And will neither be hermit nor friar any more <sup>10</sup>

\* 45

The hermit marries them, and determines to go with them to their house in the town; and then the whole ends somewhat strangely with a *villancico*, which has for its burden,—

Let us fly, I say, from Love's power away;  
'T is a vassalage hard,  
Which gives grief for reward.<sup>11</sup>

The piece is curious, because it is a wild mixture of the spirit of the old Mysteries with that of Juan de la Enzina's Eclogues and the Comedies of Naharro, and shows by what awkward means it was attempted to

<sup>10</sup> Agora reniego de mala fraylia,  
Ni quero hermitaño ni frayle mas ser

<sup>11</sup> Huyamos de ser vasallos  
Del Amor,  
Pues por premio da dolor

conciliate the Church, and yet amuse an audience which had little sympathy with monks and hermits. But it has no poetry in it, and very little dramatic movement. Of its manner and measure the opening stanza is quite a fair specimen. The Hermit enters, saying to himself, —

The suffering life we mortal men below,  
 Upon this terrene world, are bound to spend,  
 If we but carefully regard its end,  
 We find it very full of grief and woe ·  
 Torments so multiplied, so great, and ever such,  
 That but to count an endless reckoning brings,  
 While, like the rose that from the rose-tree springs,  
 Our life itself fades quickly at their touch <sup>12</sup>

Other attempts followed this, or appeared at just about the same time, which approach nearer \* 46 to the example \* set by Naharro. One of them, called "La Vidriana," by Jaume de Huete, is on the loves of a gentleman and lady of Aragon, who desired the author to represent them dramatically;<sup>13</sup> and another, by the same hand, is call "La Tesorina," and was afterwards forbidden by the Inquisition.<sup>14</sup>

<sup>12</sup> As another copy of this play can be found, I suppose, only by some rare accident, I give the original of the passage in the text, with its original pointing. It is the opening of the first scene —

*Hermitaño*

La vida peñosa, que nos los mortales

"Una Farça a Manera de Tragedia," in prose and partly pastoral, was printed at Valencia, anonymously, in 1537, and seems to have resembled this one in some particulars. It is mentioned in Arribau, "Biblioteca de Autores Españoles," 1846, Tom II p. 193, note.

<sup>13</sup> "Comedia llamada Vidriana, compuesta por Jaume de Huete agora nue-

vamente," etc , sm 4to, black-letter, eighteen leaves, without year, place, or printer It has ten interlocutors, and ends with an apology in Latin, that the author cannot write like Mena, — Juan de Mena, I suppose, — though I know not why he should have been selected, as the piece is evidently in the manner of Naharro

<sup>14</sup> Another drama from the same volume with the last two Moratin (Catálogo, No 47) had found it noticed in the Index Expurgatorius of Valladolid, 1559, and assigns it, at a venture, to the year 1531, but he never saw it Its title is "Comedia intitulada Tesorina, la materia de la qual es unos amores de un penado por una Señora y otras personas adherentes Hecha nuevamente por Jaume de Huete Pero si por ser su natural lengua Aragonesa, no fuere por muy cendrados terminos, quanto a este merece perdon" Small 4to, black-letter, fifteen leaves, no year, place, or

This last is a direct imitation of Naharro; has an *intróito*; is divided into five *jornadas*; and is written in short verses. Indeed, at the end, Naharro is mentioned by name, with much implied admiration on the part of the author, who in the title-page announces himself as an Aragonese, but of whom we know nothing else. And, finally, we have a play in five acts, and in the same style, with an *intróito* at the beginning and a *villancico* at the end, by Agostin Ortiz,<sup>15</sup> leaving no \* doubt that the manner and \* 47 system of Naharro had at last found imitators in Spain, and were fairly recognized there.

But the popular vein had not yet been struck. Except dramatic exhibitions of a religious character, and under ecclesiastical authority, nothing had been attempted in which the people, as such, had any share. The attempt, however, was now made, and made suc-

A list of sundry rude dramatic works in the forms common in Spain in the time of Charles V is given in the Spanish translation of this History, (Tom II pp 520 — 538,) as an addition to the well-known Catalogue of Moratin Among them are the titles of Autos and other dramas by the strange and extravagant Tanco del Frejenal or Fisxenal, (see *post*, Chap XXIX, note,) all lost and not worth recovering, two or three imitations of Enzina, Naharro, and the Celestina, and the second edition, 1552, of a very simple Comedia, called "Pietet y Tibaldo," begun by Peralvarez de Ayllon, and finished after his death by Luis Hurtado, who wrote Palmerin of England Of this last Gayangos gives considerable extracts, but all of them add nothing material to our knowledge of the theatre of the time.

cessfully. Its author was a mechanic of Seville, Lope de Rueda, a goldbeater by trade, who, from motives now entirely unknown, became both a dramatic writer and a public actor. The period in which he flourished has been supposed to be between 1544 and 1567, in which last year he is spoken of as dead; and the scene of his adventures is believed to have extended to Seville, Córdova, Valencia, Segovia, and probably other places, where his plays and farces could be represented with profit. At Segovia, we know he acted in the new cathedral, during the week of its consecration, in 1558; and Cervantes and the unhappy Antonio Perez both speak with admiration of his powers as an actor,—the first having been twenty years old in 1567, the period commonly assumed as that of Rueda's death,<sup>16</sup> and the last having been eighteen. Rueda's success, therefore, even during his lifetime, seems to have been remarkable; and when he died, though he belonged to the despised and rejected profession of the stage, he was interred with honor among the mazy pillars in the nave of the great cathedral at Córdova.<sup>17</sup>

\* 48      \* His works were collected after his death by

<sup>16</sup> It is known that he was certainly dead as early as that year, because the edition of his "Comedias" then published at Valencia, by his friend Timoneda, contains, at the end of the "Engaños," a sonnet on his death by Francisco de Ledesma. The last, and, indeed, almost the only date we have about him, is that of his acting in the cathedral at Segovia in 1558; of which we have a distinct account in the learned and elaborate History of Segovia, by Diego de Colmenares, (Segovia, 1627, fol., p. 516,) where he says that, on a stage erected between the choirs, "Lope de Rueda, a well-known actor [famoso comediante] of that age represented an entertaining play [gustosa comedia]."

Gayangos says that Timoneda alludes to the death of Lope de Rueda, in 1566. I suppose he refers, in this remark, to the "Epistola" prefixed to the edition of the *Eufemia* and *Armelina* dated 1567, but with the Censura of October, 1566.

<sup>17</sup> The well-known passage about Lope de Rueda, in Cervantes's *Prólogo* to his own plays, (see *post*, p. 55,) is of more consequence than all the rest that remains concerning him. Everything, however, is collected in Navarrete, "Vida de Cervantes," pp. 255–260; and in Casiano Pellicer, "Origen de la Comedia y del Histrionismo en España" (Madrid, 1804, 12mo, Tom. II pp. 72–84).

his friend Juan de Timoneda, and published in different editions, between 1567 and 1588.<sup>18</sup> They consist of four *Comedias*, two *Pastoral Colloquies*, and ten *Pasos*, or dialogues, all in prose; besides two dialogues in verse. They were all evidently written for representation, and were unquestionably acted before public audiences, by the strolling company Lope de Rueda led about.

The four *Comedias* are merely divided into scenes, and extend to the length of a common farce, whose spirit they generally share. The first of them, "Los Engaños,"<sup>19</sup>—Frauds,—contains the story of a daughter of Verginio, who has escaped from the convent where she was to be educated, and is serving as a page to Marcelo, who had once been her lover, and who had left her because he believed himself to have been ill treated. Clavela, the lady to whom Marcelo now devotes himself, falls in love with the fair page, somewhat as Olivia does in "Twelfth Night," and this brings in several effective scenes and situations. But a twin brother of the lady-page returns home, after a considerable absence, so like her, that he proves the other Sosia, who, first producing great confusion and trouble, at last marries Clavela, and leaves his sister to her original lover. This is at least a plot; and some of its details and portions of the dialogue are ingenious, and managed with dramatic skill.

<sup>18</sup> "Las Quatro Comedias y Dos Colloquios Pastorales del excelente poeta y gracioso representante, Lope de Rueda," etc., impresas en Sevilla, 1576, 8vo,—contains his principal works, with the "Diálogo sobre la Invención de las Calzas que se usan agora." From the Epistola prefixed to it by Juan de Timoneda, I infer that he made alterations in the manuscripts, as Lope de Rueda left them, but not, probably, any of

much consequence. Of the "Deleytoso," printed at Valencia, 1567, I have never been able to see more than the very ample extracts given by Moratín, amounting to six *Pasos* and a *Colloquio*. The first edition of the Quatro *Comedias*, etc., was 1567, at Valencia, the last at Logroño, 1588.

<sup>19</sup> In the edition of Valencia by Joan Mey, 8vo, 1567, this play is entitled "Los Engañados,"—*the cheated*.

The next, the "Medora," is, also, not without a sense of what belongs to theatrical composition and effect. The interest of the action depends, in a considerable degree, on the confusion produced by the resemblance between a young woman stolen when a \* 49 child by \* Gypsies, and the heroine, who is her twin sister. But there are well-drawn characters in it, that stand out in excellent relief, especially two: Gargullo, — the "miles gloriosus," or Captain Bobadil, of the story, — who, by an admirable touch of nature, is made to boast of his courage when quite alone, as well as when he is in company; and a Gypsy woman, who overreaches and robs him at the very moment he intends to overreach and rob her.<sup>20</sup>

The story of the "Eufemia" is not unlike that of the slandered Imogen, and the character of Melchior Ortiz is almost exactly that of the fool in the old English drama, — a well-sustained and amusing mixture of simplicity and shrewdness.

The "Armelina," which is the fourth and last of the longer pieces of Lope de Rueda, is more bold in its dramatic incidents than either of the others.<sup>21</sup> The heroine, a foundling from Hungary, after a series of strange incidents, is left in a Spanish village, where she is kindly and even delicately brought up by the village blacksmith; while her father, to supply her place, has no less kindly brought up in Hungary a natural son of this same blacksmith, who had been carried there by his unworthy mother. The father of the lady, having some intimation of where his daughter is to be found,

<sup>20</sup> This is the *Rufian* of the old Spanish dramas and stories, — *parcel rowdy*, *parcel bully*, and *wholly knave*, — a different personage from the *Rufian* of recent times, who is the elder *Alcahuete* or *pander*.

<sup>21</sup> It may be worth noticing, that both the "Armelina" and the "Eufemia" open with scenes of calling up a lazy young man from bed, in the early morning, much like the first in the "Nubes" of Aristophanes.

comes to the Spanish village, bringing his adopted son with him. There he advises with a Moorish necromancer how he is to proceed in order to regain his lost child. The Moor, by a fearful incantation, invokes Medea, who actually appears on the stage, fresh from the infernal regions, and informs him that his daughter is living in the very village where they all are. Meanwhile the daughter has seen the youth from Hungary, and they are at once in love with each other;— the blacksmith, at the same time, having decided, with the aid of his wife, to compel her to marry a shoemaker, to whom he had before promised her. Here, of course, \* come troubles \* 50 and confusion. The young lady undertakes to cut them short, at once, by simply drowning herself, but is prevented by Neptune, who quietly carries her down to his abodes under the roots of the ocean, and brings her back at the right moment to solve all the difficulties, explain the relationships, and end the whole with a wedding and a dance. This is, no doubt, very wild and extravagant, especially in the part containing the incantation and in the part played by Neptune; but, after all, the dialogue is pleasant and easy, and the style natural and spirited.

The two *Pastoral Colloquies* differ from the four *Comedias*, partly in having even less carefully constructed plots, and partly in affecting, through their more bucolic portions, a stately and pedantic air, which is anything but agreeable. They belong, however, substantially to the same class of dramas, and received a different name, perhaps, only from the circumstance that a pastoral tone was always popular in Spanish poetry, and that, from the time of Enzina, it had been considered peculiarly fitted for public exhibition. The

comic parts of the *Colloquies* are the only portions of them that have merit ; and the following passage from that of "Timbria" is as characteristic of Lope de Rueda's light and natural manner as anything, perhaps, that can be selected from what we have of his dramas. It is a discussion between Leno, the shrewd fool of the piece, and Troico,<sup>22</sup> in which Leno ingeniously contrives to get rid of all blame for having eaten up a nice cake which Timbria, the lady in love with Troico, had sent to him by the faithless glutton.

*Leno.* Ah, Troico, are you there ?

*Troico.* Yes, my good fellow, don't you see I am ?

*Leno.* It would be better if I did not see it.

*Troico.* Why so, Leno ?

*Leno.* Why, then you would not know a piece of ill-luck that has just happened.

*Troico.* What ill-luck ?

*Leno.* What day is it to-day ?

*Troico.* Thursday.

\* 51 \* *Leno.* Thursday ? How soon will Tuesday come, then ?

*Troico* Tuesday is passed two days ago.

*Leno.* Well, that's something ; — but tell me, are there not other days of ill-luck as well as Tuesdays ?<sup>23</sup>

*Troico* What do you ask that for ?

*Leno* I ask, because there may be unlucky pancakes, if these are unlucky Thursdays

*Troico* I suppose so.

*Leno* Now, stop there ; — suppose one of yours had been eaten of a Thursday ; on whom would the ill-luck have fallen ? — on the pancake, or on you ?

*Troico.* No doubt, on me

*Leno* Then, my good Troico, comfort yourself, and begin to suffer and be patient ; for men, as the saying is, are born to misfortunes, and these are matters, in fine, that come from God ; and in the order of time you must die yourself, and, as the saying is, your last hour will then be come and arrived. Take it, then, patiently, and remember that we are here to-morrow and gone to-day.

*Troico.* For heaven's sake, Leno, is anybody in the family dead ? Or else why do you console me so ?

*Leno.* Would to heaven that were all, Troico !

<sup>22</sup> Troico, it should be observed, is a woman in disguise.

<sup>23</sup> This superstition about Tuesday as an unlucky day is not unfrequent in the old Spanish drama : —

Está escrito,  
El Martes es dia aciago.  
Lope de Vega, *El Cuerdo en su Casa, Acto II*, Comedias, Madrid, 1615, 4to, Tom VI. f. 112, a.

*Troco.* 'Then what is it? Can't you tell me without so many circumlocutions? What is all this preamble about?

*Leno.* When my poor mother died, he that brought me the news, before he told me of it, dragged me round through more turn-abouts than there are windings in the Pisuerga and Zapardiel <sup>24</sup>

*Troco.* But I have got no mother, and never knew one. I don't comprehend what you mean

*Leno* Then smell of this napkin

*Troco* Very well, I have smelt of it.

*Leno* What does it smell of?

*Troco* Something like butter.

*Leno* Then you may truly say, "Here Troy was"

*Troco* What do you mean, Leno?

*Leno* For you it was given to me; for you Madam Timbria sent it, all stuck over with nuts, — but, as I have (and Heaven and everybody else knows it) a sort of natural relationship for whatever is good, my eyes watched and followed her just as a hawk follows chickens.

*Troco.* Followed whom, villain? Timbria?

*Leno.* Heaven forbid! But how nicely she sent it, all made up with butter and sugar!

*Troco.* And what was that?

\* *Leno.* The pancake, to be sure, — don't you understand? \* 52

*Troco.* And who sent a pancake to me?

*Leno* Why, Madam Timbria.

*Troco.* Then what became of it?

*Leno.* It was consumed.

*Troco.* How?

*Leno* By looking at it.

*Troco.* Who looked at it?

*Leno* I, by ill-luck.

*Troco.* In what fashion?

*Leno.* Why, I sat down by the wayside.

*Troco.* Well, what next?

*Leno* I took it in my hand.

*Troco* And then?

*Leno.* Then I tried how it tasted; and what between taking and leaving all around the edges of it, when I tried to think what had become of it, I found I had no sort of recollection.

*Troco.* The upshot is that you ate it?

*Leno.* It is not impossible.

*Troco.* In faith, you are a trusty fellow!

*Leno.* Indeed! do you think so? Hereafter, if I bring two, I will eat them both, and so be better yet.

*Troco.* The business goes on well.

*Leno.* And well advised, and at small cost, and to my content. But now, go to; suppose we have a little jest with Timbria.

*Troco* Of what sort?

<sup>24</sup> Rivers in the north of Spain, often mentioned in Spanish poetry, especially the first of them.

*Leno* Suppose you make her believe you ate the pancake yourself, and when she thinks it is true, you and I can laugh at the trick till you split your sides. Can you ask for anything better?

*Troico* You counsel well

*Leno* Well, Heaven bless the men that listen to reason! But tell me, Troico, do you think you can carry out the jest with a grave face?

*Troico* I? What have I to laugh about?

*Leno* Why, don't you think it is a laughing matter to make her believe you ate it, when all the time it was your own good Leno that did it?

*Troico* Wisely said. But now hold your tongue, and go about your business

## \* 53 \* The ten Pasos are much like this dialogue, — short and lively, without plot or results, and

25 *Len* Ah, Troico! estás aca?  
*Tro* Sí, hermano tu no lo ves?  
*Len* Mas valhera que no  
*Tro* Porque, Leno?  
*Len* Porque no supieras una desgracia, que ha sucedido harto poco ha  
*Tro* Y que ha sido la desgracia?  
*Len* Que es hoy?  
*Tro* Jueves  
*Len* Jueves? Quanto le falta para ser Martes?  
*Tro* Antes le sobran dos dias  
*Len* Mucho es eso! Mas dime, suele haber dias azagros asi como los Martes?  
*Tro* Porque lo dices?  
*Len* Pregunto, porque tambien habrá hojalres desgraciadas, pues hay Jueves desgraciados  
*Tro* Creo que si!  
*Len* Y ven aca si te la hubiesen comido á ti una en Jueves, en quien habria caido la desgracia, en la hojalde o en ti?  
*Tro* No hay duda sino que en mi  
*Len* Pues, hermano Troico, aconortaos, y comenzad á sufrir, y ser paciente, que por los hombres (como dicen) suelen venir las desgracias, y estas son cosas de Dios en fin, y tambien segun orden de los dias os podriades vos morir, y (como dicen) ya seria recomplida y allegada la hora postimera, rescebedo con paciencia, y acordados que mañana somos y hoy no  
*Tro* Valame Dios, Leno! Es muerto alguno en casa? O como me consuelas asi?  
*Len* Ojal, Troico!  
*Tro* Pues que fué? No lo dirás sin tantos circunloquios? Para que es tanto pre-mabulo?  
*Len* Quando mi madre murió, para decir-melo á que me llevó la nueva me trajo mas rodeos que tiene bueutas Pisuerga ó Zapardiel  
*Tro* Pues yo no tengo madre, ni la conocí, ni te entiendo  
*Len* Huéle ese pañizuelo  
*Tro* Y bien? Ya está olido.  
*Len* A que huele?  
*Tro* A cosa de manteca  
*Len* Pues bien puedes decir, aquí fué Troya  
*Tro* Como, Leno?  
*Len* Para ti me la habian dado, para tu la embiaba rebestida de piñones la Señora Timbría; pero como yo soy (y lo sabe Dios y todo el mundo) allegada á lo bueno, en viéndola asi, se me vinieron los ojos tras ella como milano tras de pollera  
*Tro* Tras quien, traidor? tras Timbría?  
*Len* Que no, valame Dios! Que empapada la embiaba de manteca y azúcar!  
*Tro* La que?

*Len* La hojalde no lo entiendes?  
*Tro* Y quien me la embiaba?  
*Len* La Señora Timbría  
*Tro* Pues que la heciste?  
*Len* Consumise.  
*Tro* De que?  
*Len* De ojo  
*Tro* Quien la ojeo?  
*Len* Yo mal punto!  
*Tro* De que manera?  
*Len* Asentéme en el cammo  
*Tro* Y que mas?  
*Len* Toméla en la mano  
*Tro* Y luego?  
*Len* Prove á que sabia, y como por una vanda y por otra estaba de dar y tomar, quando por ella acordé, ya no habia memoria  
*Tro* En fin, te la comiste?  
*Len* Podria ser  
*Tro* Por cierto, que eres hombre de buen recado  
*Len* A fe? que te parezco? De aqui adelante si trugere dos, me las comere juntas, para hacerlo mejor  
*Tro* Bueno va el negocio  
*Len* Y bien regdo, y con poca costa, y á mi contento. Mas ven aca, si quies que riamos un rato con Timbría?  
*Tro* De que suerte?  
*Len* Puedes te hacer en creyente, que la comiste tu, y como ella piense que es verdad, podremos despues tu y yo reir acá de la burla, que robartanis riyendo? Que mas quies?  
*Tro* Bien me aconsejas  
*Len* Agora bien, Dios bendiga los hombres acogidos á razon! Pero dime, Troico, sabras disimular con ella sin reir?  
*Tro* Yo? de que me habia de reir?  
*Len* No te paresce, que es manera de reir, hacelle en creyente, que tu te la comiste, habiéndosela comido tu amigo Leno?  
*Tro* Dices sabiamente, mas calla, vete en buen hora  
 (Las Quatro Comedias, etc., de Lope de Rueda, Sevilla, 1576, 8vo.)

The learned allusion to Troy by a man as humble as Leno might seem inappropriate, but it is a phrase that was in popular use. Don Quixote employed it, when, leaving Barcelona, he looked back upon that city as the scene of his final discomfiture and disgrace. It occurs often in the old dramatists.

merely intended to amuse an idle audience for a few moments. Two of them are on glutton tricks, like that practised by Leno; others are between thieves and cowards; and all are drawn from common life, and written with spirit. It is very possible that some of them were taken out of larger and more formal dramatic compositions, which it was not thought worth while to print entire.<sup>26</sup>

The two dialogues in verse are curious, as the only specimens of Lope de Rueda's poetry that are now extant, except some songs, and a fragment preserved by Cervantes.<sup>27</sup> One is called "Proofs of Love," and is a sort \* of pastoral discussion between \* 54 two shepherds, on the question which was most favored, the one who had received a finger-ring as a present, or the one who had received an ear-ring. It is written in easy and flowing *quintillas*, and is not longer than one of the slight dialogues in prose. The other is called "A Dialogue on the Breeches now in Fashion," and is in the same easy measure, but has more of its author's peculiar spirit and manner. It is between two lackeys, and begins thus abruptly:—

*Peralta.* Master Fuentes, what 's the change, I pray,  
I notice in your hosiery and shape?  
You seem so very swollen as you walk  
*Fuentes* Sir, 't is the breeches fashion now prescribes.  
*Peralta.* I thought it was an under-petticoat  
*Fuentes* I 'm not ashamed of what I have put on.  
Why must I wear my breeches made like yours?  
Good friend, your own are wholly out of vogue.

<sup>26</sup> This I infer from the fact that, at the end of the edition of the *Comedias* and *Coloquios*, 1576, there is a "Tabla de los pasos graciosos que se pueden sacar de las presentes *Comedias y Coloquios y poner en otras obras.*" Indeed, *paso* meant *a passage*. *Pasos* were, however, undoubtedly sometimes written as separate works by Lope de Rueda,

and were not called *entremeses* till Timoneda gave them the name. Still, they may have been earlier used as such, or as introductions to the longer dramas.

<sup>27</sup> There is a *Glosa* printed at the end of the *Comedias*, but it is not of much value. The passage preserved by Cervantes is in his "*Baños de Argel*," near the end.

*Peralta.* But what are yours so lined and stuffed withal,  
That thus they seem so very smooth and tight ?

*Fuentes.* Of that we 'll say but little. An old mantle,  
And a cloak still older and more spoiled,  
Do vainly struggle from my hose t' escape

*Peralta.* To my mind they were used to better ends  
If sewed up for a horse's blanket, sir

*Fuentes* But others stuff in plenty of clean straw  
And rushes to make out a shapely form —

*Peralta.* Proving that they are more or less akin  
To beasts of burden.

*Fuentes.* But they wear, at least,  
Such gallant hosiery that things of taste  
May well be added to fit out their dress.

*Peralta.* No doubt the man that dresses thus in straw  
May tastefully put on a saddle too <sup>28</sup>

\* 55 \* In all the forms of the drama attempted by Lope de Rueda, the main purpose is evidently to amuse a popular audience. But, to do this, his theatrical resources were very small and humble. "In the time of this celebrated Spaniard," says Cervantes,

<sup>28</sup> *Per* Señor Fuentes, que mudanza  
Haben hecho en el calzado,  
Con que andais tan abultado ?

*Fuent* Señor, calzas á la usanza

*Per* Pense qu' era verdugado

*Fuent* Pues yo d' ellas no me corro  
Que han de ser como las vuesas ?

*Per* Hermano, ya no usan d' esas  
Mas que les hechais de aforro,  
Que aun se paran tan tiesas ?

*Fuent* D' eso poco un sayo viejo  
Y toda una ruin capa,  
Que a esta calza no escapa.

*Per* Pues, si van á mi consejo,  
Hecharan una gualdrapa

*Fuent* Y aun otros mandan poner  
Copia de paja y esparto,  
Porque les abulten harto

*Per.* Esos deben de tener  
De bestias quizá algun quarto.

*Fuent* Pondrase qualquier alhaja  
Por traer calza gallarda

*Per.* Ciento yo no sé que aguarda.  
Quen va vestido de paja  
De hacerse alguna albarda.

I do not know that this dialogue is printed anywhere but at the end of the edition of the *Comedias*, 1576. It refers evidently to the broad-bottomed stuffed hose or boots, then coming into fashion ; such as the daughter of Sancho, in her vanity, when she heard her father was governor of Barrataria, wanted to see him wear ; and such as Don Carlos, according to the account of Thuanus, wore,

when he used to hide in their strange recesses the pistols that alarmed Philip II ; — "caligis, quæ amplissimæ de more gentis in usu sunt" They were forbidden by a royal ordinance in 1623 See D Quixote, (Parte II c 50,) with two amusing stories told in the notes of Pellicer and Thuani Historiarum, Lib. XLI, at the beginning They became fashionable in other parts of Europe, as the whole Spanish costume, hat, feathers, cloak, etc., did from the spread of Spanish power and *prestige*, that is, precisely for the same reasons that the French dress and fashions have spread since the time of Louis XIV. Figueiroa (Plaça Universal, 1615, ff 226, 227) has an amusing article about *tailors*, in which he claims precedence for the skill and taste of those in Madrid, and shows how their supremacy was acknowledged in France and Italy. That it was acknowledged in England in the time of Elizabeth and James I. we very well know Roger Ascham, in his "Schoolmaster," talks of the very "huge hose" here referred to, as an "outrage" to be rebuked and repressed, like that of the "monstrous hats," etc., — all Spanish

recalling the gay season of his own youth,<sup>29</sup> “the whole apparatus of a manager was contained in a large sack, and consisted of four white shepherd’s jackets, turned up with leather, gilt and stamped ; four beards and false sets of hanging locks ; and four shepherd’s crooks, more or less. The plays were colloquies, like eclogues, between two or three shepherds and a shepherdess, fitted up and extended with two or three interludes, whose personages were sometimes a negress, sometimes a bully, sometimes a fool, and sometimes a Biscayan ;— for all these four parts, and many others, Lope himself performed with the greatest excellence and skill that can be imagined. . . . The theatre was composed of four benches, arranged in a square, with five or six boards laid across them, that were thus raised about four palms from the ground. . . . The furniture of the theatre was an old blanket drawn aside by two cords, making what they call the tiring-room, behind which were the musicians, who sang old ballads without a guitar.”

The place where this rude theatre was set up was a public square, and the performances occurred whenever an audience could be collected ; apparently both forenoon and afternoon, for, at the end of one of his plays, Lope de Rueda invites his “hearers only to eat their dinner and return to the square,”<sup>30</sup> and witness another.

His four longer dramas have some resemblance to portions \* of the earlier English comedy, which, at precisely the same period, was beginning to show itself in pieces such as “Ralph Royster Doyster,” and “Gammer Gurton’s Needle.”

<sup>29</sup> *Comedias, Prólogo*

<sup>30</sup> “*Auditores, no hagais sino comer, y dad la vuelta á la plaza.*”

They are divided into what are called scenes,— the shortest of them consisting of six, and the longest of ten ; but in these scenes the place sometimes changes, and the persons often,— a circumstance of little consequence, where the whole arrangements implied no real attempt at scenic illusion.<sup>31</sup> Much of the success of all depended on the part played by the fools, or *simples*, who, in most of his dramas, are important personages, almost constantly on the stage ;<sup>32</sup> while something is done by mistakes in language, arising from vulgar ignorance or from foreign dialects, like those of negroes and Moors. Each piece opens with a brief explanatory prologue, and ends with a word of jest and apology to the audience. Naturalness of thought, the most easy, idiomatic, purely Castilian turns of expression, a good-humored, free gayety, a strong sense of the ridiculous, and a happy imitation of the manners and tone of common life, are the prominent characteristics of these, as they are of all the rest of his shorter efforts. He was, therefore, on the right road, and was, in consequence, afterwards justly reckoned, both by Cervantes and Lope de Vega, to be the true founder of the popular national theatre.<sup>33</sup>

The earliest follower of Lope de Rueda was his friend and editor, Juan de Timoneda, a bookseller of Valencia, who certainly flourished during the middle and latter part of the sixteenth century, and probably

<sup>31</sup> In the fifth *escena* of the “Eufemia,” the place changes, when Vahano comes in. Indeed, it is evident that Lope de Rueda did not know the meaning of the word *scene*, or did not employ it aright.

<sup>32</sup> The first traces of these *simples*, who were afterwards expanded into the *graciosos*, is to be found in the *parvos* of Gil Vicente.

<sup>33</sup> Cervantes, in the *Prólogo* already cited, calls him “*el gran Lope de Rue-*

*da*,” and, when speaking of the Spanish *Comedias*, treats him as “*el primero que en España las sacó de mantillas y las puso en toldo y vistió de gala y apariencia*.” This was in 1615, and Cervantes spoke from his own knowledge and memory. In 1620, in the *Prólogo* to the thirteenth volume of his *Comedias*, (Madrid, 4to,) Lope de Vega says, “*Las comedias no eran mas antiguas que Rueda, á quien oyeron muchos, que hoy viven*.”

died in extreme old age, soon after the year \* 1597.<sup>34</sup> His thirteen or fourteen pieces that were printed pass under various names, and have a considerable variety in their character; the most popular in their tone being the best. Four are called “Pasos,” and four “Farsas,” — all much alike. Two are called “Comedias,” one of which, the “Aurelia,” written in short verses, is divided into five *jornadas*, and has an *intróito*, after the manner of Naharro; while the other, the “Cornelia,” is merely divided into seven scenes, and written in prose, after the manner of Lope de Rueda. Besides these, we have what, in the present sense of the word, is for the first time called an “Entremes”; a Tragicomedia, which is a mixture of mythology and modern history; a religious Auto, on the subject of the Lost Sheep; and a translation, or rather an imitation, of the “Menæchmi” of Plautus. In all of them, however, he seems to have relied for success on a spirited, farcical dialogue, like that of Lope de Rueda; and all were, no doubt, written to be acted in the public squares, to which, more than once, they make allusion.<sup>35</sup>

The “Cornelia,” first printed in 1559, is somewhat confused in its story. We have in it a young lady, taken, when a child, by the Moors, and returned, when grown up, to the neighborhood of her friends, without knowing who she is; a foolish fellow, deceived by his wife, and yet not without shrewdness enough to make much merriment; and Pasquin, partly a quack doctor,

<sup>34</sup> Ximeno, Escritores de Valencia, Tom I p 72, and Fuster, Biblioteca Valenciana, Tom I p 161. But best in Barreua y Leirado *ad verb.*

<sup>35</sup> In the Prologue to the *Cornelia*, one of the speakers says that one of the principal personages of the piece lives

in Valencia, “in this house which you see,” he adds, pointing the spectators picturesquely, and no doubt with comic effect, to some house they could all see. A similar jest about another of the personages is repeated a little further on.

partly a magician, and wholly a rogue ; who, with five or six other characters, make rather a superabundance of materials for so short a drama. Some of the dialogues are full of life ; and the development of two or three of the characters is good, especially that of Cornalla, the clown ; but the most prominent personage, perhaps, — the magician, — is taken, in a considerable degree, from the “ Negromante ” of Ariosto, which was represented at Ferrara about thirty years earlier, and proves that \* Timoneda had some scholarship, if not always a ready invention.<sup>36</sup>

\* 58 The “ Menennos,” published in the same year with the *Cornelia*, is further proof of his learning. It is in prose, and taken from Plautus ; but with large changes. The plot is laid in Seville ; the play is divided into fourteen scenes, after the example of Lope de Rueda ; and the manners are altogether Spanish. There is even a talk of *Lazarillo de Tórmes*, when speaking of an unprincipled young servant.<sup>37</sup> But it shows frequently the same free and natural dialogue, fresh from common life, that is found in his master’s dramas ; and it can be read with pleasure throughout, as an amusing *rifacimento*.<sup>38</sup>

The *Paso*, however, of “ The Blind Beggars and the Boy ” is, like the other short pieces, more characteristic of the author and of the little school to which he belonged. It is written in short, familiar verses, and opens with an address to the audience by *Palillos*, the boy, asking for employment, and setting forth his own good qualities, which he illustrates by showing how

<sup>36</sup> “ Con privilegio. Comedia llamada *Cornelia*, nuevamente compuesta, por Juan de Timoneda. Es muy sentida, graciosa, y vozijada. Año 1559.” 8vo.

<sup>37</sup> It is in the twelfth scene. “ Es el mas agudo rapaz del mundo, y es

hermano de *Lazarillo de Tórmes*, el que tuvo trecientos y cincuenta amos ”

<sup>38</sup> “ Con privilegio. La Comedia de los *Menennos*, traduzida por Juan Timoneda, y puesta en gracioso estilo y elegantes sentencias. Año 1559.” 8vo.

ingeniously he had robbed a blind beggar who had been his master. At this instant, Martin Alvarez, the blind beggar in question, approaches on one side of a square where the scene passes, chanting his prayers, as is still the wont of such persons in the streets of Spanish cities; while on the other side of the same square approaches another of the same class, called Pero Gomez, similarly employed. Both offer their prayers in exchange for alms, and are particularly earnest to obtain custom, as it is Christmas eve. Martin Alvarez begins:—

What pious Christian here  
Will bid me pray  
A blessed prayer,  
Quite singular  
And new, I say,  
In honor of our Lady dear?

\* On hearing the well-known voice, Palillos, the \* 59 boy, is alarmed, and, at first, talks of escaping; but, recollecting that there is no need of this, as the beggar is blind, he merely stands still, and his old master goes on:—

O, bid me pray ! O, bid me pray !—  
The very night is holy time, —  
O, bid me pray the blessed prayer,  
The birth of Christ in rhyme !

But as nobody offers an alms, he breaks out again:—

Good heavens ! the like was never known !  
The thing is truly fearful grown ;  
For I have cried,  
Till my throat is dried,  
At every corner on my way,  
And not a soul heeds what I say  
The people, I begin to fear,  
Are grown too careful of their gear,  
For honest prayers to pay.

The other blind beggar, Pero Gomez, now comes up and strikes in:—

Who will ask for the blind man's prayer ?  
 O, gentle souls that hear my word !  
 Give but an humble alms,  
 And I will sing the holy psalms  
 For which Pope Clement's bulls afford  
 Indulgence full, indulgence rare,  
 . . . . .  
 And add, besides, the blessed prayer  
 For the birth of our blessed Lord <sup>39</sup>

The two blind men, hearing each other, enter into conversation, and, believing themselves to be  
 \* 60 alone, Alvarez \* relates how he had been robbed by his unprincipled attendant, and Gomez explains how he avoids such misfortunes by always carrying the ducats he begs sewed into his cap. Palillos, learning this, and not well pleased with the character he has just received, comes very quietly up to Gomez, knocks off his cap, and escapes with it. Gomez thinks it is his blind friend who has played him the trick, and asks civilly to have his cap back again. The friend denies, of course, all knowledge of it; Gomez insists; and the dialogue ends, as others of its class do, with a quarrel and a fight, to the great amusement, no doubt, of audiences such as were collected in the public squares of Valencia or Seville.<sup>40</sup>

 I p 648

<sup>40</sup> This Paso — true to the manners of the times, as we can see from a similar scene in the “Diablo Cojuelo.” Tranco VI — is reprinted by L. F. Moratín, (Obras, 8vo, Madrid, 1830, Tom I. Parte II p 644,) who gives (Parte I Catálogo, Nos 95, 96, 106—118) the best account of all the works of Timoneda. The habit of singing popular poetry of all kinds in the streets has been common, from the days of the Archpriest Hita (Copla 1488) to our own times. I have often listened to it, and possess many of the ballads and other verses still paid for by an alms, as they were in this Paso of Timoneda.

In one of the plays of Cervantes,— that of “Pedro de Urdemalas,”—the hero is introduced enacting the part of a blind beggar, and is advertising himself by his chant, just as the beggar in Timoneda does —

The prayer of the secret soul I know,

That of Pancras the blessed of old,

The prayer of Acacius and Quirce,

One for chilblains, that come from the cold,

One for jaundice that yellows the skin,

And for scrofula working within

The lines in the original are not consecutive, but those I have selected are as follows —

Se la del anima sola,  
Y se la de San Pancracio,  
La de San Quirce y Acacio,  
Se la de los sabanones,  
La de curar la tericia  
Y resolver lamparones

Two of the persons attached to Lope de Rueda's company were, like himself, authors as well as actors. One of them, Alonso de la Vega, died at Valencia as early as 1566, in which year three of his dramas, all in prose, and one of them directly imitated from his master, were published by Timoneda.<sup>1</sup> The other, Alonso Cisneros, lived as late as 1579, but it does not seem certain that any dramatic work of his now exists.<sup>2</sup> Neither of them was equal to Lope de Rueda or Juan de Timoneda; but the four taken together produced an impression on the theatrical taste of their times which was never afterwards wholly forgotten or lost, — a fact of which the shorter dramatic compositions that have been favorites on the Spanish stage ever since give decisive proof.

But dramatic representations in Spain between 1560 and 1590 were by no means confined to what was done by Lope de Rueda, his friends, and his strolling company of actors. Other efforts were made in various places, and upon other principles; sometimes with more success than theirs, sometimes with less. In Seville, a good deal seems to have been done. It is

probable the plays of Malara or Mal Larà, a native of that city, were represented there during this period; but they are now all \*lost.<sup>3</sup> Those of \*62 Juan de la Cueva, on the contrary, have been partly preserved, and merit notice for many reasons, but especially because most of them are historical. They were represented — at least, the few that still remain — in 1579, and the years immediately subsequent; but were not printed till 1588, and then only a single volume appeared.<sup>4</sup> Each of them is divided into four *jornadas*, or acts, and they are written in various measures, including *terza rima*, blank verse, and sonnets, but chiefly in *redondillas* and octave stanzas. Several are on national subjects, like "The Children of Lara," "Bernardo del Carpio," and "The Siege of Zamora"; others are on subjects from ancient history, such as Ajax, Virginia, and Mutius Scævola; some are on fictitious stories, like "The Old Man in Love," and "The Decapitated," which last is founded on a Moorish adventure; and one, at least, is on a great event of times then recent, "The Sack of Rome" by the Constable Bourbon. All, however, are crude in their structure, and unequal in their execution. The Sack of Rome, for instance, is merely a succession of dialogues thrown together in the loosest manner, to set

Mal Lara prepared the inscriptions, Latin and Spanish, used to explain the multitudinous allegorical figures that constituted a great part of the show on the occasion, and printed them, and everything else that could illustrate the occasion, in his "Recivi-

forth the progress of the Imperial arms, from the siege of Rome in May, 1527, to the coronation of Charles the Fifth at Bologna, in February, 1530; and though the picture of the outrages at Rome is not without an air of truth, there is little truth in other respects; the Spaniards being made to carry off all the glory.<sup>5</sup>

“*El Infamador*,” or *The Calumniator*, sets forth, in a different tone, the story of a young lady who \* 63 refuses the \* love of a dissolute young man, and is, in consequence, accused by him of murder and other crimes, and condemned to death, but is rescued by preternatural power, while her accuser suffers in her stead. It is almost throughout a revolting picture; the fathers of the hero and heroine being each made to desire the death of his own child, while the whole is rendered absurd by the not unusual mixture of heathen mythology and modern manners. Of poetry, which is occasionally found in Cueva’s other dramas, there is in this play no trace, though there are passages of comic spirit; and so carelessly is it written, that there is no division of the acts into scenes.<sup>6</sup> Indeed, it seems difficult to understand how several of his twelve or fourteen dramas should have been brought into practical shape and represented at all. It is probable they were merely spoken as consecutive dialogues, to bring out their respective stories, without any attempt at theatrical illusion; a conjecture which receives confirmation from the fact that nearly all of them are announced, on their titles, as having been

represented in the garden of a certain Doña Elvira at Seville.<sup>7</sup>

The two plays of Joaquin Romero de Zepeda, of Badajoz, which were printed at Seville in 1582, are somewhat different from those of Cueva. One, "The Metamorfosea," is in the nature of the old dramatic pastorals, but is divided into three short *jornadas*, or acts. It is a trial of wits and love, between three shepherds and three shepherdesses, who are constantly at cross purposes with each other, but are at last reconciled and united; — all except one shepherd, who had originally refused to love anybody, and one shepherdess, Belisena, who, after being cruel to one of her lovers, and slighted by another, is finally rejected by the rejected of all. The other play, called "La Comedia Salvage," is taken in its first two acts from the well-known dramatic novel of \* "Celas- \* 64 tina"; the last act being filled with atrocities of Zepeda's own invention. It obtains its name from the Salvages or wild men, who figure in it, as such personages did in the old romances of chivalry and the old English drama, and is as strange and rude as its title implies. Neither of these pieces, however, can have done anything of consequence for the advancement of the drama at Seville, though each contains passages of flowing and apt verse, and occasional turns of thought that deserve to be called graceful.<sup>8</sup>

<sup>7</sup> One of the plays, not represented in the Huerta de Doña Elvira, is represented "en el Corral de Don Juan," and another in the Atarazanas, — Arsenal, or Ropewalks. None of them, I suppose, appeared on a public theatre.  
<sup>8</sup> These two pieces are in "Obras de Joachim Romero de Zepeda, Vezino de Badajoz," (Sevilla, 1582, 4to, ff. 130 and 118), and are reprinted by Ochoa and the opening of the second *jornada* of

The Metamorfosea may be cited for its pleasant and graceful tone of poetry, — lyrical, however, rather than dramatic, — and its air of the olden time. Another play found by Schack in MS is dated 1626, and implies that Zepeda was long a writer for the theatre. (Nachtrage, 1854, p. 59.) Other authors living in Seville at about the same period are mentioned by La Cueva in his "Exemplar Poético" (Se-

During the same period, there was at Valencia, as well as at Seville, a poetical movement in which the drama shared, and in which, I think, Lope de Vega, an exile in Valencia for several years, about 1585, took part. At any rate, his friend, Cristóval de Virues, of whom he often speaks, and who was born there in 1550, was among those who then gave an impulse to the theatrical taste of his native city. He claims to have first divided Spanish dramas into three *jornadas* or acts, and Lope de Vega assents to the claim; but they were both mistaken, for we now know that such a division was made by Francisco de Avendaño, not later than 1553, when Virues was but three years old.<sup>9</sup>

Only five of the plays of Virues, all in verse, are extant; and these, though supposed to have been written as early as 1579–1581, were not printed till 1609, when Lope de Vega had already given its full development and character to the popular theatre; so that it is not improbable some of the dramas of

Virues, as printed, may have been more or less altered and accommodated to \*the standard then considered as settled by the genius of his friend. Two of them, the "Cassandra" and the "Marcela," are on subjects apparently of the Valencian poet's own invention, and are extremely wild and extravagant; in "El Átila Furioso" above fifty persons come to an untimely end, without reckoning the crew of a galley who perish in the flames for the diversion of the tyrant and his followers; and in the "Semíramis,"<sup>10</sup> the

Some of them, from his account, wrote in the manner of the ancients; and perhaps Malara and Megia are the persons he refers to

subject is so handled that when Calderon used it again in his two plays entitled "La Hija del Aire," he could not help casting the cruel light of his own poetical genius on the clumsy work of his predecessor. All four of them are absurd.

The "Elisa Dido" is better, and may be regarded as an effort to elevate the drama. It is divided into five acts, and observes the unities, though Virues can hardly have comprehended what was afterwards considered as their technical meaning. Its plot, invented by himself, and little connected with the stories found in Virgil or the old Spanish chronicles, supposes the Queen of Carthage to have died by her own hand for a faithful attachment to the memory of Sichæus, and to avoid a marriage with Iarbas. It has no division into scenes, and each act is burdened with a chorus. In short, it is an imitation of the ancient Greek masters; and as some of the lyrical portions, as well as parts of the dialogue, are not unworthy the talent of the author of the "Monserrate," \* it \* 66 is, for the age in which it appeared, a remarkable composition. But it lacks a good development of the characters, as well as life and poetical warmth in

Leipzig in 1858, but published in London by Williams and Norgate. Its editor, whose name is not given, has in this rendered good service to early Spanish literature, but if, by his citation of Schack's authority in the preface, he desires to have it understood that that eminent critic concurs with him in regarding this wild play as a work of "extraordinary merit and value," I think he can hardly have understood Schack's criticism on it (Dramat. Lit., Vol. I. p. 296). Certainly he had not seen the original and only edition of Virues, 1609; and, from the note at the end of his list of *errata*, he does not appear always to comprehend the text he publishes. For, if he had printed "is" (Jorn. III. v. 690) with a

capital letter, as Virues did, he would have found that it was the river "Is," or the city "Is" on its banks, both mentioned by Herodotus, (Lib. I. c. 179,) near which was the abundance of asphalt referred to by Virues, and so the passage would have ceased to be "unintelligible" to him; and if he had read carefully the passage, (Jorn. III. v. 632, etc.,) he would not have found "a line evidently wanting" I rather think, too, that the editor of the "Semiframis" is wrong in supposing (Preface, p. xi) that Virues "got his learning at second hand", and that he will find he was wrong, if he will turn to the passage in Herodotus from which the Spanish poet seems to me to have taken his description of Babylon.

the action ; and being, in fact, an attempt to carry the Spanish drama in a direction exactly opposite to that of its destiny, it did not succeed.<sup>11</sup>

Such an attempt, however, was not unlikely to be made more than once ; and this was certainly an age favorable for it. The theatre of the ancients was now known in Spain. The translations, already noticed, of Villalobos in 1515, and of Oliva before 1530, had been followed, as early as 1540, by one from Euripides by Boscan ;<sup>12</sup> in 1555, by two from Plautus, the work of an unknown author ;<sup>13</sup> and in 1570 – 1577, by the “Plutus” of Aristophanes, the “Medea” of Euripides, and the six comedies of Terence, by Pedro Simon de Abril.<sup>14</sup> The efforts of Timoneda in his “Menennos,” and of Virues in his “Elisa Dido,” were among the consequences of this state of things, and were succeeded by others, two of which should be noticed.

The first is by Gerónimo Bermudez, a native of Galicia, who is supposed to have been born about 1530, and to have lived as late as 1589. He was a learned Professor of Theology at Salamanca, and published, at Madrid, in 1577, two dramas, which he somewhat boldly called “the first Spanish tragedies.”<sup>15</sup>

<sup>11</sup> In the address to the “Discreto Letor” prefixed to the only edition of the “Obras tragicas y líricas del Capitan Cristoval de Virues,” (that of Madrid, 1609, 12mo, ff 278,) we are told that he had endeavored in the first four tragedies “to unite what was best in ancient art and modern customs”; but the Dido, he says, “va escrita toda por el estilo de Griegos i Latinos con cuidado y estudio” See, also, L F Moratin, Catálogo, Nos 140, 141, 146, 148, 149, with Martinez de la Rosa, Obras, Tom. <sup>12</sup> The translation of Boscan from

Euripides was never published, though it is included in the permission to print that poet’s works, given by Charles V to Boscan’s widow, 18th February, 1543, prefixed to the first edition of his Works, which appeared that year at Barcelona. Boscan died in 1540

They are both on \*the subject of Inez de \*67 Castro ; both are in five acts, and in various verse ; and both have choruses in the manner of the ancients. But there is a great difference in their respective merits. The first “Nise Lastimosa,” or Inez to be Compassionated,—Nise being a poor anagram of Inez,—is hardly more than a skilful translation of the Portuguese tragedy of “Inez de Castro,” by Ferreira, which, with considerable defects in its structure, is yet full of tenderness and poetical beauty. The last, “Nise Laureada,” or Inez Triumphant, takes up the tradition where the first left it, after the violent and cruel death of the princess, and gives an account of the coronation of her ghastly remains above twenty years after their interment, and of the renewed marriage of the prince to them ;—the closing scene exhibiting the execution of her murderers with a coarseness, both in the incidents and in the language, as revolting as can well be conceived. Neither probably produced any perceptible effect on the Spanish drama ; and yet the “Nise Lastimosa” contains passages of no little poetical merit ; such as the beautiful chorus on Love at the end of the first act, the dream of Inez in the third, and the truly Greek dialogue between the princess and the women of Coimbra ; for the last two

VI , 1772) contains both the dramas of Bermudez, with notices of his life

I think we have nothing else of Bermudez, except his “Hesperodia,” a panegyric on the great Duke of Alva, written in 1589, after its author had travelled much, as he says, in France and Africa. It is a cold elegy, originally composed in Latin, and not printed till it appeared in Sedano, Par-naso (Tom VII , 1773, p 149). Parts of it are somewhat obscure , and of the whole, translated into Spanish to please a friend and that friend’s wife, the author truly says that it is not so inter-

esting that they “will lose sleep by it ” Being a Galician, he hints, in the Dedication of his “Nise Lastimosa,” that Castilian was not easy to him. I find, however, no traces of awkwardness in his manner, and his Gallego helped him in managing Ferreira’s Portuguese. The two tragedies, it should be noted, were published under the assumed name of Antonio de Silva ;—perhaps because he was a Dominican monk. The volume (Madrid, Sanchez, 1577) is a mean one, and the type a poor sort of Italics.

of which, however, Bermudez was directly indebted to Ferreira.<sup>16</sup>

Three tragedies by Lupercio Leonardo de Argensola, the accomplished lyric poet, who will hereafter be amply noticed, produced a much more considerable sensation when they first appeared, though they \* 68 were soon afterwards \* as much neglected as their predecessors. He wrote them when he was hardly more than twenty years old, and they were acted about the year 1585. "Do you not remember," says the canon in *Don Quixote*, "that, a few years ago, there were represented in Spain three tragedies composed by a famous poet of these kingdoms, which were such that they delighted and astonished all who heard them; the ignorant as well as the judicious, the multitude as well as the few; and that these three alone brought more profit to the actors than the thirty best plays that have been written since?"—"No doubt," replied the manager of the theatre, with whom the canon was conversing,—"no doubt you mean the 'Isabela,' the 'Philis,' and the 'Alexandra.'"<sup>17</sup>

This statement of Cervantes is certainly extraordinary, and the more so from being put into the mouth of the wise canon of Toledo. But, notwithstanding the flush of immediate success which it implies, all trace of these plays was soon so completely lost that, for a long period, the name of the famous poet Cervantes had referred to was not known, and it was even suspected that he had intended to compliment himself. At last, between 1760 and 1770, two of them — the "Alexandra" and "Isabela" — were accidentally dis-

covered, and all doubt ceased. They were found to be the work of Lupercio Leonardo de Argensola.<sup>18</sup>

But, unhappily, they quite failed to satisfy the expectations that had been excited by the good-natured praise of Cervantes. They are in various verse, fluent and pure ; and were intended to be imitations of the Greek style of tragedy, called forth, perhaps, by the recent attempts of Bermudez. Each, however, is divided into three acts ; and the choruses, originally prepared for them, are \* omitted. The \* 69 Alexandra is the worse of the two. Its scene is laid in Egypt ; and the story, which is fictitious, is full of loathsome horrors. Every one of its personages, except perhaps a messenger, perishes in the course of the action ; children's heads are cut off and thrown at their parents on the stage ; and the false queen, after being invited to wash her hands in the blood of the person to whom she was unworthily attached, bites off her own tongue, and spits it at her monstrous husband. Treason and rebellion form the lights in a picture composed mainly of such atrocities.

The Isabela is better ; but still is not to be praised. The story relates to one of the early Moorish Kings of Saragossa, who exiles the Christians from his kingdom in a vain attempt to obtain possession of Isabela, a Christian maiden with whom he is desperately in love, but who is herself already attached to a noble Moor whom she has converted, and with whom, at last, she

<sup>18</sup> They first appeared in Sedano's "Parnaso Español," Tom. VI., 1772. All the needful explanations about them are in Sedano, Moratin, and Martinez de la Rosa. The "Philis" has not been found. The MS originals of the two published plays were, in 1772, in the Archives of the "Escuelas Pías" of the city of Balbastro, in Aragon, where

they were deposited by the heir of L. Leonardo de Argensola. They are said to contain a better text than the MSS. used by Sedano, and ought, therefore, for the honor of the author, to be inquired after. Sebastian de Latre, *Essayso sobre el Teatro Español*, folio, 1773, Prologo.

suffers a triumphant martyrdom. The incidents are numerous, and sometimes well imagined; but no dramatic skill is shown in their management and combination, and there is little easy or living dialogue to give them effect. Like the *Alexandra*, it is full of horrors. The nine most prominent personages it represents come to an untimely end, and the bodies, or at least the heads, of most of them are exhibited on the stage, though some reluctance is shown, at the conclusion, about committing a supernumerary suicide before the audience. Fame opens the piece with a prologue, in which complaints are made of the low state of the theatre; and the ghost of Isabela, who is hardly dead, comes back at the end with an epilogue very flat and quite needless.

With all this, however, a few passages of poetical eloquence, rather than of absolute poetry, are scattered through the long and tedious speeches of which the piece is principally composed; and once or twice there is a touch of passion truly tragic, as in the discussion between Isabela and her family on the threatened exile and ruin of their whole race, and in that be-

tween Adulce, her lover, and Aja, the king's  
\* 70 sister, who disinterestedly loves \* Adulce, notwithstanding she knows his passion for her fair Christian rival. But still it seems incomprehensible how such a piece should have produced the popular dramatic effect attributed to it, unless we suppose that the Spaniards had from the first a passion for theatrical exhibitions, which, down to this period, had been so imperfectly gratified, that anything dramatic, produced under favorable circumstances, was run after and admired.<sup>19</sup>

<sup>19</sup> There are several old ballads on the subject of this play. See Wolf, "Über eine Sammlung Spanischer Romanzen" (Wien, 1850, pp. 33, 34);

The dramas of Argensola, by their date, though not by their character and spirit, bring us at once within the period which opens with the great and prevalent names of Cervantes and Lope de Vega. They, therefore, mark the extreme limits of the history of the early Spanish theatre; and if we now look back and consider its condition and character during the long period we have just gone over, we shall easily come to three conclusions of some consequence.<sup>20</sup>

The first is, that the attempts to form and develop a national drama in Spain have been few and rare. During the two centuries following the first notice of it, about 1250, we cannot learn distinctly that anything was undertaken but rude exhibitions in pantomime; though it is not unlikely dialogues may sometimes have been added, such as we find in the more imperfect religious pageants produced at the same period in England and France. During the next century, which brings us down to the time of Lope de Rueda, we have nothing better than "Mingo Revulgo," which is rather a spirited political satire than a drama, Enzina's and Vicente's dramatic eclogues, and Naharro's more dramatic "Propaladia," \* with a \*<sup>71</sup> few translations from the ancients which were little noticed or known. And during the half-century which Lope de Rueda opened with an attempt to

but the historical tradition is in the "Cronica General," Parte III. c. 22, ed 1604, ff 83, 84

<sup>20</sup> It seems probable that a considerable number of dramas belonging to the period between Lope de Rueda and Lope de Vega, or between 1560 and 1590, could even now be collected, whose names have not yet been given to the public, but it is not likely that they would add anything important to our knowledge of the real character or progress of the drama at that time.

Aribau, Biblioteca, Tom II pp 163, 225, notes. The names of many such — part of them in Spanish, part in Latin, and part in both languages, but all akin to the old Mysteries and Autos — may be found in the Spanish translation of this History, Tom II pp 543—550. A considerable number of them seem to have been represented in religious houses, where, as we know, a more secular drama afterwards intruded and found much favor.

create a popular drama, we have obtained only a few farces from himself and his followers, the little that was done at Seville and Valencia, and the countervailing tragedies of Bermudez and Argensola, who intended, no doubt, to follow what they considered the safer and more respectable traces of the ancient Greek masters. Three centuries and a half, therefore, or four centuries, furnished less dramatic literature to Spain than the last half-century of the same portion of time had furnished to France and Italy; and near the end of the whole period, or about 1585, it is apparent that the national genius was not so much turned towards the drama as it was at the same period in England, where Greene and Peele were just preparing the way for Marlowe and Shakespeare.

In the next place, the apparatus of the stage, including scenery and dresses, was very imperfect. During the greater part of the period we have gone over, dramatic exhibitions in Spain were either religious pantomimes shown off in the churches to the people, or private entertainments given at court and in the houses of the nobility. Lope de Rueda brought them out into the public squares, and adapted them to the comprehension, the taste, and the humors of the multitude. But he had no theatre anywhere, and his gay farces were represented on temporary scaffolds, by his own company of strolling players, who stayed but a few days at a time in even the largest cities, and were sought, when there, chiefly by the lower classes of the people.

The first notice, therefore, we have of anything approaching to a regular establishment—and this is far removed from what that phrase generally implies—is in 1568, when an arrangement or compromise between

the Church and the theatre was begun, traces of which have subsisted at Madrid and elsewhere down to our own times. Recollecting, no doubt, the origin of dramatic representations in Spain for religious edification, the government ordered, in form, that no actors should make an \* exhibition in Madrid, except \*<sup>72</sup> in some place to be appointed by two religious brotherhoods designated in the decree, and for a rent to be paid to them; — an order in which, after 1583, the general hospital of the city was included.<sup>21</sup> Under this order, as it was originally made, we find plays acted from 1568; but only in the open area of a court-yard, *corral*, without roof, seats, or other apparatus, except such as is humorously described by Cervantes to have been packed, with all the dresses of the company, in a few large sacks.

In this state things continued several years. None but strolling companies of actors were known, and they remained but a few days at a time even in Madrid. No fixed place was prepared for their reception; but sometimes they were sent by the pious brotherhoods to one court-yard, and sometimes to another. They acted in the daytime, on Sundays and other holidays, and then only if the weather permitted a performance in the open air; — the women separated from the men,<sup>22</sup> and the entire audience so small, that the profit yielded by the exhibitions to the religious societies and the hospital rose only to eight or ten dollars each time.<sup>23</sup> At last, in 1579 and 1583, two court-yards were permanently fitted up for them, belonging to

<sup>21</sup> The two brotherhoods were the Cofradía de la Sagrada Pasión, established 1565, and the Cofradía de la Soledad, established 1567. The accounts of the early beginnings of the theatre at Madrid are awkwardly enough given

by C. Pellicer in his "Origen de la Comedia en España." But they can be found so well nowhere else. See Tom. I. pp. 43-77.

<sup>22</sup> C. Pellicer, *Origen*, Tom. I. p. 83

houses in the streets of the “Príncipe” and “Cruz.” But, though a rude stage and benches were provided in each, a roof was still wanting; the spectators all sat in the open air, or at the windows of the house whose court-yard was used for the representation; and the actors performed under a slight and poor awning, without anything that deserved to be called scenery. The theatres, therefore, at Madrid, as late as 1586, could not be said to be in a condition materially to further any efforts that might be made to produce a respectable national drama.

In the last place, the pieces that had been written had not the decided, common character \*73 on which a national \*drama could be fairly founded, even if their number had been greater. Juan de la Enzina’s eclogues, which were the first dramatic compositions represented in Spain by actors who were neither priests nor cavaliers, were really what they were called, though somewhat modified in their bucolic character by religious and political feelings and events; — two or three of Naharro’s plays, and several of those of Cueva, give more absolute intimations of the intriguing and historical character of the stage, though the effect of the first at home was delayed, from their being for a long time published only in Italy; — the translations from the ancients by Villalobos, Oliva, Abril, and others, seem hardly to have been intended for representation, and certainly not for popular effect; — and Bermudez, with one of his pieces stolen from the Portuguese and the other full of horrors of his own, was, it is plain, little thought of at his first appearance, and soon quite neglected.

There were, therefore, before 1586, only two persons

to whom it was possible to look for the establishment of a popular and permanent drama. The first of them was Argensola, whose three tragedies enjoyed a degree of success before unknown ; but they were so little in the national spirit, that they were early overlooked, and soon completely forgotten. The other was Lope de Rueda, who, himself an actor, wrote such farces as he found would amuse the common audiences he served, and thus created a school in which other actors, like Alonso de la Vega and Cisneros, wrote the same kind of farces, chiefly in prose, and intended so completely for temporary effect, that hardly one of them has come down to our own times. Of course, the few and rare efforts made before 1586 to produce a drama in Spain had been made upon such various or contradictory principles, that they could not be combined so as to constitute the safe foundation for a national theatre.

But, though the proper foundation was not yet laid, all was tending to it and preparing for it. The stage, rude as it was, had still the great advantage of being confined to two spots, which, it is worth notice, have \* continued to be the sites of the two \* 74 principal theatres of Madrid ever since. The number of authors, though small, was yet sufficient to create so general a taste for theatrical representations that Lopez Pinciano, a learned man, and one of a temper little likely to be pleased with a rude drama, said, “When I see that Cisneros or Galvez is going to act, I run all risks to hear him ; and, when I am in the theatre, winter does not freeze me, nor summer make me hot.”<sup>24</sup> And finally, the public, who resorted to the

imperfect entertainments offered them, if they had not determined what kind of drama should become national, had yet decided that a national drama should be formed, and that it should be founded on the national character and manners.

During the period just gone over—that between the death of Lope de Rueda and the success of Lope de Vega—the traces of whatever regards the theatre are to be best found in Martín’s “Catalogo” (Obras, 1830, Tom I pp 192–300) But there were many more rude efforts made than he has chronicled, though none of consequence Gayangos, in the Spanish translation of this History, (see note 20 of this chap,) has collected the titles of a

good many, and could, no doubt, easily have collected more, if they had been worth the trouble Some of those he records have been printed, but more are in manuscript; some are in Latin, some in Spanish, and some in both languages; some are religious, and some secular. Many of them were probably represented in religious houses, in the colleges of the Jesuits, and in convents, on occasions of ceremony, like the election of a Bishop, or the canonization of a Saint. Of others no account can be given. But all of them taken together give no intimation of a different state of the drama from that already sufficiently described. We see, indeed, from them very plainly that it was a period of change; but we see nothing else, except that the change was very slow.

LUIS DE LEON.—EARLY LIFE.—PERSECUTIONS — TRANSLATION OF THE CANTICLES — NAMES OF CHRIST — PERFECT WIFE AND OTHER PROSE WORKS — HIS DEATH.—HIS POEMS.—HIS CHARACTER.

IT should not be forgotten that, while we have gone over the beginnings of the Italian school and of the existing theatre, we have had little occasion to notice one distinctive element of the Spanish character, which is yet almost constantly present in the great mass of the national literature: I mean the religious element. A reverence for the Church, or, more properly, for the religion of the Church, and a deep sentiment of devotion, however mistaken in the forms it wore, or in the direction it took, had been developed in the old Castilian character by the wars against Islamism, as much as the spirit of loyalty and knighthood, and had, from the first, found no less fitting poetical forms of expression. That no change took place in this respect in the sixteenth century, we find striking proof in the character of a distinguished Spaniard, who lived about twenty years later than Diego de Mendoza, but one whose gentler and graver genius easily took the direction which that of the elder cavalier so decidedly refused.

I refer, of course, to Luis Ponce de Leon, called, from his early and unbroken connection with the Church, "Brother Luis de Leon," — Fray Luis de Leon. He was born in Belmonte, in 1528, and lived there until he was five or six years old, when his father, who

was a "king's advocate," removed his family first to Madrid, and then to Valladolid. The young poet's advantages for education were such as were enjoyed at that time only by persons whose position in society was a favored one; and, at fourteen, he was \* 76 sent to the neighboring \* University of Salamanca, where, following the strong religious tendencies of his nature, he entered a monastery of the order of Saint Augustin. From this moment the final direction was given to his life. He never ceased to be a monk; and he never ceased to be attached to the University where he was bred. In 1560 he became a Licentiate in Theology, and immediately afterwards was made a Doctor of Divinity. The next year, at the age of thirty-four, he obtained the chair of Saint Thomas Aquinas, which he won after a public competition against several opponents, four of whom were already professors; and to these honors he added, ten years later, that of the chair of Sacred Literature.

By this time, however, his influence and consideration had gathered round him a body of enemies, who diligently sought means of disturbing his position.<sup>1</sup> The chief of them were either leading monks of the rival order of Saint Dominick at Salamanca, with whom he seems to have had, from time to time, warm discus-

Miguel Salvá y D. Pedro Sainz de Baranda" (Tomas X, XI., Madrid, 1847-8, 8vo) is to be found the entire official record of the trial of Luis de Leon, taken from the Archives of the Inquisition at Valladolid, and now in the National Library at Madrid, — by far the most important authentic statement known to me respecting the treatment of men of letters who were accused before that

formidable tribunal, and probably the most curious and important one in existence, whether in MS or in print. Its multitudinous documents fill more than nine hundred pages, everywhere teeming with instruction and warning, on the subject of ecclesiastical usurpations, and the noiseless, cold, subtle means by which they crush the intellectual freedom and healthy culture of a people. For the enmity of the Dominicans — in whose hands was the Inquisition — to Luis de Leon, and for the jealousy of his defeated competitors, see these Documentos, Tom X p 100, and many other places.

sions in the public halls of the University, or else they were the competitors whom he had defeated in open contest for the high offices he had obtained. In each case the motives of his adversaries were obvious.

With such persons, an opportunity for an attack would soon be found. The pretext first seized upon was that he had made a translation of the Song of Solomon into Castilian, treating it as if it were an eclogue. To this was soon added the suggestion that, in his discussions in “the Schools” or public halls of the University, he \*had declared the \*<sup>77</sup> Vulgate version of the Bible to be capable of improvement. And, finally, it was intimated that while, on the one side, he had leaned to new and dangerous opinions,—meaning Lutheranism,—on the other side, he had shown a tendency to Jewish interpretations of the Scriptures, in consequence of a Hebrew taint in his blood,—always odious in the eyes of those Spaniards who could boast that their race was pure, and their descent orthodox.<sup>2</sup>

The first formal denunciation of him was made at Salamanca, before Commissaries of the Holy Office, on the seventeenth of December, 1571. But, at the outset, everything was done in the strictest secrecy, and wholly without the knowledge or suspicion of the accused. In the course of this stage of the process, about twenty witnesses were examined at Salamanca, who made their statements in writing, and the testimony of others was sent for to Granada, Valladolid, Murcia, Carthagena, Arévalo, and Toledo; so that, from the beginning, the affair took the character it preserved to the last,—that of a wide-spread con-

spiracy against a person whom it was not safe to assail without the most cautious and thorough preparation.<sup>3</sup>

At last, when all was ready, the bolt fell. On the sixth of March, 1572, he was personally summoned before the Tribunal of the Inquisition at Salamanca, and accused of having made and circulated a vernacular translation of Solomon's Song; — the other complaints being apparently left to be urged or not, as might afterwards be deemed expedient. His answer — which, in the official process, is technically, but most unjustly, called his "confession," when, in fact, it is his defence — was instant, direct, and sincere. He avowed, without hesitation, that he had made such a translation as was imputed to him, but that he had made it for a nun [*una religiosa*], to whom he had personally carried it, and from whom he had personally received it back

again soon afterward; — that, unknown to him, \* 78 it had subsequently \* been copied by a friar having charge of his cell, and so had come into secret circulation; — that he had vainly endeavored to stop its further diffusion, by collecting the various transcripts that had been thus surreptitiously and fraudulently made; — and that his feeble health alone had hindered him from completing — what he had already begun — a Latin version of the book in question, with a commentary, setting forth his opinions concerning it in such a way as to leave no doubt of their strict orthodoxy. At the same time he declared, by the most explicit and solemn words, his unconditional submission to the authority of the Holy Office, and his devout purpose, in all respects, and

<sup>3</sup> Documentos, Tom. X. pp. 26, 31, 74, 78, 81, 92. Later, they sent for testimony to Cuzco, in Peru, whither his translation of Solomon's Song had wandered, p. 505.

at all times, to cherish and defend all the doctrines and dogmas of the Roman Catholic Church.<sup>4</sup>

At this point in the inquiry,— and after this full declaration of the accused,— if there had been no motives for the investigation but such as were avowed, the whole affair would, no doubt, have been stopped, and nothing more would have been heard of it. But this was far from the case. His enemies were personal, bitter, and unscrupulous; and they had spread wide the suspicion — as was done in relation to his friend Arias Montano — that his great biblical learning was fast leading him to heresy; if, indeed, he were not already at heart a Protestant. His examination, therefore, was pushed on with unrelenting severity. His cause was removed from Salamanca to the higher tribunal at Valladolid; and, on the twenty-seventh of March, 1572, he was arrested and confined in the secret prisons [*carceles secretas*] of the Inquisition, where, for a time, he was denied the use of a knife to cut his food, and where he at no period obtained a sheet of paper or a book, except on the especial, recorded permission of the judges before whom he was on trial. The other accusations, too, were now urged against him by his persecutors, though, at last, none were relied upon for his conviction save those regarding the Song of Solomon and the Vulgate.

But to all the charges, and to all the insinuations against him, as they were successively brought up, he replied with \*sincerity, distinctness, and \*79 power. Above fifty times he was summoned in person before his judges, and the various defences which he read on these occasions, and which are still

extant in his own handwriting, make above two hundred printed pages,—not, indeed, marked with the rich eloquence which elsewhere flows so easily from his pen, but still written in the purest Castilian, and with extraordinary acuteness and perspicacity.<sup>5</sup>

At last, when all the resources of ecclesiastical ingenuity had been employed, in vain, for nearly five years, to break his firm though gentle spirit, the judgment of his seven judges was pronounced on the twenty-eighth of September, 1576. It was a very strange one. Four of their number voted that “he should be put to the rack [*quistion de tormento*], to ascertain his *intentions* in relation to whatever had been indicated and testified against him; but,” they added, “that the rack should be applied moderately, from regard to the delicate health of the accused, and that, afterwards, further order should be taken in the case.” Two more of his judges were of opinion that he should be rebuked in the Halls of the Holy Office, for having ventured, at such a time, to move matters tending to danger and scandal;—that, in presence of all persons belonging to the University, he should confess certain propositions gathered out of his papers to be “suspicious and ambiguous”;—and, finally, that he should be forbidden from all public teaching whatsoever. One of the judges asked leave to give his opinion separately; but whether he ever did or not, and, if he did, whether it was more or less severe than the opinions of his coadjutors, does not appear.

<sup>5</sup> In all cases of trial before the tribunal of the Inquisition, though the written statements of the witnesses might be given to the party accused, their names never were. Luis de Leon had the anonymous testimony of his enemies before him, and, from internal evidence, often conjectured who they were, naming them boldly, and treat-

ing them sometimes with no little severity for their injustice and falsehood. Throughout the trial he showed a genuine simplicity of heart, a careful, wise logic, and an unshaken resolution Documentos, Tom. X. pp 317, 326, 357, 368–371, 423, 495, and other passages.

But all of them — even the least harsh — were wholly unjustified by any proof brought against the prisoner, or by anything shown in his spirit during the trial. Indeed, \* the lightest punishment proposed implied a complete degradation and disgrace of the devout monk, while the punishment proposed by the majority of the tribunal demanded a degree of cruelty which his feeble frame could hardly have endured. Happily, he was compelled to undergo neither sentence. The members of the Supreme Council of the Inquisition at Madrid, who had been repeatedly consulted on different points in the trial, as it went on, showed their accustomed cold, impassive caution in their final judgment; for they passed over everything previously done in absolute silence; and, by a new and solemn decree, of December 7, 1576, decided that the accused, Luis de Leon, be fully acquitted [*absuelto de la instancia deste juicio*], being previously warned to be circumspect both how and where he should discuss hereafter such matters as had given rise to his trial, and to observe, in relation to them, great moderation and prudence, so that all scandal and occasion of error might cease; and requiring, furthermore, that his vernacular translation of Solomon's Song should be suppressed. This final decree having been announced to him in form, at Valladolid, he was forthwith released from prison, not, however, without the customary caution to bear no ill-will against any person whom he might suspect to have testified against him, and to observe absolute secrecy concerning whatever related to his trial, under pain of full excommunication, and such other punishments as might be deemed needful; — to all which, by his sign-manual, he gave a promise of true obedience and sub-

mission, which, there is every reason to believe, he faithfully kept.<sup>6</sup>

Thus was ended this extraordinary and cruel trial, whose minute details and discussions, spread over its voluminous original documents, show — as can be shown by no general statement of its course — how acute, wary, and unscrupulous was the Inquisition in persecuting men of the highest gifts, and of the \* 81 most submissive religious \* obedience, if they were either obnoxious to the jealousy and ill-will of its members, or suspected of discussing questions that might disturb the sharply defined faith exacted from every subject of the Spanish crown. But more and worse than this, the very loyalty with which Luis de Leon bowed himself down before the dark and unrelenting tribunal, into whose presence he had been summoned, — sincerely acknowledging its right to all the powers it claimed, and submitting faithfully to all its decrees, — is the saddest proof that can be given of the subjugation to which intellects the most lofty and cultivated had been reduced by ecclesiastical tyranny, and the most disheartening augury of the degradation of the national character, that was sure to follow.

But the University remained faithful to Luis de Leon through all his trials; — so far faithful, at least, that his academical offices were neither filled by others, nor declared vacant. As soon, therefore, as he emerged from the cells of the Inquisition, he appeared again in the old halls of Salamanca; and it is a beautiful circumstance attending his restoration, that when,

on the thirtieth of December, 1576, he rose for the first time in his accustomed place before a crowded audience, eager to hear what allusion he would make to his persecutions, he began by simply saying, “As we remarked when we last met,” and then went on as if the five bitter years of his imprisonment had been a blank in his memory, bearing no record of the cruel treatment he had suffered.

It seems, however, to have been thought advisable that he should vindicate his reputation from the suspicions that had been cast upon it; and, therefore, in 1580, at the request of his friends, he published an extended commentary on the Canticles, interpreting each part in three different ways,—directly, symbolically, and mystically,—and giving the whole as theological and obscure a character as the most orthodox could desire, though still without concealing his opinion that its most obvious form is that of a pastoral eclogue.<sup>7</sup>

\* Another work on the same subject, but in \* 82 Spanish, and in most respects like the one that had caused his imprisonment, was also prepared by him, and found among his manuscripts after his death. But it was not thought advisable to print it till 1798. Even then a version of the Canticles, in Spanish oc-

<sup>7</sup> A Spanish poetical paraphrase of Solomon's Song was made at about the same time, and on the same principle, by Arias Montano, the biblical scholar. When it was first published, I do not know; but it may be found in Faber's Floresta, No. 717; and, though it is diffuse, parts of it are beautiful. From several passages in the trial of Luis de Leon, it is certain that there was a good deal of intercourse between him and Montano, and even that they had conferred together about this portion of the Scriptures. It is, moreover, one of the significant facts in the trial of Luis de Leon that, being in the car-

*celes secretas* at Valladolid, he was led to believe, in 1574, that Montano was dead, though he did not die till 1598, twenty-four years afterwards. Now, this could hardly have occurred, strictly cut off as Luis de Leon was from all external intercourse, except through the officers of the Inquisition, nor for any purpose except that of leading Luis de Leon to compromise his friend Montano, who, as we know, escaped with difficulty from the clutches of the Holy Office, who long sought grounds for destroying him. *Documentos*, Tom. XI. pp. 18, 19, 215, etc.

taves, as an eclogue, intended originally to accompany it, was not added, and did not appear till 1806; — a beautiful translation, which discovers, not only its author's power as a poet, but the remarkable freedom of his theological inquiries, in a country where such freedom was, in that age, not tolerated for an instant.<sup>8</sup> The fragment of a defence of this version, or of some parts of it, is dated from his prison, in 1573, and was found long afterwards among the state papers of the kingdom in the archives of Simancas.<sup>9</sup>

While in prison he prepared a long prose work, which he entitled “The Names of Christ.” It is a singular specimen at once of Spanish theological learning, eloquence, and devotion. Of this, between 1583 and 1585, he published three books, but he never completed it.<sup>10</sup> It is thrown into the form of a dialogue, like the “Tusculan Questions,” which it was probably intended to imitate; and its purpose is, by means of successive discussions of the character of the Saviour, as set forth under the names of Son, Prince, Shepherd, King, etc., to excite devout feelings in those who read

it. The form, however, is not adhered to with \* 83 great strictness. The \* dialogue, instead of being a discussion, is, in fact, a succession of speeches; and once, at least, we have a regular sermon, of as much merit, perhaps, as any in the language;<sup>11</sup> so that, taken together, the entire work may be regarded as a series of declamations on the character of Christ, as that character was regarded by the more devout portions of the Spanish Church in its

author's time. Many parts of it are eloquent, and its eloquence has not unfrequently the gorgeous coloring of the elder Spanish literature; such, for instance, as is found in the following passage, illustrating the title of Christ as the Prince of Peace, and proving the beauty of all harmony in the moral world from its analogies with the physical:—

“Even if reason should not prove it, and even if we could in no other way understand how gracious a thing is peace, yet would this fair show of the heavens over our heads, and this harmony in all their manifold fires, sufficiently bear witness to it. For what is it but peace, or, indeed, a perfect image of peace, that we now behold, and that fills us with such deep joy? Since if peace is, as Saint Augustin, with the brevity of truth, declares it to be, a quiet order, or the maintenance of a well-regulated tranquillity in whatever order demands,—then what we now witness is surely its true and faithful image. For while these hosts of stars, arranged and divided into their several bands, shine with such surpassing splendor, and while each one of their multitude inviolably maintains its separate station, neither pressing into the place of that next to it, nor disturbing the movements of any other, nor forgetting its own; none breaking the eternal and holy law God has imposed on it; but all rather bound in one brotherhood, ministering one to another, and reflecting their light one to another,—they do surely show forth a mutual love, and, as it were, a mutual reverence, tempering each other's brightness and strength into a peaceful unity and power, whereby all their different influences are combined into one holy and mighty harmony, universal and everlasting. And therefore may it be most

\* 84 truly said, not \*only that they do all form a fair and perfect model of peace, but that they all set forth and announce, in clear and gracious words, what excellent things peace contains within herself, and carries abroad whithersoever her power extends.”<sup>12</sup>

The eloquent treatise on the Names of Christ was not, however, the most popular of the prose works of Luis de Leon. This distinction belongs to his “Perfecta Casada,” or Perfect Wife; a treatise which he composed, in the form of a commentary on some portions of Solomon’s Proverbs, for the use of a lady newly married, and which was first published in 1583.<sup>13</sup> But it is not necessary specially to notice either this work, or his Exposition of Job, in two volumes, accompanied with a poetical version, which he began in prison for his own consolation, and finished the year of his death, but which none ventured to publish till 1779.<sup>14</sup> Both are marked with the same humble faith, the same strong enthusiasm, and the same elaborate, rich eloquence, that appear, from time to time, in the work on the Names of Christ; though perhaps the last, which received the careful corrections of its author’s matured genius, has a serious and settled power greater

<sup>12</sup> Obras, Tom III pp. 342, 343. This beautiful passage may well be compared to his more beautiful ode, entitled “Noche Serena,” to which it has an obvious resemblance. Luis de Leon, like most other successful authors, wrote with great care. In the letter to his friend Puerto Carrero, prefixed to the Third Book of the “Nombres de Christo,” he explains, with not a little spirit, his reasons for writing in Spanish, and not in Latin, which it seems had been made matter of reproach to him. This was in 1585, the same year that the works of Oliva were published, written in Spanish and defended as such. (See *ante*, Chap. V.

with notes 6, 12, and 25) But Luis de Leon goes farther than Oliva did, and shows how difficult it is to write well in Spanish. “El bien hablar,” he says, “no es comun, sino negocio de particular juicio, asi en lo que se dice, como en la manera como se dice; y negocio que de las palabras que todos hablan, elige las que convienen y mira el sonido dellas, y aun cuenta á veces las letras, y las pese, y las mide, y las compone, para que no solamente digan con claridad lo que se pretende decir, sino tambien con armonia y dulcura.”

than he has shown anywhere else. But the characteristics of his prose compositions — even those which from their nature are the most strictly didactic — are the same everywhere; and the rich language and imagery of the passage already cited afford a fair specimen of the style towards which he constantly directed his efforts.

Luis de Leon's health never recovered from the shock it suffered in the cells of the Inquisition. He lived, indeed, nearly fourteen years after his release; but most of his works, whether in Castilian or in Latin, were written before his imprisonment or during its continuance, while those he undertook afterwards, like his account of Santa Teresa and some others, were \* never finished. His life was always, from \* 85 choice, very retired, and his austere manners were announced by his habitual reserve and silence. In a letter that he sent with his poems to his friend Puerto Carrero, a statesman at the court of Philip the Second and a member of the principal council of the Inquisition, he says, that, in the kingdom of Old Castile, where he had lived from his youth, he could hardly claim to be familiarly acquainted with ten persons.<sup>15</sup> Still he was extensively known, and was held in great honor. In the latter part of his life especially, his talents and sufferings, his religious patience and his sincere faith, had consecrated him in the eyes alike of his friends and his enemies. Nothing relating to the monastic brotherhood of which he was a member, or to the University where he taught, was undertaken without his concurrence and support; and when he died, in 1591, he was in the exercise of a constantly increasing influence, having just been chosen the head of his

<sup>15</sup> Obras, Tom VI p 2.

Order, and being engaged in the preparation of new regulations for its reform.<sup>16</sup>

But, besides the character in which we have thus far considered him, Luis de Leon was a poet, and a poet of no common genius. He seems, it is true, to have been little conscious, or, at least, little careful, of his poetical talent; for he made hardly an effort to cultivate it, and never took pains to print anything, in order to prove its existence to the world. Perhaps, too, he showed more deference than was due to the opinion of many persons of his time, who thought poetry an occupation not becoming one in his position;

for, in the prefatory notice to his sacred odes, he \* 86 says, in a deprecating \* tone, “Let none regard verse as anything new and unworthy to be applied to Scriptural subjects, for it is rather appropriate to them; and so old is it in this application, that, from the earliest ages of the Church to the present day, men of great learning and holiness have thus employed it. And would to God that no other poetry were ever sounded in our ears; that only these sacred tones were sweet to us; that none else were heard at night in the streets and public squares; that the child might still lisp it, the retired damsel find in it her best solace, and the industrious tradesman make it the relief of his toil! But the Christian name is now sunk to such immodest and reckless degradation, that we set our

<sup>16</sup> The best materials for the life of Luis de Leon, down to the end of his trial and imprisonment in 1576, are contained in his accounts of himself on that occasion (Documentos, Tom. X. pp. 182, 257, etc.), after which a good deal may be found in notices of him in the curious MS. of Pacheco, published, Semanario Pintoresco, 1844, p. 374,—those in N. Antonio, Bib. Nova, *ad verb.*;—in Sedano, Parnaso

Español, Tom. V; and in the Preface to a collection of his poetry, published at Valencia by Mayans y Siscar, 1761, the last being also found in Mayans y Siscar, “Cartas de Varios Autores” (Valencia, 1773, 12mo, Tom. IV. pp. 398, etc.). Pacheco adds a description of his person, and the singular fact, not elsewhere noticed, that he amused himself with the art of painting, and succeeded in his own portrait.

sins to music, and, not content with indulging them in secret, shout them joyfully forth to all who will listen."

But, whatever may have been his own feelings on the suitableness of such an occupation to his profession, it is certain that, while most of the poems he has left us were written in his youth, they were not collected by him till the latter part of his life, and then only to please a personal friend, who never thought of publishing them; so that they were not printed at all till forty years after his death, when Quevedo gave them to the public, in the hope that they might help to reform the corrupted taste of the age. But from this time they have gone through many editions, though still they never appeared properly collated and arranged till 1816.<sup>17</sup>

They are, however, of great value. They consist of versions of all the Eclogues and two of the Georgics of Virgil, about thirty Odes of Horace, about forty Psalms, and a few passages from the Greek and Italian poets; all executed with freedom and spirit, and all in a genuinely Castilian style. His translations, however, seem to have been only in the nature of exercises and amusements. But, though he thus acquired great \* facility and exactness in his versification, he wrote little. His original poems fill no more than about a hundred pages; but there is hardly a line of them which has not its value; and the whole, when taken together, are to be placed at the head of

<sup>17</sup> The poems of Luis de Leon fill the last volume of his Works, but there are several among them that are probably spurious. *Per contra*, a few more translations by his hand, and especially an ode to a religious life, — *A la vida religiosa*, — may be found in Vol. XXXVII of the *Biblioteca de Autores Espanoles*, 1855, which consists of all his poetical works, and a selection of

his works in prose, together with the most important part of the documents concerning his trial by the Inquisition. Spanish lyric poetry. They are chiefly religious, and the source of their inspiration is not to be mistaken. Luis de Leon had a Hebrew soul, and kindles his enthusiasm almost always from the Jewish Scriptures. Still he preserved his nationality unimpaired. Nearly all the best of his poetical compositions are odes written in the old Castilian measures, with a classical purity and rigorous finish before unknown in Spanish poetry, and hardly attained since.<sup>18</sup>

This is eminently the case, for instance, with what the Spaniards have esteemed the best of his poetical works; his ode, called "The Prophecy of the Tagus," in which the river-god predicts to Roderic the Moorish conquest of his country, as the result of that monarch's violence to Cava, the daughter of one of his principal nobles. It is an imitation of the Ode of Horace in which Nereus rises from the waves and predicts the overthrow of Troy to Paris, who, under circumstances not entirely dissimilar, is transporting the stolen wife of Menelaus to the scene of the fated conflict between the two nations. But the Ode of Luis de Leon is written in the old Spanish *quintillas*, his favorite measure,

and is as natural, fresh, and flowing as one of the

\* 88 national ballads.<sup>19</sup> \* Foreigners, however, less

<sup>18</sup> In noticing the Hebrew temperament of Luis de Leon, I am reminded of one of his contemporaries, who possessed in some respects a kindred spirit, and whose fate was even more strange and unhappy. I refer to Juan Pinto Delgado, a Portuguese Jew, who lived long in Spain, embraced the Christian religion, was reconverted to the faith of his fathers, fled from the terrors of the Inquisition to France, and died there about the year 1590. In 1627, a volume of his works, containing narrative poems on Queen Esther and on Ruth, free versions from the Lamentations of Jeremiah in the old national *quintillas*, and sonnets and other short

pieces, generally in the Italian manner, was published at Rouen in France, and dedicated to Cardinal Richelieu, then the all-powerful minister of Louis XIII. They are full of the bitter and sorrowful feelings of his exile, and parts of them are written, not only with tenderness, but in a sweet and pure versification. The Hebrew spirit of the author, whose proper name is Moseh Delgado, breaks through constantly, as might be expected. Barbosa, *Biblioteca, Tom. II.* p. 722. Amador de los Rios, *Judios de España, Madrid, 1848, 8vo, p. 500.*

<sup>19</sup> It is the eleventh of Luis de Leon's Odes, and may well bear a comparison

interested in what is so peculiarly Spanish, and so full of allusions to Spanish history, may sometimes prefer the serener ode “On a Life of Retirement,” that “On Immortality,” or perhaps the still more beautiful one “On the Starry Heavens”; all written with the same purity and elevation of spirit, and all in the same national measure and manner.

A truer specimen of his prevalent lyrical tone, and, indeed, of his tone in much else of what he wrote, is perhaps to be found in his “Hymn on the Ascension.” It is both very original and very natural in its principal idea, being supposed to express the disappointed feelings of the disciples as they see their Master passing out of their sight into the opening heavens above them.

And dost thou, holy Shepherd, leave  
 Thine unprotected flock alone,  
 Here, in this darksome vale, to grieve,  
 While thou ascend'st thy glorious throne ?

O, where can they their hopes now turn,  
 Who never lived but on thy love ?  
 Where rest the hearts for thee that burn,  
 When thou art lost in light above ?

How shall those eyes now find repose  
 That turn, in vain, thy smile to see ?  
 What can they hear save mortal woes,  
 Who lose thy voice's melody ?

And who shall lay his tranquil hand  
 Upon the troubled ocean's might ?

with that of Horace (Lib. I. Carm. 15) which suggested it. This same ode of Horace that Luis de Leon imitated with such admirable success was also imitated in the same way and on the same subject subsequently by Francisco de Medrano, but he did it before the ode of Luis de Leon had been published. The ode of Medrano, — beginning, “Rendido el postrer Godo,” — like all his translations and imitations of Horace, is well worth reading, although not equal in

richness and power to that of Luis de Leon. Horace and Virgil were evidently the favorite Latin poets of the latter. When he was immured in the secret cells of the Inquisition, and could obtain books only by special written petition to the tribunal, he asked for a single copy of each of them to be brought to him from his own cell, adding, with characteristic simplicity, “There are plenty of them,” — *hay hartos* Documentos, Tom. X p. 510.

Who hush the winds by his command ?  
Who guide us through this starless night ?

For THOU art gone !— that cloud so bright,  
That bears thee from our love away,  
Springs upward through the dazzling light,  
And leaves us here to weep and pray !<sup>20</sup>

\* 89 \* In order, however, to comprehend aright the genius and spirit of Luis de Leon, we must study, not only his lyrical poetry, but much of his prose ; for, while his religious odes and hymns, beautiful in their severe exactness of style, rank him before Klopstock and Filicaja, his prose, more rich and no less idiomatic, places him at once among the greatest masters of eloquence in his native Castilian.<sup>21</sup>

<sup>20</sup> It is in *quintillas* in the original ; but that stanza, I think, can never, in English, be made flowing and easy as it is in Spanish. I have, therefore, used in this translation a freedom greater than I have generally permitted to myself, in order to approach, if possible, the bold outline of the original thought. It begins thus —

Y dexas, pastor santo,  
Tu grey en este valle hondo oscuro  
Con soledad y llanto,  
Y tu rompiendo el puro  
Ayre, te vas al inmortal seguro !  
Los antes bien hadados,  
Y los agora tristes y afigados,  
A tus pechos criados,  
De ti desposeidos,  
A do couverturán ya sus sentidos ?

by C B Schluter and W Storek, Munster, 1853, is worth reading by those who are familiar with the German. The version of this ode is at p 130, and is in the measure of the original. Another similar version of it may be found in Diepenbrock's Geistlichei Blumenstraus, 1852, p 157

<sup>21</sup> In 1837, D José de Castro y Olozco produced on the stage at Madrid a drama, entitled "Fray Luis de Leon," in which the hero, whose name it bears, is represented as renouncing the world and entering a cloister, in consequence of a disappointment in love. Diego de Mendoza is also one of the principal personages in the same drama, which is written in a pleasing style, and has some poetical merit, notwithstanding its unhappy subject and plot

<sup>1</sup> Many lives of Cervantes have been written, of which four need to be mentioned 1 That of Gregorio Mayans y Siscar, first prefixed to the edition of Don Quixote in the original published in London in 1738 (4 tom. 4to) under the auspices of Lord Carteret, and afterwards to several other editions ; a work of learning, and the first proper attempt to collect materials for a life of Cervantes, but ill arranged and ill written, and of little value now, except for some of its incidental discussions 2 The Life of Cervantes, with the Analysis of his Don Quixote, by Vicente de los Rios, prefixed to the sumptuous edition of Don Quixote by the Spanish Academy, (Madrid, 1780, 4 tom fol,) and often printed since, — better written than the preceding, and containing some new facts, but with criticisms full of pedantry and of extravagant eulogy 3 Noticias para la Vida de Miguel de Cervantes Saavedra, by J. Ant. Pellicer, first printed in his "Ensayo de una Biblioteca de Traductores," 1778, but much enlarged afterwards, and prefixed to his edition of Don Quixote (Madrid, 1797 - 1798, 5 tom. 8vo), poorly digested, and con-

taining a great deal of extraneous, though sometimes curious matter, but more complete than any life that had preceded it 4 Vida de Miguel de Cervantes, etc., por D Martin Fernandez de Navarrete, published by the Spanish Academy (Madrid, 1819, 8vo) ; — the best of all, and indeed one of the most judicious and best arranged biographical works that have been published in any country Navarrete has used in it, with great effect, many new documents ; and especially the large collection of papers found in the archives of the Indies at Seville, in 1808, which comprehend the voluminous *Informacion* sent by Cervantes himself, in 1590, to Philip II, when asking for an office in one of the American colonies, — a mass of well-authenticated certificates and depositions, setting forth the trials and sufferings of the author of Don Quixote, from the time he entered the service of his country, in 1571 ; through his captivity in Algiers, and, in fact, till he reached the Azores in 1582 This thorough and careful life is skilfully abridged by L Viardot, in his French translation of Don Quixote, (Paris, 1836, 2 tom 8vo,) and forms

branch, which, in the fifteenth century, became \* 91 connected \* by marriage with the Saavedras, seems, early in the sixteenth, to have fallen off in its fortunes; and we know that the parents of Miguel, who has given to the race a splendor which has saved its old nobility from oblivion, were poor inhabitants of Alcalá de Henares, a small but flourishing city, about twenty miles from Madrid. There he was born, the youngest of four children, on one of the early days of October, 1547.<sup>2</sup>

No doubt, he received his early education in the place of his nativity, then in the flush of its prosperity and fame from the success of the University founded there by Cardinal Ximenes, about fifty years before. At any rate, like many other generous spirits, he has taken an obvious delight in recalling the days of his childhood in different parts of his works; as in his *Don Quixote*, where he alludes to the burial and enchantments of the famous Moor Muzaraque on the great hill of Zulema,<sup>3</sup> just as he had probably heard them in some nursery story; and in his prose pastoral, "*Galatea*," where he arranges the scene of some of its most graceful adventures "on the banks," as he fondly calls it, "of the famous Henares."<sup>4</sup> But concerning

the substance of the "Life and Writings of Miguel de Cervantes Saavedra," by Thomas Roscoe, London, 1839, 18mo

In the notice which follows in the text, I have relied for my facts on the work of Navarrete, whenever no other authority is referred to, but in the literary criticisms Navarrete can hardly afford aid, for he hardly indulges himself in them at all

<sup>2</sup> The date of the baptism of Cervantes is October 9, 1547, and as it is the practice in the Catholic Church to perform this rite soon after birth, we may assume, with sufficient probability, that Cervantes was born on that very day, or the day preceding. But Julius, in a

note to this passage in his translation of this history, suggests very ingeniously that Cervantes may have been born on St. Michael's day, September 29, as it was common in Spain to name children after the Saint on whose festival they were born, and as the feast of St Michael was but recently passed when he was baptized

his youth we know only what he incidentally tells us himself; — that he took great pleasure in attending the theatrical representations of Lope de Rueda;<sup>5</sup> that he wrote verses when very young;<sup>6</sup> and that he always read everything \* within his reach, even, \* 92 as it should seem, the torn scraps of paper he picked up in the public streets.<sup>7</sup>

It has been conjectured that he pursued his studies in part at Madrid, and there is some probability, notwithstanding the poverty of his family, that he passed two years at the University of Salamanca. But what is certain is, that he obtained a public and decisive mark of respect, before he was twenty-two years old, from one of his teachers; for, in 1569, Lope de Hoyos published, by authority, on the death of the unhappy Isabelle de Valois, wife of Philip the Second, a volume of verse, in which, among other contributions of his pupils, are six short poems by Cervantes, whom he calls his “dear and well-beloved disciple.” This was, no doubt, Cervantes’s first appearance in print as an author; and though he gives in it little proof of poetical talent, yet the affectionate words of his master by which his verses were accompanied, and the circumstance that one of his elegies was written in the name of the whole school, show that he enjoyed the respect of his teacher and the good-will of his fellow-students.<sup>8</sup>

Y en ella procuré siempre agradarte

<sup>7</sup> “Como soy aficionado á leer aunque sean los papeles rotos de las calles, llevado desta mi natural inclinacion, tomé un cartapacio,” etc., he says, (Don Quix-

<sup>8</sup> The verses of Cervantes on this occasion may be found partly in Rios, “Pruebas de la Vida de Cervantes,” ed. Academia, Nos 2-5, and partly in Navarrete, *Vida*, pp. 262, 263. They are poor, and the only circumstance that makes it worth while to refer to them is,

The next year, 1570, we find him, without any notice of the cause, removed from all his early connections, and serving at Rome as chamberlain in the household of Monsignor Aquaviva, soon afterwards a cardinal; the same person who had been sent, in

1568, on a special mission from the Pope to \* 93 Philip the Second, \* and who, as he seems to have had a regard for literature and for men of letters, may, on his return to Italy, have taken Cervantes with him from interest in his talents. The term of service of the young man must, however, have been short. Perhaps he was too much of a Spaniard, and had too proud a spirit, to remain long in a position at best very equivocal, and that, too, at a period when the world was full of solicitations to adventure and military glory.

But, whatever may have been his motive, he soon left Rome, and its court. In 1571, the Pope, Philip the Second, and the state of Venice concluded what was called a "Holy League" against the Turks, and set on foot a joint armament, commanded by the chivalrous Don John of Austria, a natural son of Charles the Fifth. The temptations of such a romantic, as well as imposing, expedition against the ancient oppressor of whatever was Spanish, and the formidable enemy of all Christendom, were more than Cervantes, at the age of twenty-three, could resist; and the next thing we hear of him is, that he had volunteered in it

that Hoyos, who was a professor of elegant literature, calls Cervantes repeatedly "caro discípulo," and "amado discípulo", and says that the *Elegy* is written "en nombre de todo el estudio." These, with other miscellaneous poems of Cervantes, are collected for the first time in the first volume of the "Biblioteca de Autores Españoles," by Arribau (Madrid, 1846, 8vo, pp. 612-620); and

prove the pleasant relations in which Cervantes stood with some of the principal poets of his day, such as Padilla, Maldonado, Barros, Yague de Salas, Hernando de Herrera, etc. Of Hoyos and his volume of verses curious notices may be found in the "Disertacion Historico Geografico, ec , de Madrid, por D Juan Ant Pellicer," Madrid, 1803, 4to, pp. 108, sqq.

as a common soldier. For, as he says in a work written just before his death, he had always observed “that none make better soldiers than those who are transplanted from the region of letters to the fields of war, and that never scholar became soldier that was not a good and brave one.”<sup>9</sup> Animated with this spirit, he entered the service of his country among the troops with which Spain then filled a large part of Italy, and continued in it till he was honorably discharged in 1575.

During these four or five years he learned many of the hardest lessons of life. He was present in the sea-fight of Lepanto, October 7, 1571, and, though suffering at the time under a fever, insisted on bearing his part in that great battle, which first decisively arrested the intrusion of the Turks into the

\* West of Europe. The galley in which he \* 94 served was in the thickest of the contest, and that he did his duty to his country and to Christendom he carried proud and painful proof to his grave; for, besides two other wounds, he received one which deprived him of the use of his left hand and arm during the rest of his life. With the other sufferers in the fight, he was taken to the hospital at Messina, where he remained till April, 1572; and then, under Marco Antonio Colonna, went on the expedition to the Levant, to which he alludes with so much satisfaction in his dedication of the “Galatea,” and which he has so well described in the story of the Captive in *Don Quixote*.

The next year, 1573, he was in the affair of the Go-

leta at Tunis, under Don John of Austria, and afterwards, with the regiment to which he was attached,<sup>10</sup> returned to Sicily and Italy, many parts of which, in different journeys or expeditions, he seems to have visited, remaining at one time in Naples above a year.<sup>11</sup> This period of his life, however, though marked with much suffering, seems never to have been regarded by him with regret. On the contrary, above forty years afterward, with a generous pride in what he had undergone, he declared that, if the alternative were again offered him, he should account his wounds a cheap exchange for the glory of having been present in that great enterprise.<sup>12</sup>

\* 95 \* When he was discharged, in 1575, he took with him letters from the Duke of Sesa and Don John, commanding him earnestly to the king, and embarked for Spain. But on the twenty-sixth of September he was captured<sup>13</sup> and carried into Algiers, where he passed five years yet more disastrous and more full of adventure than the five preceding. He served successively three cruel masters,—a Greek and a Venetian, both renegadoes, and the Dey, or King, himself;

<sup>10</sup> The regiment in which he served was one of the most famous in the armies of Philip II. It was the "Teicio de Flandes," and at the head of it was Lope de Figueroa, who acts a distinguished part in two of the plays of Calderon,—"Amar despues de la Muerte," and "El Alcalde de Zalamea." Cervantes probably joined this favorite regiment again, when, as we shall see, he engaged in the expedition to Portugal in 1581, whither we know not only that he went that year, but that the Flanders regiment went also. Of the affair of the Goleta at Tunis a spirited account is given in a little tract in the *Biblioteca de Autores Espanoles* (Tom. XXI. 1852, pp. 451-458), by Gonzalo de Illescas,—the same person who published, in 1574, the beginning of a very dull *Pontifical History*, which was sub-

sequently continued in the same spirit by Luis de Bavia and others

<sup>11</sup> All his works contain allusions to the experiences of his life, and especially to his travels. When he sees Naples in his imaginary *Viage del Parnaso* (c. 8, p. 126), he exclaims,—

*Esta ciudad en N. pôles la ilustre,  
Que yo pôs sus ruas mas de un año*

<sup>12</sup> "Si ahora me propusieran y facilitaran un imposible," says Cervantes, in reply to the coarse personalities of Avellaneda, "quisiera ántes haber me hallado en aquella faccion prodigiosa, que sano ahora de mis heridas, sin haberme hallado en ella." *Prólogo á Don Quixote, Parte Segunda*, 1615.

the first two tormenting him with that peculiar hatred against Christians which naturally belonged to persons who, from unworthy motives, had joined themselves to the enemies of all Christendom; and the last, the Dey, claiming him for his slave, and treating him with great severity, because he had fled from his master and become formidable by a series of efforts to obtain liberty for himself and his fellow-captives.

Indeed, it is plain that the spirit of Cervantes, so far from having been broken by his cruel captivity, had been only raised and strengthened by it. On one occasion he attempted to escape by land to Oran, a Spanish settlement on the coast, but was deserted by his guide and compelled to return. On another, he secreted thirteen fellow-sufferers in a cave on the sea-shore, where, at the constant risk of his own life, he provided during many weeks for their daily wants, while waiting for rescue by sea; but at last, after he had joined them, was basely betrayed, and then nobly took the whole punishment of the conspiracy on himself. Once he sent for help to break forth by violence, and his letter was intercepted; and once he had matured a scheme for being rescued, with sixty of his countrymen,—a scheme of which, when it was defeated by treachery, he again announced himself as the only author and the willing victim. And finally, he had a grand project for the insurrection of all the Christian slaves in Algiers, which was, perhaps, not unlikely to succeed, as their number was full twenty-five thousand, and which was certainly so

\* alarming to the Dey, that he declared that, \* 96  
“If he could but keep that lame Spaniard well  
guarded, he should consider his capital, his slaves, and

his galleys safe.”<sup>14</sup> On each of these occasions, severe, but not degrading,<sup>15</sup> punishments were inflicted upon him. Four times he expected instant death in the awful form of impalement or of fire; and the last time a rope was absolutely put about his neck, in the vain hope of extorting from a spirit so lofty the names of his accomplices.

At last, the moment of release came. His elder brother, who was captured with him, had been ransomed three years before; and now his widowed mother was obliged to sacrifice, for her younger son’s freedom, all the pittance that remained to her in the world, including the dowry of her daughters. But even this was not enough; and the remainder of the poor five hundred crowns that were demanded as the price of his liberty was made up partly by small borrowings, and partly by the contributions of religious charity.<sup>16</sup> In this way he \* was ransomed

<sup>14</sup> One of the most trustworthy and curious sources for this part of the life of Cervantes is “La Historia y Topografía de Argel,” por D. Diego de Haedo, (Valladolid, 1612, folio,) in which Cervantes is often mentioned, but which seems to have been overlooked in all inquiries relating to him, till Sarmiento stumbled upon it, in 1752. It is in this work that occur the words cited in the text, and which prove how formidable Cervantes had become to the Dey, — “Decia Asan Bajá, Rey de Argel, que como el tuviere guardado al estropado Español tenía seguros sus cristianos, sus baxeles y aun toda la ciudad” (f 185.) And just before this, referring to the bold project of Cervantes to take the city by an insurrection of the slaves, Haedo says, “Y si á su animo, industria, y trazas, correspondiera la ventura, hoy fuera el dia, que Argel fuera de cristianos, porque no aspiraban á menos sus intentos.” All this, it should be recollect, was published four years before Cervantes’s death. The whole book, including not only the history, but the dialogues at

the end on the sufferings and martyrdom of the Christians in Algiers, is very curious, and often throws a strong light on passages of Spanish literature in the sixteenth and seventeenth centuries, which so often refer to the Moors and their Christian slaves on the coasts of Barbary.

<sup>15</sup> With true Spanish pride, Cervantes, when alluding to himself in the story of the Captive, (Don Quixote, Parte I c 40,) says of the Dey, “Solo libró bien con él un soldado Español llamado tal de Saavedra, al qual con haber hecho cosas que quedarán en la memoria de aquellas gentes por muchos años, y todos por alcanzar libertad, jamás le dió palo, ni se lo mandó dar, ni le dixo mala palabra, y por la menor cosa de muchas que hizo, temiamos todos que había de ser empalado, y así lo temió él mas de una vez.”

<sup>16</sup> A beautiful tribute is paid by Cervantes, in his tale of the “Española Inglesa,” (Novelas, Madrid, 1783, 8vo, Tom I pp 358, 359,) to the zeal and disinterestedness of the poor priests and monks, who went, sometimes at the

on the nineteenth of September, 1580, just at the moment when he had embarked with his master, the Dey, for Constantinople, whence his rescue would have been all but hopeless. A short time afterward he left Algiers, where we have abundant proof that, by his disinterestedness, his courage, and his fidelity, he had, to an extraordinary degree, gained the affection and respect of the multitude of Christian captives with which that city of anathemas was then crowded.<sup>17</sup>

But, though he was thus restored to his home and his country, and though his first feelings may have been as fresh and happy as those he has so eloquently expressed more than once when speaking of the joys of freedom,<sup>18</sup> still it should be remembered that he returned after an absence of ten years, beginning at a period of life when he could hardly have taken root in society, or made for himself, amidst its struggling interests, a place which would not be filled almost as soon as he left it. His father was dead. His family,

risk of their lives, to Algiers to redeem the Christians, and one of whom remained there, giving his person in pledge for four thousand ducats which he had borrowed to send home captives. Of Father Juan Gil, who effected the redemption of Cervantes himself from slavery, Cervantes speaks expressly, in his "Trato de Argel," as

Un frayle Trinitario, Christianissimo,  
Amigo de hacer bien y conocido  
Porque ha estado otra vez en esta tierra  
Rescatando Christianos, y dio exemplo  
De una gran Christianidad y gran prudencia ; —

A truly Christian man, known as the friend  
Of all good charities, who once before  
Came to Algiers to ransom Christian slaves,  
And gave example in himself, and proof  
Of a most wise and Christian faithfulness  
His name is Friar Juan Gil

Haedo gives a similar account of Friar Juan Gil in his "Topografia de Argel" (1612, ff. 144, sqq.). Indeed, not a few of the "padres de la limosna," as they were called, appear to great advantage in this interesting work, and, no doubt,

deserved all the reverence they received

<sup>17</sup> Cervantes was evidently a person of great kindness and generosity of disposition, but he never overcame a strong feeling of hatred against the Moors, inherited from his ancestors and exasperated by his own captivity. This feeling appears in both his plays, written at distant periods, on the subject of his life in Algiers, in the fifty-fourth chapter of the second part of *Don Quixote*, in the *Persiles y Sigismunda*, Lib. III cap. 10; and elsewhere. But except this, and an occasional touch of satire against duennas, — in which Quevedo and Luis Velez de Guevara are as severe as he is, — and a little bitterness about private chaplains that exercised a cunning influence in the houses of the great, I know nothing, in all his works, to impeach his universal good-nature. See *Don Quixote*, ed. Clemencin, Vol. V p. 260, note, and p. 138, note

poor before, had been reduced to a still more bitter poverty by his own ransom and that of his brother. He was unfriended and unknown, and must have suffered naturally and deeply from a sort of grief and disappointment which he had felt neither as a \* 98 soldier nor \* as a slave. It is not remarkable, therefore, that he should have entered anew into the service of his country,—joining his brother, probably in the same regiment to which he had formerly belonged, and which was now sent to maintain the Spanish authority in the newly acquired kingdom of Portugal. How long he remained there is not certain. But he was at Lisbon, and went, under the Marquis of Santa Cruz, in the expedition of 1581, as well as in the more important one of the year following, to reduce the Azores, which still held out against the arms of Philip the Second. From this period, therefore, we are to date the full knowledge he frequently shows of Portuguese literature, and that strong love for Portugal which, in the third book of “Persiles and Sigismunda,” as well as in other parts of his works, he exhibits with a kindness and generosity remarkable in a Spaniard of any age, and particularly in one of the age of Philip the Second.<sup>19</sup>

It is not unlikely that this circumstance had some influence on the first direction of his more serious efforts as an author, which, soon after his return to Spain, ended in the pastoral romance of “Galatea.” For prose pastorals have been a favorite form of fiction in Portugal from the days of the “Menina e Moça”<sup>20</sup>

<sup>19</sup> “Well doth the Spanish hind the difference  
know  
‘Twixt him and Lusian slave, the lowest of the  
low”,—

an opinion which Childe Harold found  
in Spain when he was there, and could

have found at any time for two hundred  
years before.

<sup>20</sup> The “Menina e Moça” is the graceful little fragment of a prose pastoral, by Bernardino Ribeyro, which dates from

down to our own times ; and had already been introduced into Spanish literature by George of Montemayor, a Portuguese poet of reputation, whose “Diana Enamorada” and the continuation of it by Gil Polo were, as we know, favorite books with Cervantes.

But, whatever may have been the cause, Cervantes now wrote all he ever published of his Galatea, which was licensed on the first of February, 1584, and printed in the \* December following. He himself calls it “An Eclogue,” and dedicates it, as “the first fruits of his poor genius,”<sup>21</sup> to the son of that Colonna under whose standard he had served, twelve years before, in the Levant. It is, in fact, a prose pastoral, after the manner of Gil Polo’s ; and, as he intimates in the Preface, “its shepherds and shepherdesses are many of them such only in their dress.”<sup>22</sup> Indeed, it has always been understood that Galatea, the heroine, is the lady to whom he was soon afterwards married ; that he himself is Elicio, the hero ; and that several of his literary friends, especially Luis Barahona de Soto, whom he seems always to have overrated as a poet, Francisco de Figueroa, Pedro Lainez, and some others, are disguised under the names of Lauso, Tirsi, Damon, and similar pastoral appellations. At any rate, these personages of his fable talk with so much grace and learning, that he finds it necessary to apologize for their too elegant discourse.<sup>23</sup>

about 1500, and has always been admired, as indeed it deserves to be. It gets its name from the two words with which it begins, “Small and young” ; a quaint circumstance, showing its extreme popularity with those classes that were little in the habit of referring to books by their formal titles

<sup>21</sup> “Estas primicias de mi corto ingenio.” Dedicatoria. Seven editions

of the Galatea were published as early as 1618

<sup>22</sup> “Muchos de los disfrazados pastores della lo eran solo en el hábito”

<sup>23</sup> “Cuyas razones y argumentos mas parecen de ingenios entre libros y las aulas criados que no de aquellos que entre pagizas cabañas son crecidos.” (Libro IV. Tomo II p 90) This was intended, no doubt, at the same time,

Like other works of the same sort, the Galatea is founded on an affectation which can never be successful; and which, in this particular instance, from the unwise accumulation and involution of the stories in its fable, from the conceited metaphysics with which it is disfigured, and from the poor poetry profusely scattered through it, is more than usually unfortunate. Perhaps no one of the many pastoral tales produced in Spain in the sixteenth and seventeenth centuries fails so much in the tone it should maintain. Yet there are traces both of Cervantes's experience in life, and of his talent, in different parts of it. Some of the tales, like that of Sileno, in the second and third books, are interesting; others, like Timbrio's capture by the Moors, in the fifth book, remind us of his own adventures and sufferings; while yet one, at least, that of Rosaura and Grisaldo, in the fourth book, is quite emancipated from pastoral conceits and fancies.

\* 100 In all \* we have passages marked with his rich and flowing style, though never, perhaps, with what is most peculiar to his genius. The inartificial texture of the whole, and the confusion of Christianity and mythology, almost inevitable in such a work, are its most obvious defects; though nothing, perhaps, is more incongruous than the representation of that sturdy old soldier and formal statesman, Diego de Mendoza, as a lately deceased shepherd.<sup>24</sup>

as a compliment to Figueroa, etc. See *post*, Chap XXXIII note 8

<sup>24</sup> The chief actors in the Galatea visit the tomb of Mendoza, in the sixth book, under the guidance of a wise and gentle Christian priest, and when there, Calliope strangely appears to them and pronounces a tedious poetical eulogum on a vast number of the contemporary Spanish poets, most of whom are now forgotten. The Galatea was abridged by Florian, at the end of the eighteenth

century, and reproduced, with an appropriate conclusion, in a prose pastoral, which, in the days when Gessner was so popular, was frequently reprinted. In this form it is by no means without grace. Certainly the attempt of Florian is more successful than a similar one made by Don Candido Maria de Trigueros, who followed and used him in *Los Enamorados o Galatea*, ec., Madrid, 1798.

But, when speaking thus slightly of the *Galatea*, we ought to remember that, though it extends to two volumes, it is unfinished, and that passages which now seem out of proportion or unintelligible might have their meaning, and might be found appropriate, if the second part, which Cervantes had perhaps written, and which he continued to talk of publishing till a few days before his death,<sup>25</sup> had ever appeared. And certainly, as we make up our judgment on its merits, we are bound to bear in mind his own touching words, when he represents it as found by the barber and curate in *Don Quixote's* library.<sup>26</sup> “But what book is the next one?” said the curate. ‘The *Galatea* of Miguel de Cervantes,’ replied the barber. ‘This Cervantes,’ said the curate, ‘has been a great friend of mine these many years; and I know that he is more skilled in sorrows than in verse. His book is not without happiness in the invention; it proposes something, but finishes nothing. So we must wait for the second part, which he promises; for perhaps he will then obtain the favor that is now denied him; and, in the mean time, my good gossip, keep it locked up at home.’”

If the story be true that he wrote the *Galatea* to win \* the favor of his lady, his success may \* 101 have been the reason why he was less interested to finish it; for, almost immediately after the appearance of the first part, he was married, December 12, 1584, to a lady of a good family in *Esquivias*, a village near Madrid.<sup>27</sup> The pecuniary arrangements

<sup>25</sup> In the Dedication to “*Persiles y Sigismunda*,” 1616, April 19, only four days before his death

<sup>26</sup> *Parte Primera*, cap. 6

<sup>27</sup> He alludes, I think, but twice in all his works to *Esquivias*; and both

times it is to praise its wines. The first is in the “*Cueva de Salamanca*” (*Comedias*, 1749, Tom. II p. 313), and the last is in the *Prólogo* to “*Persiles y Sigismunda*,” though in the latter he speaks also of its “*ilustres linajes*.”

consequent on the marriage, which have been published,<sup>28</sup> show that both parties were poor; and the Galatea intimates that Cervantes had a formidable Portuguese rival, who was, at one time, nearly successful in winning his bride.<sup>29</sup> But, whether the course of his love ran smooth before marriage or not, his wedded life, for above thirty years, seems to have been happy; and his widow, at her death, desired to be buried by his side.

In order to support his family, he probably lived much at Madrid, where we know he was familiar with several contemporary poets, such as Juan Rufo, Pedro de Padilla, and others, whom, with his inherent good-nature, he praises constantly in his later works, and often unreasonably. From the same motive, too, and perhaps partly in consequence of these intimacies, he now undertook to gain some portion of his subsistence by authorship, turning away from the life of adventure to which he had earlier been attracted.

His first efforts in this way were for the stage, which naturally presented strong inducements for one who was early fond of dramatic representations, and who was now in serious want of such immediate profit as the theatre sometimes yields. The drama, however, in the time of Cervantes, was rude and unformed. He tells us, as we have already noticed, that he had witnessed its beginnings in the time of Lope de \* 102 Rueda and \* Naharro,<sup>30</sup> which must have been before he went to Italy, and when, from his description of its dresses and apparatus, we plainly see

<sup>28</sup> See the end of Pellicer's Life of Cervantes, prefixed to his edition of *Don Quixote* (Tom I p ccv) There seems to have been an earlier connection between the family of Cervantes and that of his bride, for the lady's mother had been named executrix of

his father's will, who died while Cervantes himself was a slave in Algiers

<sup>29</sup> At the end of the sixth book

that the theatre was not so well understood and managed as it is now by strolling companies and in puppet-shows. From this humble condition, which the efforts made by Bermudez and Argensola, Virues, La Cueva, and their contemporaries, had not much ameliorated, Cervantes undertook to raise it; and he succeeded so far that, thirty years afterwards, he thought his success of sufficient consequence frankly to boast of it.<sup>31</sup>

But it is curious to see the methods he deemed it expedient to adopt for such a purpose. He reduced, he says, the number of acts from five to three; but this is a slight matter, and, though he does not seem to be aware of the fact, it had been done long before by Avendaño. He claims to have introduced phantasms of the imagination, or allegorical personages, like War, Disease, and Famine; but, besides that Juan de la Cueva had already done this, it was, at best, nothing more in either of them than reviving the forms of the old religious shows. And, finally, though this is not one of the grounds on which he himself places his dramatic merits, he seems to have endeavored in his plays, as in his other works, to turn his personal travels and sufferings to account, and thus, unconsciously, became an imitator of some of those who were among the earliest inventors of such representations in modern Europe.

But, with a genius like that of Cervantes, even changes or attempts as crude as these were not without results. He wrote, as he tells us with characteristic carelessness, twenty or thirty pieces which were received with applause; — a number greater than can be with certainty attributed to any preceding Spanish author, and a success before quite unknown. None of

<sup>31</sup> *Adjunta al Parnaso*, first printed in 1614; and the *Prólogo* last cited

these pieces were printed at the time, but he has given us the names of nine of them, two of which \* 103 were discovered \* in 1782, and printed, for the first time, in 1784.<sup>32</sup> The rest, it is to be feared, are irrecoverably lost; and among them is "La Confusa," which, long after Lope de Vega had given its final character to the proper national drama, Cervantes fondly declared was still one of the very best of the class to which it belonged; <sup>33</sup> a judgment which the present age might perhaps confirm, if the proportions and finish of the drama he preferred were equal to the strength and originality of the two that have been rescued.

The first of these is "El Trato de Argel," or, as he elsewhere calls it, "Los Tratos de Argel," which may be translated Life, or Manners, in Algiers. It is a drama, slight in its plot, and so imperfect in its dialogue, that, in these respects, it is little better than some of the old eclogues on which the earlier theatre was founded. His purpose, indeed, seems to have been simply to set before a Spanish audience such a picture of the sufferings of the Christian captives at Algiers as his own experience would justify, and such as might well awaken sympathy in a country which had furnished a deplorable number of the victims. He, therefore, is little careful to construct a regular plot, if, after all, he were aware that such a plot was important; but instead of it he gives us a stiff and unnatural love-story, which he thought good enough to be used again, both in one of his later plays and in one of his tales; <sup>34</sup> and then trusts the main success of the piece to its episodical sketches.

<sup>32</sup> They are in the same volume with the "Viage al Parnaso," Madrid, 1784, 8vo

<sup>33</sup> Adjunta al Parnaso, p. 139, ed 1784.  
<sup>34</sup> In the "Baños de Argel," and the "Amante Liberal."

Of these sketches, several are striking. First, we have a scene between Cervantes himself and two of his fellow-captives, in which they are jeered at as slaves and Christians by the Moors, and in which they give an account of the martyrdom in Algiers of a Spanish priest, which was subsequently used by Lope de Vega in one of his dramas, and which was founded in fact. Next, we have the attempt of Pedro Alvarez to escape to Oran, which is, no doubt, taken from the similar attempt of Cervantes, and has all the spirit of a drawing from life. \* And, in different places, we have two or three painful scenes of the public sale of slaves, and especially of little children, which he must often have witnessed, and which again Lope de Vega thought worth borrowing, when he had risen, as Cervantes calls it, to the monarchy of the scene.<sup>35</sup> The whole play is divided into five *jornadas*, or acts, and written in octaves, *redondillas, terza rima*, blank verse, and almost all the other measures known to Spanish poetry; while among the persons of the drama are strangely scattered, as prominent actors, Necessity, Opportunity, a Lion, and a Demon.

<sup>35</sup> The “*Esclavos en Argel*” of Lope is found in his *Comedias*, Tom. XXV, (Caragoça, 1647, 4to, pp 231 – 260,) and shows that he borrowed much too freely from the play of Cervantes, which, it should be remembered, had not then been printed, so that he must have used a manuscript. The scenes of the sale of the Christian children, (pp 249, 250,) and the scenes between the same children after one of them had become a Mohammedan, (pp. 259, 260,) as they stand in Lope, are taken from the corresponding scenes in Cervantes (pp. 316 – 323, and 364 – 366, ed. 1784). Much of the story, and passages in other parts of the play, are also borrowed. The martyrdom of the Valencian priest, which is merely described

by Cervantes, (pp 298 – 305,) is made a principal dramatic point in the third *jornada* of Lope's play, where the execution occurs, in the most revolting form, on the stage (p 263). The truth is, that this execution really occurred at Algiers in 1577, while Cervantes was there, and that he first used it and then Lope copied from him. A full account of it may be found in Haedo, (*Topografia*, ff. 179 a to 183 a,) and is one of the most curious illustrations extant of the relations subsisting between the Spaniards and their hated enemies. The borrowings of Lope from the play of Cervantes are, however, more plain elsewhere in his “*Esclavos de Argel*” than in the case of this shocking martyrdom.

Yet, notwithstanding the unhappy confusion and carelessness all this implies, there are passages in the *Trato de Argel* which are highly poetical. Aurelio, the hero,—who is a Christian captive affianced to another captive named Sylvia,—is loved by Zara, a Moorish lady, whose confidante, Fatima, makes a wild incantation, in order to obtain means to secure the gratification of her mistress's love ; the result of which is that a demon rises and places in her power Necessity and Opportunity. These two immaterial agencies are then sent by her upon the stage, and— invisible to Aurelio himself, but seen by the spectators — tempt him with evil thoughts to yield to the seductions of the fair unbeliever.<sup>36</sup> When they are gone, he thus expresses, in soliloquy, his feelings at the idea of having nearly yielded :—

\* 105      \* Aurelio, whither goest thou ? Where, O where,  
 Now tend thine erring steps ? Who guides thee on  
 Is, then, thy fear of God so small that thus,  
 To satisfy mad fantasy's desires,  
 Thou rushest headlong ? Can light and easy  
 Opportunity, with loose solicitation,  
 Persuade thee thus, and overcome thy soul,  
 Yielding thee up to love a prisoner ?  
 Is this the lofty thought and firm resolve  
 In which thou once wast rooted, to resist  
 Offence and sin, although in torments sharp  
 Thy days should end and earthly martyrdom ?  
 So soon hast thou offended, to the winds  
 Thy true and loving hopes cast forth,  
 And yielded up thy soul to low desire ?  
 Away with such wild thoughts, of basest birth  
 And basest lineage sprung ! Such witchery  
 Of foul, unworthy love shall by a love

<sup>36</sup> Cervantes, no doubt, valued himself upon these immaterial agencies ; and, after his time, they became common on the Spanish stage. Calderon, in his “*Gran Principe de Fez*,” (Comedias, Madrid, 1760, 4to, Tom. III. p. 389,) thus explains two, whom he introduces, in words that may be applied to those of Cervantes :—

Representando los dos  
 De su buen Genio y mal Genio  
 Externamente la lid,  
 Que arde interior en su pecho

His good and evil genius bodied forth,  
 To show, as if it were in open fight,  
 The hot encounter hidden in his heart.

All pure be broke ! A Christian soul is mine,  
 And as a Christian's shall my life be marked ; —  
 Nor gifts, nor promises, nor cunning art,  
 Shall from the God I serve my spirit turn,  
 Although the path I trace lead on to death !<sup>37</sup>

The conception of this passage, and of the scene preceding it, is certainly not dramatic, though it is one of those on which, from the introduction of spiritual agencies, Cervantes valued himself. But neither is it without stirring poetry. Like the rest of the piece, it is a mixture of personal feelings and fancies, struggling with an ignorance of the proper principles of the drama, and with the rude elements of the theatre in its author's time. He calls the whole a *Comedia* ; but it is neither a comedy nor a tragedy. Like the old Mysteries, it is rather an attempt to exhibit, in living show, a series of unconnected incidents ; for it has no properly constructed plot, and, as he honestly confesses afterwards, it comes to no proper conclusion.<sup>38</sup>

The other play of Cervantes, that has reached us from \* this period of his life, is founded on \* 106 the tragical fate of Numantia, which having resisted the Roman arms fourteen years<sup>39</sup> was reduced by famine ; the Roman forces consisting of eighty thousand men, and the Numantian of less than four thousand, not one of whom was found alive when the

is the jest with which he ends his other play on the same subject, printed thirty years after the representation of this one. Clemencin (*Notas á D. Quixote*, III. 253, 254) says Cervantes did not print this play because he did not deem

it worthy of him. But the inference is not a fair one, for Cervantes did not print his *Numancia*, and yet he certainly thought well of it. D Quixote, II. 48.

<sup>39</sup> Cervantes makes Scipio say of the siege, on his arrival, —

conquerors entered the city.<sup>40</sup> Cervantes probably chose this subject in consequence of the patriotic recollections it awakened, and still continues to awaken, in the minds of his countrymen ; and, for the same reason, he filled his drama chiefly with the public and private horrors consequent on the self-devotion of the Numantians.

It is divided into four *jornadas*, and, like the *Trato de Argel*, is written in a great variety of measures ; the ancient *redondilla* being preferred for the more active portions. Its *dramatis personæ* are no fewer than forty in number ; and among them are Spain and the River Duero, a Dead Body, War, Sickness, Famine, and Fame ; the last personage speaking the Prologue. The action opens with Scipio's arrival. He at once reproaches the Roman army, that, in so long a time, they had not conquered so small a body of Spaniards, — as Cervantes always patriotically calls the Numantians, — and then announces that they must now be subdued by Famine. Spain enters as a fair matron, and aware of what awaits her devoted city, invokes the Duero in two poetical octaves,<sup>41</sup> which the river answers in person, accompanied by three \* 107 \* of his tributary streams, but gives no hope to Numantia, except that the Goths, the Constable of Bourbon, and the Duke of Alva, shall one

<sup>40</sup> It is well to read, with the "Numancia" of Cervantes, the account of Florus, (Epit. II. 18,) and especially that in Mariana, (Lib. III. c. 6—10,) the latter being the proud Spanish version of it.

<sup>41</sup> Duero gentil, que, con torcidas vueltas,

Y en prestarte favor no sean avaras,

Que prestes á mis ásperos lamentos

It should be added that these two octaves occur at the end of a somewhat tedious soliloquy of nine or ten others, all of which are really octave stanzas, though not printed as such.

day avenge its fate on the Romans. This ends the first act.

The other three divisions are filled with the horrors of the siege endured by the unhappy Numantians ; the anticipations of their defeat ; their sacrifices and prayers to avert it ; the unhallowed incantations by which a dead body is raised to predict the future ; and the cruel sufferings to old and young, to the loved and lovely, and even to the innocence of childhood, through which the stern fate of the city is accomplished. The whole ends with the voluntary immolation of those who remained alive among the starving inhabitants, and the death of a youth who holds up the keys of the gates, and then, in presence of the Roman general, throws himself headlong from one of the towers of the city ; its last self-devoted victim.

In such a story there is no plot, and no proper development of anything like a dramatic action. But the romance of real life has rarely been exhibited on the stage in such bloody extremity ; and still more rarely, when thus exhibited, has there been so much of poetical effect produced by individual incidents. In a scene of the second act, Marquino, a magician, after several vain attempts to compel a spirit to re-enter the body it had just left on the battle-field, in order to obtain from it a revelation of the coming fate of the city, bursts forth indignantly, and says : —

Rebellious spirit ! Back again and fill  
The form which, but a few short hours ago,  
Thyself left tenantless.

To which the spirit, re-entering the body, replies : —

Restrain the fury of thy cruel power !  
Enough, Marquino ! O, enough of pain  
I suffer in those regions dark, below,

Without the added torments of thy spell !  
 Thou art deluded if thou deem'st indeed  
 That aught of earthly pleasure can repay  
 Such brief return to this most wretched world,  
 Where, when I barely seem to live again,

\* 108

\* With urgent speed life harshly shrinks away  
 Nay, rather dost thou bring a shuddering pain ;  
 Since, on the instant, all-prevailing death  
 Triumphant reigns anew, subduing life and soul ;  
 Thus yielding twice the victory to my foe,  
 Who now, with others of his grisly crew,  
 Obedient to thy will, and stung with rage,  
 Awaits the moment when shall be fulfilled  
 The knowledge thou requirest at my hand ;  
 The knowledge of Numantia's awful fate <sup>42</sup>

There is nothing of so much dignity in the incantations of Marlowe's "Faustus," which belong to the contemporary period of the English stage ; nor does even Shakespeare demand from us a sympathy so strange with the mortal head reluctantly rising to answer Macbeth's guilty question, as Cervantes makes us feel for this suffering spirit, recalled to life only to endure a second time the pangs of dissolution.

The scenes of private and domestic affliction arising from the pressure of famine are sometimes introduced with unexpected effect, especially one between a mother and her child, and the following between Morandro, a lover, and his mistress, Lira, whom he now sees wasted by hunger, and mourning over the universal desolation. She turns from him to conceal her sufferings, and he says, tenderly, —

Nay, Lira, haste not, haste not thus away ;  
 But let me feel an instant's space the joy

Which life can give even here, amidst grim death.  
 Let but mine eyes an instant's space behold  
 Thy beauty, and, amidst such bitter woes,  
 Be gladdened ! O my gentle Lira ! — thou,  
 That dwell'st forever in such harmony  
 Amidst the thoughts that throng my fantasy,  
 That suffering grows glorious for thy sake, —  
 What ails thee, love ? On what are bent thy thoughts,  
 Chief honor of mine own ?

*Lira.*

I think, how fast  
 All happiness is gliding both from thee  
 And me, and that, before this cruel war  
 Can find a close, my life must find one too.

*Morandro.*

What say'st thou, love ?

*Lira.*

That hunger so prevails  
 Within me, that it soon must triumph quite,  
 And break my life's thin thread. What wedded love  
 Canst thou expect from me in such extremity, —  
 Looking for death perchance in one short hour ?  
 With famine died my brother yesterday ;  
 With famine sank my mother, and if still  
 I struggle on, 't is but my youth that bears  
 Me up against such rigors horrible.  
 But sustenance is now so many days  
 Withheld, that all my weakened powers  
 Contend in vain

*Morandro*

O Lira ! dry thy tears,  
 And let but mine bemoan thy bitter griefs !  
 For though fierce famine press thee merciless,  
 Of famine, while I live, thou shalt not die  
 Fosse deep and wall of strength shall be o'erleaped,  
 And death confronted, and yet warded off !  
 The bread the bloody Roman eats to-day  
 Shall from his lips be torn and placed in thine, —  
 My arms shall hew a passage for thy life, —  
 For death is naught when I behold thee thus  
 Food thou shalt have, in spite of Roman power,  
 If but these hands are such as once they were

*Lira.*

Thou speak'st, Morandro, with a loving heart, —  
 But food thus bought with peril to thy life  
 Would lose its savor All that thou couldst snatch  
 In such an onset must be small indeed,  
 And rather cost thy life than rescue mine.  
 Enjoy, then, love, thy fresh and glowing youth !  
 Thy life imports the city more than mine ;  
 Thou canst defend it from this cruel foe,  
 Whilst I, a maiden, weak and faint at heart,  
 Am worthless all. So, gentle love, dismiss this thought ;

I taste no food bought at such deadly price.  
 And though a few short, wretched days thou couldst  
 Protect this life, still famine, at the last,  
 Must end us all.

\* 110 \* *Morandro.* In vain thou strivest, love,  
 To hinder me the way my will alke  
 And destiny invite and diaaw me on  
 Pray rather, therefore, to the gods above,  
 That they return me home, laden with spoils,  
 Thy sufferings and mine to mitigate.

*Lira.* Morandio, gentle friend, O, go not forth !  
 For here before me gleams a hostile sword,  
 Red with thy blood ! O, venture, venture not  
 Such fierce extremity, light of my life !  
 For if the sally be with dangers thick,  
 More dread is the return.<sup>43</sup>

 Un rato tu hermosura,  
 Pues tanto mi dev'entura  
 Se entretiene en mis enojos  
 O dulce Lira, que suenas

 Que vuelve en gloria mis penas !

 Que me tiene tal la hambre,  
 Que de mi vital estambre

 Que talaman has de esperar  
 De quien esta en tal extremo,  
 Que te aseguro que temo  
 Antes de una hora espirar ?  
 Mi hermano ayer espiro  
 De la hambre fatigado,  
 Y mi madre ya ha acabado  
 Que la hambre la acabo  
 Y si la hambre y su fuerza  
 No ha rendido mi salud,  
 Es porque la juventud  
 Contra su rigor se esfuerza.  
 Pero como ha tantos dias  
 Que no le hago defensa,  
 No pueden contra su ofensa  
 Las débiles fuerzas mias.

*Morandro.*  
 Enjuga, Lira, los ojos,  
 Dexa que los tristes mios  
 Se vuelvan corrientes rios  
 Nacidos de tus enojos ,

Y aunque la hambre ofendida  
 Te tenga tan sin compas,  
 De hambre no moriras  
 Mientras yo tuviere vida  
 Yo me ofrezco de saltar  
 El foso y el muro fuerte,  
 Y entrar por la misma muerte  
 Para la tuya escusar  
 El pan que el Romano toca,  
 Sin que el temor me destruya,  
 Lo quitaré de la suya  
 Para ponerlo en tu boca  
 Con mi brazo haré carrera  
 A tu vida y á mi muerte,  
 Porque mas me mata el verte,  
 Señora, de esa manera  
 Yo te traere de comer  
 A pesar de los Romanos,  
 Si ya son estas mis manos  
 Las mismas que solian ser.

*Lira.*

 En fresca edad y crecida,  
 Que mas importa tu vida  
 Que la mia, á la ciudad  
 Tu podrás bien defendella,  
 De la enemiga asechanza,  
 Que no la flaca pujanza  
 Desta tan triste doncella  
 Ansí que, mi dulce amor,  
 Despide ese pensamiento,  
 Que yo no quiero sustento  
 Ganado con tu sudor  
 Que aunque puedes alargar  
 Mi muerte por algun dia,  
 Esta hambre que porfia  
 En fin nos ha de acabar.

 En vano trabajas, Lira,  
 De impidirme este camino,  
 Do mi voluntad y signo  
 Allá me convida y tira.

\* He persists, and, accompanied by a faithful \* 111 friend, penetrates into the Roman camp and obtains bread. In the contest he is wounded ; but still, forcing his way back to the city, by the mere energy of despair, he gives to Lira the food he has won, wet with his own blood, and then falls dead at her feet.

A very high authority in dramatic criticism speaks of the Numancia as if it were not merely one of the more distinguished efforts of the early Spanish theatre, but one of the most striking exhibitions of modern poetry.<sup>44</sup> It is not probable that this opinion will prevail. Yet the whole piece has the merit of great originality, and, in several of its parts, succeeds in awakening strong emotions ; so that, notwithstanding the want of dramatic skill and adaptation, it may still be cited as a proof of its author's high poetical talent, and, in the actual condition of the Spanish stage when he wrote, as a bold and noble effort to raise it.

Tú rogarás entre tanto  
A los Dioses, que me vuelvan

There is, in this scene, a tone of gentle, broken-hearted self-devotion on the part of Lira, awakening a fierce despair in her lover, that seems to me very true to nature. The last words of Lira, in the passage translated, have, I think, much beauty in the original.

<sup>44</sup> A W von Schlegel, *Vorlesungen über dramatische Kunst und Literatur*, Heidelberg, 1811, Tom. II. Abt. II. p. 345. Cervantes speaks more modestly

of it himself, but still couples it with well-considered plays of Lope de Vega, Gaspar de Avila, and Francisco Tarrega Don Quixote, Parte I c 48

There is a very curious contract between Cervantes and Rodrigo de Osorio an "Autor de Comedias," dated at Seville, 5 September, 1592, in which Cervantes engages to write six plays, for each of which he is to receive fifty ducats, provided it should be "una de las mejores comedias que se han representado en España", otherwise nothing. Whether these plays were ever written, or whether, if they were written, they were the six mentioned in the "Adjunta al Parnaso" in 1614, we shall probably never know. (Nuevos Documentos, Sevilla, 1864, pp. 26-29) The period referred to — 1592 — was apparently the one when he was much occupied and vexed with collecting provisions for the government in Andalusia, and with other poor labors of a similar sort.

CERVANTES NEGLECTED — AT SEVILLE — HIS FAILURE — ASKS EMPLOYMENT IN AMERICA — AT VALLADOLID — HIS TROUBLES — PUBLISHES THE FIRST PART OF DON QUIXOTE. — HE REMOVES TO MADRID — HIS LIFE THERE. — HIS RELATIONS WITH LOPE DE VEGA — HIS TALES AND THEIR CHARACTER — HIS JOURNEY TO PARNASSUS, AND DEFENCE OF HIS DRAMAS — PUBLISHES HIS PLAYS AND ENTREMESES — THEIR CHARACTER — SECOND PART OF DON QUIXOTE — HIS DEATH.

THE low condition of the theatre in his time was a serious misfortune to Cervantes. It prevented him from obtaining, as a dramatic author, a suitable remuneration for his efforts, even though they were, as he tells us, successful in winning public favor. If we add to this that he was now married, that one of his sisters was dependent on him, and that he was maimed in his person and a neglected man, it will not seem remarkable that, after struggling on for three years at Esquivias and Madrid, he found himself obliged to seek elsewhere the means of subsistence. In 1588, therefore, he went to Seville, then the great mart for the vast wealth coming in from America, and, as he afterwards called it, "a shelter for the poor and a refuge for the unfortunate."<sup>1</sup> There he acted for some time as one of the agents of Antonio de Guevara, a royal commissary for the American fleets, and afterwards as a collector of moneys due to the government

<sup>1</sup> "Volvíme á Sevilla," says Berganza, in the "Coloquio de los Perros," "que es amparo de pobres y refugio de desdichados" *Novelas*, Madrid, 1783, 8vo, Tom. II p 362 That Cervantes was at Seville in the years 1588, 1589,

1590, 1592, and 1593 is proved beyond all peradventure by documents published at Seville in 1864, by Don José María Asensio y Toledo, referred to in note 44 of the last chapter

and to private individuals; an humble condition, certainly, and full of cares, but still one that gave him the bread he had vainly sought in other pursuits.

The chief advantage, perhaps, of these employments to a genius like that of Cervantes was, that they led him to \* travel much for ten years \* 113 in different parts of Andalusia and Granada, and made him familiar with life and manners in these picturesque parts of his native country. During the latter portion of the time, indeed, partly owing to the failure of a person to whose care he had intrusted some of the moneys he had received, and partly, it is to be feared, owing to his own negligence, he became indebted to the government, and was imprisoned at Seville, as a defaulter, for a sum so small that it seems to mark a more severe degree of poverty than he had yet suffered. After a strong application to the government, he was released from prison under an order of December 1, 1597, when he had been confined, apparently, about three months; but the claims of the public treasury on him were not adjusted in 1608, nor do we know what was the final result of his improvidence in relation to them, except that he does not seem to have been molested on the subject after that date.

During his residence at Seville, which, with some interruptions, extended from 1588 to 1598, or perhaps somewhat longer, Cervantes made an ineffectual application to the king for an appointment in America; setting forth by exact documents — which now constitute the most valuable materials for his biography — a general account of his adventures, services, and sufferings, while a soldier in the Levant, and of the

miseries of his life while he was a slave in Algiers.<sup>2</sup> This was in 1590. But no other than a formal answer seems ever to have been returned to the application; and the whole affair only leaves us to infer the severity of that distress which should induce him to \* 114 seek relief in exile to a colony \* of which he has elsewhere spoken as the great resort of rogues.<sup>3</sup>

As an author, his residence at Seville has left few distinct traces of him. In 1595, he sent some trifling verses to Saragossa, which gained one of the prizes offered at the canonization of San Jacinto;<sup>4</sup> in 1596, he wrote a sonnet in ridicule of a great display of courage made in Andalusia after all danger was over and the English had evacuated Cadiz, which, under Essex, Elizabeth's favorite, they had for a short time occupied;<sup>5</sup> and in 1598 he wrote another sonnet, in ridicule of an unseemly uproar that took place in the cathedral at Seville, from a pitiful jealousy between the municipality and the Inquisition, on occasion of the religious ceremonies observed there after the death of Philip the Second.<sup>6</sup> But, except these trifles, we

<sup>2</sup> This extraordinary mass of documents is preserved in the "Archivos de las Indias," which are admirably arranged in the old and beautiful Exchange built by Herrera in Seville, when Seville was the great *entrepot* between Spain and her colonies. The papers referred to may be found in Estante II Cajon 5, Legajo 1, and were discovered by the venerable Cean Bermudez in 1808, who showed them to me in 1818. The most important of them are published entire, and the rest are well abridged, in the Life of Cervantes by Navarrete (pp. 311-388) Cervantes petitioned in them for one of four offices, — the Auditorship of New Granada; that of the galleys of Cartagena; the Governorship of the Province of Soconusco; or the place of Corregidor of the city of Paz.

know of nothing that he wrote, during this active period of his life, unless we are to assign to it some of his tales, which, like the "Española Inglesa," are connected with known contemporary events, or, like "Rinconete y Cortadillo," savor so much of the manners of Seville, that it seems as if they could have been written nowhere else.

\* Of the next period of his life,—and it is \* 115 the important one immediately preceding the publication of the First Part of *Don Quixote*,—we know even less than of the last. A uniform tradition, however, declares that he was employed by the Grand Prior of the Order of Saint John in La Mancha to collect rents due to his monastery in the village of Argamasilla; that he went there on this humble agency and made the attempt, but that the debtors refused payment, and, after persecuting him in different ways, ended by throwing him into prison, where, in a spirit of indignation, he began to write the *Don Quixote*, making his hero a native of the village that treated him so ill, and laying the scene of most of the knight's earlier adventures in La Mancha. But, though this is possible, and even probable, we have no direct proof of it. Cervantes says, indeed,

"mis escritos" But he was mistaken, or he jested,—I rather think the last. For an account of the indecent uproar Cervantes ridiculed, and needful to explain this sonnet, see Semanario Pintoresco, Madrid, 1842, p 177, and Espinosa, *Hist de Sevilla*, 1627, Segunda Parte, ff 112-117. The principal artists of the city were employed on the *catafalque* sacrificed in this unseemly riot, and they made it as magnificent as possible (Stirling's *Artists of Spain*, 1848, Vol I pp 351, 403, 463) The sermon delivered on the occasion by Maestro Fray Juan Bernal, and printed at Seville, 1599, 4to, ff. 18, is not without a sort of rude familiar elo-

quence, comparing Philip II to Hezekiah, who drove out heresy, and boasting that, "like a Phoenix, as he was, he died in the nest he had himself built up,"—the famous Escorial. Bernal died in 1601, and a popular life of him was printed at Seville in about sixty doggerel *quintillas*, full of puns, and very characteristic of a period in which buffoonery was often one of the means by which religion was made palatable to the rabble. The following is a specimen of it —

Y que el varon soberano  
Fuese Padre Santo es llano,  
Pues, quando le amortajaron,  
Mil cardenales le hallaron  
Hechos de su propia mano.

in his Preface to the First Part, that his Don Quixote was begun in a prison;<sup>7</sup> but this may refer to his earlier imprisonment at Seville, or his subsequent one at Valladolid. All that is certain, therefore, is, that he had friends and relations in La Mancha; that, at some period of his life, he must have enjoyed an opportunity of acquiring the intimate knowledge of its people, antiquities, and topography, which the Don Quixote shows; and that this could hardly have happened except between the end of 1598, when we lose all trace of him at Seville, and the beginning of 1603, when we find him established at Valladolid.

To Valladolid he went, apparently because the court had been removed thither by the caprice of Philip the Third and the interests of his favorite, the Duke of Lerma; \* but, as everywhere else, there, too, he was overlooked and left in poverty. Indeed, we should hardly know he was in Valladolid at all before the publication of the First Part of his Don Quixote, but for two painful circumstances. The first is an account, in his own handwriting, for sewing done by his sister, who, having sacrificed everything for his redemption from captivity, became dependent on him during her widowhood, and died in his family. The other is, that in

<sup>7</sup> "Se engendró en una cárcel" Avellaneda says the same thing in his Preface, but says it contemptuously: "Pero disculpan los yerros de su Primera Parte en esta materia, el haberse escrito entre *los* de una cárcel," etc. I once thought that the article *los* in this passage was an intimation that the residence of Cervantes in a jail was a matter of reproach to him. But Sir Edmund Head—so familiar with everything Spanish, and so acute in applying his knowledge—pointed out to me the pun on the word "yerros," (*faults*),

which is commonly sounded much like "hierros" (*irons*), and, on referring to the original edition of Avellaneda, (1614,) I found the word actually spelt "hierros," (*irons, chains*), while the large Dictionary of the Academy, (1739, in verb "yerro,") admitting that "yerros" (*faults*) is sometimes spelt "hierros," settles the question. In its mildest form, it is a poor quibble, intended to insult Cervantes with his misfortunes. There is a similar pun on the word in Lope's "Dorotea," Acto III. Esc. 7.

one of those night-brawls common among the gallants of the Spanish court, a stranger was killed near the house where Cervantes lived; in consequence of which, and of some suspicions that fell on the family, he was, according to the hard provisions of the Spanish law, confined with the other principal witnesses until an investigation could take place.<sup>8</sup>

But, in the midst of poverty and embarrassments, and while acting in the humble capacity of general agent and amanuensis for those who needed his services,<sup>9</sup> Cervantes had prepared for the press the First Part of his *Don Quixote*, which was licensed in 1604, at Valladolid, and printed in 1605, at Madrid. It was received with such decided favor, that, before the year was out, another edition was called for at Madrid, and two more elsewhere; circumstances which, after so many discouragements in other attempts to procure a subsistence, naturally turned his thoughts more towards letters than they had been at any previous period of his life.

In 1606, the court having gone back to Madrid, Cervantes followed it, and there passed the remainder of his life; changing his residence to \*different parts of the city at least seven \*117 times in the course of ten years, apparently as he was driven hither and thither by his neces-

<sup>8</sup> Pellicer's Life, pp cxvi-cxxxii. It has been suggested, on the authority of a satirical sonnet attributed to *Góngora*, that Cervantes was employed by the Duke of Lerma to write an account of the festivities with which *Howard*, the English Ambassador, was welcomed in 1605. But the genuineness of the sonnet is doubtful, and it does not seem to me to bear the interpretation put upon it (Navarrete, *Vida*, p 456 *D Quixote*, ed Pellicer, 1797, Tom I. p cxv.) It has also been suggested that Cervantes, in the same year, 1605,

wrote at Valladolid an account, in fifty leaves quarto, of the festivities in that city on occasion of the birth of Philip IV. But, I think, he was then a person of too little note to have been employed for such a work. See the Spanish translation of this History, Tom II p. 550

<sup>9</sup> One of the witnesses in the preceding criminal inquiry says that Cervantes was visited by different persons, "por ser hombre que escribe y trata negocios."

sities. In 1609, he joined the brotherhood of the Holy Sacrament,—one of those religious associations which were then fashionable, and the same of which Quevedo, Lope de Vega, and other distinguished men of letters of the time, were members. About the same period, too, he seems to have become known to most of these persons, as well as to others of the favored poets round the court, among whom were Espinel and the two Argensolas; though what were his relations with them, beyond those implied in the commendatory verses they prefixed to each other's works, we do not know.

Concerning his relations with Lope de Vega there has been much discussion to little purpose. Certain it is that Cervantes often praises this great literary idol of his age, and that four or five times Lope stoops from his pride of place and compliments Cervantes, though never beyond the measure of praise he bestows on many whose claims were greatly inferior. But in his stately flight it is plain that he soared much above the author of *Don Quixote*, to whose highest merits he seemed carefully to avoid all homage;<sup>10</sup> and though I find no sufficient reason to suppose their relation to each other was marked by any personal jealousy or ill-will, as has been sometimes supposed, yet I can find no proof that it was either intimate or kindly. On the contrary, when we consider the good-nature of Cervantes, which made him praise to excess nearly all his other literary contemporaries, as well as the greatest of them all, and when we allow for the frequency of hyperbole in such praises at that time, which prevented them from being what they would now be, we may perceive an occasional coolness in his manner,

<sup>10</sup> *Laurel de Apolo*, *Silva* 8, where he is praised *only* as a poet.

when he speaks of Lope, which shows that, without overrating his own merits and claims, he was not insensible to the difference in their respective positions, or to the injustice towards himself implied by it. Indeed, his whole tone, whenever he notices Lope, \* seems to be marked with much personal dignity, and to be singularly honorable to him.<sup>11</sup> \* 118

<sup>11</sup> Most of the materials for forming a judgment on this point in Cervantes's character are to be found in Navarrete's (*Vida*, 457-475), who maintains that Cervantes and Lope were sincere friends, and in Hueita (*Lección Crítica*, Madrid, 1785, 18mo, p. 43 to the end), who maintains that Cervantes was an envious rival of Lope. As I cannot adopt either of these results, and think the last particularly unjust, I will venture to add one or two considerations.

Lope was fifteen years younger than Cervantes, and was forty-three years old when the First Part of the *Don Quixote* was published, but from that time till the death of Cervantes, a period of eleven years, he does not, that I am aware, once allude to him. The five passages in the immense mass of Lope's works, in which alone, so far as I know, he speaks of Cervantes, are, —1 In the "Dorothea," 1598, twice slightly and without praise. 2 In the Preface to his own 'Tales, 1621, still more slightly, and even, I think, coldly. 3 In the "Laurel de Apolo," 1630, where there are twelve lines of cold punning eulogy of him, fourteen years after his death. 4 In his play, "El Premio del Bien Hablar," printed in Madrid, 1635, where Cervantes is barely mentioned (*Comedias*, 4to, Tom. XXI, f. 162). And 5 In "Amar sin Saber á Quien" (*Comedias*, Madrid, Tom. XXII, 1635), where (Jornada primera) Leonarda, one of the principal ladies, says to her maid, who had just cited a ballad of Audalla and Xarifa to her, —

Inez, take care, your common reading is,  
I know, the Ballad-book, and, after all,  
Your case may prove, like that of the poor  
knight —

to which Inez replies, interrupting her mistress, —

Don Quixote of La Mancha, if you please, —  
May God Cervantes pardon! — was a knight

Of that wild, erring sort the Chronicle  
So magnifies For me, I only read  
The Ballad-book, and find myself from day  
To day the better for it

All this looks very reserved, but, when we add to it that there were numberless occasions on which Lope could have graciously noticed the merit to which he could never have been insensible, — especially when he makes so free and unjustifiable a use of Cervantes's "Trato de Argel" in his own "Esclavos de Argel," absolutely introducing him by name on the stage, and giving him a prominent part in the action (*Comedias*, *Caragocá*, 1647, 4to, Tom. XXV. pp. 245, 251, 257, 262, 277), without showing any of those kindly or respectful feelings which it was easy and common to show to friends on the Spanish stage, and which Calderon, for instance, so frequently shows to Cervantes (e. g. *Casa con Dos Puertas*, *Join I*, etc.), — we can hardly doubt that Lope willingly overlooked and neglected Cervantes, at least from the time of the appearance of the First Part of *Don Quixote*, in 1605, till after its author's death, in 1616.

On the other hand, Cervantes, from the date of the "Canto de Calíope" in the "Galatea," 1584, when Lope was only twenty-two years old, to the date of the Preface to the Second Part of *Don Quixote*, 1615, only a year before his own death, was constantly giving Lope the praises due to one who, beyond all *contemporary* doubt or rivalry, was at the head of Spanish literature, and, among other proofs of such elevated and generous feelings, prefixed, in 1598, a laudatory sonnet to Lope's "Dragontea." But, at the same time that he did this, and did it freely and fully, there is a dignified reserve and caution in some parts of his remarks about Lope that show he was not impelled by any warm, personal regard;

\* 119 \* In 1613 he published his "Novelas Exemplares," Instructive or Moral Tales,<sup>12</sup> twelve in number, and making one volume. Some of them were written several years before, as was "The Impertinent

a caution which is so obvious, that Avellaneda, in the Preface to his *Don Quixote*, maliciously interpreted it into envy

It therefore seems to me difficult to avoid the conclusion, that the relations between the two great Spanish authors of this period were such as might be expected, where one was, to an extraordinary degree, the idol of his time, and the other a suffering and neglected man. What is most agreeable about the whole matter is the generous justice Cervantes never fails to render to Lope's merits

But, since the preceding account, both in the text and note, was published, (1849,) more evidence has been discovered on the subject of the personal relations of Cervantes and Lope, — unhappily, such as leaves no doubt of Lope's ungenerous feelings towards his great contemporary. It is published in the "Nachtage zur Geschichte der dramatischen Literatur und Kunst in Spanien von A. F. von Schack," (Frankfurt am Main, 1854, 8vo, pp 31-34,) and consists of extracts, made by Duran, from *autograph* letters of Lope, found among the papers of Lope's great patron and friend, the Duke de Sessa, who paid the expenses of his funeral, and inherited his manuscripts. The principal one, for the present purpose, is dated August 4, 1604, while the *Don Quixote* was in the press, and when reading it we must bear in mind that Cervantes did not much regard the fashion of his time in prefixing laudatory sonnets, etc., of his friends, to his other works, and has ridiculed it outright in the jesting and satirical verses he has prefixed to his *Don Quixote*, in the names of *Amadis de Gaula*, *Orlando Furioso*, etc. Lope, under these circumstances, writes to his friend the Duke "Of poets I speak not. Many are in the bud for next year; but there is *none so bad as Cervantes*, or so foolish as to praise *Don Quixote*, — *pero ninguno hay tan malo como Cervantes, ni tan necio que alabe á Don Quixote*. And

further on, speaking of satire, he says, "It is a thing as hateful to me as my little books are to Almendares, and my *plays to Cervantes*." Of course there can be no mistake about the feelings with which such bitter words were written. They are the more cruel, as Cervantes was then a suffering man, living in severe poverty at Valladolid, and Lope knew it

I do not know who is hit under the name of Almendares, but suspect it is a misspelling or misprint of that of Almendariz, who published poor religious poetry in the popular style — *populare carmine* — in 1603 and 1613, and is praised by Cervantes in his *Viaje al Parnaso*

I have said nothing here of the sonnets first published by Pellicer in his "Biblioteca de Traductores" (Tom I, 1778, pp 170, etc.) I mean two attributed to Cervantes and one to Lope, in which those great men are made to ridicule each other in very bad taste, — I have, I say, not mentioned these sonnets, partly because, even as set forth by Pellicer, they have a very suspicious look, but chiefly because the matter at the time was sifted by Huerta, Forner, etc., and no doubt was left that they are spurious. See "Lección Crítica," *ut supra*, — "Tentativa de aprovechar el merito de la Lección Crítica, en defensa de Cervantes por Don Placido Guerreiro," (Madrid, 1785, 18mo, pp 30, ec.,) and finally, "Reflexiones sobre la Lección Crítica por Tome Cecial, ec las publica Don J. P. Forner" Madrid, 1786, 18mo, pp 107-123.

<sup>12</sup> He explains in his Preface the meaning he wishes to give the word *exemplares*, saying, "Heles dado nombre de *exemplares*, y si bien lo miras, no hay ninguna de quien no se puede sacar algun exemplo provechoso." The word *exemplo*, from the time of the Archpriest of Hita and Don Juan Manuel, has had the meaning of *instruction* or *instructive story*. The *novelas* have been the most successful of Cervantes's works, except his *D. Quixote*.

Curiosity," inserted in the First Part of *Don Quixote*,<sup>13</sup> and "Rinconete y Cortadillo," which is mentioned there, so that both must be dated as early as 1604; while others contain internal evidence of the time of their composition, \* as the "Española Inglesa" does, \* 120 which seems to have been written in 1611.

All of these stories are, as he intimates in their Preface, original, and most of them have the air of being drawn from his personal experience and observation.<sup>14</sup>

Their value is different, for they are written with different views, and in a variety of style and manner greater than he has elsewhere shown; but most of them contain touches of what is peculiar in his talent, and are full of that rich eloquence, and of those pleasing descriptions of natural scenery, which always flow so easily from his pen. They have little in common with the graceful story-telling spirit of Boccaccio and his followers, and still less with the strictly practical

<sup>13</sup> The "Curioso Impertinente," first printed in 1605, in the First Part of *Don Quixote*, was printed in Paris in 1608, — five years before the collected *Novelas* appeared in Madrid, — by Cæsar Oudin, a teacher of Spanish at the French court, who caused several other Spanish books to be printed in Paris, where the Castilian was in much favor from the intermarriages between the crowns of France and Spain. Oudin printed the *Curioso Impertinente*, without its author's name, at the end of a volume entitled *Silva curiosa de Julian de Medrano, cavallero Navarro, ec., corregida en esta nueva edicion, ec., por Cesar Oudin* Paris, 1608, 8vo, pp 328. Many other proofs could be given of the fashionable prevalence of Spanish in France. Cervantes says, somewhat extravagantly, "En Francia ni muger ni varon dexa de aprender la Lengua Castellana." (*Persiles, Lib III c 13*) But the Spanish theatre established in Paris twelve years is proof enough. See *post*, Chap. XXVI note 12

<sup>14</sup> In the prologue, Cervantes says

these tales are the oldest in the language, — "Yo soy el primero que he novelado en lengua Castellana", — but he explains this by saying that those who had preceded him in this style of composition had borrowed their fictions from other languages. This is true of Timoneda, but it is not true of the *Conde Lucanor*. I suppose, however, that he referred to the "Novelas," then coming in fashion, which were taken from the Italian. Those of Cervantes have been, undoubtedly, after the *Don Quixote*, the most favored of all his works, and the most deserving of favor. One separate testimony to their power should, however, not be forgotten. In Lockhart's *Life of Scott* (ed. London, 1839, Vol. X p 187) we are told that Scott "expressed the most unbounded admiration for Cervantes, and said that the 'Novelas' of that author had inspired him with the ambition of excelling in fiction, and that, until disabled by illness, he had been a constant reader of them."

tone of Don Juan Manuel's tales ; nor, on the other hand, do they approach, except in the case of the Impertinent Curiosity, the class of short novels which have been frequent in other countries within the last century. The more, therefore, we examine them, the more we shall find that they are original in their composition and general tone, and that they are strongly marked with the individual genius of their author, as well as with the more peculiar traits of the national character,—the ground, no doubt, on which they have always been favorites at home, and less valued than they deserve to be abroad. As works of invention they rank, among their author's productions, next after *Don Quixote* ; in correctness and grace of style, they stand before it.

The first in the series, “*The Little Gypsy Girl*,” is the story of a beautiful creature, *Preciosa*, who had been stolen, when an infant, from a noble family, and educated in the wild community of the Gypsies,—that mysterious and degraded race which, until within the last fifty years, has always thriven in Spain since it first appeared there in the fifteenth century. There

is a truth, as well as a spirit, in parts of this

\* 121 little story, that \* cannot be overlooked. The description of *Preciosa*'s first appearance in Madrid during a great religious festival ; the effect produced by her dancing and singing in the streets ; her visits to the houses to which she was called for the amusement of the rich ; and the conversations, compliments, and style of entertainment, are all admirable, and leave no doubt of their truth and reality. But there are other passages which, mistaking in some respects the true Gypsy character, seem as if they were rather drawn from some such

imitations of it as the “Life of Bampfylde Moore Carew” than from a familiarity with Gypsy life as it then existed in Spain.<sup>15</sup>

The next of the tales is very different, and yet no less within the personal experience of Cervantes himself. It is called “The Generous Lover,” and is nearly the same in its incidents with an episode found in his own “Trato de Argel.” The scene is laid in Cyprus, two years after the capture of that island by the Turks, in 1570; but here it is his own adventures in Algiers upon which he draws for the materials and coloring of what is Turkish in his story, and the vivacity of his descriptions shows how much of reality there is in both.

The third story, “Rinconete y Cortadillo,” is again quite unlike any of the others. It is an account, partly in the *picaresque* style, of two young vagabonds, not without ingenuity and spirit, who join at Seville, in 1569, one of those organized communities of robbers and beggars which often recur in the history of Spanish society and manners during the last three centuries. The realm of Monipodio, their chief, reminds us at once of Alsatia in Sir Walter Scott’s “Nigel,” and the resemblance is made still more obvious afterwards, when, in “The Colloquy of the Dogs,” we find the same Monipodio in secret league with the officers of justice.<sup>154</sup> A single trait, however, will show with what fidelity Cervantes has copied from nature. The members of this confederacy, who lead the most

<sup>15</sup> This story has been dramatized more than once in Spain, and freely used elsewhere, — among the rest, as an opera, by Carl Maria Weber. See note on the “Gitanilla” of Solís, *post*, Chap. XXV.

<sup>154</sup> The name of “Monipodio” was no more taken by accident than that of Jonathan Oldenbuck. Mr. Allworthv.

or a hundred others of the same sort. The large dictionary of the Spanish Academy makes *Monipodio* a popular corruption of *Monipolio*, and Antonio Pérez, in one of his letters to Gil de Mesa, extends it to frauds in contracts, forged testaments, etc., in short, to general roguery.

\* 122 dissolute and lawless lives, are yet \* represented as superstitious, and as having their images, their masses, and their contributions for pious charities, as if robbery were a settled and respectable vocation, a part of whose income was to be devoted to religious purposes in order to consecrate the remainder; a delusion which, in forms alternately ridiculous and revolting, has subsisted in Spain from very early times down to the present day.<sup>16</sup>

It would be easy to go on and show how the rest of the tales are marked with similar traits of truth and nature: for example, the story founded on the adventures of a Spanish girl carried to England when Cadiz was sacked in 1596; "The Jealous Estremadurian," and "The Fraudulent Marriage," the last two of which bear internal evidence of being founded on fact; and even "The Pretended Aunt," which, as he did not print it himself,—apparently in consequence of its coarseness,—ought not now to be placed among his works, is after all the story of an adventure that really occurred at Salamanca in 1575.<sup>17</sup> Indeed, they

<sup>16</sup> It is an admirable hit, when Rinconete, first becoming acquainted with one of the rogues, asks him, "Es vuesa merced poi ventura ladron?" and the rogue replies, "*Sí, para servir á Díos y á la buena gente*" (Novelas, Tom I. p. 235.) And, again, the scene (pp. 242–247) where Rinconete and Cortadillo are received among the robbers, and that (pp. 254, 255) where two of the shameless women of the gang are very anxious to provide candles to set up as devout offerings before their patron saints, are hardly less happy, and are perfectly true to the characters represented. Indeed, it is plain from this tale, and from several of the Entremeses of Cervantes, that he was familiar with the life of the rogues of his time. Fermin Caballero, in a pleasant tract on the Geographical Knowledge of Cervantes, (*Pericia Geográfica de Cervantes*,

Madrid, 1840, 12mo,) notes the aptness with which Cervantes alludes to the different localities in the great cities of Spain, which constituted the rendezvous and lurking-places of its vagabond population. (p 75.) Among these Seville was pre-eminent. Guevara, when he describes a community like that of Monipodio, places it, as Cervantes does, in Seville. Diablo Cojuelo, Tranco IX.

<sup>17</sup> Coarse as it is, however, the "Tia Fingida" was found, with "Rinconete y Cortadillo," and several other tales and miscellanies, in a manuscript collection of stories and trifles made 1606–1610, for the amusement of the Archbishop of Seville, D. Fernando Niño de Guevara; and long afterwards carefully preserved by the Jesuits of St. Hermenegild. A castigated copy of it was printed by Arrieta in his "Espíritu de

are all fresh from the \* racy soil of the national \* 123 character, as that character is found in Andalusia; and are written with an idiomatic richness, a spirit, and a grace, which, though they are the oldest tales of their class in Spain, have left them ever since without successful rivals. Ten editions of them were published in nine years.

In 1614, the year after they appeared, Cervantes printed his "Journey to Parnassus"; a satire in *terza rima*, divided into eight short chapters, and written in professed imitation of an Italian satire, by Cesare Caporali, on the same subject and in the same measure.<sup>18</sup> The poem of Cervantes has little merit. It is an account of a summons by Apollo, requiring all good poets to come to his assistance for the purpose of driving all the bad poets from Parnassus, in the course of which Mercury is sent in a royal galley, allegorically

Miguel de Cervantes" (Madrid, 1814, 12mo), but the Prussian ambassador in Spain, if I mistake not, soon afterwards obtained possession of an unaltered copy, certified by Navarrete to be exact, and sent it to Berlin, where it was published by the famous Greek scholar, F A Wolf, first in one of the periodicals of Berlin, and afterwards in a separate pamphlet (See his *Verbrecht* to the "Tia Fingida, Novela inédita de Miguel de Cervantes Saavedra," Berlin, 1818, 8vo) It has since been printed in Spain with the other tales of Cervantes

An acute, characteristic criticism of the "Tia Fingida," by D Bart José Gallardo, may be found in the first number of his "Criticon," 1835; giving, among other curious matter, improved readings of it in several places.

Some of the tales of Cervantes were translated into English as early as 1640; but not well into French, I think, till Vialdot published his translation (Paris, 1838, 2 tom 8vo) Even he, however, did not venture on the obscure puns and jests of the "Licenciado Vidriera," a fiction of which Moreto made use in his play of the same name, representing

the Licentiate, however, as a feigned madman and not as a real one, and showing little of the humor of the original conception (Comedias Escogidas, Madrid, 4to, Tom V 1653) Under the name of "Léocadie," there is a poor abridgment of the "Fueiza de la Sangre," by Flonan. The old English translation by Mabbe (London, 1640, folio) is said by Godwin to be "perhaps the most perfect specimen of prose translation in the English language" (Lives of E and J Philips, London, 1815, 4to, p 246) The praise is excessive, but the translation is certainly very well done. It, however, extends only to six of the tales

<sup>18</sup> The first edition is in small duodecimo, (Madrid, 1614,) 80 leaves, better printed, I think, than any other of his works that were published under his own care. Little but the opening is imitated from Cesare Caporali's "Viaggio in Parnaso," which is only about one fifth as long as the poem of Cervantes. The "Viage del Parnaso" had no success. Unless there is an edition of Milan, 1624, which I know only from N Antonio, none appeared after the first, I believe, till 1736.

built and rigged with different kinds of verses, to Cervantes, who, being confidentially consulted about the Spanish poets that can be trusted as allies in the war against bad taste, has an opportunity of speaking his opinion on whatever relates to the poetry of his time.

The most interesting part is the fourth chapter, in which he slightly notices the works he has himself written,<sup>19</sup> and complains, with a gayety that at \* 124 least proves \* his good-humor, of the poverty and neglect with which they have been rewarded.<sup>20</sup> It may be difficult, perhaps, to draw a line between such feelings as Cervantes here very strongly expresses, and the kindred ones of vanity and presumption; but yet, when his genius, his wants, and his manly struggles against the gravest evils of life are considered, and when to this are added the light-heartedness and simplicity with which he always speaks of himself, and the indulgence he always shows to others, few will complain of him for claiming with some boldness honors that had been coldly withheld, and to which he felt that he was entitled.

At the end he has added a humorous prose dialogue, called the “Adjunta,” defending his dramas, and attacking the actors who refused to represent them. He says that he had prepared six full-length plays, and six Entremeses, or farces; but that the theatre had its

<sup>19</sup> Among them he speaks of many ballads that he had written —

pensioned poets, and so took no note of him. The next year, however, when their number had become eight plays and eight Entremeses, he found a publisher, though not without difficulty; for the bookseller, as he says in the Preface, had been warned by a noble author, that from his prose much might be hoped, but from his poetry nothing. And truly his position in relation to the theatre was not one to be desired. Thirty years had passed since he had himself been a successful writer for it; and the twenty or more pieces he had then produced, some of which he mentions anew with great complacency,<sup>21</sup> were, no doubt, long since forgotten. \* In the interval, \* 125 as he tells us, "that great prodigy of nature, Lope de Vega, had raised himself to the monarchy of the theatre, subjected it to his control, and placed all its actors under his jurisdiction; filled the world with becoming plays, happily and well written; . . . . and if any persons (and in truth there are not a few such) have desired to enter into competition with him and share the glory of his labors, all they have done, when put together, would not equal the half of what has been done by him alone."<sup>22</sup>

<sup>21</sup> The "Confusa" was evidently his favorite among these earlier pieces. In the Viage he says of it, —

Soy por quien La Confusa nadafea  
Pareci en los teatros admirable,

and in the "Adjunta" he says, "De la que mas merecio fué *y es*, de una llamada La Confusa, la qual, con paz sea dicho, de quantas comedias de capa y espada hasta hoy se han representado, bien puede tener lugar señalado por buena entre las mejores." This boast, it should be remembered, was made in 1614, when Cervantes had printed the First Part of the *Don Quixote*, and when Lope and his school were at the height of their glory. It is probable, however, that we, at the present day, should be more curious to see the "Ba-

talla Naval," which, from its name, contained, I think, his personal experiences at the fight of Lepanto, as the "Trato de Argel" contained those at Algiers

<sup>22</sup> After alluding to his earlier efforts on the stage, Cervantes goes on in the Prólogo to his new plays "Tuve otras cosas en que ocuparme; dexé la pluma y las comedias, y entró luego el monstruo de naturaleza, el gran Lope de Vega, y alzóse con la monarquía cómica; avasalló y puso debajo de su jurisdicción á todos los Farsantes, llenó el mundo de Comedias proprias, felices y bien razonadas; y tantas que passan de diez mil pliegos los que tiene escritos, y todas (que es una de las mayores cosas que puede decirse) las ha visto

The number of these writers for the stage in 1615 was, as Cervantes intimates, very considerable ; and when he goes on to enumerate, among the more successful, Mira de Mescua, Guillen de Castro, Aguilar, Luis Velez de Guevara, Gaspar de Avila, and several others, we perceive, at once, that the essential direction and character of the Spanish drama were at last determined. Of course, the free field open to him when he composed the plays of his youth was now closed ; and as he wrote from the pressure of want, he could venture to write only according to the models triumphantly established by Lope de Vega and his imitators.

The eight plays or *Comedias* he now produced were, therefore, all composed in the style and in the forms of verse already fashionable and settled. Their subjects are as various as the subjects of his tales. One of them is a *rifacimento* of his “Trato de Argel,” and is curious, because it contains some of the materials,

and even occasionally the very phraseology, \* 126 of the story \* of the Captive in *Don Quixote*,

and because Lope de Vega thought fit afterwards to use it somewhat too freely in the composition of his own “Esclavos en Argel.”<sup>23</sup> Much of it seems to be founded in fact ; among the rest, the deplorable martyrdom of a child in the third act, and the repre-

representar, ú oido decir (por lo menos) que se han representado, y si algunos, (que hay muchos) han querido entrar á la parte y gloria de sus trabajos, todos juntos no llegan en lo que han escrito á la mitad de lo que él solo,” etc

<sup>23</sup> This play, which Cervantes calls “Los Baños de Argel,” (*Comedias*, 1749, Tom I p 125,) opens with the landing of a Moorish corsair on the coast of Valencia ; gives an account of the sufferings of the captives taken in this descent, as well as the sufferings

of others afterward ; and ends with a Moorish wedding and a Christian martyrdom (See *ante*, Chap. X.) He says of it himself —

No de la imaginacion  
Este trato se sacó,  
Que la verdad lo fraguó  
Bien lejos de la ficcion.

p 186

The verbal resemblances between the play and the story of the Captive are chiefly in the first *jornada* of the play, as compared with *Don Quixote*, Parte I. c 40.

sentation of one of the *Coloquios* or farces of Lope de Rueda by the slaves in their prison-yard.

Another of the plays, the story of which is also said to be true, is “El Gallardo Español,” or The Bold Spaniard.<sup>24</sup> Its hero, named Saavedra, and therefore, perhaps, of the old family into which that of Cervantes had long before intermarried, goes over to the Moors for a time, from a point of honor about a lady, but turns out at last a true Spaniard in everything else, as well as in the exaggeration of his gallantry. “The Sultana” is founded on the history of a Spanish captive, who rose so high in the favor of the Grand Turk, that she is represented in the play as having become, not merely a favorite, but absolutely the Sultana, and yet as continuing to be a Christian,—a story which was readily believed in Spain, though only the first part of it is true, as Cervantes must have known, since Catharine of Oviedo, who is the heroine, was his contemporary.<sup>25</sup> The “Rufian Dichoso” is a Don

\* Juan in licentiousness and crime, who is converted and becomes so extraordinary a saint, that, to redeem the soul of a dying sinner, Doña Ana de Treviño, he formally surrenders to her his own virtues and good works, and assumes her sins, be-

<sup>24</sup> The part we should least willingly suppose to be true—that of a droll, roistering soldier, who gets a shameful subsistence by begging for souls in Purgatory, and spending on his own gluttony the alms he receives—is particularly vouched for by Cervantes “Esto de pedir para las ánimas esuento verdadero, que yo lo vi.” How so indecent an exhibition on the stage could be permitted is the wonder. Once, for instance, when in great personal danger, he prays thus, as if he had read the “Clouds” of Aristophanes —

Animas de Purgatorio'  
Favoreced me, Señoras'

Que mi peligro es notorio,  
Si ya no estais en estas horas  
*Durmiendo en el dormitorio*  
Tom I p 34

At the end he says his principal intent has been, —

Mezclar verdades  
Con fabulosos intentos

The Spanish doctrine of the play—all for love and glory—is well expressed in the two following lines from the second *jornada* —

Que por reynar y por amor no hay culpa,  
Que no tenga perdón, y halle disculpa

<sup>25</sup> Se vino á Constantinopla,

ginning anew, through incredible sufferings, the career of penitence and reformation ; all of which, or at least what is the most gross and revolting in it, is declared by Cervantes, as an eye-witness, to be true.<sup>26</sup>

The remaining four plays are no less various in their subjects, and no less lawless in the modes of treating them ; and all the eight are divided into three *jornadas*, which Cervantes uses as strictly synonymous with acts.<sup>27</sup> All preserve the character of the Fool, who in one instance is an ecclesiastic,<sup>28</sup> and all extend over any amount of time and space that is found convenient to the action ; the “Rufian Dichoso,” for instance, beginning in Seville and Toledo, during the youth of the hero, and ending in Mexico in his old age. The personages represented are extravagant in their number, — once amounting to above thirty, — and among them, besides every variety of human existences, are Demons, Souls in Purgatory, Lucifer, Fear, Despair, Jealousy, and other similar phantasms. The truth is, Cervantes had renounced all the principles of the drama which his discreet canon had so gravely set forth ten years earlier in the First Part of Don Quixote ; and now, whether with the consent of his will, or only with that of his poverty, we cannot tell, but, as may be seen, not merely in the plays themselves, but in a sort of induction to the second act of the Rufian

<sup>26</sup> The Church prayers on the stage in this play, and especially in Jornada II, and the sort of legal contract used to transfer the merits of the healthy saint to the dying sinner, are among the revolting exhibitions of the Spanish drama which at first seem inexplicable, but which any one who reads far in it easily understands. Cervantes, in many parts of this strange play, avers the truth of what he thus represents, saying, “Todo esto fué verdad” ; “Todo esto fué así” ; “Así se cuenta en su historia,” etc.

<sup>27</sup> He uses the words as convertible Tom. I. pp 21, 22, Tom II p. 25, etc

<sup>28</sup> In the “Baños de Argel,” where he is sometimes indecorous enough, as when, (Tom I. p. 151,) giving the Moors the reason why his old general, Don John of Austria, does not come to subdue Algiers, he says —

Sin duda, que, en el cielo,  
Debia de haber gran guerra,  
Do el General faltaba,  
Y á Don Juan se llevaron para serlo.

Dichoso, he had \* fully and knowingly adopted \* 128 the dramatic theories of Lope's school.

The eight Entremeses are better than the eight full-length plays. They are short farces, generally in prose, with a slight plot, and sometimes with none, and were intended merely to amuse an audience in the intervals between the acts of the longer pieces. "The Spectacle of Wonders," for instance, is only a series of practical tricks to frighten the persons attending a puppet-show, so as to persuade them that they see what is really not on the stage. "The Watchful Guard" interests us, because he seems to have drawn the character of the soldier from his own; and the date of 1611, which is contained in it, may indicate the time when it was written. "The Jealous Old Man" is a reproduction of the tale of "The Jealous Estremaduran," with a different and more spirited conclusion. And the "Cueva de Salamanca" is one of those jests at the expense of husbands which are common enough on the Spanish stage, and were, no doubt, equally common in Spanish life and manners. All, indeed, have an air of truth and reality, which, whether they were founded in fact or not, it was evidently the author's purpose to give them.

But there was an insuperable difficulty in the way of all his efforts on the stage. Cervantes had not dramatic talent, nor a clear perception how dramatic effects were to be produced. From the time when he wrote the "Trato de Argel," which was an exhibition of the sufferings he had himself witnessed and shared in Algiers, he seemed to suppose that whatever was both absolutely true and absolutely striking could be produced with effect on the theatre; thus confounding the province of romantic fiction and story-telling with

that of theatrical representation, and often relying on trivial incidents and an humble style for effects which could be produced only by ideal elevation and incidents so combined by a dramatic instinct as to produce a dramatic interest.

This was, probably, owing in part to the different direction of his original genius, and in part \* 129 to the condition \* of the theatre, which in his youth he had found open to every kind of experiment and really settled in nothing. But whatever may have been the cause of his failure, the failure itself has been a great stumbling-block in the way of Spanish critics, who have resorted to somewhat violent means in order to prevent the reputation of Cervantes from being burdened with it. Thus, Blas de Nasarre, the king's librarian, — who, in 1749, published the first edition of these unsuccessful dramas that had appeared since they were printed above a century earlier, — would persuade us, in his Preface, that they were written by Cervantes to parody and caricature the theatre of Lope de Vega; <sup>29</sup> though, setting aside all

<sup>29</sup> See the early part of the "Prólogo del que hace imprimi" I am not certain that Blas de Nasarre was perfectly fair in all this, for he printed, in 1732, an edition of Avellaneda's continuation of *Don Quixote*, in the Preface to which he says that he thinks the character of Avellaneda's *Sancho* is more natural than that of Cervantes's *Sancho*, that the Second Part of Cervantes's *Don Quixote* is taken from Avellaneda's, and that, in its essential merits, the work of Avellaneda is equal to that of Cervantes. "No se puede disputar," he says, "la gloria de la invención de Cervantes, aunque no es inferior la de la imitación de Avellaneda", to which he adds afterwards, "Es cierto que es necesario mayor esfuerzo de ingenio para añadir á las primeras invenciones, que para hacerlas" (See Avellaneda, *Don Quixote*, Madrid, 1805, 12mo,

Tom I p 34) Now, the *Juicio*, or Preface, from which these opinions are taken, and which is really the work of Nasarre, is announced by him, not as his own, but as the work of an anonymous friend, precisely as if he were not willing to avow such opinions under his own name (Pellier's *Vida de Cervantes*, ed *Don Quixote*, I p clxvi) In this way a disingenuous look is given to what would otherwise have been only an absurdity, and what, taken in connection with this reprint of Cervantes's poor dramas and the Preface to them, seems like a willingness to let down the reputation of a genius that Nasarre could not comprehend.

It is intimated, in an anonymous pamphlet, called "Exámen Crítico del Tomo Primero del Antiquixote," (Madrid, 1806, 12mo,) that Nasarre had sympathies with Avellaneda as an Ara-

that at once presents itself from the personal relations of the parties, nothing can be more serious than the interest Cervantes took in the fate of his plays, and the confidence he expressed in their dramatic merit; while, at the same time, not a line has ever been pointed out as a parody in any one of them.<sup>30</sup>

\* This position being untenable, Lampillas, \* 130 who, in the latter part of the last century, wrote a long defence of Spanish literature against the suggestions of Tiraboschi and Bettinelli in Italy, gravely maintains that Cervantes sent, indeed, eight plays and eight Entremeses to the booksellers, but that the booksellers took the liberty to change them, and printed eight others with his name and Preface. It should not, however, be forgotten that Cervantes lived to prepare two works after this, and if such an insult had been offered him, the country, judging from the way in which he treated the less gross offence of Avellaneda, would have been filled with his reproaches and remonstrances.<sup>31</sup>

gonese, and the pamphlet in question being understood to be the work of J. A. Pellicer, the editor of *Don Quixote*, this intimation deserves notice. It may be added, that Nasarre belonged to the French school of the eighteenth century in Spain, — a school that saw little merit in the older Spanish drama. His remarks on it, in his preface to *Cervantes*, and on the contemporary English school of comedy, show this plainly enough, and leave no doubt that his knowledge upon the whole subject was inconsiderable, and his taste as bad as it well could be.

<sup>30</sup> The extravagant opinion, that these plays of Cervantes were written to discredit the plays then in fashion on the stage, just as the *Don Quixote* was written to discredit the fashionable books of chivalry, did not pass uncontradicted at the time. The year after it was published, a pamphlet appeared, entitled “La Simaazon impugnada y Beata de Lavapies, Coloquio Crítico apuntado al disparatado Prólogo que sirve de de-

lantal (según nos dice su Autor) á las Comedias de Miguel de Cervantes, compuesto por Don Joseph Carrillo” (Madrid, 1750, 4to, pp. 25) It is a spirited little tract, chiefly devoted to a defence of Lope and of Calderon, though the point about Cervantes is not forgotten (pp. 13-15). But in the same year a longer work appeared on the same side, called “Discurso Crítico sobre el Origen, Calidad, y Estado presente de las Comedias de España, contra el Dictámen que las supone corrompidas, etc., por un Ingenio de esta Corte” (Madrid, 1750, 4to, pp. 285) The author was a lawyer in Madrid, D. Thomas Zabaleta, and he writes with as little philosophy and judgment as the other Spanish critics of his time, but he treats Blas de Nasarre with small ceremony.

<sup>31</sup> “Ensayo Histórico-apologético de la Literatura Española,” Madrid, 1789, 8vo, Tom. VI pp. 170, etc. “Suprimiendo las que verdaderamente eran de él,” are the bold words of the critic

Nothing remains, therefore, but to confess — what seems, indeed, to be quite incontestable — that Cervantes wrote several plays which fell seriously below what might have been hoped from him. Passages, indeed, may be found in them where his genius asserts itself. “The Labyrinth of Love,” for instance, has a chivalrous air and plot that make it interesting ; and the Entremes of “The Pretended Biscayan” contains specimens of the peculiar humor with which we always associate the name of its author. Others are marked with the poetical genius that never deserted him. But it is quite too probable that he had made up his mind to sacrifice his own opinions respecting the drama to the popular taste ; and if the constraint he thus laid upon himself was one of the causes of his failure, it only affords another ground for our inter-  
 \* 131 est in the fate of one whose \* whole career was so deeply marked with trials and calamity.<sup>32</sup>

But the life of Cervantes, with all its troubles and sufferings, was now fast drawing to a close. In October of the same year, 1615, he published the Second Part of his *Don Quixote* ; and in its Dedication to the Count de Lemos, who had for some time favored him,<sup>33</sup> he alludes to his failing health, and intimates that he hardly looked for the continuance of life beyond a few months. His spirits, however, which had survived his sufferings in the Levant, at Algiers, and in prisons at

<sup>32</sup> There can be little doubt, I think, that this was the case, if we compare the opinions expressed by the canon on the subject of the drama in the 48th chapter of the First Part of *Don Quixote*, 1605, and the opinions in the opening of the second *jornada* of the “Rufian Dichoso,” 1615

<sup>33</sup> It has been generally conceded that the Count de Lemos and the Archbishop of Toledo favored and assisted

Cervantes ; the most agreeable proof of which is to be found in the Dedication of the Second Part of *Don Quixote*. I am afraid, however, that their favor was a little too much in the nature of alms. Indeed, it is called *limosna* the only time it is known to be mentioned by any contemporary of Cervantes. See Salas Barbadillo, in the Dedication of the “Estafeta del Dios Momo,” Madrid, 1627, 12mo.

home, and which, as he approached his seventieth year, had been sufficient to produce a work like the Second Part of *Don Quixote*, did not forsake him, now that his strength was wasting away under the influence of disease and old age. On the contrary, with unabated vivacity he urged forward his romance of “*Persiles and Sigismunda*”; anxious only that life enough should be allowed him to finish it, as the last offering of his gratitude to his generous patron. In the spring he went to *Esquivias*, where was the little estate he had received with his wife, and after his return wrote a Preface to his unpublished romance, full of a delightful and simple humor, in which he tells a pleasant story of being overtaken in his ride back to Madrid by a medical student, who gave him much good advice about the dropsy, under which he was suffering; to which he replied that his pulse had already warned him that he was not to live beyond the next Sunday. “And so,” says he, at the conclusion of this remarkable Preface, “farewell to jesting, farewell my merry humors, farewell my gay friends, for I feel that I am dying, and have no desire but soon to see you happy in the other life.”

\* In this temper he prepared to meet death, \* 132 as many Catholics of strong religious impressions were accustomed to do at that time; <sup>34</sup> and, on the 2d of April, entered the order of Franciscan friars, whose habit he had assumed three years before at *Alcalá*. Still, however, his feelings as an author, his

<sup>34</sup> “Who, to be sure of Paradise,  
Dying put on the weeds of Dominic,  
Or in Franciscan think to pass disguised”  
Alfonso Valdés — if he be the author of the remarkable “*Dialogo de Mercurio y Caron*,” about 1530 (see *ante*, Chap. V, note 42) — had notions on this subject such as Milton had, and much wiser notions than those of Cervantes;

for he makes his religious minded man tell Charon that on his death-bed, when his friends asked him to put on the habit of St Francis, he answered them “*Hermanos, ya sabéis quanto me guarda siempre de engañar a ninguno, para que quereis que me ponga ahora en engañar a Dios?*” Ed. 1850, p. 172.

vivacity, and his personal gratitude did not desert him. On the 18th of April he received the extreme unction, and the next day wrote a Dedication of his "Persiles and Sigismunda" to the Count de Lemos, marked, to an extraordinary degree, with his natural humor, and with the solemn thoughts that became his situation.<sup>35</sup> The last known act of his life, therefore, shows that he still possessed his faculties in perfect serenity, and four days afterwards, on the 23d of April, 1616, he died, at the age of sixty-eight.<sup>36</sup> He was buried, as he probably had desired, in the convent of the Nuns of the Trinity; but a few years afterwards this convent was removed to another part of the city, and what became of the ashes of the greatest genius of his country is, from that time, wholly unknown.<sup>37</sup>

<sup>35</sup> The only case I recollect at all parallel is that of the graceful Dedication of Addison's works to his friend and successor in office, Secretary Craggs, which is dated June 4, 1719, thirteen days before his death. But the Dedication of Cervantes is much more cordial and spirited.

<sup>36</sup> Bowle says (*Anotaciones á Don Quixote*, Salisbury, 1781, 4to, Prólogo ix, note) that Cervantes died on the same day with Shakespeare, but this is a mistake, the calendar not having then been altered in England, and there being, therefore, a difference between that and the Spanish calendar of ten days.

<sup>37</sup> Nor was any monument raised to Cervantes, in Spain, until 1835, when a bronze statue of him larger than life, cast at Rome by Solá of Barcelona, was placed in the Plaza del Estamento at Madrid. (See *El Artista*, Madrid, 1834, 1835, Tom. I p. 205; Tom. II p. 12; and *Semanario Pintoresco*, 1836, p. 249.) Of the head of this statue, I possess a beautiful copy, in marble, made by Solá himself in 1855, for my friend Don Guillermo Picard, a Spaniard of no common intellectual tastes and accomplishments, who presented it to me in 1859. Before 1835 I believe there was nothing that approached nearer to a monument

in honor of Cervantes throughout the world than an ordinary medal of him, struck in 1818, at Paris, as one of a large series which would have been absurdly incomplete without it, and a small medallion or bust, that was placed in 1834, at the expense of an individual, over the door of the house in the Calle de los Francos, where he died.

As to the true likeness of Cervantes — *vera effigies* — there has been a discussion going on for nearly a hundred years, which is not likely soon to end. The portrait commonly current and accepted derives its main authority from an old picture belonging to the Royal Spanish Academy, who prefixed an engraving of it to their magnificent edition of the *Don Quixote* in 1780 and gave their reasons for it in the *Prologo* to that work (Sect. xvii—xx.) Navarrete, who went with his accustomed exactness and fidelity over the whole ground again, in his *Life of Cervantes*, (Madrid, 1819, pp. 196, 536—539,) was satisfied with this decision of the Academy. Several other portraits, however, have since been brought forward, but no one of them, I think, has been found, in the judgment of the curious, to rest on sufficient authority. The last of them, and the one which, from the discussions that accompany it, comes

with some pretension before the world, is one prefixed to a collection of "Documentos Nuevos para ilustrar la Vida de Cervantes," published in 1864 at Seville by Don José María Asensio y Toledo. The facts in the case, as he gives them, are these —

In 1850, Don José read an anonymous manuscript, whose date he does not intuimte, but which belonged to Don Rafael Monti of Seville, and which was entitled "Relacion de Cosas de Sevilla de 1590 á 1640" In this MS he found a notice that, in one of six pictures painted by Francisco Pacheco and Alonso Vazquez for the "Casa Grande de la Merced," there was a portrait of Cervantes with that of other persons who had been in Algiers, and that the picture in question represented "los Padres de la Redencion con cautivos" In 1864 Don José thinks that he found this statement completely confirmed in a MS on the "Verdaderos Retratos de ilustres y memorables Varones por Francisco Pacheco," setting forth that he had painted a picture of Father Juan Bernal, an eminent ecclesiastic (see *ante*, p 114, note) who had been in Africa Don José then informs us that these six pictures are in the "Museo Provincial" of Seville, and that one of them, "No 19, San Pedro de Nolasco en uno de los pasos de su Vida," is, as he believes, the one referred to, because he thinks that it sets forth the scene of an embarkation from Africa of Padres Redentores with ransomed captives, and that one of them, the *barquero*, or boatman, with a boat-hook in his hand, is the figure of Cervantes and a true likeness of him Documentos, pp 1, II, IV, x, xi, 68-82

Setting aside all minor difficulties and objections to this theory, of which there are several, there are two others that seem to me to be decisive 1 There is no reason to suppose that this "No 19" contains a likeness of Padre Bernal, who is not claimed to have been painted by Pacheco as part of this or of any other historical picture, but only as a portrait, — Pacheco's phrase being, "Yo le retrate." 2 There is no reason to suppose that any picture which might contain a portrait of Bernal would also contain a portrait of Cervantes, the two having never before been mentioned

together. Now, as the failure of either of these postulates is fatal to the conjecture of Don José, it does not seem needful to go further

Hartzenbusch, in a letter prefixed to the "Documentos," (p xvii,) thinks that the head of the *barquero*, and the head authorized by the Academy as that of Cervantes, *may* represent the same person at different periods of life, — *pueden representar una persona, etc*, and Don José (p 87) seems to agree with Hartzenbusch I do not, indeed, myself see the resemblance indicated between the two, but, if there be any, the *barquero's* head would seem to countenance the genuineness of that of the Academy, just so far as that of the *barquero* is believed to represent Cervantes It is admitted, however, that the handsome young boatman is very unlike the description of himself given by Cervantes in the Prologo to his Novelas, 1613, while, on the other hand, we cannot help agreeing with the cautious Navarrete, that the old picture of the Academy is "conforme en todo" with this very minute description. Vida, p 196

The great misfortune in the case is, that the portrait of Cervantes which he himself, in the Prologo to his Novelas, tells us was painted by "el famoso Juan de Jauregui," is not known to exist, although it has been anxiously sought for It seems to have been entirely satisfactory to Cervantes, and would have settled all questions. See *post*, Vol III, p 34

It may not be amiss to add here, that in the description of his own person, so often referred to in this note, Cervantes says that he was a stammerer or stammerer, *tartamudo*; and that the expression of the mouth in the portrait of the Academy and in the statue of Solá seems to me to indicate this defect of utterance, just as it is indicated in the heads of Demosthenes that have come down to us from antiquity, and as it is indicated by the genius of Michael Angelo in his well-known statue of Moses. (Visconti, Iconografia Greca, 8vo, Milano, 1823, Tom I p 335) If I am right in this, it is a confirmation of the genuineness of the portrait sanctioned by the Academy.

CERVANTES.—HIS PERSILES AND SIGISMUNDA, AND ITS CHARACTER.—HIS DON QUIXOTE.—CIRCUMSTANCES UNDER WHICH IT WAS WRITTEN.—ITS PURPOSE AND GENERAL PLAN.—PART FIRST — AVELLANEDA.—PART SECOND — CHARACTER OF THE WHOLE.—CHARACTER OF CERVANTES

SIX months after the death of Cervantes,<sup>1</sup> the license for publishing "Persiles and Sigismunda" was granted to his widow, and in 1617 it was  
 \* 134 printed.<sup>2</sup> His purpose \* seems to have been

<sup>1</sup> At the time of his death Cervantes seems to have had the following works more or less prepared for the press, namely "Las Semanas del Jardín," announced as early as 1613; — the Second Part of "Galatea," announced in 1615; — the "Bernardo," mentioned in the Dedication of "Persiles," just before he died; — and several plays, referred to in the Preface to those he published, and in the Appendix to the "Viage del Parnaso." All these works are now probably lost. Others have been attributed to him. Of the "Buscapié" I shall speak in the Appendix, and of two apocryphal chapters of Don Quixote in a note to this chapter. To these may be added a letter on a popular festival, part of which is printed in the twentieth volume of the *Biblioteca de Autores Españoles*, 1851, p. xxvii.

<sup>2</sup> The first edition of *Persiles y Sigismunda* was printed with the following title: "Los Trabajos de Persiles y Sigismunda, Historia Setentrional, por M. de Cervantes Saavedra, dirigida," etc., Madrid, 1617, 8vo, por Juan de la Cuesta; and reprints of it appeared in Valencia, Pamplona, Barcelona, and Brussels, the same year. I have a copy of this first edition, and of the one printed at Pamplona the same year; but the most agreeable one is that of Madrid, 1802, 8vo, 2 tom. There is an English translation by M. L., published 1619, which I have never seen;

but from which I doubt not Fletcher borrowed the materials for that part of the *Persiles* which he has used, or rather abused, in his "Custom of the Country," acted as early as 1628, but not printed till 1647; the very names of the personages being sometimes the same. See *Persiles*, Book I. c. 12 and 13; and compare Book II. c. 4 with the English play, Act IV. scene 3, and Book III. c. 6, etc. with Act II. scene 4, etc. Sometimes we have almost literal translations, like the following:—

"Sois Castellano?" me preguntó en su lengua Portuguesa. "No, Señora," le respondí yo, "sino forastero, y bien lejos de esta tierra" "Pues aunque fuerades mil veces Castellano," replicó ella, "os libraria yo, si pudiera, y os librare si puedo; subid por cima deste lecho, y éntrao debaxo de este tapiz, y éntrao en un hueco que aquí hallareis, y no os movais, que si la justicia viñiere, me tendrá respeto, y creerá lo que yo quisiere decirles." *Persiles*, Lib. III. cap. 6.

In Fletcher we have it as follows:—

*Guomar* Are you a Castilian?

*Rutho* No, Madam. Italy claims my birth.

*Gui* I ask not

to write a serious romance, which should be to this species of composition what the *Don Quixote* is to comic romance. So much, at least, may be inferred from the manner in which it is spoken of by himself and by his friends. For in the Dedication of the Second Part of *Don Quixote* he says, “It will be either the worst or the best book of amusement in the language”; adding, that his friends thought it admirable; and Valdivielso,<sup>3</sup> after his death, said he had equalled or surpassed in it all his former efforts.

But serious romantic fiction, which is peculiarly the offspring of modern civilization, was not yet far enough developed to enable one like Cervantes to obtain a high degree of success in it, especially as the natural bent of his genius was to humorous fiction. The imaginary travels of Lucian, three or four Greek romances, and the romances of chivalry, were all he had to guide him; for anything approaching nearer to the proper modern novel than some of his own tales had not yet been imagined. Perhaps his first impulse was to write a romance of chivalry, modified by the spirit of the age, and free from the absurdities which abound in the romances that had been written before his time.<sup>4</sup> But if he had such a thought, the

Other parallel passages might be cited; but it should not be forgotten, that there is one striking difference between the two, for that, whereas the *Persiles* is a book of great purity of thought and feeling, “The Custom of the Country” is one of the most indecent plays in the language, so indecent, indeed, that Dryden rather boldly says it is worse in this particular than all his own plays put together. Dryden’s Works, Scott’s ed., London, 1808,

8vo, Vol XI. p. 239. The earliest translation I remember to have seen of the *Persiles* and *Sigismunda* is in French by François de Rosset, Paris, 1618; but the best is an anonymous one in the purest English, (London, 1854,) understood to be by Miss L D Stanley, but in which a good many passages are omitted, ex gr. Book III Chaps. VI, VII, VIII, etc. I have also an Italian one by Francesco Ella, printed at Venice, 1626.

<sup>3</sup> In the *Aprobacion*, dated September 9, 1616, ed 1802, Tom I p vii.

<sup>4</sup> This may be fairly suspected from the beginning of the 48th chapter of the First Part of *Don Quixote*.

success of his own *Don Quixote* almost necessarily prevented him from attempting to put it in execution. He therefore looked rather to the Greek romances, and, as far as he used any model, took the “*Theagenes and Chariclea*” of *Heliodorus*.<sup>5</sup> He calls \* 135 what he produced “*A Northern Romance*,” and makes its principal story consist of the sufferings of *Persiles* and *Sigismunda*,—the first the son of a king of Iceland; the second the daughter of a king of Friesland,—laying the scene of one half of his fiction in the North of Europe, and that of the other half in the South. He has some faint ideas of the sea-kings and pirates of the Northern Ocean, but very little of the geography of the countries that produced them; and as for his savage men and frozen islands, and the wild and strange adventures he imagines to have passed among them, nothing can be more fantastic and incredible.

In Portugal, Spain, and Italy, through which his hero and heroine — disguised as they are from first to last under the names of *Periandro* and *Auristela*—make a pilgrimage to Rome, we get rid of most of the extravagances which deform the earlier portion of the romance. The whole, however, consists of a labyrinth of tales, showing, indeed, an imagination quite aston-

<sup>5</sup> Once he intimates that it is a translation, but does not say from what language (See opening of Book II.) An acute and elegant critic of our own time says, “*Des naufrages, des déserts, des descentes par mer, et des ravissements, c'est donc toujours plus ou moins l'ancien roman d'Héliodore*” (*Sainte Beuve, Critiques, Paris, 1839, 8vo, Tom. IV. p. 173*) These words describe more than half of the *Persiles* and *Sigismunda* Two imitations of the *Persiles*, or, at any rate, two imitations of the Greek romance which was the chief model of the *Persiles*,

soon appeared in Spain. The first is the “*Historia de Hipólito y Aminta*” of *Francisco de Quintana*, (Madrid, 1627, 4to,) divided into eight books, with a good deal of poetry intermixed. The other is “*Eustorgio y Clorilene, Historia Moscovica*,” by *Enrique Suárez de Mendoza y Figueroa*, (1629,) in thirteen books, with a hint of a continuation; but my copy was printed *Çaragoça*, 1665, 4to. Both are written in bad taste, and have no value as fictions. The latter seems to have been plainly suggested by the *Persiles*.

ishing in an old man like Cervantes, already past his grand climacteric, — a man, too, who might be supposed to be broken down by sore calamities and incurable disease; but it is a labyrinth from which we are glad to be extricated, and we feel relieved when the labors and trials of his Persiles and Sigismunda are over, and when, the obstacles to their love being removed, they are happily united at Rome. No doubt, amidst the multitude of separate stories with which this wild work is crowded, several are graceful in themselves, and others are interesting because they contain traces of Cervantes's experience of life,<sup>6</sup> while, \*through the whole, his style is more \*136 carefully finished, perhaps, than in any other of his works. But, after all, it is far from being what he and his friends fancied it was, — a model of this peculiar style of fiction, and the best of his efforts.

This honor, if we may trust the uniform testimony of two centuries, belongs, beyond question, to his *Don Quixote*, — the work which, above all others, not merely of his own age, but of all modern times, bears most deeply the impression of the national character it represents, and has, therefore, in return, enjoyed a degree and extent of national favor never granted to any other.<sup>7</sup> When Cervantes began to write it is wholly

<sup>6</sup> From the beginning of Book III, we find that the action of Persiles and Sigismunda is laid in the time of Philip II or Philip III, when there was a Spanish viceroy in Lisbon, and the travels of the hero and heroine in the South of Spain and Italy seem to be, in fact, Cervantes's own recollections of the journey he made through the same countries in his youth, while Chapters 10 and 11 of Book III show bitter traces of his Algerine captivity. His familiarity with Portugal, as seen in this work, should also be noticed. Frequently, indeed, as in almost every-

thing else he wrote, we meet intimations and passages from his own life. Persiles and Sigismunda, after all, was the most immediately successful of any of the works of Cervantes. Eight editions of it appeared in two years, and it was translated into Italian, French, and English, between 1618 and 1626.

<sup>7</sup> My own experience in Spain fully corroborates the suggestion of Inglis, in his very pleasant book, (*Rambles in the Footsteps of Don Quixote*, London, 1837, 8vo, p 26,) that "no Spaniard is entirely ignorant of Cervantes." At least, none I ever questioned on the subject — and

uncertain. For twenty years preceding the appearance of the First Part he printed almost nothing;<sup>8</sup> and the little we know of him during that long and dreary period of his life shows only how he obtained a hard subsistence for himself and his family by common business agencies, which, we have reason to suppose, were generally of trifling importance, and which, we are sure, were sometimes distressing in their consequences. The tradition, therefore, of his persecutions in La Mancha, and his own averment that the Don Quixote was begun in a prison, are all the hints we have received concerning the circumstances under which it was first imagined; and that such circumstances should have tended to such a result is a striking fact in the history, not only of Cervantes, \* 137 but of \* the human mind, and shows how different was his temperament from that commonly found in men of genius.

His purpose in writing the Don Quixote has sometimes been enlarged by the ingenuity of a refined criticism, until it has been made to embrace the whole of the endless contrast between the poetical and the prosaic in our natures,—between heroism and generosity on one side, as if they were mere illusions, and a cold selfishness on the other, as if it were the truth and reality of life.<sup>9</sup> But this is a metaphysical conclusion drawn from views of the work

their number was great in the lower conditions of society—seemed to be entirely ignorant what sort of persons were Don Quixote and Sancho Panza

<sup>8</sup> He felt this himself as a dreary interval in his life, for he says in his Prólogo. “Al cabo de tantos años como ha, que duermo en el silencio del olvido,” etc. In fact, from 1584 till 1605 he had printed nothing except a few short poems of little value, and

seems to have been wholly occupied in painful struggles to secure a subsistence.

<sup>9</sup> This idea is found partly developed by Bouterwek, (Geschichte der Poesie und Beredsamkeit, Göttingen, 1803, 8vo, Tom. III pp. 335—337,) and fully set forth and defended by Sismondi, with his accustomed eloquence Littérature du Midi de l’Europe, Paris, 1813, 8vo, Tom. III pp. 339—343.

at once imperfect and exaggerated; contrary to the spirit of the age, which was not given to a satire so philosophical and generalizing, and contrary to the character of Cervantes himself, as we follow it from the time when he first became a soldier, through all his trials in Algiers, and down to the moment when his warm and trusting heart dictated the Dedication of "Persiles and Sigismunda" to the Count de Lemos. His whole spirit, indeed, seems rather to have been filled with a cheerful confidence in human virtue, and his whole bearing in life seems to have been a contradiction to that discouraging and saddening scorn for whatever is elevated and generous, which such an interpretation of the *Don Quixote* necessarily implies.<sup>10</sup>

Nor does he himself permit us to give to his romance any such secret meaning; for, at the very beginning of the work, he announces it to be his sole purpose to break down the vogue and authority of books of chivalry, and, at the end of the whole, he declares anew, in his own person, that "he had had no other desire than to render abhorred of men the false and absurd stories contained in books of chivalry";<sup>11</sup> exulting \* in his success, as an \* 138

<sup>10</sup> Many other interpretations have been given to the *Don Quixote*. One of the most absurd is that of Daniel De Foe, who declares it to be "an emblematic history of, and a just satire upon, the Duke de Medina Sidonia, a person very remarkable at that time in Spain" (Wilson's Life of De Foe, London, 1830, 8vo, Vol. III p 437, note). The "Buscapié"—if there ever was such a publication—pretended that it set forth "some of the undertakings and gallantries of the Emperor Charles V." See Appendix (D).

<sup>11</sup> In the Prólogo to the First Part, he says, "No mira á mas que á deshacer la autoridad y cabida, que en el mundo

y en el vulgo tienen los libros de Caballerías", and he ends the Second Part, ten years afterwards, with these remarkable words "No ha sido otro mi deseo, que poner en aboircimiento de los hombres las fingidas y disparatadas historias de los libros de Caballerías, que por las de mi verdadero *Don Quixote* van ya tropezando, y han de caer del todo sin duda alguna Vale". It seems really hard that a great man's word of honor should thus be called in question by the spirit of an over-refined criticism, two centuries after his death. D. Vicente Salvá has partly, but not wholly, avoided this difficulty in an ingenious and pleasant essay on the ques-

achievement of no small moment. And such, in fact, it was, for we have abundant proof that the fanaticism for these romances was so great in Spain, during the sixteenth century, as to have become matter of alarm to the more judicious. Many of the distinguished contemporary authors speak of its mischiefs, and among the rest Fernandez de Oviedo, the venerable Luis de Granada, Luis de Leon, Luis Vives, the great scholar, and Malon de Chaide, who wrote the eloquent "Conversion of Mary Magdalen."<sup>12</sup> Guevara, the learned and fortunate courtier of Charles the Fifth, declares that "men did read nothing in his time but such shameful books as 'Amadis de Gaula,' 'Tristan,' 'Primaleon,' and the like";<sup>13</sup> the acute author of "The Dialogue on Languages" says that "the ten years he passed at court he wasted in studying 'Florisando,' 'Lisuarte,' 'The Knight of the Cross,' and other such books, more than he can name";<sup>14</sup> and from different

tion, "Whether the Don Quixote has yet been judged according to its merits", — in which he maintains that Cervantes did not intend to satirize the substance and essence of books of chivalry, but only to purge away their absurdities and improbabilities, and that, after all, he has given us substantially only another romance of the same class, which has ruined the fortunes of all its predecessors by being itself immensely in advance of them all. All five are strong in their censures; and to them may be added Juan Sanchez Valdes de la Plata, who in the Prólogo to his "Chronica del Hombre" (folio, 1595), — a book packed full of crude learning on the destiny of man, his powers and his in-

ventions, — says, that "young men and girls, and even those of ripe age and estate, do waste their time in reading books which with truth may be called sermon-books of Satan, full of deluding vanities and blazonries of the knighthoods of the Amadises and Esplandians, with the rest of their crew, from which neither profit nor doctrine can be gathered, but such as makes their thoughts the abode of lies and false fancies, which is a thing the Devil doth much covet." It should be noticed, however, that Nicolas Antonio at the end of the seventeenth century was by no means willing to give up books of chivalry. See Preface to Bibliotheca Nova, § 27

sources we \*know, what, indeed, we may \*139 gather from Cervantes himself, that many who read these fictions took them for true histories.<sup>15</sup> At last they were deemed so noxious, that, in 1553, they were prohibited by law from being printed or sold in the American colonies, and in 1555 the same prohibition, and even the burning of all copies of them extant in Spain itself, was earnestly asked for by the Cortes.<sup>16</sup> The evil, in fact, had become formidable, and the wise began to see it.

To destroy a passion that had struck its roots so deeply in the character of all classes of men,<sup>17</sup> to break up the only reading which at that time could be considered widely popular and fashionable,<sup>18</sup> was certainly

See Mayans y Siscar, *Orígenes*, Tom II pp 157, 158

<sup>15</sup> See *ante*, Vol. I pp 223-226. But, besides what is said there, Francisco de Portugal, who died in 1632, tells us in his "Arte de Galantería," (Lisboa, 1670, 4to, p 96,) that Simon de Silveira (I suppose the Portuguese poet who lived about 1500, Barbosa, Tom III p 722) once swore upon the Evangelists, that he believed the whole of the Amadis to be true history

<sup>16</sup> Clemencin, in the Preface to his edition of *Don Quixote*, Tom I. pp xi-xvi, cites many other proofs of the passion for books of chivalry at that period in Spain, adding a reference to the "Recopilacion de Leyes de las Indias," Lib I Tit 24, Ley 4, for the law of 1553, and printing at length the very curious petition of the Cortes of 1555, which I have not seen anywhere else, except in the official publication of the "Capitulos y Leyes," (Vallado Id, 1558, fol 1v, b,) and which would probably have produced the law it demanded, if the abdication of the Emperor, the same year, had not prevented all action upon the matter

<sup>17</sup> Allusions to the fanaticism of the lower classes on the subject of books of chivalry are happily introduced into

*Don Quixote*, Parte I c 32, and in other places. It extended, too, to those better bred and informed. Francisco de Portugal, in the "Arte de Galantería," cited in a preceding note, and written before 1632, tells the following anecdote. "A knight came home one day from the chase and found his wife and daughters and their women crying. Surprised and grieved, he asked them if any child or relation were dead. 'No,' they answered, suffocated with tears. 'Why, then, do you weep so?' he rejoined, still more amazed. 'Sir,' they replied, 'Amadis is dead.' They had read so far" p 96

<sup>18</sup> Cervantes himself, as his *Don Quixote* amply proves, must, at some period of his life, have been a devoted reader of the romances of chivalry. How minute and exact his knowledge of them was may be seen, among other passages, from one at the end of the twentieth chapter of Part First, where, speaking of Gasabal, the esquire of Galarraga, he observes that his name is mentioned *but once* in the history of Amadis of Gaul; — a fact which the indefatigable Mr Bowle took the pains to verify, when reading that huge romance. See his "Letter to Dr Percy, on a New and Classical Edition of *Don Quixote*," London, 1777, 4to, p. 25.

a bold undertaking, and one that marks anything rather than a scornful or broken spirit, or a want of faith in what is most to be valued in our common nature. The great wonder is, that Cervantes \* 140 succeeded. But that he did, there is no \* question. No book of chivalry was written after the appearance of Don Quixote, in 1605; and from the same date, even those already enjoying the greatest favor ceased, with one or two unimportant exceptions, to be reprinted;<sup>19</sup> so that, from that time to the present, they have been constantly disappearing, until they are now among the rarest of literary curiosities; — a solitary instance of the power of genius to destroy, by a single well-timed blow, an entire department, and that, too, a flourishing and favored one, in the literature of a great and proud nation.

The general plan Cervantes adopted to accomplish this object, without, perhaps, foreseeing its whole course, and still less all its results, was simple as well as original. In 1605,<sup>20</sup> he published the First Part of Don Quixote, in which a country gentleman of La Mancha — full of genuine Castilian honor and enthusiasm, gentle and dignified in his character, trusted by

<sup>19</sup> In the commentary of Faria y Sousa on the Lusiad, 1637, (Canto VI fol 138,) he says already that in consequence of the publication of the Don Quixote, books of chivalry "no son tan leídos", and in a dedication to the Madrid edition of that work, 1668, we are told that its previous repeated impressions "han desterrado los libros de caballerías tan perjudiciales a las costumbres." Navarrete, pp. 500, 502. Clemencin, moreover, and finally in his Preface, 1833, notes "D Polcincne de Boecia," printed in 1602, as the *last* book of chivalry that was written in Spain, and adds, that, after 1605, "no se publicó de nuevo libro alguno de caballerías, y dejaron de reimprimirse los anteriores" (p. xxi). To this re-

mark of Clemencin, however, there are exceptions. For instance, the "Genealogía de la Toledana Discreta, Primera Parte," por Eugenio Martínez, a tale of chivalry in octave stanzas, not ill written, was reprinted in 1608, and "El Caballero del Febo," and "Claudiano," his son, are extant in editions of 1617. The period of the passion for such books in Spain can be readily seen in the Bibliographical Catalogue, and notices of them by Salvá, in the *Repertorio Americano*, (London, 1827, Tom IV pp. 29 - 74,) and still better in the Catalogue prefixed by Gayangos to Rivedeneira's *Biblioteca*, Tom XL. 1857. It was eminently the sixteenth century.

<sup>20</sup> See Appendix (E).

his friends, and loved by his dependants — is represented as so completely crazed by long reading the most famous books of chivalry, that he believes them to be true, and feels himself called on to become the impossible knight-errant they describe, — nay, actually goes forth into the world to defend the oppressed and avenge the injured, like the heroes of his romances.

To complete his chivalrous equipment — which he had begun by fitting up for himself a suit of armor strange to his century — he took an esquire out of his neighborhood; a middle-aged peasant, ignorant and credulous to excess, but of great good-nature; a glutton and a liar; selfish and gross, yet attached to his master; shrewd enough occasionally to see the folly of their position, but always \*amusing, \*141 and sometimes mischievous, in his interpretations of it. These two sally forth from their native village in search of adventures, of which the excited imagination of the knight, turning windmills into giants, solitary inns into castles, and galley-slaves into oppressed gentlemen, finds abundance, wherever he goes; while the esquire translates them all into the plain prose of truth with an admirable simplicity, quite unconscious of its own humor, and rendered the more striking by its contrast with the lofty and courteous dignity and magnificent illusions of the superior personage. There could, of course, be but one consistent termination to adventures like these. The knight and his esquire suffer a series of ridiculous discomfitures, and are at last brought home, like madmen, to their native village, where Cervantes leaves them, with an intimation that the story of their adventures is by no means ended.

From this time we hear little of Cervantes and

nothing of his hero, till eight years afterwards, in July, 1613, when he wrote the Preface to his Tales, where he distinctly announces a Second Part of *Don Quixote*. But before this Second Part could be published, and, indeed, before it was finished, a person calling himself Alonso Fernandez de Avellaneda, who seems, from some provincialisms in his style, to have been an Aragonese, and who, from other internal evidence, was a Dominican monk, came out, in the summer of 1614, with what he impertinently called “The Second Volume of the Ingenious Knight, *Don Quixote de la Mancha*.<sup>21</sup>

\* 142 \* Two things are remarkable in relation to this book. The first is, that, though it is hardly possible its author's name should not have been known to many, and especially to Cervantes himself, still it is only by strong conjecture that it has been often assigned to Luis de Aliaga, the king's confessor, a person whom, from his influence at court, it might not have been deemed expedient openly to attack; but sometimes also to Juan Blanco de Paz, a Dominican friar, who had been an enemy of Cervantes in Algiers. The second is, that the author

<sup>21</sup> Cervantes reproaches Avellaneda with being an Aragonese, because he sometimes omits the article where a Castilian would insert it (*Don Quixote*, Parte II c 59.) The rest of the discussion about him is found in Pellecer, *Vida*, pp clvi-clxv, in Navarrete, *Vida*, pp 144-151, in Clemente's *Don Quixote*, Parte II. c 59, notes, and in Adolfo de Castro's “Conde Duque de Olivares,” Cadiz, 1846, 8vo, pp 11, etc. This Avellaneda, whoever he was, called his book “*Segundo Tomo del Ingenioso Hidalgo Don Quixote de la Mancha*,” etc., (Tarragona, 1614, 12mo,) and printed it so that it matches very well with the Valencian edition, 1605, of the First Part of the genuine *Don Quixote*; — both of which

I have There are editions of it, Madrid, 1732, 1805, and 1851, and a translation by Le Sage, 1704, in which — after his manner of translating — he alters and enlarges the original work with little ceremony or good faith

It may be worth while to note here, that, when Pope, in his “Essay on Criticism,” (267, etc., beginning, “Once on a time La Mancha's knight, they say,”) tells a story about *Don Quixote*, he refers, not to the work of Cervantes, but to that of Avellaneda, and of Avellaneda in the *rifacimento* of Le Sage, Liv III chap 29. Persons familiar with Cervantes are often disappointed that they do not recollect it, thinking that the reference must be to *his* *Don Quixote*.

seems to have had hints of the plan Cervantes was pursuing in his Second Part, then unfinished, and to have used them in an unworthy manner, especially in making Don Alvaro Tarf  play substantially the same part that is played by the Duke and Duchess towards Don Quixote, and in carrying the knight through an adventure at an inn with play-actors rehearsing one of Lope de Vega's dramas, almost exactly like the adventure with the puppet-show man so admirably imagined by Cervantes.<sup>22</sup>

But this is all that can interest us about the book, which, if not without merit in some respects, is generally low and dull, and would now be forgotten, if it were not connected with the fame of Don Quixote. In its Preface, Cervantes is treated with coarse indignity, his age, his sufferings, and even his honorable wounds being sneered at;<sup>23</sup> and in the body of the book, the character of Don Quixote, who appears as a vulgar madman, fancying himself to be Achilles, or any other character that happened to occur to the author,<sup>24</sup> is so completely without dignity or consistency, \* that it is clear the writer did \* 143 not possess the power of comprehending the

<sup>22</sup> Avellaneda, c 26. There is a much better translation than Le Sage's, by Germ nd de Lavigne, (Paris, 1853, 8vo,) with an acute preface and notes, partly intended to rehabilitate Avellaneda

Fr Luis de Alhaga was, at one time, Inquisitor-General, and a person of great political consideration, but he resigned his place or was disgraced in the reign of Philip IV, and died in exile shortly afterwards, December 3, 1626. He figures in Quevedo's "Grandes Anales de Quince Dias." Ample notices of him may be found in the *Revista de Ciencias, etc.*, Sevilla, 1856, Tom III pp 6, 74, etc See also Latassa, *Bib Nov*, III 376.

<sup>23</sup> "Tiene mas lengua que manos," says Avellaneda, coarsely.

<sup>24</sup> Chapter 8; — just as he makes Don Quixote fancy a poor peasant in his melon-garden to be Orlando Furioso (c. 6), — a little village to be Rome (c 7), — and its decent priest alternately Lirgando and the Archbishop Turpin. Perhaps the most obvious comparison, and the fairest that can be made, between the two Don Quixotes is in the story of the goats, told by Sancho in the twentieth chapter of the First Part in Cervantes, and the story of the geese, by Sancho in Avellaneda's twenty-first chapter, because the latter professes to improve upon the former. The failure to do so, however, is obvious enough.

genius he at once basely libelled and meanly attempted to supplant. The best parts of the work are those in which Sancho is introduced; the worst are its indecent stories and the adventures of Barbara, who is a sort of brutal caricature of the graceful Dorothea, and whom the knight mistakes for Queen Zenobia.<sup>25</sup> But it is almost always wearisome, and comes to a poor conclusion by the confinement of Don Quixote in a madhouse.<sup>26</sup>

Cervantes evidently did not receive this affronting production until he was far advanced in the composition of his Second Part; but in the fifty-ninth chapter, written apparently when it first reached him, he breaks out upon it, and from that moment never ceases to persecute it, in every form of ingenious torture, until, with the seventy-fourth, he brings his own work to its conclusion. Even Sancho, with his accustomed humor and simplicity, is let loose upon the unhappy Aragonese; for, having understood from a chance traveller, who first brings the book to their knowledge, that his wife is called in it Mary Gutierrez, instead of Teresa Panza,—

“‘A pretty sort of a history-writer,’ cried Sancho, ‘and a deal must he know of our affairs, if he calls Teresa Panza, my wife, Mary Gutierrez. Take the book again, Sir, and see if I am put into it, and if he has changed my name, too.’ ‘By what I hear you say, my friend,’ replied the stranger, ‘you are, no doubt, Sancho Panza, the esquire of Don Quixote.’

<sup>25</sup> The whole story of Barbara, beginning with Chapter 22, and going nearly through the remainder of the work, is miserably coarse and dull

<sup>26</sup> In 1824, a curious attempt was made, probably by some ingenious Ger-

man, to add two chapters more to Don Quixote, as if they had been suppressed when the Second Part was published. But they were not thought worth printing by the Spanish Academy. See *Don Quixote*, ed. Clemencin, Tom. VI p. 296.

‘To be sure I am,’ \* answered Sancho, ‘and \* 144 proud of it too.’ ‘Then, in truth,’ said the gentleman, ‘this new author does not treat you with the propriety shown in your own person; he makes you a glutton and a fool; not at all amusing, and quite another thing from the Sancho described in the first part of your master’s history.’ ‘Well, Heaven forgive him!’ said Sancho: ‘but I think he might have left me in my corner, without troubling himself about me; for, *Let him play that knows the way*; and *Saint Peter at Rome is well off at home.*’<sup>27</sup>

Stimulated by the appearance of this rival work, as well as offended with its personalities, Cervantes urged forward his own, and, if we may judge by its somewhat hurried air, brought it to a conclusion sooner than he had intended.<sup>28</sup> At any rate, as early as February, 1615, it was finished, and was published in the following autumn; after which we hear nothing more of Avellaneda, though he had intimated his purpose to exhibit Don Quixote in another series of adventures at Avila, Valladolid, and Salamanca.<sup>29</sup> This, indeed, Cervantes took some pains to prevent; for—besides a little changing his plan, and avoiding the jousts at Saragossa, because Avellaneda had carried his hero there<sup>30</sup>—he finally restores Don Quixote, through a severe illness, to his right mind, and makes him renounce all the follies of knight-errantry, and die, like a peaceful Christian, in his own bed;—thus cutting off the possibility of another continuation with the pretensions of the first.

This latter half of Don Quixote is a contradiction of

<sup>29</sup> At the end of Cap 36

<sup>30</sup> When Don Quixote understands that Avellaneda has given an account

of his being at Saragossa, he exclaims, “*Por el mismo caso, no pondré los pies en Zaragoza, y así sacaré á la plaza del mundo la mentira dese historiador moderno*” Parte II c 59.

the proverb Cervantes cites in it,— that second parts were never yet good for much.<sup>31</sup> It is, in fact, better than the first. It shows more freedom and vigor; and if the caricature is sometimes pushed to the very verge of what is permitted, the invention, the style of \* thought, and, indeed, the materials throughout, are richer and the finish is more exact. The character of Sanson Carrasco, for instance,<sup>32</sup> is a very happy, though somewhat bold, addition to the original persons of the drama; and the adventures at the castle of the Duke and Duchess, where Don Quixote is fooled to the top of his bent; the managements of Sancho as governor of his island; the visions and dreams of the cave of Montesinos; the scenes with Roque Guinart, the freebooter, and with Gines de Passamonte, the galley-slave and puppet-show man; together with the mock-heroic hospitalities of Don Antonio Moreno at Barcelona, and the final defeat of the knight there, are all admirable. In truth, everything in this Second Part, especially its general outline and tone, shows that time and a degree of success he had not before known had ripened and perfected the strong manly sense and sure insight into human nature which are visible in nearly all his works, and which here become a part, as it were, of his peculiar genius, whose foundations had been laid, dark and deep, amidst the trials and sufferings of his various life.

<sup>31</sup> It is one of the mischievous remarks of the Bachelor Samson Carrasco. Parte II c 4

<sup>32</sup> Don Quixote, Parte II c 4 The style of both parts of the genuine Don Quixote is, as might be anticipated, free, fresh, and careless,— genial, like the author's character, full of idiomatic beauties, and by no means without

blemishes Garcés, in his “*Fuerza y Vigor de la Lengua Castellana*,” Tom. II Prólogo, as well as throughout that excellent work, has given it, perhaps, more uniform praise than it deserves; — while Clemencin, in his notes, is very rigorous and unpardoning to its occasional defects.

But throughout both parts, Cervantes shows the impulses and instincts of an original power with most distinctness in his development of the characters of Don Quixote and Sancho, in whose fortunate contrast and opposition is hidden the full spirit of his peculiar humor, and no small part of what is most effective in the entire fiction. They are his prominent personages. He delights, therefore, to have them as much as possible in the front of his scene. They grow visibly upon his favor as he advances, and the fondness of his liking for them makes him constantly produce them in lights and relations as little foreseen by himself as they are by his readers. The knight, who seems to have been \* originally intended for a parody of the \* 146 Amadis, becomes gradually a detached, separate, and wholly independent personage, into whom is infused so much of a generous and elevated nature, such gentleness and delicacy, such a pure sense of honor, and such a warm love for whatever is noble and good, that we feel almost the same attachment to him that the barber and the curate did, and are almost as ready as his family was to mourn over his death.<sup>33</sup>

The case of Sancho is again very similar, and perhaps in some respects stronger. At first, he is introduced as the opposite of Don Quixote, and used merely to bring out his master's peculiarities in a more striking relief. It is not until we have gone through nearly half of the First Part that he utters one of those proverbs which form afterwards the staple of his conversation and humor;<sup>34</sup> and it is not till the open-

<sup>33</sup> Wordsworth, in his "Prelude," Book V., says of Don Quixote, very strikingly —

Nor have I pitied him, but rather felt  
Reverence was due to a being thus employed;

And thought that, in the blind and awful lair  
Of such a madness, reason did he couched

<sup>34</sup> In 1626, Quevedo, in his "Cuento de Cuentos," ridiculed the free use of proverbs, not, however, I think, direct-

ing of the Second Part, and, indeed, not till he comes forth, in all his mingled shrewdness and credulity, as governor of Barataria, that his character is quite developed and completed to the full measure of its grotesque, yet congruous, proportions.

Cervantes, in truth, came at last to love these creations of his marvellous power, as if they were real, familiar personages, and to speak of them and treat them with an earnestness and interest that tend much to the illusion of his readers. Both Don Quixote and Sancho are thus brought before us like such living realities, that, at this moment, the figures of the crazed, gaunt, dignified knight and of his round, selfish, and most amusing esquire dwell bodied forth in the imaginations of more, among all conditions of men throughout Christendom, than any other of the crea-

\* 147 tions \* of human talent. The greatest of the great poets — Homer, Dante, Shakespeare, Milton — have no doubt risen to loftier heights, and placed themselves in more imposing relations with the noblest attributes of our nature; but Cervantes — always writing under the unchecked impulse of his own genius, and instinctively concentrating in his fiction whatever was peculiar to the character of his nation — has shown himself of kindred to all times and all lands; to the humblest degrees of cultivation as well as to the highest; and has thus, beyond all other writers, received in return a tribute of sympathy and admiration from the universal spirit of humanity.<sup>35</sup>

ing his satire against the Don Quixote, but rather against the absurd fashion of his time, just as Cervantes did. A rude answer to it, — “Venganza de la Lengua Castellana,” — attributed to Fr. Luis de Alhaga, and first printed, I believe, in the same year, may be found in the Seminario Eruditio, Tom VI. p. 264.

<sup>35</sup> I mean by this, that I think thousands of persons, the world over, have notions of Don Quixote and his esquire, and talk about “Quixotism,” “mischievous Sancho,” etc., who yet never have read the romance of Cervantes, nor even know what it is. A different popular effect, and one worthy the days

It is not easy to believe, that, when he had finished such a work, he was insensible to what he had done. Indeed, there are passages in the *Don Quixote* itself which prove a consciousness of his own genius, its aspirations, and its power.<sup>36</sup> And yet there are, on the other hand, carelessnesses, blemishes, and contradictions scattered through it, which seem to show him to have been almost indifferent to contemporary success or posthumous fame. His plan, which he seems to have modified more than once while engaged

\* in the composition of the work, is loose and \* 148 disjointed; his style, though full of the richest idiomatic beauties, abounds with inaccuracies; and the facts and incidents that make up his fiction are full of anachronisms, which *Los Ríos*, *Pellicer*, and *Eximeno* have in vain endeavored to reconcile, either with the main current of the story itself, or with one another.<sup>37</sup>

of Grecian enthusiasm, is noticed in *Rocca's "Memos of the War of the French in Spain"* (London, 1816, p. 110). He says, that when the body of French troops to which he was attached entered *Toboso*, — perfectly answering, he adds, the description of it by *Cervantes*, — they were so amused with the fancies about *Dulcinea* and *Don Quixote*, awakened by the place, that they were, at once, on easy terms with its inhabitants, *Cervantes* becoming a bond of good-fellowship, which not only prevented the villagers from flying, as they commonly did in similar cases, but led the soldiers to treat them and their homes with unwonted respect. So,

The great Emathian conqueror bid spare  
The house of *Pindarus*, when temple and tower  
Went to the ground and the repeated air  
Of sad *Electra's* poet had the power  
To save the Athenian walls from ruin bare

<sup>36</sup> The concluding passages of the work, for instance, are in this tone; and this is the tone of his criticisms on *Avellaneda*. I do not count in the same sense the passage, in the Second Part, c. 16, in which *Don Quixote* is made to boast that thirty thousand

copies had been printed of the First Part, and that thirty thousand thousands would follow, for this is intended as the mere *thodomontade* of the hero's folly, or a jest at the pretensions set up for *Aleman's "Guzman de Alfarache"* (see *post*, Chap. XXXIV, note 4), but I confess I think *Cervantes* is somewhat in earnest when he makes *Sancho* say to his master, "I will lay a wager, that, before long, there will not be a two-penny eating-house, a hedge tavern, or a poor inn, or barber's shop, where the history of what we have done will not be painted and stuck up" *Parte II c. 71*

<sup>37</sup> *Los Ríos*, in his "Análisis," prefixed to the edition of the Academy, 1780, undertakes to defend *Cervantes* on the authority of the ancients, as if the *Don Quixote* were a poem, written in imitation of the *Odyssey*. *Pellicer*, in the fourth section of his "Discurso Preliminar" to his edition of *Don Quixote*, 1797, follows much the same course, besides which, at the end of the fifth volume, he gives what he gravely calls a "Geographico-historical Description of the Travels of *Don Quixote*," accompanied with a map, as if

Thus, in the First Part, Don Quixote is generally represented as belonging to a remote age, and his history is supposed to have been written by an ancient Arabian author;<sup>38</sup> while, in the examination \* 149 of his library, he is \* plainly contemporary with Cervantes himself, and, after his defeats, is

some of Cervantes's geography were not impossible, and as if half his localities were to be found anywhere but in the imaginations of his readers. On the ground of such irregularities in his geography, and on other grounds equally absurd, Nicholas Perez, a Valencian, attacked Cervantes in the "Anti-Quixote," the first volume of which was published in 1805, but was followed by none of the five that were intended to complete it, and received an answer, quite satisfactory, but more severe than was needful, in a pamphlet, published at Madrid in 1806, 12mo, by J. A. Pellicer, without his name, entitled "Exámen Crítico del Tomo Primero de el Anti-Quixote." And finally, Don Antonio Eximeno, in his "Apología de Miguel de Cervantes," (Madrid, 1806, 12mo,) excuses or defends everything in the Don Quixote, giving us a new chronological plan, (p. 60,) with exact astronomical reckonings, (p. 129,) and maintaining, among other wise positions, that Cervantes *intentionally* represented Don Quixote to have lived both in an earlier age and in his own time, in order that curious readers might be confounded, and, after all, only some imaginary period be assigned to his hero's achievements (pp. 19, etc.) All this, I think, is eminently absurd, but it is the consequence of the blind admiration with which Cervantes was idolized in Spain during the latter part of the last century and the beginning of the present, — itself partly a result of the coldness with which he had been overlooked by the learned of his countrymen for nearly a century previous to that period. *Don Quixote*, Madrid, 1819, 8vo, *Prólogo de la Academia*, p. [3].

<sup>38</sup> Conde, the author of the "Dominación de los Arabes en España," undertakes, in a pamphlet published in conjunction with J. A. Pellicer, to show that the name of this pretended Arabic

author, *Cid Hamete Benengeli*, is a combination of Arabic words, meaning *noble, satirical, and unhappy* (Carta en Castellano, etc., Madrid, 1800, 12mo, pp. 16-27.) It may be so, but it is not in character for Cervantes to seek such refinements, or to make such a display of his little learning, which does not seem to have extended beyond a knowledge of the vulgar Arabic spoken in Barbary, the Latin, the Italian, and the Portuguese. Like Shakespeare, however, Cervantes had read and remembered nearly all that had been printed in his own language, and constantly makes the most felicitous allusions to the large stores of his knowledge of this sort.

Clemente, however, sometimes seems willing to extend the learned reading of Cervantes further than is necessary. Thus (Don Quixote, Tom. III, p. 132) he thinks the Discourse of the Knight on Arms and Letters (Parte II, c. 37 and 38) may be traced to an obscure Latin treatise on the same subject printed in 1549. It does not seem to be needful to refer to any particular source for a matter so obvious, especially to a Spaniard of the time of Cervantes, but if it be worth while to do so, a nearer one, and one much more probable, may be found in the Dedication of the "Flores de Seneca traducidas por Juan Cordero," (Anvers, 1555, 12mo,) a person much distinguished and honored in his time, as we see from Ximeno and Fuster.

There was an answer to Conde's "Carta en Castellano," entitled "Respuesta a la Carta en Castellano, etc., por Don Juan Fran Perez de Cacegas" (Madrid, 1800, 18mo, pp. 60.) It was hardly needed, I think, and its temper is not better than that of such controversial tracts generally among the Spaniards. But some of its hits at the notes of Pellicer to *Don Quixote* are well deserved.

brought home confessedly in the year 1604. To add further to this confusion, when we reach the Second Part, which opens only a month after the conclusion of the First, and continues only a few weeks, we have, at the side of the same claims of an ancient Arabian author, a conversation about the expulsion of the Moors,<sup>39</sup> which happened after 1609, and much criticism on Avellaneda, whose work was published in 1614.<sup>40</sup>

But this is not all. As if still further to accumulate contradictions and incongruities, the very details of the story he has invented are often in whimsical conflict with each other, as well as with the historical facts to which they allude. Thus, on one occasion, the scenes which he had represented as having occurred in the course of a single evening and the following morning are said to have occupied two days;<sup>41</sup> on another, he sets a company down to a late supper, and after conversations and stories that must have carried them nearly through the night, he says, "It began to draw towards evening."<sup>42</sup> In different places he calls the same individual by different names, and — what is rather amusing — once reproaches Avellaneda with a mistake which was, after all, his own.<sup>43</sup> And finally, having discovered the inconsequence of saying seven times that Sancho was on his ass after Gines de Passamonte had stolen it, he took pains, in the only edition of the First Part that he ever \* revised, \* 150 to correct two of his blunders, — heedlessly

<sup>39</sup> Don Quixote, Parte II c 54

<sup>40</sup> The criticism on Avellaneda begins, as we have said, Parte II c 59.

<sup>41</sup> Parte I c 46

<sup>42</sup> "Llegaba ya la noche," he says in c. 42 of Parte I, when all that had occurred from the middle of c. 37 had happened after they were set down to supper.

<sup>43</sup> Cervantes calls Sancho's wife by three or four different names (Parte I. c 7 and 52, and Parte II c 5 and 59); and Avellaneda having, in some degree, imitated him, Cervantes makes himself very merry at the confusion; not noticing that the mistake was really his own.

overlooking the rest; and when he published the Second Part, laughed heartily at the whole,— the errors, the corrections, and all,— as things of little consequence to himself or anybody else.<sup>44</sup>

The romance, however, which he threw so carelessly from him, and which, I am persuaded, he regarded rather as a bold effort to break up the absurd taste of his time for the fancies of chivalry than as anything of more serious import, has been established by an uninterrupted, and, it may be said, an unquestioned, success ever since, both as the oldest classical specimen of romantic fiction, and as one of the most remarkable monuments of modern genius. But though this may be enough to fill the measure of human fame and glory, it is not all to which Cervantes is entitled; for, if we would do him the justice that would have been most welcome to his own spirit, and even if we would ourselves fully comprehend and enjoy the whole of his *Don Quixote*, we should, as we read it, bear in mind, that this delightful romance was not the result of a youthful exuberance of feeling and a happy external condition, nor composed in his best years, when the spirits of its author were light and his hopes high; but that — with all its unquenchable and irresistible humor, with its bright views of the world, and its cheerful trust in goodness and virtue — it was written in his old age, at the conclusion of a life nearly every step of which had been marked with disappointed expectations, disheartening struggles, and sore calamities;

<sup>44</sup> The facts referred to are these. Gines de Passamonte, in the 23d chapter of Part First, (ed. 1605, f. 108,) steals Sancho's ass. But hardly three leaves further on, in the same edition, we find Sancho riding again, as usual, on the poor beast, which reappears yet six other times out of all reason. In

the edition of 1608, Cervantes corrected two of these careless mistakes on leaves 109 and 112, but left the five others just as they stood before, and in Chapters 3 and 27 of the Second Part, (ed. 1615,) jests about the whole matter, but shows no disposition to attempt further corrections.

that he began it in a prison, and that it was finished when he felt the hand of death pressing heavy and cold upon his heart. If this be remembered as we read, we may feel, as we ought to feel, what admiration and reverence are due, not only to the living power of Don \* Quixote, but to the character and genius of Cervantes; — if it be forgotten or underrated, we shall fail in regard to both.<sup>45</sup>

<sup>45</sup> Having expressed so strong an opinion of Cervantes's merits, I cannot refuse myself the pleasure of citing the words of the modest and wise Sir William Temple, who, when speaking of works of satire, and rebuking Rabelais for his indecency and profaneness, says "The matchless writer of Don Quixote is much more to be admired for having made up so excellent a composition of satire or ridicule without those ingredients, and seems to be the best and

highest strain that ever has been or will be reached by that vein" Works, London, 1814, 8vo, Vol III p 436. To this may not inappropriately be added the opinion of Dr Johnson, who "confessed that the work of Cervantes was the greatest in the world after Homer's Iliad, speaking of it, I mean," says Mrs. Piozzi, "as a book of entertainment" Boswell's Johnson, Croker's edition, 1831, Vol IV. pp. 377, 378. See Appendix (E).

LOPE DE VEGA — HIS EARLY LIFE — A SOLDIER — HE WRITES THE ARCADIA — MARRIES — HAS A DUEL — FLIES TO VALENCIA — DEATH OF HIS WIFE — HE SERVES IN THE ARMADA — RETURNS TO MADRID — MARRIES AGAIN — DEATH OF HIS SONS — HE BECOMES RELIGIOUS — HIS POSITION AS A MAN OF LETTERS — HIS SAN ISIDRO, HERMOSURA DE ANGÉLICA, DRAGONTEA, PEREGRINO EN SU PATRIA, AND JERUSALEN CONQUISTADA

IT is impossible to speak of Cervantes as the great genius of the Spanish nation without recalling Lope de Vega, the rival who far surpassed him in contemporary popularity, and rose, during the lifetime of both, to a degree of fame which no Spaniard had yet attained, and which has been since reached by few of any country. To the examination, therefore, of this great man's claims,—which extend to almost every department of the national literature,—we naturally turn, after examining those of the author of *Don Quixote*.

Lope Felix de Vega Carpio was born on the 25th of November, 1562, at Madrid, whither his father had recently removed, almost by accident, from the old family estate of Vega, in the picturesque valley of Carriedo.<sup>1</sup> From his earliest youth he discovered

<sup>1</sup> There is a life of Lope de Vega, which was first published in a single volume, by the third Lord Holland, in 1806, and again, with the addition of a life of Guillen de Castro, in two volumes, 8vo, London, 1817. It is a pleasant book, and contains a good notice of both its subjects, and agreeable criticisms on their works, but it is quite as interesting for the glimpses it gives of the fine accomplishments and

generous spirit of its author, who spent some time in Spain, when he was about thirty years old, and never afterwards ceased to take an interest in its affairs and literature. He was much connected with Jovellanos, Blanco White, and other distinguished Spaniards; not a few of whom, in the days of disaster that fell on their country during the French invasion, and the subsequent misgovernment of Ferdinand VII., en-

extraordinary \* powers. We are assured by \* 153 his friend Montalvan, that at five years of age he could not only read Latin as well as Spanish, but that he had such a passion for poetry, as to pay his more advanced schoolfellows with a share of his breakfast for writing down the verses he dictated to them, before he had learned to do it for himself<sup>2</sup> His father, who, as he intimates, was a poet,<sup>3</sup> and who was much devoted to works of charity in the latter years of his life, died when he was very young, and left, besides Lope, a son who perished in

joyed the princely hospitality of Holland House, where the benignant and frank kindness of its noble master shed a charm and a grace over what was most intellectual and elevated in European society that could be given by nothing else

Lope's own account of his origin and birth, in a poetical epistle to a Peruvian lady, who addressed him in verse under the name of "Amarylis," is very odd. The correspondence is found in the first volume of his *Obrias Sueltas*, (Madrid, 1776-1779, 21 tom 4to,) *Epistolas XV* and *XVI*, and was first printed by Lope, if I mistake not, in 1624. It is now referred to for the following important lines —

Tiene su villa en la bordada alfombra  
De Castilla el valor de la montaña,  
Que el valle de Carriido España nombra  
Allí otro tiempo se cifraba España,  
Allí tuvo principio, mas que importa  
Nacer laurel y ser humilde caña?  
Falta dínero allí, la tierra es corta,  
Vino mi padre del solar de Vega  
Assí a los pobres la nobleza exhorta,  
Siguólo hasta Madrid, de zelos ciega,  
Su amorosa muger, porque él quería  
Una Española Helena, entonces Griega  
Hicieron amistades, y aquél dia  
Fué piedra en mi primero fundamento  
La paz de su zelos fantasía  
En fin por zelos soy, que nacimiento'  
Imaginalde vos que haver nacido  
De tan inqueta causa fué portento

And then he goes on with a pleasant account of his making verses as soon as he could speak, of his early passion for Raymond Lulli, the metaphysical doctor then so much in fashion, of his subsequent studies, his family, etc. Lope loved to refer to his origin in the mountains. He speaks of it in his

"Laurel de Apolo," (Silva VIII,) and in two or three of his plays he makes his heroes boast that they came from that part of Spain to which he traced his own birth. Thus, in "La Venganza Venturosa," (Comedias, 4to, Madrid, Tom X, 1620, f 33, b,) Feliciano, a high-spirited old knight, says, —

El noble solar que heredo,  
No lo dare a rico infame,  
Porque nadie me lo llame  
En el valle de Carriido

And again, in the opening of the "Premio del Bien Hablar," (4to, Madrid, Tom XXI, 1635, f 159,) where he seems to describe his own case and character. —

Naci en Madrid, aunque son  
En Galicia los solares  
De mi nacimiento noble,  
De mis abuelos y padres  
Para noble nacimiento  
Ay en España tres partes,  
Galicia, Vizcaya, Asturias,  
O ya montañas le llaman

The valley of Carriido is said to be very beautiful, and Miñano, in his "Duccionario Geográfico," (Madrid, 8vo, Tom II, 1826, p 40,) describes La Vega as occupying a fine position on the banks of the Sandoñana

<sup>2</sup> "Before he knew how to write, he loved verses so much," says Montalvan, his friend and eulogist, "that he shared his breakfast with the older boys, in order to get them to take down for him what he dictated" *Fama Póstuma, Obrias Sueltas*, Tom XX p 28

<sup>3</sup> In the "Laurel de Apolo," he says he found rough copies of verses among his father's papers, that seemed to him better than his own.

the Armada in 1588, and a daughter who died in 1601. In the period immediately following the father's death, the family seems to have been scattered by poverty; and during this interval Lope \* 154 probably lived with his uncle, \* the Inquisitor, Don Miguel de Carpio, of whom he long afterwards speaks with great respect.<sup>4</sup>

But though the fortunes of his house were broken, his education was not neglected. He was sent to the Imperial College at Madrid, and in two years made extraordinary progress in ethics and in elegant literature, avoiding, as he tells us, the mathematics, which he found unsuited to his humor, if not to his genius. Accomplishments, too, were added,—fencing, dancing, and music; and he was going on in a way to gratify the wishes of his friends, when, at the age of fourteen, a wild, giddy desire to see the world took possession of him; and, accompanied by a schoolfellow, he ran away from college. At first, they went on foot for two or three days. Then they bought a sorry horse, and travelled as far as Astorga, in the northwestern part of Spain, not far from the old fief of the Vega family; but there, growing tired of their journey, and missing more seriously than they had anticipated the comforts to which they had been accustomed, they determined to return home. At Segovia, they attempted, in a silversmith's shop, to exchange some doubloons and a gold chain for small coin, but were suspected to be thieves, and arrested. The magistrate, however, before whom they were brought, being satisfied that they were guilty of nothing but folly, released them; though,

wishing to do a kindness to their friends, as well as to themselves, he sent an officer of justice to deliver them safely in Madrid.<sup>5</sup>

At the age of fifteen, as he tells us in one of his poetical epistles, he was serving as a soldier against the Portuguese in Terceira;<sup>6</sup> but only a little later than this we know that he filled some place

\* about the person of Gerónimo Manrique, \* 155 Bishop of Avila, to whose kindness he acknowledged himself to be much indebted, and in whose honor he wrote several eclogues,<sup>7</sup> and inserted a long passage in his "Jerusalem." Under the patronage of Manrique, he was, probably, sent to the University of Alcalá, where he certainly studied some time, and not only took the degree of Bachelor, but was near submitting himself to the irrevocable tonsure of the priesthood.<sup>8</sup>

But, as we learn from some of his own accounts, he now fell in love. Indeed, if we are to believe

<sup>6</sup> This curious passage is in the Epistle, or Metro Lyrico, to D. Luis de Haro, Obras Sueltas, Tom. IX, p. 379 —

Ni mi fortuna muda

Con la espada desnuda  
Al bravo Portugués en la Tercera,

I do not quite make out how this can have happened in 1577, but the assertion seems unequivocal. Schack (Geschichte der dramatischen Literatur in Spanien, Berlin, 1845, 8vo, Tom. II. p. 164) thinks the fifteen years here referred to are intended to embrace the fifteen years of Lope's life as a soldier, which he extends from Lope's eleventh year to his twenty-sixth, — 1573 to 1588. But Schack's ground for this is a mistake he had himself previously made in supposing the Dedication of the "Gatomaquia" to be addressed to Lope himself, whereas it is addressed to his son, named Lope, who served, at the age of fifteen, under the Marquis of Santa Cruz,

as we shall see hereafter. The "Cupid in arms," therefore, referred to in this Dedication, fails to prove, what Schack thought it proved, and leaves the "fifteen years" as dark a point as ever. See Schack, pp. 157, etc.

<sup>7</sup> These are the earliest works of Lope mentioned by his eulogists and biographers, (Obras Sueltas, Tom. XX, p. 30,) and must be dated as early as 1582 or 1583. The "Pastoral de Jacinto" is in the Comedias, Tom. XVIII, but was not printed till 1623.

<sup>8</sup> In the epistle to Doctor Gregorio de Ángulo, (Obras Sueltas, Tom. I, p. 420,) he says "Don Gerónimo Manrique brought me up. I studied in Alcalá, and took the degree of Bachelor, I was even on the point of becoming a priest, but I fell blindly in love, God forgive it; I am married now, and he that is so ill off fears nothing." Elsewhere he speaks of his obligations to Manrique more warmly, for instance, in his Dedication of "Pobreza no es Vileza," (Comedias, 4to, Tom. XX, Madrid, 1629,) where his language is very strong.

the tales he tells of himself in his "Dorothea," which was written in his youth and printed with the sanction of his old age, he suffered great extremity from that passion when he was only seventeen. Some of the stories of that remarkable dramatic romance, in which he figures under the name of Fernando, are, it may be hoped, fictitious;<sup>9</sup> though it must be admitted that others, like the scene between the hero and Dorothea, in the first act, the account of his weeping behind the door with Marfisa, on the day she was to be married to another, and most of the narrative parts in the fourth act, have an air of reality about them that hardly permits us to doubt they were true.<sup>10</sup> Taken together, however, they do him little credit as a young man of honor and a cavalier.

\* 156 \* From Alcalá, Lope came to Madrid, and attached himself to the Duke of Alva; not, as it has been generally supposed, the remorseless favorite of Philip the Second, but Antonio, the great Duke's grandson, who had succeeded to his ancestor's fortunes without inheriting his formidable spirit.<sup>11</sup>

<sup>9</sup> See *Dorotea*, Acto I sc 6, in which, having coolly made up his mind to abandon Marfisa, he goes to her and pretends he has killed one man and wounded another in a night brawl, obtaining by this base falsehood the unhappy creature's jewels, which he needed to pay his expenses, and which she gave him out of her overflowing affection. Francisco Lopez de Aguilar, who defended the theatre in Lope de Vega's lifetime, says of the *Dorotea* (*Obras de Lope*, Tom. VII p vn), "Siendo cierta imitacion de verdad, le parecia que no lo seria hablando las personas en verso."

<sup>10</sup> Act I. sc. 5, and Act IV. sc. 1, have a great air of reality about them. But other parts, like that of the discourses and troubles that came from

giving to one person the letter intended for another, are quite too improbable, and too much like the inventions of some of his own plays, to be trusted. (Act V sc 3, etc.) M Faunel, however, whose opinion on such subjects is always to be respected, regards the whole as true. *Revue des Deux Mondes*, September 1, 1839

<sup>11</sup> Lord Holland treats him as the old Duke (*Life of Lope de Vega*, London, 1817, 2 vols., 8vo), and Southey (*Quarterly Review*, 1817, Vol. XVIII. p 2) undertakes to show that it could be no other, while Nicolas Antonio (*Bib Nov.*, Tom. II p 74) speaks as if he were doubtful, though he inclines to think it was the elder. But there is no doubt about it. Lope repeatedly speaks of Antonio, *the grandson*, as his

Lope was much liked by his new patron, and rose to be his confidential secretary, living with him both at court and in his retirement at Alva, where letters seem for a time to have taken the place of arms and affairs. At the suggestion of the Duke, he wrote his "Arcadia," a pastoral romance, making a volume of considerable size; and, though chiefly in prose, yet with poetry of various kinds freely intermixed. Such compositions, as we have seen, were already favored in Spain;—the last of them, the "Galatea" of Cervantes, published in 1584, giving, perhaps, occasion to the Arcadia, which seems to have been written almost immediately afterwards. Most of them have one striking peculiarity; that of concealing, under the forms of pastoral life in ancient times, adventures which had really occurred in the times of their respective authors. The Duke was desirous to figure among these \*fan- \*157 tastic shepherds and shepherdesses, and therefore induced Lope to write the Arcadia, and make him its hero, furnishing some of his own experiences as materials for the work. At least, so the affair was understood both in Spain and France, when the Arcadia was published, in 1598; besides which, Lope himself, a few years later, in the Preface to some miscel-

patron, e g in his epistle to the Bishop of Oviedo, where he says —

Y yo del Duque *Antonio* dexé el Alva

Obras Sueitas, Tom I p 289.

And in the opening words of the Dedication of his "Domine Lucas," where he says "Sirviendo al excelentísimo Don Antonio de Toledo y Beaumont, Duque de Alva, en la edad que pude escribir —

*La verde primavera*

*De mis floridos años*"

Comedias, Tom XVII 1621, f 187, b

He, however, praised the elder Duke abundantly in the second, third, and fifth books of the "Arcadia," giving in

the last an account of his death and of the glories of *his grandson*, whom he again notices as his patron. Indeed, the case is quite plain, and it is only singular that it should need an explanation; for the idea of making the Duke of Alva, who was minister to Philip II, a shepherd, seems to be a caricature or an absurdity, or both. It is, however, the common impression, and may be again found in the *Semanario Pintoresco*, 1839, p 18. The younger Duke, on the contrary, loved letters, and, if I mistake not, there is a *Cancion* of his in the *Cancionero General* of 1573, f 178.

laneous poems, tells us expressly, “The Arcadia is a true history.”<sup>12</sup>

But whether it be throughout a true history or not, it is a very unsatisfactory one. It is commonly regarded as an imitation of its popular namesake, the “Arcadia” of Sannazaro, of which a Spanish translation had appeared in 1547; but it much more resembles the similar works of Montemayor and Cervantes, both in story and style. Metaphysics and magic, as in the “Diana” and “Galatea,” are strangely mixed up with the shows of a pastoral life; and, as in them, we listen with little interest to the perplexities and sorrows of a lover who, from mistaking the feelings of his mistress, treats her in such a way that she marries another, and then, by a series of enchantments, is saved from the effects of his own despair, and his heart is washed so clean, that, like Orlando’s, there is not one spot of love left in it. All this, of course, is unnatural; for the personages it represents are such as can never have existed, and they talk in a language strained above the tone becoming prose; all propriety of costume and manners is neglected; so much learning is crowded into it, that a dictionary is placed at the end to make it intelligible; and it is drawn out to a length which now seems quite absurd, though the editions it soon passed through show that it was not too long for the

<sup>12</sup> The truth of the stories, or some of the stories, in the Arcadia, may be inferred from the mysterious intimations of Lope in the *Prólogo* to the first edition; in the “*Egloga à Claudio*”; and in the Preface to the “*Rimas*,” (1602,) put into the shape of a letter to Juan de Argujo Quintana, too, in the Dedication to Lope of his “*Experiencias de Amor y Fortuna*,” (1626,) says of the Arcadia, that “under a rude covering are hidden souls that are noble and events that really happened.” See,

also, Lope, *Obras Suetas*, Tom. XIX p. xxii, and Tom. II. p. 456. That it was believed to be true in France is apparent from the Preface to old Lance-lot’s translation, under the title of “*Délices de la Vie Pastorale*” (1624) Figueroa (Pasagero, 1617, f. 97, b) says the same thing of pastorals in general, and cites the Galatea and the Arcadia in proof of it. It is important to settle the fact, for it must be referred to hereafter. See *post*, Chap. XXXIII, note 8.

taste of its time. It should be added, however, that \* it occasionally furnishes happy specimens \* 158 of a glowing declamatory eloquence, and that in its descriptions of natural scenery there is sometimes great felicity of imagery and illustration.<sup>13</sup>

About the time when Lope was writing the *Arcadia*, he married Isabela de Urbina, daughter of the King-at-arms to Philip the Second and Philip the Third ; a lady, we are told, not a little loved and admired in the high circle to which she belonged.<sup>14</sup> But his domestic happiness was soon interrupted. He fell into a quarrel with a *hidalgo* of no very good repute ; lampooned him in a satirical poem ; was challenged, and wounded his adversary ; — in consequence of all which, and of other follies of his youth that seem now to have been brought up against him, he was cast into prison.<sup>15</sup> He

<sup>13</sup> The *Arcadia* fills the sixth volume of Lope's *Obras Suetas*. Editions of it were printed in 1598, 1599, 1601, 1602, twice, 1603, 1605, 1612, 1615, 1617, 1620, 1630, and often since, showing a great popularity. The first edition, 1598, which I possess, and which I suppose is the first of Lope's publications, makes 312 ff in 12mo, besides the prefatory matter and Index, and is from the press of Sanchez at Madrid. It contains a wood-engraving of Lope, which represents him as a somewhat stiff and gaily dressed young man.

<sup>14</sup> Her father, Diego de Urbina, was a person of some consequence, and figures among the more distinguished natives of Madrid in Baena, "Hijos de Madrid."

<sup>15</sup> Montalvan, it should be noted, seems willing to slide over these "frowns of fortune, brought on by his youth and aggravated by his enemies." But Lope attributes to them his exile, which came, he says, from "love in early youth, whose trophies were exile and its results tragedies" (*Epistola Primera á D. Ant. de Mendoza.*) But he also attributes it to false friends, in the fine ballad where he represents himself as looking down upon the ruins of

Saguntum and moralizing on his own exile "Bad friends," he says, "have brought me here" (*Obras Suetas*, Tom XVII p. 434, and *Romancero General*, 1602, f 108.) But again, in the Second Part of his "Philomena," 1621, (*Obras Suetas*, Tom II p. 452,) he traces his troubles to his earlier adventures ; "love to hatred turned" "Love-vengeance," he declares, "dis-gusted as justice, exiled me."

But the whole of this portion of Lope's life is obscure. Some light, however, is thrown on it by a letter which he addressed to the king in 1598, and a copy of which I obtained from the kindness of the last Lord Holland, to whose father, the biographer of Lope, it was sent, many years ago, by Don Martin Fernandez de Navarrete. As it is important, and, I think, unpublished, I give it entire. It seems to have been written from the *villa* of Madrid.

"Señor, Lope de Vega Carpio, vecino de esta villa dice Que V. M. le ha hecho merced de alzarle lo que le faltaba de cumplir de diez años de destierro en que fue condenado por los Alcaldes de Corte deste reyno, los dos que cumplió y los ocho della y cinco leguas, porque se le opusó haber hecho ciertas

\* 159 was not, however, left without a \*true friend.

Claudio Conde, who, on more than one occasion, showed a genuine attachment to Lope's person, accompanied him to his cell, and, when he was released and exiled, went with him to Valencia, where Lope himself was treated with extraordinary kindness and consideration, though exposed, he says, at times, to dangers as great as those from which he had suffered so much at Madrid.<sup>16</sup>

The exile of Lope lasted at least two years, and was chiefly passed at Valencia, then in literary reputation next after Madrid among the cities of Spain. Nor does he seem to have missed the advantages it offered him; for it was, no doubt, during his residence there that he formed a friendship with Gaspar de Aguilar and Guillen de Castro, of which many traces are to be found in his works; while, on the other hand, it is

sátiras contra Geronimo Velazquez, autor de comedias y otras personas de su casa, y porque durante dicho destierro á cosas forzosas que se le ofrecieron entró en esta corte y otras partes en quebrantamiento del,—suplica le haga merced de remitirle las penas que por ello incurrió ”

The following note is in Navarrete's well-known handwriting “Me lo envió de Simancas el Sr D Tomas Gonzalez encargado del arreglo de aquel archivo nacional Martín Fernandez de Navarrete ” And on the back is indorsed, “Carta de Lope de Vega al Rey pidiendo le haga la gracia de remitir las penas incurridas por el, año 1598 ”

From this letter it appears that the avowed cause of Lope's exile was certain satires against Geronimo Velazquez, autor de Comedias, and other persons of his kin,—that he had broken its terms by coming within the five leagues of the court from which he was forbidden, and that he now asked a pardon from the penalties he had thus incurred, having already obtained a remission of the term of exile not yet fulfilled. Now there is a certain Ve-

lazquez noticed in C Pellicer's “Origen de la Comedia,” etc, (Madrid, 1804, Tom II p 141,) who answers all the conditions given by Montalvan and Lope of the “Autor de Comedias” in question, and Pellicer has given part of a popular satire on him, which, it is not unlikely, may be the very one for which Lope was exiled Pellicer, however, neither suspected the distinguished authorship of the verses he cites, nor knew the first name of Velazquez

<sup>16</sup> His relations with Claudio are noticed by himself in the Dedication to that “true friend,” as he justly calls him, of the well-known play, “Courting his own Misfortunes,”—“which title,” he adds, “is well suited to those adventures, when, with so much love, you accompanied me to prison, from which we went to Valencia, where we ran into no less dangers than we had incurred at home, and where I repaid you by liberating you from the tower of Serranos [a jail at Valencia] and the severe sentence you were there undergoing,” etc Comedias, Tom. XV., Madrid, 1621, f. 26.

perhaps not unreasonable to assume that the theatre, which was just then beginning to take its form in Valencia, was much indebted to the fresh power of Lope for an impulse it never afterwards lost. At any rate, we know that he was much connected with the Valencian poets, and that, a little later, they were among his marked followers in the drama. But his exile was still an exile,—bitter and wearisome to him,—and he gladly returned to Madrid as soon as he could venture there safely.

His home, however, soon ceased to be what it had been. His young wife died in less than a year after his \* return, and one of his friends, Pedro \* 160 de Medinilla,<sup>17</sup> joined him in an eclogue to her memory, which is dedicated to Lope's patron, Antonio, Duke of Alva,<sup>18</sup>—a poem of little value, and one that does much less justice to his feelings than some of his numerous verses to the same lady, under the name of Belisa, which are scattered through his own works and found in the old Romanceros.<sup>19</sup>

<sup>17</sup> Baltasar Elisio de Medinilla, whose violent death is mourned by Lope de Vega in an Elegy in the first volume of his works, wrote a Poem entitled “Limpia Concepcion de la Virgen Nuestra Señora,” Madrid, 1617, 12mo, pp 89,—the fruit, he tells us, of seven years' labor, and published at the age of thirty-two Lope, in some prefatory verses, says of it, —

Letor no ay silaba aqui  
Que de oro puro no sea, ec.

But it is, after all, a dull poem, divided into five books, and about five hundred octave stanzas, beginning with the prayers of Joachim for offspring, and ending with the mysterious conception. The subject—always popular in Spain—may have gained more regard for it than it deserved; but it was never reprinted.

<sup>18</sup> Obras Suetas, Tom IV. pp 430—  
<sup>443</sup> *Belardo*, the name Lope bears in this eclogue, is the one he gave himself

in the Arcadia, as may be seen from the sonnet prefixed to that pastoral by Amphryso, or Antonio, Duke of Alva; and it is the poetical name Lope bore to the time of his death, as may be seen from the beginning of the third act of the drama in honor of his memory (Obras Suetas, Tom XX p. 494) Even his Peruvian Amaryllis knew it, and under this name addressed to him the poetical epistle already referred to. This fact—that Belardo was his recognized poetical appellation—should be borne in mind when reading the poetry of his time, where it frequently recurs.

<sup>19</sup> *Belisa* is an anagram of *Isabela*, the first name of his wife, as is plain from a sonnet on the death of her mother, Theodora Uribina, where he speaks of her as “the heavenly image of his Belisa, whose silent words and gentle smiles had been the consolation of his exile” (Obras Suetas, Tom. IV. p. 278.) There are several ballads con-

It must be admitted, however, that there is some confusion in this matter. The ballads bear witness to the jealousy felt by Isabela on account of his relations with another fair lady, who passes under the name of Filis, — a jealousy which seems to have caused him no small embarrassment; for while, in some of his verses, he declares it has no foundation, in others he admits and justifies it.<sup>20</sup> But however this may have been, a very short time after Isabela's death he made no secret of his passion for the rival who had disturbed her peace. He was not, however, successful. For

\* 161 some reason \*or other, the lady rejected his suit.

He was in despair, as his ballads prove; but his despair did not last long. In less than a year from the death of Isabela it was all over, and he had again taken, to amuse and distract his thoughts, the genuine Spanish resource of becoming a soldier.

The moment in which he made this decisive change in his life was one when a spirit of military adventure was not unlikely to take possession of a character always seeking excitement; for it was just as Philip the Second was preparing the portentous Armada, with which he hoped, by one blow, to overthrow the power of Elizabeth and bring back a nation of heretics to the bosom of the Church. Lope, therefore, as he tells us in one of his eclogues, finding the lady of his love would not smile upon him, took his musket on his shoulder, amidst the universal enthusiasm of 1588, marched to Lisbon, and, accompanied by his faithful

neeted with her in the Romancero General, and a beautiful one in the third of Lope's Tales, written evidently while he was with the Duke of Alva. *Obras*, Tom. VIII p 148.

<sup>20</sup> For instance, in the fine ballad beginning, "Llenos de l'grimas tristes," (Romancero of 1602, f. 47,) he says to

Belisa, "Let Heaven condemn me to eternal woe, if I do not detest Phillis and adore thee"; — which may be considered as fully contradicted by the equally fine ballad addressed to Filis, (f. 18,) "Amada pastora mia", as well as by six or eight others of the same sort, — some more, some less tender.

friend Conde, went on board the magnificent armament destined for England, where, he says, he used up for wadding the verses he had written in his lady's praise.<sup>21</sup>

A succession of disasters followed this ungallant jest. His brother, from whom he had long been separated, and whom he now found as a lieutenant on board the Saint John, in which he himself served, died in his arms of a wound received during a fight with the Dutch. Other great troubles crowded after this one. Storms scattered the unwieldy fleet; calamities of all kinds confounded prospects that had just before been so full of glory; and Lope must have thought himself but too happy, when, after the Armada had been dispersed or destroyed, he was brought back in safety, first to Cadiz and afterwards to Toledo and Madrid, reaching the last city, probably, in 1590. It is a curious fact, however, in his personal history, that, amidst all the terrors and sufferings of this disastrous expedition, he found leisure and quietness of spirit to write the greater part of his long \* poem on "The Beauty of \* 162 Angelica," which he intended as a continuation of the "Orlando Furioso."<sup>22</sup>

But Lope could not well return from such an expedition without something of that feeling of disappointment which, with the nation at large, accompanied its failure. Perhaps it was owing to this that he entered again on the poor course of life of which he

<sup>22</sup> One of his poetical panegyrists, after his death, speaking of the Armada, says "There and in Cadiz he wrote the Angelica" (Obras, Tom. XX p. 348.) The remains of the Armada re-

turned to Cadiz in September, 1588, having sailed from Lisbon in the preceding May, so that Lope was probably at sea about four months. Further notices of his naval service may be found in the third canto of his "Corona Trágica," and the second of his "Philomena."

had already made an experiment with the Duke of Alva, and became secretary, first of the Marquis of Malpica, and afterwards of the generous Marquis of Sarria, who, as Count de Lemos, was, a little later, the patron of Cervantes and the Argensolas. While he was in the service of the last distinguished nobleman, and already known as a dramatist, he became attached to Doña Juana de Guardio, a lady of good family in Madrid, whom he married in 1597; and, soon afterwards leaving the Count de Lemos, had never any other patrons than those whom, like the Duke of Sessa, his literary fame procured for him.<sup>23</sup>

Lope had now reached the age of thirty-five, and seems to have enjoyed a few years of happiness, to which he often alludes, and which, in two of his poetical epistles, he has described with much gentleness and grace.<sup>24</sup> But it did not last long. A son,

Carlos, to whom he was tenderly attached, \* 163 lived only to his seventh \* year;<sup>25</sup> and the mother died, giving birth, at the same time, to Feliciana,<sup>26</sup> who was afterwards married to Don Luis de Usategui, the editor of some of his father-in-

<sup>23</sup> Don Pedro Fernandez de Castro, Count of Lemos and Marquis of Sarria, who was born in Madrid about 1576, married a daughter of the Duke de Lerma, the reigning favorite and minister of the time, with whose fortunes he rose, and in whose fall he was ruined. The period of his highest honors was that following his appointment as Viceroy of Naples, in 1610, where he kept a literary court of no little splendor, that had for its chief directors the two Argensolas, and with which, at one time, Quevedo was connected. The count died in 1622, at Madrid Lope's principal connections with him were when he was young, and before he had come to his title as Count de Lemos. He records himself as "Secretary of the Marquis of Sarria," in the title-page of the *Arcadia*, 1598; besides which, many

years afterwards, when writing to the Count de Lemos, he says "You know how I love and reverence you, and that, many a night, I have slept at your feet like a dog" *Obras Sueltas*, Tom. XVII, p. 403 Clemencin, *Don Quixote*, Parte II, note to the Dedicatoria.

law's posthumous works. Lope seems to have felt bitterly his desolate estate after the death of his wife and son, and speaks of it with much feeling in a poem addressed to his faithful friend Conde.<sup>27</sup> But earlier than this, in 1605, an illegitimate daughter was born to him, whom he named Marcela,—the same to whom, in 1620, he dedicated one of his plays, with extraordinary expressions of affection and admiration,<sup>28</sup> and who, in 1621, took the veil and retired from the world, renewing griefs, which, with his views of religion, he desired rather to bear with patience, and even with pride.<sup>29</sup> In 1606, the same lady,—Doña María de Luxan,—who was the mother of Marcela, bore him a son, whom he named Lope, and who, at the age of fourteen, appears among the poets at the canonization of San Isidro.<sup>30</sup> But though his father had fondly destined him for a life of letters, he insisted on becoming a soldier, and, after serving under the Marquis of Santa Cruz against the Dutch and the Turks, perished, when only fifteen years old, in a vessel which was lost at sea with all on board.<sup>31</sup> Lope poured forth his sorrows in a piscatory eclogue, less full of feeling than the verses in which he describes Marcela taking the veil.<sup>32</sup>

She long survived her father, and died, much reverenced for her piety, in 1688.

<sup>29</sup> The description of his grief, and of his religious feelings as she took the veil, is solemn, but he dwells a little

near nothing more of their mother. Indeed, soon afterwards, Lope, no longer at an age to be deluded by his passions, began, according to the custom of his time and country, to turn his thoughts seriously to religion. He devoted himself to pious works, as his father had done; visited the hospitals regularly; resorted daily to a particular church; entered a secular religious congregation; and finally, at Toledo, in 1609, according to Navarrete, received the tonsure and became a priest. The next year he joined the same brotherhood of which Cervantes was afterwards a member.<sup>33</sup> In 1625, he entered the congregation of the native priesthood of Madrid, and was so faithful and exact in the performance of his duties, that, in 1628, he was elected to be its chief chaplain. He is, therefore, for the twenty-six latter years of his long life, to be regarded as strictly connected with the Spanish Church, and as devoting to its daily service some portion of his time.<sup>34</sup>

But we must not misunderstand the position in which, through these relations, Lope had now placed himself, nor overrate the sacrifices they required of him. Such a connection with the Church, in his time, by no means involved an abandonment of the world,—hardly an abandonment of its pleasures.

<sup>33</sup> Pellicer, ed. *Don Quixote*, Tom. I. cxcix. Navarrete, *Vida de Cervantes*, 1819, p. 468.

<sup>34</sup> There is a difficulty about these relations of Lope to the priesthood and to his married life. Of course, if he took the tonsure in 1609, he could not be a married man in 1611; and yet Schack (*Nachtrage*, p. 31) gives us these words from an autograph letter of Lope, dated Madrid, July 6, 1611, and found among the papers of his great patron and executor, the Duque de Sessa, viz. . “Aqui paso, Señor exelentissimo, mi vida con este mal importuno de mi mujer, ejercitando actos

de paciencia, que si fuesen voluntarios como precisos no fuese aqui su penitencia menos que principio del purgatorio” —In another letter of September 7, 1611, he speaks of getting along better with his wife Juana. Of course, if these dates are right, the reckoning of Pellicer and Navarrete is wrong, and Lope did not enter the priesthood before 1611 or 1612; but he seems by his *liaison* with María de Luxan, in 1605–6, to have given cause enough for family dissensions such as these letters intimate. The “brotherhood” did not imply celibacy

On the contrary, it was rather regarded as one of the means for securing the leisure suited to a life of letters and social ease. As such, unquestionably, Lope employed it; for, during the long series of years in which he was a priest, and gave regular portions of his time to offices of devotion

\* and charity, he was at the height of favor \* 165 and fashion as a poet. And, what may seem to us more strange, it was during the same period he produced the greater number of his dramas, not a few of whose scenes offend against the most unquestioned precepts of Christian morality, while, at the same time, in their title-pages and dedications, he carefully sets forth his clerical distinctions, giving peculiar prominence to his place as a Familiar or servant of the Holy Office of the Inquisition.<sup>35</sup>

It was, however, during the happier period of his married life that he laid the foundations for his general popularity as a poet. His subject was well chosen. It was that of the great fame and glory of San Isidro the Ploughman. This remarkable personage, who plays so distinguished a part in the ecclesiastical history of Madrid, is supposed to have been born in the twelfth century, on what afterwards became the site of that city, and to have led a life so eminently

<sup>35</sup> I notice the title *Familiar del Santo Oficio* as early as the "Jerusalen Conquistada," 1609. Frequently afterwards, as in the *Comedias*, Tom II., VI., XI., etc., no other title is put to his name, as if this were glory enough. In his time, *Familiar* meant a person who could at any moment be called into the service of the Inquisition; but had no special office, and no duties, till he was summoned. Covarruvias, *ad verb.* Lope, in his "Peregrino en su Patria," (1604,) had already done homage to the Inquisition, calling it "Esta santa y venerable Inquisicion," etc. Lib. II.

Lope, also, sometimes calls himself *Frey* in the titles of his works. This, however, it should be noted, is a different designation from *Fray*, though both come from the Latin *Frater*. For *Fray* means a monk, and, in common parlance, a monk of some mendicant order, whereas *Frey* is a member, whether clerical or lay, of one of the great Spanish military and religious orders. Thus Lope de Vega was "Frey del Orden de Malta," — not a small honor, — and Juan de la Cruz was "Fray Descalzo de la Reforma de Nuestra Señora del Carmen," — a severe order of monks.

pious, that the angels came down and ploughed his grounds for him, which the holy man neglected in order to devote his time to religious duties. From an early period, therefore, he enjoyed much consideration, and was regarded as the patron and friend of the whole territory, as well as of the city of Madrid itself. But his great honors date from the year 1598. In that year Philip the Third was dangerously ill at a neighboring village; the city sent out the remains of Isidro in procession to avert the impending calamity; the king recovered; and for the first time the holy man became widely famous and fashionable.<sup>36</sup>

\* 166 \* Lope seized the occasion, and wrote a long poem on the life of “Isidro the Ploughman,” or Farmer; so called to distinguish him from the learned saint of Seville who bore the same name. It consists of ten thousand lines, exactly divided among the ten books of which it is composed; and yet it was finished within the year, and published in 1599. It has no high poetical merit, and does not, indeed, aspire to any. But it was intended to be popular, and succeeded. It is written in the old national five-line stanza, carefully rhymed throughout; and, notwithstanding the apparent difficulty of the measure, it everywhere affords unequivocal proof of that facility and fluency of versification for which Lope became afterwards so famous. Its tone, which, on the most solemn matters of religion, is so familiar that we should now consider it indecorous, was no doubt in full consent with the spirit of the

<sup>36</sup> He was, from a very early period, honored at home, in Madrid, and has continued to be so ever since, — his humble origin and gentle character contributing no doubt to his popularity. A poem urging intercessions to him in consequence of a great drought at Ma-

drid in 1779 contains a list of the kings who had paid reverence to the poor ploughman, and among them are St. Ferdinand and Alfonso the Wise Elo-gio a San Isidro, Labrador, Patron de Madrid, por D Joachin Ezquerra, Madrid, 1779, 18mo, pp. 14.

times, and one main cause of its success. Thus, in Canto Third, where the angels come to Isidro and his wife Mary, who are too poor to entertain them, Lope describes the scene — which ought to be as solemn as anything in the poem, since it involves the facts on which Isidro's claim to canonization was subsequently admitted — in the following light verses, which may serve as a specimen of the measure and style of the whole ; —

Three angels, sent by grace divine,  
Once on a time blessed Abraham's sight ; —  
To Mamre came that vision bright,  
Whose number should our thoughts incline  
To Him of whom the Prophets write.

But six now came to Isidore !  
And, heavenly powers ! what consternation !  
Where is his hospitable store ?  
Surely they come with consolation,  
And not to get a timely ration.

Still, if in haste unleavened bread  
Mary, like Sarah, now could bake,  
\* Or Isidore, like Abraham, take  
The lamb that in its pasture fed,  
And honey from its waxen cake,

I know he would his guests invite ; —  
But whoso ploughs not, it is right  
His sufferings the price should pay ; —  
And how has Isidore a way  
Six such to harbor for a night ?

And yet he stands forgiven there,  
Though friendly bidding he make none ;  
For poverty prevents alone ; —  
But, Isidore, thou still canst spare  
What surest rises to God's throne.

Let Abraham to slay arise ;  
But, on the ground, in sacrifice,  
Give, Isidore, thy soul to God,  
Who never doth the heart despise  
That bows beneath his rod.

He did not ask for Isaac's death ;  
He asked for Abraham's willing faith <sup>37</sup>

No doubt, some of the circumstances in the poem are invented for the occasion, though there is in the margin much parade of authorities for almost everything ; — a practice very common at that period, to which Lope afterwards conformed only once or twice. But however we may now regard the “San Isidro,” it was printed four times in less than nine years ; and by addressing itself more to the national and popular feeling than the “Arcadia” had done, it became the earliest foundation for its author’s fame as the favorite poet of the whole nation.

\* 168 \* At this time, however, he was beginning to be so much occupied with the theatre, and so successful, that he had little leisure for anything else. His next considerable publication,<sup>38</sup> therefore, was not till 1602, when the “Hermosura de Angélica,” or The Beauty of Angelica, appeared ; a poem already mentioned as having been chiefly written while its author served at sea in the ill-fated Armada. It somewhat presumptuously claims to be a continuation of the “Orlando Furioso,” and is stretched out through twenty cantos, comprehending above eleven thousand lines in octave verse. In the Preface, he says he wrote it “under the rigging of the galleon Saint John and the banners of

The three angels that came to Abraham are often taken by the elder theologians, as they are by Lope, to symbolize the Trinity Navarrete — more commonly known as *El Mudo*, or the Dumb Painter — endeavored to give this expression to them on canvas Stirling’s Artists in Spain, 1848, Vol. I, p. 255.

<sup>38</sup> The “Fiestas de Denia,” a poem in two short cantos, on the reception of Philip III. at Denia, near Valencia, in 1599, soon after his marriage, was printed the same year, but is of little consequence.

the Catholic king," and that "he and the generalissimo of the expedition finished their labors together";—a remark which must not be taken too strictly, since both the thirteenth and twentieth cantos contain passages relating to events in the reign of Philip the Third. Indeed, in the Dedication, he tells his patron that he had suffered the whole poem to lie by him long for want of leisure to correct it; and he elsewhere adds, that he leaves it still unfinished, to be completed by some happier genius.

It is not unlikely that Lope was induced to write the Angelica by the success of several poems that had preceded it on the same series of fictions, and especially by the favor shown to one published only two years before, in the same style and manner,—the "Angélica" of Luis Barahona de Soto, which is noticed with extraordinary praise in the scrutiny of the Knight of La Mancha's Library, as well as in the conclusion to Don Quixote, where a somewhat tardy compliment is paid to this very work of Lope. Both poems are obvious imitations of Ariosto; and if that of De Soto has been too much praised, it is, at least, better than Lope's. And yet, in "The Beauty of Angelica," the author might have been deemed to occupy ground \*well \* 169 suited to his genius; for the boundless latitude afforded him by a subject filled with the dreamy adventures of chivalry was, necessarily, a partial release from the obligation to pursue a consistent plan,—while, at the same time, the example of Ariosto, as well as that of Luis de Soto, may be supposed to have launched him fairly forth upon the open sea of an unrestrained fancy, careless of shores or soundings.

But perhaps this very freedom was a principal cause of his failure; for his story is to the last degree wild

and extravagant, and is connected by the slightest possible thread with the graceful fiction of Ariosto.<sup>39</sup> A king of Andalusia, as it pretends, leaves his kingdom by testament to the most beautiful man or woman that can be found.<sup>40</sup> All the world throngs to win the mighty prize ; and one of the most amusing parts of the whole poem is that in which its author describes to us the crowds of the old and the ugly who, under such conditions, still thought themselves fit competitors. But as early as the fifth canto, the two lovers, Medoro and Angelica, who had been left in India by the Italian master, have already won the throne, and, for the sake of the lady's unrivalled beauty, are crowned king and queen at Seville.

Here, of course, if the poem had a regular subject, it would end ; but now we are plunged at once into a series of wars and disasters, arising out of the discontent of unsuccessful rivals, which threaten to have no end. Trials of all kinds follow. Visions, enchantments and counter enchantments, episodes quite unconnected with the main story, and broken up themselves by the most perverse interruptions, are mingled together, we neither know why nor how ; and when at last the happy pair are settled in their hardly won kingdom, we are as much wearied by the wild waste of fancy in which Lope has indulged himself, as we

should have been by almost any degree of mō  
\* 170 notony arising from a want of inventive \* power.

The best parts of the poem are those that contain descriptions of persons and scenery ;<sup>41</sup> the worst are those where Lope has displayed his learning,

<sup>39</sup> The point where it branches off from the story of Ariosto is the sixteenth stanza of the thirtieth canto of the "Orlando Furioso," where there is,

indeed, a fair opening for the subject of Lope's *Angélica*

which he has sometimes done by filling whole stanzas with a mere accumulation of proper names. The versification is extraordinarily fluent.<sup>42</sup>

As *The Beauty of Angelica* was written in the ill-fated Armada, it contains occasional intimations of the author's national and religious feelings, such as were naturally suggested by his situation. But in the same volume he at one time published a poem in which these feelings are much more fully and freely expressed;—a poem, indeed, which is devoted to nothing else. It is called “*La Dragontea*,” and is on the subject of Sir Francis Drake's last expedition and death. Perhaps no other instance can be found of a grave epic devoted to the personal abuse of a single individual; and to account for the present one, we must remember how familiar and formidable the name of Sir Francis Drake had long been in Spain.

He had begun his career as a brilliant pirate in South America above thirty years before; he had alarmed all Spain by ravaging its coasts and occupying Cadiz, in a sort of doubtful warfare, which Lord Bacon tells us the free sailor used to call “singeing the king of Spain's beard”;<sup>43</sup> and he had risen to the height of his glory as second in command of the great fleet which had discomfited the Armada, one of whose largest vessels was known to have surrendered to the terror of his name alone. In Spain, where he was as much hated as he was feared, he was regarded chiefly as a bold and successful buccaneer, whose melancholy

<sup>42</sup> *La Hermosura de Angélica* was printed for the first time in 1604, says the editor of the *Obras*, in Tom II. But Salvá gives an edition in 1602. It certainly appeared at Barcelona in 1605. The stanzas where proper names occur so often as to prove that Lope was guilty of the affectation of taking pains to

accumulate them are to be found in *Obras*, Tom II pp 27, 55, 233, 236, etc

death at Panamá, in 1596, was held to be a just visitation of the Divine vengeance for his piracies; — a state of feeling of which the popular literature \* 171 \* of the country, down to its very ballads, affords frequent proof.<sup>44</sup>

The Dragontea, however, whose ten cantos of octave verse are devoted to the expression of this national hatred, may be regarded as its chief monument. It is a strange poem. It begins with the prayers of Christianity, in the form of a beautiful woman, who presents Spain, Italy, and America in the court of Heaven, and prays God to protect them all against what Lope calls "that Protestant Scotch pirate."<sup>45</sup> It ends with rejoicings in Panamá because "the Dragon," as he is called through the whole poem, has died, poisoned by his own people, and with the thanksgivings of Christianity that her prayers have been heard, and that "the scarlet lady of Babylon" — meaning Queen Elizabeth — had been at last defeated. The substance of the poem is such as may be seem such an opening

<sup>44</sup> Mariana, *Historia*, ad an 1596, calls him simply "Francis Drake, an English corsair," — and in a graceful little anonymous ballad, imitated from a more graceful one by Góngora, we have again a true expression of the popular feeling. The ballad in question, beginning "Hermano Peñco," is in the *Romancero General*, 1602, (f 34,) and contains the following significant passage —

And Bartolo, my brother,  
To England forth is gone,  
Where the Drake he means to kill; —  
And the Luteranos every one,  
Excommunicate from God,  
Their queen among the first,  
He will capture and bring back,  
Like heretics accurst  
And he promises, moreover,  
Among his spoils and gains,  
A heretic young serving-boy  
To give me, bound in chains,  
And for my lady grandmamma,  
Whose years such waiting crave  
A little handy Lutheran,  
To be her maiden slave

Mi hermano Bartolo  
Se va a Inglaterra,  
A matar al Draque,  
Y á prender la Reyna,  
Y á los Luteranos  
De la Bandomessa  
Tiene de traerme  
A mi de la guerra  
Un Luteranico  
Con una cadena,  
Y una Luterana  
A señora aguela

*Romancero General*, Madrid, 1602, 4to, f 35.

The same ballad occurs in the "Entremes de los Romances," in the very rare and curious third volume, entitled *Parte Tercera de las Comedias de Lope de Vega y otros Autores*, ec, Barcelona, 1614, which, however, contains only three of Lope's Plays out of its twelve. I found it in the Library of the Vatican, where there are more old Spanish books than is commonly supposed

<sup>45</sup> He was in fact of Devonshire. See Fuller's *Worthies and Holy State*.

and such a conclusion. It is violent and coarse throughout. But although it appeals constantly to the national prejudices that prevailed in its author's time with great intensity, it was not received with favor. It was written in 1597, immediately after the occurrence of most of the events to which it alludes ; but was not published till 1604, and has been printed since \*only in the collected edition of \* 172 Lope's miscellaneous works, in 1776.<sup>46</sup>

In the same year, however, in which he gave the Dragontea to the world, he published a prose romance, "The Pilgrim in his own Country"; dedicating it to the Marquis of Priego, on the last day of 1603, from the city of Seville. It contains the story of two lovers, who, after many adventures in Spain and Portugal, are carried into captivity among the Moors, and return home by the way of Italy, as pilgrims. We first find them at Barcelona, shipwrecked, and the principal scenes are laid there and in Valencia and Saragossa ;—the whole ending in the city of Toledo, where, with the assent of their friends, they are at last married.<sup>47</sup> Several episodes are ingeniously interwoven with the thread of the principal narrative, and besides many poems chiefly written, no doubt, for other occasions, several religious dramas are inserted, which seem actually to have been performed under the circumstances described.<sup>48</sup>

<sup>46</sup> There is a curious poem in English, by Charles Fitzgeffrey, on the Life and Death of Sir Francis Drake, first printed in 1596, which is worth comparing with the Dragontea, as its opposite, and which was better liked in England in its time than Lope's poem was in Spain. See Wood's *Athenae*, London, 1815, 4to, Vol. II. p. 607. Pacheco, in a notice of Lope, printed in 1609, — five years after the appearance of the Dragontea, — calls it, "El

mas ignorado de sus libros" *Obras Sueltas*, Tom XIV. p. xxxi

<sup>47</sup> The time of the story is 1598 – 99, when Philip III was married

<sup>48</sup> At the end of the whole, it is said, that, during the eight nights following the wedding, eight other dramas were acted, whose names are given, two of which, "El Persegundo," and "El Galan Agradecido," do not appear among Lope's printed plays ;—at least, not under these titles.

The entire romance is divided into five books, and is carefully constructed and finished. Some of Lope's own experiences at Valencia and elsewhere evidently contributed materials for it; but a poetical coloring is thrown over the whole, and except in some of the details about the city, and descriptions of natural scenery, we rarely feel that what we read is absolutely true.<sup>49</sup> The story, especially when regarded from the point of view chosen by its author, is interesting; and it is not only one of the \*earliest specimens in Spanish literature of the class to which it belongs, but one of the best.<sup>50</sup>

\* 173 Passing over some of his minor poems and his "New Art of Writing Plays," for noticing both of which more appropriate occasions will occur hereafter, we come to another of Lope's greater efforts, his "Jerusalem Conquered," which appeared in 1609, and was twice reprinted in the course of the next ten years. He calls it "a tragic epic," and divides it into twenty books of octave rhymes, comprehending, when taken together,

<sup>49</sup> Among the passages that have the strongest air of reality about them are those relating to the dianas, said to have been acted in different places, and those containing descriptions of Monseñate and of the environs of Valencia, in the first and second books. A sort of ghost-story, in the fifth, seems also to have been founded on fact.

<sup>50</sup> The first edition of the "Peregrino en su Patria" is that of Seville, 1604, 4to, and it was soon reprinted, but the best edition is that in the fifth volume of the *Obras Seltas*, 1776. A worthless abridgment of it in English appeared anonymously in London in 1738, 12mo. A German translation, also much abridged and leaving out the poetry and dramas,—in short, omitting the part of Hamlet,—was published at Aachen, (1824, 12mo, pp. 235,) and entitled "Der Pilger, etc., übersetzt von C. Richard," a person who had served, I believe, in the Peninsular war of 1808–14, and who also

translated Lope's *Alcada*, his *Doriotea*, and some of his *Novelas*. A notice of Richard and his translations may be found in the "Kritische Bemerkungen über Kastilische und Portugiesische Literatur, von Alvaro August Liagno," (1829–30, 8vo,) written to encourage the publication by Mayet, a bookseller in Aix la Chapelle, of the principal Spanish authors,—a spirited undertaking, which was continued far enough to carry through the press Garcilasso, Melo's *Gueria de Cataluña*, Guevara's *Diablo Cojuelo*, Mendoza's *Lazarillo*; Polo's *Diana*, Tomé de *Burguillos*, and most of the works of Cervantes. Some of the notices by Liagno, in these tracts, are curious, but in general they are of little worth. His "RéPERTOIRE de l'Historie et de la Littérature Espagnole et Portugaise," (Berlin, [1820,] 8vo,) is yet worse. He seems to have been a disappointed man, and to have carried the unhappy temper of his life into his books.

above twenty-two thousand verses. The attempt was certainly an ambitious one, since we see, on its very face, that it is nothing less than to rival Tasso on the ground where Tasso's success had been so brilliant.

As might have been foreseen, Lope failed. His very subject is unfortunate, for it is not the conquest of Jerusalem by the Christians, but the failure of Cœur de Lion to rescue it from the infidels in the end of the twelfth century,—a theme evidently unfit for a Christian epic. All the poet could do, therefore, was to take the series of events as he found them in history, and, adding such episodes and ornaments as his own genius could furnish, give to the whole as much as possible of epic form, dignity, and completeness. But Lope has not done even this. He has made merely a long narrative poem, of which Richard is the hero; and he relies for success, in no \* small \* 174 degree, on the introduction of a sort of rival hero, in the person of Alfonso the Eighth of Castile, who, with his knights, is made, after the fourth book, to occupy a space in the foreground of the action quite disproportionate and absurd, since it is certain that Alfonso was never in Palestine at all.<sup>51</sup> What is equally inappropriate, the real subject of the poem is ended in the eighteenth book, by the return home of both Richard and Alfonso; the nineteenth being filled with the Spanish king's subsequent history, and the twentieth with the imprisonment of Richard and the quiet death of Saladin, as master of Jerusalem,—

<sup>51</sup> Lope insists, on all occasions, upon the fact of Alfonso's having been in the Crusades. For instance, in "La Boba para los otros," (Comedias, Tom. XXI., Madrid, 1635, f. 60,) he says —

To this crusade  
There went together France and England's  
powers,  
And our own King Alfonso

But the whole is a mere fiction of the age succeeding that of Alfonso, for using which Lope is justly rebuked by Navarrete, in his acute essay on the part the Spaniards took in the Crusades. *Memorias de la Academia de la Hist.*, Tom. V., 1817, 4to, p. 87.

a conclusion so abrupt and unsatisfactory, that it seems as if its author could hardly have originally foreseen it.

But though, with the exception of what relates to the apocryphal Spanish adventurers, the series of historical events in that brilliant crusade is followed down with some regard to the truth of fact, still we are so much confused by the visions and allegorical personages mingled in the narrative, and by the manifold episodes and love-adventures which interrupt it, that it is all but impossible to read any considerable portion consecutively and with attention. Lope's easy and graceful versification is, indeed, to be found here, as it is in nearly all his poetry; but even on the holy ground of chivalry, at Cyprus, Ptolemais, and Tyre, his narrative has much less movement and life than we might claim from its subject, and almost everywhere else it is languid and heavy. Of plan, proportions, or a skilful adaptation of the several parts so as to form an epic whole, there is no thought; and yet Lope intimates that his poem was written with care

\* 175 some time before it was published,<sup>52</sup> \* and he dedicates it to his king, in a tone indicating that he thought it by no means unworthy the royal favor.

<sup>52</sup> See the *Piologo*. The whole poem is in *Obras Seltas*, Tom XIV and XV. He always liked it. Before it was published, he says, in a letter to the Duke of Sessa, dated September 3, 1605, when he thought he might print it very soon. "I wrote it in my best years, and with a different purpose

from that of other works written in my youth, when the passions have more power" Schack, *Nachtage*, 1854, p 33. Note that the Duke's name is sometimes spelled with a double *s* as it is here, and sometimes with a single one,—Sesa.

JUST at the time the *Jerusalem* was published, Lope began to wear the livery of his Church. Indeed, it is on the title-page of this very poem that he, for the first time, announces himself as a “Familiar of the Holy Inquisition.” Proofs of the change in his life are soon apparent in his works. In 1612, he published “The Shepherds of Bethlehem,” a long pastoral in prose and verse, divided into five books. It contains the sacred history, according to the more popular traditions of the author’s Church, from the birth of Mary, the Saviour’s mother, to the arrival of the holy family in Egypt,—all supposed to be related or enacted by shepherds in the neighborhood of Bethlehem, at the time the events occurred.

Like the other prose pastorals written at the same period, it is full of incongruities. Some of the poems, in particular, are as inappropriate and in as bad taste as can well be conceived; and why three or four poetical contests for prizes, and several common Spanish games, are introduced at all, it is not easy to imagine, since they are permitted by the conditions of no possible poetical theory for such fictions. But it must be confessed, on the other hand, that there runs through the whole an air of amenity and gentleness well suited

to its subject and purpose. Several stories from \* 177 the Old Testament are gracefully \* told, and translations from the Psalms and other parts of the Jewish Scriptures are brought in with a happy effect. Some of the original poetry, too, is to be placed among the best of Lope's minor compositions ; — such as the following imaginative little song, which is supposed to have been sung in a palm-grove, by the Madonna, to her sleeping child, and is as full of the tenderest feelings of Catholic devotion as one of Murillo's pictures on the same subject : —

Holy angels and blest,  
 Through these palms as ye sweep  
 Hold their branches at rest,  
 For my babe is asleep.

And ye Bethlehem palm-trees,  
 As stormy winds rush  
 In tempest and fury,  
 Your angry noise hush ; —  
 Move gently, move gently,  
 Restrain your wild sweep ;  
 Hold your branches at rest, —  
 My babe is asleep

My babe all divine,  
 With earth's sorrows oppressed,  
 Seeks in slumber an instant  
 His grievings to rest,  
 He slumbers, — he slumbers, —  
 O, hush, then, and keep  
 Your branches all still, —  
 My babe is asleep !

Cold blasts wheel about him, —  
 A rigorous storm, —  
 And ye see how, in vain,  
 I would shelter his form ; —  
 Holy angels and blest,  
 As above me ye sweep,

\* The whole work is dedicated with great \* 178 tenderness, in a few simple words, to Carlos, the little son that died before he was seven years old, and of whom Lope always speaks so lovingly. But it breaks off abruptly, and was never finished ;— why, it is not easy to tell, for it was well received, and was printed four times in as many years.

In 1612, the year of the publication of this pastoral, Lope printed a few religious ballads and some “Thoughts in Prose,” which he pretended were translated from the Latin of Gabriel Padecopeo, an imperfect anagram of his own name ; and in 1614, there appeared a volume containing, first, a collection of his short sacred poems, to which were afterwards added four solemn and striking poetical Soliloquies, composed while he knelt before a cross on the day he was received into the Society of Penitents ; then two contemplative discourses, written at the request of his brethren of the same society ; and finally, a short spiritual Romancero, or ballad-book, and a “Via Crucis,” or meditations on the passage of the Saviour from the judgment-seat of Pilate to the hill of Calvary.<sup>2</sup>

Many of these poems are full of a deep and solemn devotion ;<sup>3</sup> others are strangely coarse and free ;<sup>4</sup> and a few are merely whimsical and trifling.<sup>5</sup> Some of the more religious of the ballads are still sung about the

streets of Madrid by blind beggars;—a testimony to the devout feelings which, occasionally at least, glowed in their author's heart, that is not to be mistaken. These poems, however, with an account of the martyrdom of a considerable number of Christians at

Japan, in 1614, which was printed four years \* 179 later,<sup>6</sup> were all the miscellaneous works \* published by Lope between 1612 and 1620;—the rest of his time during this period having apparently been filled with his brilliant successes in the drama, both secular and sacred.

But in 1620 and 1622, he had an opportunity to exhibit himself to the mass of the people, as well as to the court, at Madrid, in a character which, being both religious and dramatic, was admirably suited to his powers and pretensions. It was the double occasion of the beatification and the canonization of Saint Isidore, in whose honor, above twenty years earlier, Lope had made one of his most successful efforts for popularity,—a long interval, but one during which the claims of the Saint had been by no means overlooked. On the contrary, the king, from the time of his restoration to health, had been constantly soliciting the honors of the Church for a personage to whose miraculous interposition he believed himself to owe it. At last they were granted, and the 19th of May, 1620, was appointed for celebrating the beatification of the pious “Ploughman of Madrid.”

Such occasions were now often seized in the principal cities of Spain, as a means alike of exhibiting the talents of their poets, and amusing and interesting the multitude;—the Church gladly contributing its authority to substitute, as far as possible, a sort of poeti-

cal tournament, held under its own management, for the chivalrous tournaments which had for centuries exercised so great and so irreligious an influence throughout Europe. At any rate, these literary contests, in which honors and prizes of various kinds were offered, were called "Poetical Joustings," and early became favorite entertainments with the mass of the people. We have already noticed such festivals, as early as the end of the fifteenth century; and besides the prize which, as we have seen, Cervantes gained at Saragossa in May, 1595,<sup>7</sup> Lope gained one at Toledo, in June, 1608;<sup>8</sup> and in September, 1614, he was the judge at a poetical festival in honor of the \* beatification of Saint Theresa, at Madrid, \* 180 where the rich tones of his voice and his graceful style of reading were much admired.<sup>9</sup>

The occasion of the beatification of the Saint who presided over the fortunes of Madrid was, however, one of more solemn importance than either of these had been. All classes of the inhabitants of that "Heroic Town," as it is still called, took an interest in it;

<sup>7</sup> See *ante*, Vol. I. p 305, and Vol. II p 114

<sup>8</sup> The successful poem, a jesting ballad of very small merit, is in the *Obras Sueltas*, Tom XXI pp 171-177

<sup>9</sup> An account of some of the poetical joustings of this period is to be found in Navarrete, "Vida de Cervantes," § 162, with the notes, p 486, and in the Spanish translation of this History, Tom III pp 527-529 I have seen many of them and read a few. They have almost no value. A good illustration of the mode in which they were conducted is to be found in the "Justa Poética," in honor of Our Lady of the Pillar at Saragossa, collected by Juan Bautista Felices de Caceres, (Caragoça, 1629, 4to,) in which Joseph de Valdvielso and Vargas Machuca figured. Such joustings became so frequent at last, and so poor, as to be subjects of

ridicule. In the "Caballero Descortes" of Salas Barbadillo, (Madrid, 1621, 12mo, f 99, etc,) there is a *certámen* in honor of the recovery of a lost hat, —merely a light caricature. In another of his satirical works, (La Estafeta del Dios Momo, 1627,) which is a collection of letters in ridicule of extravagances and extravagant people, Barbadillo speaks, in Epistola XVII, of a shoemaker who set up to have a *certámen*, and offered prizes for it. Sometimes, however, they were very devout. One on the canonization of San Pedro de Alcantara in 1670 is eminently such, consisting mainly of sixteen sermons appended to the poetical honors of the occasion. It was prepared by Antonio de Huerta and makes four hundred and forty-five pages, under the title of *Triunfos Gloriosos*, ec. There could hardly be a more dull book.

for it was believed to concern the well-being of all.<sup>10</sup> The Church of Saint Andrew, in which reposed the body of the worthy Ploughman, was ornamented with unwonted splendor. The merchants of the city completely encased its altars with plain, but pure silver. The goldsmiths enshrined the form of the Saint, which five centuries had not wasted away, in a sarcophagus of the same metal, elaborately wrought. Other classes brought other offerings; all marked by the gorgeous wealth that then flowed through the privileged portions of Spanish society, from the mines of Peru and Mexico. In front of the church a showy stage was erected, from which the poems sent in for prizes were read, and over this part of the ceremonies Lope presided.

\* 181 \* As a sort of prologue, a few satirical petitions were produced, which were intended to excite merriment, and, no doubt, were successful; after which Lope opened the literary proceedings of the festival, by pronouncing a poetical oration of above seven hundred lines in honor of San Isidro. This was followed by reading the subjects for the nine prizes offered by the nine Muses, together with the rules according to which the honors of the occasion were to be adjudged; and then came the poems themselves. Among the competitors were many of the principal men of letters of the time: Zarate, Guillen de Castro,

<sup>10</sup> The details of the festival, with the poems offered on the occasion, were neatly printed at Madrid, in 1620, in a small quarto, ff 140, and fill about three hundred pages in the eleventh volume of Lope's Works. The number of poetical offerings was great, but much short of what similar contests sometimes produced. Figueroa says in his "Passagero," (Madrid, 1617, 12mo, f 118,) that, at a *justa* in Madrid a short time before, to honor St. Antonio of

Padua, five thousand poems of different kinds were offered; which, after the best of them had been hung round the church and the cloisters of the monks who originally proposed the prizes, were distributed to other monasteries. The custom extended to America. In 1585, Balbuena carried away a prize in Mexico from three hundred competitors. See his Life, prefixed to the Academy's edition of his "Siglo de Oro," Madrid, 1821, 8vo.

Jauregui, Espinel, Montalvan, Pantaleon, Silveira, the young Calderon, and Lope himself, with the son who bore his name, still a boy. All this, or nearly all of it, was grave, and befitting the grave occasion. But at the end of the list of those who entered their claims for each prize, there always appeared a sort of masque, who, under the assumed name of Master Burguillos, "seasoned the feast in the most savory manner," it is said, with his amusing verses, caricaturing the whole, like the *gracioso* of the popular theatre, and serving as a kind of interlude after each division of the more regular drama.

Lope took hardly any pains to conceal that this savory part of the festival was entirely his own; so surely had his theatrical instincts indicated to him the merry relief its introduction would give to the stateliness and solemnity of the occasion.<sup>11</sup> All the various performances were read by him with much effect, and at the end he gave a light and pleasant account, in the old popular ballad measure, of whatever had been done; after which the judges pronounced the names of the successful competitors. Who they were, we are not told; but the offerings of all—those of the unsuccessful as well as of the successful—were published by him without delay.

\* A greater jubilee followed two years afterwards, when, at the opening of the reign of Philip the Fourth, the negotiations of his grateful predecessor were crowned with a success he did not live

<sup>11</sup> "But let the reader note well," says Lope, "that the verses of Master Burguillos must be supposititious, for he did not appear at the contest, and all he wrote is in jest, and made the festival very savory. And as he did not appear for any prize, it was generally believed that he was a character

introduced by Lope himself" *Obras*, Tom XI p 401. See also p 598. Rosell (*Bib de Rivadeneyra*, XXXVIII, *Prologo*, xvi, note) says that poems attributed to Tomé de Burguillos, but in the autograph of Lope, are in possession of the Marquis de Pidal.

to witness; and San Isidro, with three other devout Spaniards, was admitted by the Head of the Church at Rome to the full glories of saintship, by a formal canonization. The people of Madrid took little note of the Papal bull, except so far as it concerned their own particular saint and protector. But to him the honors they offered were abundant.<sup>12</sup> The festival they instituted for the occasion lasted nine days. Eight pyramids, above seventy feet high, were arranged in different parts of the city, and nine magnificent altars, a castle, a rich garden, and a temporary theatre. All the houses of the better sort were hung with gorgeous tapestry; religious processions, in which the principal nobility took the meanest places, swept through the streets; and bull-fights, always the most popular of Spanish entertainments, were added, in which above two thousand of those noble animals were sacrificed in amphitheatres or public squares open freely to all.

As a part of the show, a great literary contest or jousting was held on the 19th of May,—exactly two years after that held at the beatification. Again Lope appeared on the stage in front of the same Church of Saint Andrew, and, with similar ceremonies and a similar admixture of the somewhat broad farce of Tomé de Burguillos, most of the leading poets of the time joined in the universal homage. Lope carried away the principal prizes. Others were given to Zarate, Calderon, Montalvan, and Guillen de Castro. Two plays— one on the childhood and the other on the youth of San Isidro, but both expressly ordered from Lope by the city — were acted on open, movable stages, before the king, the court, and the multitude,

<sup>12</sup> The proceedings and poems of this second great festival were printed at once at Madrid, in a quarto volume, 1622, ff 156, and fill Tom. XII. of the Obras Sueltas.

making their author the most prominent figure of a festival which, rightly understood, goes far to explain the spirit of the times and of \* the \* 183 religion on which it all depended. An account of the whole, comprehending the poems offered on the occasion, and his own two plays, was published by Lope before the close of the year.

His success at these two jubilees was, no doubt, very flattering to him. It had been of the most public kind ; it had been on a very popular subject ; and it had, perhaps, brought him more into the minds and thoughts of the great mass of the people, and into the active interests of the time, than even his success in the theatre. The caricatures of Tomé de Burguillos, in particular, though often rude, seem to have been received with extraordinary favor. Later, therefore, he was induced to write more verses in the same style ; and, in 1634, he published a volume, consisting almost wholly of humorous and burlesque poems, under the same disguise. Most of the pieces it contains are sonnets and other short poems ;— some very sharp and satirical, and nearly all fluent and happy. But one of them is of considerable length, and should be separately noticed.

It is a mock-heroic, in irregular verse, divided into six *silvas* or cantos, and is called “La Gatomachia,” or the Battle of the Cats ; being a contest between two cats for the love of a third. Like nearly all the poems of the class to which it belongs, from the “Batrachomyomachia” downwards, it is too long. It contains about twenty-five hundred lines, in various measures. But if it is not the first in the Spanish language in the order of time, it is the first in the order of merit. The last two *silvas*, in particular, are written with great

lightness and spirit ; sometimes parodying Ariosto and the epic poets, and sometimes the old ballads, with the gayest success. From its first appearance, therefore, it has been a favorite in Spain ; and it is now, probably, more read than any other of its author's miscellaneous works. An edition printed in 1794 assumes, rather than attempts to prove, that Tomé de Burguillos was a real personage. But few persons have ever been of this opinion ; for though, when it first appeared, Lope

prefixed to it one of those accounts concerning  
 \* 184 its pretended author that deceive \* nobody,  
 yet he had, as early as the first festival in hon-  
 or of San Isidro, almost directly declared Master Bur-  
 guillos to be merely a disguise for himself and a means  
 of adding interest to the occasion,—a fact, indeed,  
 plainly intimated by Quevedo in the *Approbation* pre-  
 fixed to the volume, and by Coronel in the verses  
 which immediately follow.<sup>13</sup>

In 1621, just in the interval between the two festi-  
 vals, Lope published a volume containing the "Filomena," a poem, in the first canto of which he gives  
 the mythological story of Tereus and the Nightingale,  
 and in the second, a vindication of himself, under the  
 allegory of the Nightingale's Defence against the En-  
 vious Thrush. To this he added, in the same volume,  
 "La Tapada," a description, in octave verse, of a coun-  
 try-seat of the Duke of Braganza in Portugal ; the

<sup>13</sup> The edition which claims a sepa-  
 rate and real existence for Burguillos is  
 that found in the seventeenth volume  
 of the "Poesias Castellanas," collected  
 by Fernandez and others. But, be-  
 sides the passages from Lope himself  
 cited in a preceding note, Quevedo  
 says, in an *Apobacion* to the very vol-  
 ume in question, that "the style is  
 such as has been seen only in the writ-  
 ings of Lope de Vega", and Coronel,  
 in some *decimas* prefixed to it, adds,

"These verses are dashes from the pen  
 of the Spanish Phoenix", hints which  
 it would have been dishonorable for  
 Lope himself to publish, unless the  
 poems were really his own. The po-  
 etry of Burguillos is in Tom XIX of  
 the *Obras Seltas*, just as Lope origi-  
 nally published it in 1634. There is a  
 spirited German translation of the *Ga-  
 tomachia* in Bertuch's *Magazin der  
 Span. und Port. Literatur*, Dessau,  
 1781, 8vo, Tom. I.

“Andromeda,” a mythological story like the *Filomena*; “The Fortunes of Diana,” the first prose tale he ever printed; several poetical epistles and smaller poems; and a correspondence on the subject of the New Poetry, as it was called, in which he boldly attacked the school of Góngora, then at the height of its favor.<sup>14</sup> The whole volume added nothing to its author’s permanent reputation; but parts of it, and especially passages in the epistles and in the *Filomena*, are interesting from the circumstance that they contain allusions to his own personal history.

\* Another volume, not unlike the last, followed in 1624. It contains three poems in the octave stanza: “Circe,” an unfortunate amplification of the well-known story found in the *Odyssey*; “The Morning of Saint John,” on the popular celebration of that graceful festival in the time of Lope; and a fable on the Origin of the White Rose. To these he added several epistles in prose and verse, and three more prose tales, which, with the one already mentioned, constitute all the short prose fictions he ever published in a separate form.<sup>15</sup>

The best part of this volume is, no doubt, the three stories. Probably Lope was induced to write them by the success of those of Cervantes, which had now been published eleven years, and were already known throughout Europe. But Lope’s talent seems not to

<sup>14</sup> The poems are in Tom. II. of the *Obras Suetas*. The discussion about the new poetry is in Tom IV pp 459–482, to which should be added some trifles in the same vein, scattered through his Works, and especially a sonnet beginning, “Boscan, tarde llegamos”; — which, as it was printed by him with the “Laurel de Apolo,” (1630, f 123,) shows, that, though he himself sometimes wrote in the affected

style then in fashion, to please the popular taste, he continued to disapprove it to the last. The *Novela* is in *Obra*, Tom VIII. There is, also, a sonnet in the *Dorotea* in ridicule of *Cultismo*, beginning, “Pululando de culto, Claudio amigo,” which should be noticed.

<sup>15</sup> The three poems are in Tom III, the epistles in Tom I pp 279, etc, and the three tales in Tom VIII.

have been more adapted to this form of composition than that of the author of *Don Quixote* was to the drama. Of this he seems to have been partially aware himself; for he says of the first tale, that it was written to please a lady in a department of letters where he never thought to have adventured, and the other three are addressed to the same person, and appear to have been written with the same feelings.<sup>16</sup> None of them excited much attention at the time when they appeared. But, twenty years afterwards, they were reprinted with four others, torn, apparently, from some connected series of similar stories, and certainly not the work of Lope. The last of the eight is the best of the collection, though it ends awkwardly, with an intimation that another is to follow; and all are thrust together into the complete edition of Lope's miscellaneous works, though there is no pretence for claiming any of them to be his, except the first four.<sup>17</sup>

\* 186 \* In the year preceding the appearance of the tales we find him in a new character. A miserable man, a Franciscan monk, from Catalonia, was suspected of heresy; and the suspicion fell on him the more heavily because his mother was of the Jewish faith. Having been, in consequence of this, expelled successively from two religious houses of which he had been a member, he seems to have become disturbed in his mind, and at last grew so frantic, that, while mass was celebrating in open church, he seized the

<sup>16</sup> *Obras Seltas*, Tom. VIII p 2; also Tom III Preface. It is to the credit of Cerdá y Rico, that, when he published these tales of Lope de Vega, he said that the best in the language are those of Cervantes, and that Lope succeeds in proportion as he approaches them. Tom. VIII Prólogo, p vi

<sup>17</sup> There are editions of the eight at

Saragossa, (1648,) Barcelona, (1650,) etc. There is some confusion about a part of the poems published originally with these tales, and which appear among the works of Fr Lopez de Zarate, Alcalá, 1651, 4to (See Lope, *Obras*, Tom. III p iii.) But such things are not very rare in Spanish literature, and will occur again in relation to Zarate

consecrated host from the hands of the officiating priest and violently destroyed it. He was at once arrested and given up to the Inquisition. The Inquisition, finding him obstinate, declared him to be a Lutheran and a Calvinist, and, adding to this the crime of his Hebrew descent, delivered him over to the secular arm for punishment. He was, almost as a matter of course, ordered to be burned alive ; and in January, 1623, the sentence was literally executed outside the gate of Alcalá at Madrid. The excitement was great, as it always was on such occasions. An immense concourse of people was gathered to witness the edifying spectacle ; the court was present ; the theatres and public shows were suspended for a fortnight ; and we are told that Lope de Vega, who, in some parts of his “Dragon-tea,” shows a spirit not unworthy of such an office, was one of those who presided at the loathsome sacrifice and directed its ceremonies.<sup>18</sup>

His fanaticism, however, in no degree diminished his zeal for poetry. In 1625, he published his “Divine Triumphs,” a poem in five cantos, in the measure and the manner of Petrarch, beginning with the triumphs of “the Divine Pan,” and ending with those of Religion and the Cross.<sup>19</sup> It was a failure, and the more obviously so, because its very title placed it in direct contrast with the “Trionfi” of the great Italian master. It was accompanied, in the same volume, by a small collection \* of sacred poetry, which was increased \* 187 in later editions until it became a large one. Some of it is truly tender and solemn, as, for instance,

<sup>18</sup> The account is found in a MS history of Madrid, by Leon Pinelo, in the King's Library, and so much as relates to this subject I possess, as well as a notice of Lope himself, given in the same MS. under the date of his

death. It is cited, and an abstract of it given, in Casiano Felicer, “Origen de las Comedias,” (Madrid, 1804, 12mo,) Tom I. pp 104, 105.

the *cancion* on the death of his son,<sup>20</sup> and the sonnet on his own death, beginning, “I must lie down and slumber in the dust”; while other parts, like the *villancicos* to the Holy Sacrament, are written with unseemly levity, and are even sometimes coarse and sensual.<sup>21</sup> All, however, are specimens of what respectable and cultivated Spaniards in that age called religion.

A similar remark may be made in relation to the “Corona Trágica,” The Tragic Crown, which he published in 1627, on the history and fate of the unhappy Mary of Scotland, who had perished just forty years before.<sup>22</sup> It is intended to be a religious epic, and fills five books of octave stanzas. But it is, in fact, merely a specimen of intolerant controversy. Mary is represented as a pure and glorious martyr to the Catholic faith, while Elizabeth is alternately called a Jezebel and an Athaliah, whom it was a doubtful merit in Philip the Second to have spared, when, as king-consort of England, he had her life in his power<sup>23</sup> In other respects it is a dull poem; beginning with an account of Mary’s previous history, as related by herself to her women in prison, and ending with her death. But it savors throughout of its author’s sympathy with the religious spirit of his age and country;—a spirit, it should be remembered, which made the Inquisition what it was.

The Corona Trágica was, however, perhaps on this very account, thought worthy of being dedicated to Pope Urban the Eighth, who had himself written an

<sup>23</sup> The atrocious passage is on p 5. In an epistle, which he addressed to

Ovando, the Maltese envoy, and published at the end of the “Laurel de Apolo,” (Madrid, 1630, 4to, f 118,) he gives an account of this poem, and says he wrote it in the country, where “the soul in solitude labors more gently and easily”!

epitaph on the unfortunate Mary of Scotland, which Lope, in courtly phrase, declared was “beatifying her in prophecy.” The flattery was well received. Urban sent the poet in return a complimentary letter; gave him a degree of Doctor in \* Divinity, and \* 188 the Cross of the Order of Saint John; and appointed him to the honorary places of Fiscal in the Apostolic Chamber, and Notary of the Roman Archives. The measure of his ecclesiastical honors was now full.

In 1630, he published “The Laurel of Apollo,” a poem somewhat like “The Journey to Parnassus” of Cervantes, but longer, more elaborate, and still more unsatisfactory. It describes a festival, supposed to have been held by the God of Poetry, on Mount Helicon, in April, 1628, and records the honors then bestowed on above three hundred Spanish poets; — a number so great, that the whole account becomes monotonous and almost valueless, partly from the impossibility of drawing with distinctness or truth so many characters of little prominence, and partly from its too free praise of nearly all of them. It is divided into ten *silvas*, and contains about seven thousand irregular verses.<sup>24</sup> At the end, besides a few minor and miscellaneous poems, Lope added an eclogue, in seven scenes, which had been previously represented before the king and court with a costly magnificence in the theatre and a splendor in its decorations that show, at least, how great was the favor he enjoyed, when he was indulged, for so slight an offering, with such royal luxuries.<sup>25</sup>

<sup>24</sup> In Volume XXXVIII (1856) of the *Biblioteca de Autores Españoiles*, is a list of all the authors mentioned by Lope in his “Laurel de Apolo,” with bibliographical notices of their works that are frequently of value. The vol-

ume itself, which consists of a selection from the *Obras Sueltas* of Lope, published by Cerdá y Rico in twenty-one volumes, is well compiled by Don Cayetano Rosell

<sup>25</sup> It is not easy to tell why these

The last considerable work he published was his "Dorotea," a long prose romance in dialogue.<sup>26</sup> It was written in his youth, and, as has been already suggested, probably contains more or less of his own youthful adventures and feelings. But whether this be so or not, it was a favorite with him. He calls it "the most beloved of his works," and says he has

revised it with care and made many additions  
 \* 189 to it in his old age.<sup>27</sup> \* It was first printed in 1632.

A moderate amount of verse is scattered through it, and there is a freshness and a reality in many passages that remind us constantly of its author's life before he served as a soldier in the Armada. The hero, Fernando, is a poet, like Lope, who, after having been more than once in love and married, refuses Dorotea, the object of his first attachment, and becomes religious. There is, however, little plan, consistency, or final purpose in most of the manifold scenes that go to make up its five long acts; and it is now read only for its rich and easy prose style, for the glimpses it seems to give of the author's own life, and for a few of its short poems, some of which were probably written for occasions not unlike those to which they are here applied.

The last work he printed was an eclogue in honor of a Portuguese lady; and the last things he wrote—only the day before he was seized with his mortal illness—were a short poem on the Golden Age, remark-

later productions of Lope are put in the first volume of his *Miscellaneous Works*, (1776–1779,) but so it is. That collection was made by Cerdá y Rico; a man of learning, though not of good taste or sound judgment.

<sup>26</sup> It fills the whole of the seventh volume of his *Obras Seltas*. At the end is a collection of the proverbs used

in the work; not above a hundred and fifty, but very good, and chiefly taken from the part of *Gerarda*, who is an imitation of *Celestina*.

able for its vigor and harmony, and a sonnet on the death of a friend.<sup>28</sup> All of them are found in a collection, consisting chiefly of a few dramas, published by his son-in-law, Luis de Usategui, two years after Lope's death.

But, as his life drew to a close, his religious feelings, mingled with a melancholy fanaticism, predominated more and more. Much of his poetry composed at this time expressed them; and at last they rose to such a height, that he was almost constantly in a state of excited melancholy, or, as it was then beginning to be called, of hypochondria.<sup>29</sup> Early in the month of August, he felt himself extremely weak, and suffered more than ever from that sense of discouragement which was breaking \* down his resources \* 190 and strength. His thoughts, however, were so exclusively occupied with his spiritual condition, that, even when thus reduced, he continued to fast, and on one occasion went through with a private discipline so cruel, that the walls of the apartment where it occurred were afterwards found sprinkled with his blood. From this he never recovered. He was taken ill the same night; and after fulfilling the offices prescribed by his Church with the most submissive devotion, —

<sup>28</sup> These three poems — curious as his last works — are in Tom. X p. 193, and Tom. IX pp. 2 and 10. Of the very rare first edition of this, the last publication of Lope made by himself, I have a copy. It is entitled "Filia Egloga a la Decima Musa, Doña Bernarda Ferreira de la Cerda, Señora Portuguesa, Frei Lope Felix de Vega Carpio, del abito de San Juan, Año 1635." It is poorly printed in duodecimo and makes eleven leaves, besides the title. The lady to whom it is addressed is the well-known poetess noticed *post*, Chap. XXVIII.

dria," etc., is the description Montalvan gives of his disease. The account of his last days follows it. *Obras*, Tom. XX pp. 37, etc., and *Baena, Hijos de Madrid*, Tom. III pp. 360—363. The same account of hypochondria is given in the last *Jornada* of Calderon's "Medico de su Honra." Jacinta there asks, "Que es hipocondria?" to which Coquin replies. —

Es una enfermedad que no la habla,  
Habrá dos años, ni en el mundo era

Hartzenbusch places this play in 1635, the year of Lope's death, and does it on apparently good grounds. The two accounts about hypochondria, therefore, correspond exactly.

mourning that he had ever been engaged in any occupations but such as were exclusively religious,— he died on the 27th of August, 1635, nearly seventy-three years old.

The sensation produced by his death was such as is rarely witnessed, even in the case of those upon whom depends the welfare of nations. The Duke of Sessa, who was his especial patron, and to whom he left his manuscripts, provided for the funeral in a manner becoming his own wealth and rank.<sup>30</sup> It lasted nine days. The crowds that thronged to it were immense.<sup>31</sup> Three bishops officiated, and the first nobles of the land attended as mourners. Eulogies and poems followed on all sides, and in numbers all but incredible. Those written in Spain make one considerable volume, and end with a drama in which his apotheosis was brought upon the public stage. Those written in Italy are hardly less numerous, and fill another.<sup>32</sup> But more touching than any of them was the prayer of that much-loved daughter who had been shut up from the world fourteen years, that the long funeral procession might pass by her convent, and permit her once

\* 191 \* more to look on the face she so tenderly venerated; and more solemn than any was the mourning of the multitude, from whose dense mass

The Marquis of Pidal, a munificent patron of Spanish literature, and one of the most accomplished scholars in the early literature of his country, is said to possess a considerable number of Lope's letters to the Duke of Sessa, whom he addresses under the name of Lucindo. Lope's will, I think, has never been published, though I have seen an abstract of it. Having, however, obtained, through the kindness of the last Lord Holland, a copy of it, which Navarrete sent to his father, the author of Lope's Life, saying that he had found it in "El Archivo de Escrituras de Madrid," when he was searching for the will of Cervantes, I give it here entire, as a curious and important document.

LOPE DE VEGA, CONTINUED — CHARACTER OF HIS MISCELLANEOUS WORKS. — HIS DRAMAS — HIS LIFE AT VALENCIA — HIS MORAL PLAYS — HIS SUCCESS AT MADRID — VAST NUMBER OF HIS DRAMAS — THEIR FOUNDATION AND THEIR VARIOUS FORMS — HIS COMEDIAS DE CAPA Y ESPADA, AND THEIR CHARACTERISTICS

THE works of Lope de Vega that we have considered, while tracing his long and brilliant career, are far from being sufficient to explain the degree of popular admiration that, almost from the first, followed him. They show, indeed, much original talent, a still greater power of invention, and a wonderful facility of versification. But they are rarely imbued with the deep and earnest spirit of a genuine poetry; they generally have an air of looseness and want of finish; and most of them are without that national physiognomy and character, in which, after all, resides so much of the effective power of genius over any people.

The truth is, that Lope, in what have been called his miscellaneous works, was seldom in the path that leads to final success. He was turned aside by a spirit which, if not that of the whole people, was the spirit of the court and the higher classes of Castilian society. Boscan and Garcilasso, who preceded him by only half a century, had made themselves famous by giving currency to the lighter forms of Italian verse, especially those of the sonnet and the *canzone*; and Lope, who found these fortunate poets the idols of the period, when his own character was forming, thought that to

follow their brilliant course would open to him the best chances for success. His aspirations, however, stretched very far beyond theirs. He felt other and higher powers within him, and entered boldly into rivalry, not only with Sannazaro and Bembo, as

\* 194 they had done, but with \* Ariosto, Tasso, and

Petrarch. Eleven of his longer poems, epic, narrative, and descriptive, are in the stately *ottava rima* of his great masters; besides which he has left us two long pastorals in the manner of the "Arcadia," many adventurous attempts in the *terza rima*, and numberless specimens of all the varieties of Italian lyrics, including, among the rest, nearly seven hundred sonnets.

But in all this there is little that is truly national,—little that is marked with the old Castilian spirit; and if this were all he had done, his fame would by no means stand where we now find it. His prose pastorals and his romances are, indeed, better than his epics; and his didactic poetry, his epistles, and his elegies are occasionally excellent; but it is only when he touches fairly and fully upon the soil of his country,—it is only in his *glosas*, his *letrillas*, his ballads, and his light songs and roundelay,—that he has the richness and grace which should always have accompanied him. We feel at once, therefore, whenever we meet him in these paths, that he is on ground he should never have deserted, because it is ground on which, with his extraordinary gifts, he could easily have erected permanent monuments to his own fame. But he himself determined otherwise. Not that he entirely approved the innovations of Boscan and Garcilasso; for he tells us distinctly, in his "Philomena," that their imitations of the Italian had unhappily supplanted the grace and the glory that belonged pecu-

liarly to the old Spanish genius.<sup>1</sup> The theories and fashions of his time, therefore, misled, though they did not delude, a spirit that should have been above them; and the result is, that little of poetry such as marks the old Castilian genius is to be found in the great mass of his works we have thus far been called on to examine. In order to account for his permanent success, as well as marvellous popularity, we must, then, turn to another and wholly distinct department, — that of the drama, — in which he gave himself up to the leading of the national spirit as completely as if \*he had not elsewhere seemed \*195 sedulously to avoid it; and thus obtained a kind and degree of fame he could never otherwise have reached.

It is not possible to determine the year when Lope first began to write for the public stage; but whenever it was, he found the theatre in a rude and humble condition. That he was very early drawn to this form of composition, though not, perhaps, for the purposes of representation, we know on his own authority; for, in his pleasant didactic poem on the New Art of Making Plays, which he published in 1609, but read several years earlier to a society of *dilettanti* in Madrid, he says expressly: —

The Captain Virues, a famous wit,  
Cast dramas in three acts, by happy hit ;  
For, till his time, upon all fours they crept,  
Like helpless babes that never yet had stepped.  
Such plays I wrote, eleven and twelve years old ,  
Four acts — each measured to a sheet's just fold —  
Filled out four sheets ; while still, between,  
Three *entremeses* short filled up the scene <sup>2</sup>

This was as early as 1574. A few years later, or about 1580, when the poet was eighteen years old, he attracted the notice of his early patron, Manrique, the Bishop of Avila, by a pastoral. His studies at Alcalá followed; then his service under the young Duke of Alva, his marriage, and his exile of several years; for all which we must find room before 1588, when we know he served in the Armada. In 1590, however, if not a year earlier, he had returned to Madrid; and it does not seem unreasonable to assume that soon afterwards he began to be known in the capital as a dramatic writer, being then twenty-eight years old.

But it was during the period of his exile that he seems to have really begun his public dramatic career, and prepared himself, in some measure, \* 196 for his subsequent more \* general popularity.

A part of this interval was passed in Valencia; and in Valencia a theatre had been known for a long time.<sup>3</sup> As early as 1526, the hospital there received an income from it, by a compromise similar to that in virtue of which the hospitals of Madrid long afterwards laid the theatre under contribution for their support.<sup>4</sup> The Captain Virues, who was a friend of Lope de Vega, and is commemorated by him more than

<sup>3</sup> Dramatic entertainments of some kind are spoken of at Valencia in the fourteenth century. In 1394, we are told, there was represented at the palace a tragedy, entitled "L' hom enamorat e la fembra satisfeta," by Mossen Domingo Maspons, a counsellor of John I. This was undoubtedly a Troubadour performance. Perhaps the *Entramesos*

mentioned as having been acted in the same city in 1412, 1413, and 1415 were of the same sort. At any rate, they seem to have belonged, like those we have noticed (*ante*, Vol I p 231) by the Constable Alvaio de Luna, to courtly festivities Aribau, Biblioteca de Autores Españoles, Madrid, 1846, 8vo, Tom II p 178, note, and an excellent article on the early Spanish theatre, by F Wolf, in Blatter fur literarische Unterhaltung, 1848, p 1287, note.

once, wrote for this theatre, as did Timoneda, the editor of Lope de Rueda; the works of both the last being printed in Valencia about 1570. These Valencian dramas, however, except in the case of Lope de Rueda, were of moderate amount and value; nor was what was done at Seville by Cueva and his followers, about 1580, or at Madrid by Cervantes, a little later, of more real importance, regarded as the foundations for a national theatre.

Indeed, if we look over all that can be claimed for the Spanish drama from the time of the eclogues of Juan de la Enzina, in 1492, to the appearance of Lope de Rueda, about 1544, and then, again, from his time to that of Lope de Vega, we shall find, not only that the number of dramas was small, but that they had been written in forms so different and so often opposed to each other as to have little consistency or authority, and to offer no sufficient indication of the channel in which that portion of the literature of the country was at last destined to flow. We may even say, that, except Lope de Rueda, no author for the theatre had yet enjoyed any considerable popularity; and he having now been dead more than twenty years, Lope de Vega must be admitted to have had a fair and free field open before him.

Unfortunately, we have few of his earlier efforts. He \* seems, however, to have begun \* 197 upon the old foundations of the eclogues and moralities, whose religious air and tone commended them to that ecclesiastical toleration without which little could thrive in Spain.<sup>5</sup> An eclogue, which is announced as having been represented, and which

<sup>5</sup> In one his earlier efforts he says, " help them little " But of this we shall (Obras, Tom. V p. 346,) "The laws see more hereafter.

seems really to be arranged for exhibition, is found in the third book of the "Arcadia," the earliest of Lope's published works, and one that was written before his exile.<sup>6</sup> Several similar attempts occur elsewhere,—so rude and pious, that it seems almost as if they might have belonged to the age of Juan de la Enzina and Gil Vicente; and others of the same character are scattered through other parts of his multitudinous works.<sup>7</sup>

Of his more regular plays, the two oldest, that were subsequently included in his printed collection, are not without similar indications of their origin. Both are pastorals. The first is called "The True Lover," and was written when Lope was fourteen years old, though it may have been altered and improved before he published it, when he was fifty-eight. It is the story of a shepherd who refuses to marry a shepherdess, though she had put him in peril of his life by accusing him of having murdered her husband, who, as she was quite aware, had died a natural death, but whose supposed murderer could be rescued from his doom only at her requisition, as next of kin to the pretended culprit;—a process by which she hoped to obtain all power over his spirit, and compel him to marry her, as Ximena married the Cid, by royal authority. Lope admits it to be a rude performance; but it is marked by the sweetness of versification which seems to have belonged to him at every period of his career.<sup>8</sup>

<sup>6</sup> It is probable, from internal evidence, that this eclogue, and some others in the same romance, were acted before the Duke Antonio de Alva. At any rate, we know similar representations were common in the age of Cervantes and Lope, as well as before and after it.

<sup>7</sup> Such dramas are found in the "Pas-

tores de Belen," Book III, and elsewhere

<sup>8</sup> "El Verdadero Amante" is in the Fourteenth Part of the *Comedias*, printed at Madrid, 1620, and is dedicated to his son Lope, who died the next year, only fifteen years old;—the father saying in the Dedication, "This play was written when I was of about your age."

\* The other of his early performances above \* 198 alluded to is the “*Pastoral de Jacinto*,” which Montalvan tell us was the first play Lope wrote in three acts, and that it was composed while he was attached to the person of the Bishop of Avila. This must have been about the year 1580; but as the *Jacinto* was not printed till thirty-three years afterwards, it may perhaps have undergone large changes before it was offered to the public, whose requisitions had advanced in the interval no less than the condition of the theatre. He says in the Dedication, that it was “written in the years of his youth,” and it is founded on the somewhat artificial story of a shepherd fairly made jealous of himself by the management of another shepherd, who hopes thus to obtain the shepherdess they both love, and who passes himself off, for some time, as another *Jacinto*, and as the only one to whom the lady is really attached. It has the same flowing versification with “*The True Lover*,” but it is not superior in merit to that drama, which can hardly have preceded it by more than two or three years.<sup>9</sup>

Moralities, too, written with no little spirit, and with strong internal evidence of having been publicly performed, occur here and there,—sometimes where we should least look for them. Four such are produced in his “*Pilgrim in his own Country*”; the romance, it may be remembered, which is not without allusions to its author’s exile, and which seems to contain some of his personal experiences at Valencia. One of these

<sup>9</sup> Montalvan says. “Lope greatly pleased Manrique, the Bishop of Avila, by certain eclogues which he wrote for him, and by the drama of ‘*The Pastoral of Jacinto*,’ the earliest he wrote in three acts” (*Obras*, Tom. XX. p 30.) It was first printed at Madrid, in 1613, 4to, by Sanchez, in a volume entitled

“*Quatro Comedias Famosas De Don Luis de Góngora y Lope de Vega Carpio*,” etc. ; and afterwards in the eighteenth volume of the *Comedias* of Lope, Madrid, 1623. It was also printed separately, under the double title of “*La Selva de Albania, y el Celoso de sí mismo*.”

allegorical plays is declared to have been performed in front of the venerable cathedral at Saragossa, and is among the more curious specimens of such entertainments, since it is accompanied with explanations of the way in which the churches were used for theatrical purposes, and ends with an account of the ex-  
 \* 199 position of \* the Host as an appropriate conclusion for a drama so devout.<sup>10</sup>

Another, called "The Soul's Voyage," is set forth as if represented in a public square of Barcelona.<sup>11</sup> It opens with a ballad, which is sung by three persons, and is followed, first, by a prologue full of cumbrous learning, and then by another ballad, both sung and danced, as we are told, "with much skill and grace." After all this note of preparation comes the "Moral Action" itself. The Soul enters dressed in white,—the way in which a disembodied spirit was indicated to the audience. A clown, who, as the droll of the piece, represents the Human Will, and a gallant youth, who represents Memory, enter at the same time; one of them urging the Soul to set out on the voyage of salvation, and the other endeavoring to jest her out of such a pious purpose. At this critical moment, Satan appears as a ship-captain, in a black suit fringed with flames, and accompanied by Selfishness, Appetite, and other vices, as his sailors, and offers to speed the Soul on her voyage, all singing merrily together: —

Holloa ! the good ship of Delight  
 Spreads her sails for the sea to-day ;  
 Who embarks ? who embarks, then, I say ?  
 To-day, the good ship of Content,  
 With a wind at her choice for her course,  
 To a land where no troubles are sent,

<sup>10</sup> It fills nearly fifty pages in the third book of the romance. "A Moral Representation of the Soul's Voyage"; — in other words, *A Morality*.

<sup>11</sup> In the first book It is entitled

Where none knows the stings of remorse,  
With a wind fair and free takes her flight ; —  
Who embarks ? who embarks, then, I say ? <sup>12</sup>

A new world is announced as their destination, and the Will asks whether it is the one lately discovered by Columbus ; to which and to other similar questions Satan replies evasively, but declares that he is a greater pilot of the seas than Magellan or Drake, and will insure to all \* who sail with \* 200 him a happy and prosperous voyage. Memory opposes the project, but, after some resistance, is put to sleep ; and Understanding, who follows as a grey-beard full of wise counsel, comes too late. The adventurers are already gone. But still he shouts after them, and continues his warnings, till the ship of Penitence arrives, with the Saviour for its pilot, a cross for its mast, and sundry Saints for its sailors. They summon the Soul anew. The Soul is surprised and shocked at her situation ; and the piece ends with her embarkation on board the sacred vessel, amidst a *feu de joie*, and the shouts of the delighted spectators, who, we may suppose, had been much edified by the show.

Another of these strange dramas is founded on the story of the Prodigal Son, and is said to have been represented at Perpignan, then a Spanish fortress, by a party of soldiers ; one of the actors being mentioned by name in its long and absurdly learned Prologue.<sup>13</sup> Among the interlocutors are Envy, Youth, Repentance, and Good Advice ; and among other extraordinary pas-

<sup>13</sup> Book Fourth The compliment to the actor shows, of course, that the

sages it contains a flowing paraphrase of Horace's "Beatus ille," pronounced by the respectable proprietor of the swine intrusted to the unhappy Prodigal.

The fourth Morality found in the romance of the Pilgrim is entitled "The Marriage of the Soul and Divine Love"; and is set forth as having been acted in a public square at Valencia, on occasion of the marriage of Philip the Third with Margaret of Austria, which took place in that city,—an occasion, we are told, when Lope himself appeared in the character of

\* 201 a buffoon,<sup>14</sup> and one to which this drama, though it seems to \* have been written earlier, was carefully adjusted.<sup>15</sup> The World, Sin, the City of

Jerusalem, and Faith, who is dressed in the costume of a captain-general of Spain, all play parts in it. Envy enters, in the first scene, as from the infernal regions, through a mouth casting forth flames; and the last scene represents Love, stretched on the cross, and wedded to a fair damsel who figures as the Soul of Man. Some parts of this drama are very offensive; especially the passage in which Margaret of Austria, with celestial attributes, is represented as arriving in the galley of Faith, and the passage in which Philip's entrance into Valencia is described literally as it occurred, but substituting the Saviour for the king, and the prophets, the martyrs, and the hierarchy of heaven

piece was acted. Indeed, this is the proper inference from the whole Prologue *Obras*, Tom V p 347.

<sup>14</sup> Miñana, in his continuation of *Mariana*, (Lib X c 15, Madrid, 1804, folio, p 589,) says, when speaking of the marriage of Philip III at Valencia, "In the midst of such rejoicings, tasteful and frequent festivities and masquerades were not wanting, in which Lope de Vega played the part of the buffoon." In what particular piece Lope played the part of the buffoon, Miñana does not tell us. I suspect, however, that

it was in the Moral Play of the Prodigal Son, found in the Fourth Book of Lope's "Peregrino en su Patina," which, though there spoken of as acted at Perpignan, seems also, from a passage at f 211, ed 1604, to have been represented at the Marriage of Philip III. and Margaret of Austria, at Valencia, in 1599, and in which the "Gracioso" appears under the name of "Belardo," well known at the time as the poetical name of Lope. See *ante*, Chap. XIII. note 18.

for the Spanish nobles and clergy who really appeared on the occasion.<sup>16</sup>

Such were, probably, the unsteady attempts with which Lope began his career on the public stage during his exile at Valencia and for some years afterwards. They are certainly wild enough in their structure, and sometimes gross in sentiment, though hardly worse in either respect than the similar allegorical mysteries and farces which, till just about the same period, were performed in France and England, and much superior in their general tone and style. How long he continued to write them, or how many he wrote, we do not know. None of them appear in the collection of his dramas, which does not begin till 1604,<sup>17</sup> \* though \* 202 an allegorical spirit is occasionally visible in some of his plays, which are, in other respects, quite in the

<sup>16</sup> Lope boasts that he has made this sort of commutation and accommodation, as if it were a merit "This was literally the way," he says, "in which his Majesty, King Philip, entered Valencia" *Obras*, Tom V p 187

<sup>17</sup> A very curious and excessively rare volume, however, appeared at Madrid the year before, of which I found a copy in the Biblioteca Ambrogiana in Milan, and which contains plays of Lope. It is entitled, "Seis Comedias de Lope de Vega Caupio y de otros autores cuyos nombres dellas (sic) son estos —

1 De la Destruicion de Constantiopla

2 De la Fundacion de la Alhambra de Granada

3 De los Amigos enojados.

4 De la Libertad de Castilla.

5 De las Hazañas del Cid.

6 Del Perseguido

Con licencia de la Sta Inquisicion y Ordinario En Madrid, impreso por Pedro de Madrigal. Año 1603." Small 4to, ff 272

All six of the above plays are marked in Huerta's Catalogo as Lope's, but neither of them, I think, is in the list of the "Peregrino," 1604, where in fact, I suppose, Lope means — (by a

reference to this publication, one edition of which appeared in 1603 at Lisbon, and I believe another at Seville) — to discredit them. And, no doubt, the first — "La Destruicion de Constantiopla" — is not his, but Gabriel Lasso de la Vega's. On the other hand, however, No 3, "Amistad pagada," is in Vol I of Lope's Comedias, 1604, and No 6, "Carlos el Perseguido," is in the same volume, while No 4, "La Libertad de Castilla," appears in Vol. XIX, 1626, as "El Conde Fernan Gonzalez." These three, therefore, are Lope's. I did not have time to read them, but I ran them over hastily. The first in the volume, which is Gabriel Lasso de la Vega's, and which is short, seemed to be in the rude style of the stage when Lope took it in hand, and has allegorical personages, Death, Discord, etc. The sixth and the third, on the contrary, are much in Lope's final manner, at least much more so than the others. It should be noted that the third is inserted in the volume by mistake as the fifth, and so *vice versa*, and that the fourth is said to be written in "lengua antigua." The fifth is on the death of the Cid and the taking of Valencia, and has above fifty "figuras."

temper of the secular theatre. But that he wrote such religious dramas early, and that he wrote great numbers of them, in the course of his life, is unquestionable.

In Madrid, if he found little to hinder, he also found little to help him, except two rude theatres, or rather court-yards, licensed for the representation of plays, and a dramatic taste formed or forming in the character of the people.<sup>18</sup> But this was enough for a spirit like his. His success was immediate and complete; his popularity overwhelming. Cervantes, as we have seen, declared him to be a “prodigy of nature”; and, though himself seeking both the fame and the profit of a writer for the public stage, generously recognized his great rival as its sole monarch.<sup>19</sup>

Many years, however, elapsed before he published even a single volume of the plays with which he was thus delighting the audiences of Madrid, and settling the final forms of the national drama. This was, no doubt, in part owing to the habit, which seems to have prevailed in Spain from the first appearance of

\* 203 the theatre, of regarding \* its literature as ill-suited for publication; and in part to the circumstance, that, when plays were produced on the stage, the author usually lost his right in them, if not

<sup>18</sup> The description of an imaginary performance of a popular drama in a small town of Castile just at this period — 1595 — can be found in “*Ni Rey ni Roque*,” (a *Novela* by Don Patricio de la Escosura, 1835, Tom I cap 4,) and is worth reading, to see how rudely things were then managed, or supposed to be managed.

<sup>19</sup> See *ante*, p. 125, and *Comedias*, Madrid, 1615, 4to, *Prólogo*. The phrase *monstruo de naturaleza*, in this passage, has been sometimes supposed to imply a censure of Lope on the part of Cervantes. But this is a mistake. It is

a phrase frequently used; and though sometimes understood *in malam partem*, as it is in *Don Quixote*, Parte I. c. 46, — “*Vete de mi presencia, monstruo de naturaleza*,” — it is generally understood to be complimentary, as, for instance, in the “*Hermosa Ester*” of Lope, (*Comedias*, Tom XV, Madrid, 1621,) near the end of the first act, where *Ahasuerus*, in admiration of the fair *Esther*, says: —

Tanta belleza  
Monstruo será de la naturaleza

Cervantes, I have no doubt, used it in wonder at Lope's prodigious fertility.

entirely, yet so far that he could not publish them without the assent of the actors. But whatever may have been the cause, it is certain that a multitude of Lope's plays had been acted before he published any of them ; and that, to this day, not a fourth part of those he wrote has been preserved by the press.<sup>20</sup>

Their very number, however, may have been one obstacle to their publication ; for the most moderate and certain accounts on this point have almost a fabulous air about them, so extravagant do they seem. In 1603, he gives us the titles of two hundred and nineteen pieces that he had already written ;<sup>21</sup> in 1609, he

<sup>20</sup> Lope must have been a writer for the public stage as early as 1586 or 1587, and a popular writer at Madrid soon after 1590, but we have no plays by him dated earlier than 1593-94, (Schack's *Nachtrage*, 1854, p. 45,) and no knowledge that any of his plays were printed, with his own consent, before the volume which appeared as the *Novena Parte*, Madrid, 1617. Yet, in the Preface to the "*Peregrino en su Patria*," licensed in 1603, he gives us a list of two hundred and *nineteen* plays which he acknowledges and claims, and in the *same* Preface (I possess the book) he states their number at two hundred and *thirty*. In the edition of 1733 (which I also have) it is raised to three hundred and forty-nine, but in the *Obras Seltas*, (Tom V, 1776,) it is brought back to three hundred and thirty-nine, perhaps copying the edition of 1605. Of all these, none, I conceive, has much authority except the first, and it may be difficult to find sufficient ground for attributing to Lope some of the plays whose titles are added in the later editions, though it is not unlikely that some of them may be familiar to us under other names. There are eight editions of the *Peregrino*, including that in the fifth volume of Sancha's collection, 1777. Again, in 1618, when he says he had written eight hundred, (Comedias, Tom XI, Barcelona, 1618, *Prólogo*,) only one hundred and thirty-four full-length plays, and a few *entre-actes*, had been printed. Finally, of the eighteen hundred attributed to him

in 1635, after his death, by Montalvan and others, (*Obias Seltas*, Tom XX. p 49,) only about three hundred and twenty or thirty can be found in the volumes of his collected plays, and Lord Holland, counting *autos* and all, which would swell the *general* claim of Montalvan to at least twenty-two hundred, makes out but five hundred and sixteen printed dramas of Lope. Life of Lope de Vega, London, 1817, 8vo, Vol II pp 158-180

<sup>21</sup> This curious list, with the Preface in which it stands, is worth reading over carefully, as affording indications of the history and progress of Lope's genius. It is to Lope's dramatic life what the list in Meres is to Shakespeare. It is found best in the first edition, 1604. In the Spanish translation of this History, (Tom II, 1851, pp 551, 552,) in Schack's *Nachtrage*, (1854, pp 45-50,) and in the Documentos Ineditos, (Tom 1,) may be found the titles of a number of Lope's *Comedias* that are still extant in his autograph MSS. Two of them, at least, have never been published, "*Brasil Restitudo*," founded on the capture of San Salvador by the Spaniards in 1625, and "*La Reina Doña María*," founded on the strange circumstances attending the birth of Don Jaime el Conquistador as naively related in Muntaner's Chronicle. But of the last, which is in the possession of Prince Metternich, a satisfactory account by Wolf may be found in the "*Sitzungs-berichte*" of the Imperial Academy at Vienna for April, 1855.

says their number had risen to four hundred \* 204 and eighty-three; <sup>22</sup> \* in 1618, he says it was eight hundred; <sup>23</sup> in 1619, again, in round numbers, he states it at nine hundred; <sup>24</sup> and in 1624, at one thousand and seventy.<sup>25</sup> After his death, in 1635, Perez de Montalvan, his intimate friend and eulogist, who three years before had declared the number to be fifteen hundred, without reckoning the shorter pieces,<sup>26</sup> puts it at eighteen hundred plays and four hundred *autos*; <sup>27</sup> numbers which are confidently repeated by Antonio in his notice of Lope,<sup>28</sup> and by Franchi, an

In the year 1860—that is, since the preceding paragraph was published—there appeared in the fifty-second volume of Rivadeneyra's *Biblioteca* an extraordinary contribution to the bibliography of Lope's *comedias* and *autos*. Its author is Mr. J. R. Chorley of London, and it is said to be “corregido y adicionado por el Señor Don Cayetano de Barrera,” whose Catalogue of Spanish plays and their authors is elsewhere noticed. How far the additions and corrections of Señor Barrera extend does not appear, but that the immense and careful labor of the bibliography in question is substantially to be credited to Mr. Chorley, and that the alterations are few and unimportant, is hardly doubtful. The grand result, however, as reached in the final summary of Barrera, though I suspect this is not to be accepted as absolutely accurate, is, that of printed *comedias* known to be by Lope there are 403, besides which there are 63 probably his, 106 cited in the “Peregrino,” but not found, meditated, 11; and doubtful, (por varios conceptos,) 25, making, in all, 608, but reducing the “repetorio conocido” of Lope to 439 *comedias*. In relation to the *loas* and *entremeses* no careful reckoning was made, so uncertain is the authorship of those attributed to him. The whole catalogue fills twenty-two large pages in double columns, and is extremely curious and satisfactory, except that it gives us so small a number of titles compared with the recognized number of Lope's dramatic works in the two great classes to which the reckoning relates.

<sup>22</sup> In his “New Art of Writing Plays,” he says, “I have now written, including one that I have finished this week, four hundred and eighty-three plays.” He printed this for the first time in 1609, and though it was probably written four or five years earlier, yet these lines near the end may have been added at the moment the whole poem went to the press *Obias Suetas*, Tom. IV p. 417

<sup>26</sup> In the *Índice de los “Ingenios de Madrid”*, appended to the “*Paía Todos*” of Montalvan, printed in 1632, he says, Lope had then published twenty volumes of plays, and that the number of those that had been acted, without reckoning *autos*, was fifteen hundred. Lope also himself puts it at fifteen hundred in the *Elogia á Claudio*, which, though not published till after his death, must have been written as early as 1632, since it speaks of the “Dorotea,” first published in that year, as still waiting for the light.

Italian, who had been much with Lope at Madrid, and who wrote one of the multitudinous eulogies on him after his death.<sup>29</sup> The prodigious facility implied by this is further confirmed by the fact stated by himself in one of his plays, that it was written and acted in five days,<sup>30</sup> and by the anecdotes of Montalvan, that he wrote five full-length dramas at Toledo in fifteen days, and one act of another in a few hours of the early morning, without seeming to make any effort in either case.<sup>31</sup>

Of this enormous mass about five hundred dramas appear to have been published at different times,— \* most of them in the twenty-five, or, \* 205 as is sometimes reckoned, twenty-eight, volumes which were printed in various places between 1604 and 1647, but of which it is now nearly impossible to form a complete collection.<sup>32</sup> In these volumes, so far as any rules of the dramatic art are concerned, it is apparent that Lope took the theatre in the state in which he found it; and instead of attempting to adapt it to any previous theory, or to any existing models, whether ancient or recent, made it his great object to satisfy the popular audiences of his age; <sup>33</sup> —

<sup>32</sup> By far the finest copy of Lope de Vega's Comedias that I have ever seen is in the possession of Lord Taunton (formerly the Rt Hon. Henry Labouchere), at Stoke Park, near London. Including the Vega del Parnaso, 1647, and the various editions of the different volumes, where such exist, it makes forty-four volumes in all

The selection made by Hartzenbusch for the Biblioteca de Autores Españoles, and found in Vols XXIV, XXXIV, and XLI. of that collection, to which one more is promised, is well made, but it is not edited with the care shown in the edition of Calderon by the same hand. I do not know why the "Dorotea" is inserted

<sup>33</sup> As early as 1603, Lope maintains

an object which he avows so distinctly in his “Art of Writing Plays,” and in the Preface to the twentieth volume of his Dramas, that there is no doubt it was the prevailing purpose with which he labored for the theatre. For such a purpose, he certainly appeared at a fortunate moment; and possessing a genius no less fortunate, was enabled to become the founder of the national Spanish theatre, which, since his time, has rested substantially on the basis where he placed and left it.

But this very system — if that may be called a system which was rather an instinct — almost necessarily supposes that he indulged his audiences in a great variety of dramatic forms; and accordingly we find, among his plays, a diversity, alike in spirit, tone, and structure, which was evidently intended to humor the uncertain cravings of the popular taste, and which we know was successful. Whether he himself ever took the trouble to consider what were the different classes

into which his dramas might be divided, does \* 206 not appear. Certainly no \* attempt at any technical arrangement of them is made in the collection as originally printed, except that, in the first and third volumes, a few *entremeses*, or farces, generally in prose, are thrown in at the end of each, as a sort of appendix. All the rest of the plays contained in them are in verse, and are called *comedias*, — a word which is by no means to be translated “comedies,” but “dramas,” since no other name is comprehensive enough to include their manifold varieties, — and all of them are divided into three *jornadas*, or acts.

this doctrine in the Preface to his “Peregrino”; it occurs frequently afterwards in different parts of his works, as, for instance, in the Prólogo to his “Castigo sin Venganza”, and he left it as a legacy in the “Egloga á Claudio,” printed after his death. The

“Nueva Arte de Hacer Comedias,” however, is abundantly explicit on the subject in 1609, and no doubt expressed the deliberate purpose of its author, from which he seems never to have swerved during his whole dramatic career.

But in everything else there seems no end to their diversities,—whether we regard their subjects, running from the deepest tragedy to the broadest farce, and from the most solemn mysteries of religion down to the loosest frolics of common life, or their style, which embraces every change of tone and measure known to the poetical language of the country. And all these different masses of Lope's drama, it should be further noted, run insensibly into each other,—the sacred and the secular, the tragic and the comic, the heroic action and that from vulgar life,—until sometimes it seems as if there were neither separate form nor distinctive attribute to any of them.

This, however, is less the case than it at first appears to be. Lope, no doubt, did not always know or care into what peculiar form the story of his drama was cast; but still there were certain forms and attributes invented by his own genius, or indicated to him by the success of his predecessors or the demands of his time, to which each of his dramas more or less tended. A few, indeed, may be found, so nearly on the limits that separate the different classes, that it is difficult to assign them strictly to either; but in all—even in those that are the freest and wildest—the distinctive elements of some class are apparent, while all, by the peculiarly national spirit that animates them, show the source from which they come, and the direction they are destined to follow.

The *first* class of plays that Lope seems to have invented—the one in which his own genius seemed most to delight, and which still remains more popular in Spain \*than any other—consists of \*207 those called “Comedias de Capa y Espada,” or Dramas with Cloak and Sword. They took their name

from the circumstance, that their principal personages belong to the genteel portion of society, accustomed, in Lope's time, to the picturesque national dress of cloaks and swords,—excluding, on the one hand, those dramas in which royal personages appear, and, on the other, those which are devoted to common life and the humbler classes. Their main and moving principle is gallantry,—such gallantry as existed in the time of their author. The story is almost always involved and intriguing, and almost always accompanied with an underplot and parody on the characters and adventures of the principal parties, formed out of those of the servants and other inferior personages.

Their titles are intended to be attractive, and are not infrequently taken from among the old rhymed proverbs, that were always popular, and that sometimes seem to have suggested the subject of the drama itself.<sup>34</sup> They uniformly extend to the length of regular pieces for the theatre, now settled at three *jornadas*, or acts, each of which, Lope advises, should have its action compressed within the limits of a single day, though he himself is rarely scrupulous enough to follow his own recommendation. They are not properly comedies, for nothing is more frequent in them than duels, murders, and assassinations; and they are not tragedies, for, besides that they end happily, they are generally composed of humorous and sentimental dialogue, and their action is carried on chiefly by lovers full of romance, or by low characters whose wit is mingled with buffoonery. All this, it should be under-

stood, was new on the Spanish stage; or if hints might have been furnished for individual portions of it as far back as *Torres Naharro*, the combination at least was new, as well as the manners, tone, and costume.

\* Of such plays Lope wrote a very large \* 208 number,—several hundreds, at least. His genius—rich, free, and eminently inventive—was well fitted for their composition, and in many of them he shows much dramatic tact and talent. Among the best are “*The Ugly Beauty*”;<sup>35</sup> “*Money makes the Man*”;<sup>36</sup> “*The Pruderries of Belisa*,”<sup>37</sup> which has the accidental merit of being all but strictly within the rules; “*The Slave of her Lover*,”<sup>38</sup> in which he has sounded the depths of a woman’s tenderness; and “*The Dog in the Manger*,” in which he has almost equally well sounded the depths of her selfish vanity.<sup>39</sup> But perhaps there are some others which, even better than these, will show the peculiar character of this class of Lope’s dramas, and his peculiar position in relation to them. To two or three such we will, therefore, now turn.

“*El Azero de Madrid*,” or *The Madrid Steel*, is one of them, and is among his earlier works for the stage.<sup>40</sup>

<sup>35</sup> *Comedias*, Tom XXIV., Zaragoza, 1641, 4to, f 22, etc

<sup>36</sup> I know this play, “*Dineros son Calidad*,” only among the *Comedias Sueltas* of Lope, but it is no doubt his, as it is in Tom XXIV. printed at Zaragoza in 1632, which contains different plays from a Tom. XXIV. printed at Zaragoza in 1641, which I have. There is yet a third Tom XXIV., printed at Madrid in 1638. The internal evidence would, perhaps, be enough to prove its authorship

<sup>37</sup> *Comedias*, Tom IX., Barcelona, 1618, f 277, etc., but often reprinted since under the title of “*La Melindrosa*.” When mentioning the conformity of this play to the rules, it

may be well to remember that it was written only a year and a half before Lope died. See note at the end of this chapter.

<sup>38</sup> *Comedias*, Tom XXV., Çaragoça, 1647, f. 1, etc.

<sup>39</sup> *Comedias*, Tom XI., Barcelona, 1618, f 1, etc. The Preface to this volume is curious, on account of Lope’s complaints of the booksellers. He calls it “*Prólogo del Teatro*,” and makes the surreptitious publication of his plays an offence against the drama itself. He intimates that it was not very uncommon for one of his plays to be acted seventy times

<sup>40</sup> The “*Azero de Madrid*,” which was written as early as 1603, has often

It takes its name from the preparations of steel for medicinal purposes, which, in Lope's time, had just come into fashionable use ; but the main story is that of a light-hearted girl, who deceives her father, and especially her hypocritical old aunt, by pretending to be ill and taking steel medicaments from a seeming doctor, who is a friend of her lover, and who prescribes walking abroad, and such other free modes of life as may best afford opportunities for her admirer's attentions.

\* 209 \* There can be little doubt that in this play we find some of the materials for the “*Médecin Malgré Lui*” ; and though the full success of Molière's original wit is not to be questioned, still the happiest portions of his comedy can do no more than come into fair competition with some passages in that of Lope. The character of the heroine, for instance, is drawn with more spirit in the Spanish than it is in the French play ; and that of the devotee aunt, who acts as her duenna, and whose hypocrisy is exposed when she herself falls in love, is one which Molière might well have envied, though it was too exclusively Spanish to be brought within the courtly conventions by which he was restrained.

The whole drama is full of life and gayety, and has a truth and reality about it rare on any stage. Its opening is both a proof of this and a characteristic specimen of its author's mode of placing his audience at once, by a decisive movement, in the midst of the scene and the personages he means to represent. Lisardo, the hero, and Riselo, his friend, appear watching the door of a fashionable church in Madrid, at the con-

been printed separately, and is found another hit at the fashionable drug in in the regular collection, Tom XI, his “*Dorotea*,” Act V. Sc. 1. Barcelona, 1618, f. 27, etc. Lope has

clusion of the service, to see a lady with whom Lisardo is in love. They are wearied with waiting, while the crowds pass out, and Riselo at last declares he will wait for his friend's fancy no longer. At this moment appears Belisa, the lady in question, attended by her aunt, Theodora, who wears an affectedly religious dress and is lecturing her:—

*Theodora.* Show more of gentleness and modesty,—  
Of gentleness in walking quietly,  
Of modesty in looking only down  
Upon the earth you tread.

*Belisa.* 'T is what I do

*Theodora.* What? When you're looking straight towards that man?

*Belisa.* Did you not bid me look upon the earth?  
And what is he but just a bit of it?

*Theodora.* I said the earth whereon you tread, my niece.

*Belisa* But that whereon I tread is hidden quite  
With my own petticoat and walking-dress

*Theodora.* Words such as these become no well-bred maid  
But, by your mother's blessed memory,  
I'll put an end to all your pretty tricks;—  
What? You look back at him again?

\* *Belisa* Who? I? \* 210

*Theodora.* Yes, you;—and make him secret signs besides

*Belisa.* Not I. 'T is only that you troubled me  
With teasing questions and perverse replies,  
So that I stumbled and looked round to see  
Who would prevent my fall.

*Riselo (to Lisardo).* She falls again  
Be quick and help her.

*Lisardo (to Belisa)* Pardon me, lady,  
And forgive my glove.

*Theodora* Who ever saw the like?

*Belisa* I thank you, sir; you saved me from a fall.

*Lisardo.* An angel, lady, might have fallen so,  
Or stars that shine with heaven's own blessed light

*Theodora.* I, too, can fall; but 't is upon your trick  
Good gentleman, farewell to you!

*Lisardo.* Madam,  
Your servant. (Heaven save us from such spleen!)

*Theodora.* A pretty fall you made of it; and now I hope  
You'll be content, since they assisted you

*Belisa.* And you no less content, since now you have  
The means to tease me for a week to come.

*Theodora.* But why again do you turn back your head?

*Belisa.* Why, sure you think it wise and wary  
To notice well the place I stumbled at,  
Lest I should stumble there when next I pass.  
*Theodora* Mischief befall you ! But I know your ways !  
You 'll not deny this time you looked upon the youth ?  
*Belisa.* Deny it ? No !  
*Theodora* You dare confess it, then ?  
*Belisa* Be sure I dare. You saw him help me,—  
And would you have me fail to thank him for it ?  
*Theodora.* Go to ! Come home ! come home !  
*Belisa.* Now we shall have  
A pretty scolding cooked up out of this <sup>41</sup>

\* 211 \* Other passages are equally spirited and no less Castilian. The scene, at the beginning of the second act, between Octavio, another lover of the lady, and his servant, who jests at his master's passion, as well as the scene with the mock doctor, that follows, are both admirable in their way, and must have produced a great effect on the audiences of Madrid, who felt how true they were to the manners of the time.

But all Lope's dramas were not written for the public theatres of the capital. He was the courtly, no less

Comedias de Lope de Vega, Tom XI ,

The sort of decorum required in the first lines of this extract is the same that was observed by the charming Dorothea of Cervantes, and was, no doubt, looked upon at the time as no more than a gentle modesty. than the national poet of his age; and as we have already noticed a play full of the spirit of his youth, and of the popular character, to which it was addressed, we will now turn to one no less buoyant and free, which was written in his old age and prepared expressly for a royal entertainment. It is "The Saint John's Eve," and shows that his manner was the same, whether he was to be judged by the unruly crowds gathered in one of the court-yards of the capital, or by a few persons selected from whatever was most exclusive and elevated in the kingdom.

The occasion for which it was prepared and the arrangements for its exhibition mark, at once the luxury of the royal theatres in the reign of Philip the Fourth, and the consideration enjoyed by their favorite poet.<sup>42</sup> The \* drama itself was ordered \* 212 expressly by the Count Duke Olivares, for a magnificent entertainment which he wished to give his sovereign in one of the gardens of Madrid, on Saint John's Eve, in June, 1631. No expense was spared by the profligate favorite to please his indulgent master. The Marquis Juan Bautista Crescencio — the same artist to whom we owe the sombre Pantheon of the Escurial — arranged the architectural construc-

The *Entremes* of "Las Dueñas," by Benevente, (*Joco-Seria*, 1653, ff. 168—172,) was a part of this brilliant festival.

A similar entertainment had been given by his queen to Philip IV., on his birthday, in 1622, at the beautiful country-seat of Aranjuez, for which the unfortunate Count of Villamediana furnished the poetry, and Fontana, the distinguished Italian architect, erected

a theatre of great magnificence. The drama, which was much like a masque of the English theatre, and was performed by the queen and her ladies, is in the *Works* of Count Villamediana (*Caragoça*, 1629, 4to, pp 1—55), and an account of the entertainment itself is given in Antonio de Mendoça (*Obras*, Lisboa, 1690, 4to, pp 426—464), — all indicating the most wasteful luxury and extravagance. A curious English version of Mendoça's account may be found at the end of Sir R. Fanshawe's translation of Mendoça's "Querer por solo querer," 1670. See *post*, note to Chap. XXI.

tions, which consisted of luxurious bowers for the king and his courtiers, and a gorgeous theatre in front of them, where, amidst a blaze of torchlight, the two most famous companies of actors of the time performed successively two plays: one written by the united talent of Francisco de Quevedo and Antonio de Mendoça; and the other, the crowning grace of the festival, by Lope de Vega.

The subject of the play of Lope is happily taken from the frolics of the very night on which it was represented;—a night frequently alluded to in the old Spanish stories and ballads, as one devoted, both by Moors and Christians, to gayer superstitions, and adventures more various, than belonged to any other of the old national holidays.<sup>43</sup> What was represented, therefore, had a peculiar interest, from its appropriateness both as to time and place.

Leonora, the heroine, first comes on the stage, and confesses her attachment to Don Juan de Hurtado, a gentleman who has recently returned rich from the Indies. She gives a lively sketch of the way in which he had made love to her in all the forms of national admiration, at church by day, and before her grated balcony in the evenings. Don Luis, her brother, ignorant of all this, gladly becomes acquainted with the lover, whom he interests in a match of his own with Doña Blanca, sister of Bernardo, who is the cherished friend of Don Juan. Eager to oblige the brother of the lady he loves, Don Juan seeks Bernardo, \* 213 and, in the course of their conversation, \* inge-

<sup>43</sup> Lope himself, in 1624, published a poem on the same subject, which fills thirty pages in the third volume of his Works, but a description of the frolics of St John's Eve, better suited to illustrate this play of Lope, and much else

on St John's Eve in Spanish poetry, is in "Doblado's Letters," (1822, p 309,) — a work full of the most faithful sketches of Spanish character and manners.

niously describes to him a visit he has just made to see all the arrangements for the evening's entertainment now in progress before the court, including this identical play of Lope; thus whimsically claiming from the audience a belief that the action they are witnessing on the stage in the garden is, at the very same moment, going on in real life in the streets of Madrid, just behind their backs;—a passage which, involving, as it does, compliments to the king and the Count Duke, to Quevedo and Mendoça, must have been one of the most brilliant in its effect that can be imagined. But when Don Juan comes to explain his mission about the Lady Blanca, although he finds a most willing consent on the part of her brother, Bernardo, he is thunderstruck at the suggestion, that this brother, his most intimate friend, wishes to make the alliance double, and marry Leonora himself.

Now, of course, begin the involutions and difficulties. Don Juan's sense of what he owes to his friend forbids him from setting up his own claim to Leonora, and he at once decides that nothing remains for him but flight. At the same time, it is discovered that the Lady Blanca is already attached to another person, a noble cavalier, named Don Pedro, and will, therefore, never marry Don Luis, if she can avoid it. The course of true love, therefore, runs smooth in neither case. But both the ladies avow their determination to remain steadfastly faithful to their lovers, though Leonora, from some fancied symptoms of coldness in Don Juan, arising out of his over-nice sense of honor, is in despair at the thought that he may, after all, prove false to her.

So ends the first act. The second opens with the Lady Blanca's account of her own lover, his condition, and the way in which he had made his love known to

her in a public garden;— all most faithful to the national costume. But just as she is ready to escape and be privately married to him, her brother, Don Bernardo, comes in, and proposes to her to make her first visit to Leonora, in order to promote his own suit. Meantime, the poor Leonora, quite desperate, rushes

into the street with her attendant, and meets

\* 214 her lover's servant, the clown and \* harlequin of the piece, who tells her that his master, unable any longer to endure his sufferings, is just about escaping from Madrid. The master, Don Juan, follows in hot haste, booted for his journey. The lady faints. When she revives, they come to an understanding, and determine to be married on the instant; so that we have now two private marriages, beset with difficulties, on the carpet at once. But the streets are full of frolicsome crowds, who are indulged in a sort of carnival freedom during this popular festival. Don Juan's rattling servant gets into a quarrel with some gay young men, who are impertinent to his master, and to the terrified Leonora. Swords are drawn, and Don Juan is arrested by the officers of justice and carried off,— the lady, in her fright, taking refuge in a house, which accidentally turns out to be that of Don Pedro. But Don Pedro is abroad, seeking for his own lady, Doña Blanca. When he returns, however, making his way with difficulty through the rioting populace, he promises, as in Castilian honor bound, to protect the helpless and unknown Leonora, whom he finds in his balcony timidly watching the movements of the crowd in the street, among whom she is hoping to catch a glimpse of her own lover.

In the last act we learn that Don Juan has at once, by bribes, easily rid himself of the officers of justice,

and is again in the noisy and gay streets seeking for Leonora. He falls in with Don Pedro, whom he has never seen before; but Don Pedro, taking him, from his inquiries, to be the brother from whom Leonora is anxious to be concealed, carefully avoids betraying her to him. Unhappily, the Lady Blanca now arrives, having been prevented from coming earlier by the confusion in the streets; and he hurries her into his house for concealment till the marriage ceremony can be performed. But she hurries out again no less quickly, having found another lady already concealed there;—a circumstance which she takes to be direct proof of her lover's falsehood. Leonora follows her, and begins an explanation; but in the midst of it, the two brothers, who had been seeking these same missing sisters, come suddenly in; \* a scene of \* 215 great confusion and mutual reproaches ensues; and then the curtain falls with a recognition of all the mistakes and attachments, and the full happiness of the two ladies and their two lovers. At the end, the poet, in his own person, declares, that, if his art permits him to extend his action over twenty-four hours, he has, in the present case, kept within its rules, since he has occupied less than ten.

As a specimen of plays founded on Spanish manners, few are happier than “The Saint John’s Eve.” The love-scenes, all honor and passion; the scenes between the cavaliers and the populace, at once rude and gay; and the scenes with the free-spoken servant who plays the wit,—are almost all excellent, and instinct with the national character. It was received with the greatest applause, and constituted the finale of the Count Duke’s magnificent entertainment, which, with its music and dances, interludes and refreshments, occupied

the whole night, from nine o'clock in the evening till daylight the next morning, when the royal party swept back with great pomp and ceremony to the palace;— the stately form of Olivarez, such as we see him in the pictures of Velazquez, following the king's coach in place of the accustomed servant.

Another of the plays of Lope, and one that belongs to the division of the *Capa y Espada*, but approaches that of the heroic drama, is his "Fool for Others and Wise for Herself."<sup>44</sup> It is of a lighter and livelier temper throughout than most of its class. Diana, educated in the simple estate of a shepherdess, and wholly ignorant that she is the daughter and heir of the Duke of Urbino, is suddenly called, by the death of her father, to fill his place. She is surrounded by intriguing enemies, but triumphs over them by affecting a rustic simplicity in whatever she says and does, while, at the same time, she is managing all around her, and carrying on a love-intrigue with the Duke Alexander Farnese, which ends in her marriage with him.

\* 216 \* The jest of the piece lies in the wit she is able to conceal under her seeming rusticity. For instance, at the very opening, after she has been secretly informed of the true state of things, and has determined what course to pursue, the ambassadors from Urbino come in and tell her, with a solemnity suited to the occasion:—

Lady, our sovereign lord, the Duke, is dead !

To which she replies:—

What 's that to me ? But if 't is surely so,  
Why then, sirs, 't is for you to bury him.  
I 'm not the parish curate <sup>45</sup>

This tone is maintained to the end, whenever the heroine appears ; and it gives Lope an opportunity to bring forth a great deal of the fluent, light wit of which he had such ample store.

Little like all we have yet noticed, but still belonging to the same class, is “The Reward of Speaking Well,”<sup>46</sup> — a charming play, in which the accounts of the hero’s birth and early condition are so absolutely a description of his own that it can hardly be doubted that Lope intended to draw the character in some degree from himself. Don Juan, who is the hero, is standing with some idle gallants near a church in Seville, to see the ladies come out ; and, while there, defends, though he does not know her, one of them who is lightly spoken of. A quarrel ensues. He wounds his adversary, is pursued, and chances to take refuge in the house of the very lady whose honor he had so gallantly maintained a few moments before. She from gratitude secretes him, and the play ends with a wedding, though not until there has been a perfect confusion of plots and counterplots, intrigues and concealments, such as so often go to make up the three acts of Lope’s dramas.

Many other plays might be added to these, showing, by the diversity of their tone and character, how diverse \* were the gifts of the extraordinary man who invented them, and filled them with various and easy verse. Among them are “Por la Puente Juana,”<sup>47</sup> “El Anzuelo de Fenisa,”<sup>48</sup> “El Ruyseñor de Sevilla” ;<sup>49</sup> “Porfiar hasta Morir,”<sup>50</sup>

which last is on the story of Macias el Enamorado, always a favorite with the old Spanish and Provençal poets; and the "Bizarrias de Belisa," a gay comedy, which is interesting from the circumstance that it was finished in 1634, when he was nearly seventy-two years old. But it is neither needful nor possible to go further. Enough has been said to show the general character of their class, and we therefore now turn to another.<sup>51</sup>

LOPE DE VEGA, CONTINUED — HIS HEROIC DRAMA, AND ITS CHARACTERISTICS — GREAT NUMBER ON SUBJECTS FROM SPANISH HISTORY, AND SOME ON CONTEMPORARY EVENTS

THE dramas of Lope de Vega that belong to the next class were called “Comedias Heróicas,” or “Comedias Historiales,” — Heroic or Historical Dramas. The chief differences between these and the last are, that they bring on the stage personages in a higher rank of life, such as kings and princes; that they generally have an historical foundation, or at least use historical names, as if claiming it; and that their prevailing tone is grave, imposing, and even tragical. They have, however, in general, the same involved, intriguing stories and underplots, the same play of jealousy and an over-sensitive honor, and the same low, comic caricatures to relieve their serious parts, that are found in the dramas of “the Cloak and Sword.” Philip the Second disapproved of this class of plays, thinking they tended to diminish the royal dignity, — a circumstance which shows at once the state of manners at the time, and the influence attributed to the theatre.<sup>1</sup>

Lope wrote a very large number of plays in the forms of the heroic drama, which he substantially invented, — perhaps as many as he wrote in any other class. Everything historical seemed, indeed, to furnish him with a subject, from the earliest annals of the

<sup>1</sup> Lope de Vega, *Obras Sueltas*, Tom IV p 410. Such plays were also sometimes called tragedies “Aquelle donde

world down to the events of his own time; \* 219 but his favorite materials \* were sought in Greek and Roman records, and especially in the chronicles and ballads of Spain itself.

Of the manner in which he dealt with ancient history, his "Roma Abrasada," or Rome in Ashes, may be taken as a specimen, though certainly one of the least favorable specimens of the class to which it belongs.<sup>2</sup> The facts on which it is founded are gathered from the commonest sources open to its author,—chiefly from the "General Chronicle of Spain"; but they are not formed into a well-constructed or even ingenious plot,<sup>3</sup> and they relate to the whole twenty years that elapsed between the death of Messalina, the reign of Claudius, and the death of Nero himself, who is not only the hero, but sometimes the *gracioso*, or droll, of the piece.

The first act, which comes down to the murder of Claudius by Nero and Agrippina, contains the old jest of the Emperor asking why his wife does not come to dinner, after he had put her to death, and adds, for equally popular effect, abundant praises of Spain and of Lucan and Seneca, claiming both of them to be Spaniards, and making the latter an astrologer, as well as a moralist. The second act shows Nero beginning his reign with great gentleness, and follows Suetonius and the old Chronicle in making him grieve that he knew how to write, since otherwise he could not have been required to sign an order for a just judicial execution. The subsequent violent change in his con-

<sup>2</sup> *Comedias*, Tom. XX., Madrid, 1629, ff 177, etc. It is entitled "Tragedia Famosa"

<sup>3</sup> It is worth while to compare Suetonius, (Books V and VI,) and the "Crónica General," (Parte I. c. 110 and

111,) with the corresponding passages in the "Roma Abrasada." In one passage of Act III, Lope uses a ballad, the first lines of which occur in the first act of the "Celestina."

duct is not, however, in any way explained or accounted for. It is simply set before the spectators as a fact, and from this moment begins the headlong career of his guilt.

A curious scene, purely Spanish, is one of the early intimations of this change of character. Nero falls in love with Eta ; but not at all in the Roman fashion. He visits her by night at her window, sings a sonnet to her, is interrupted by four men in disguise, kills one of them, and escapes from the pursuit of his own officers of justice \* with difficulty ; all, as \* 220 if he were a wandering knight so fair of the time of Philip the Third.<sup>4</sup> The more historical love for Poppaea follows, with a shocking interview between Nero and his mother, in consequence of which he orders her to be at once put to death. The execution of this order, with the horrid exposure of her person afterwards, ends the act, which, gross as it is, does not sink to the revolting atrocities of the old Chronicle from which it is chiefly taken.

The third act is so arranged as partly to gratify the national vanity and partly to conciliate the influence of the Church, of which Lope, like his contemporaries, always stood in awe. Several devout Christians, therefore, are now introduced, and we have an edifying confession of faith, embracing the history of the world from the creation to the crucifixion, with an account of what the Spanish historians regard as the first of the twelve persecutions. The deaths of Seneca and Lucan follow ; and then the conflagration of Rome, which, as it constitutes the show part of the play, and is relied on for the stage effect it would produce, is

<sup>4</sup> This scene is in the second act, and forms that part of the play where Nero enacts the *gracioso*.

brought in near the end, out of the proper order of the story, and after the building of Nero's luxurious palace, the "aurea domus," which was really constructed in the desert the fire had left. The audience, meantime, have been put in good-humor by a scene in Spain, where a conspiracy is on foot to overthrow the Emperor's power; and the drama concludes with the death of Poppaea,—again less gross than the account of it in the Chronicle,—with Nero's own death, and with the proclamation of Galba as his successor; all crowded into a space disproportionately small for incidents so important.

But it was not often that Lope wrote so ill or so grossly. On modern, and especially on national subjects, he is almost always more fortunate, and sometimes becomes powerful and imposing. Among these, as a characteristic, though not as a remarkably favorable, specimen of his success, is to be placed the

\* 221 "Príncipe Perfeto,"<sup>5</sup> \* in which he intends to give his idea of a perfect prince under the character of Don John of Portugal, son of Alfonso the Fifth and contemporary with Ferdinand and Isabella, a full-length portrait of whom, by his friend and confidant, is drawn in the opening of the second act, with a minuteness of detail that leaves no doubt as to the qualities for which princes were valued in the age of the Philips, if not those for which they would be valued now.

Elsewhere in the piece, Don John is represented to have fought bravely in the disastrous battle of Toro, and to have voluntarily restored the throne to his father, who had once abdicated in his favor and had afterwards reclaimed the supreme power. Personal

<sup>5</sup> *Comedias*, Tom. XI., Barcelona, 1618, ff. 121, etc.

courage and strict justice, however, are the attributes most relied on to exhibit him as a perfect prince. Of the former he gives proof by killing a man in self-defence, and entering into a bull-fight under the most perilous circumstances. Of the latter—his love of justice—many instances are brought on the stage, and, among the rest, his protection of Columbus, after the return of that great navigator from America, though aware how much his discoveries had redounded to the honor of a rival country, and how great had been his own error in not obtaining the benefit of them for Portugal. But the most prominent of these instances of justice relates to a private and personal history, and forms the main subject of the drama. It is as follows.

Don Juan de Sosa, the king's favorite, is twice sent by him to Spain on embassies of consequence, and, while residing there, lives in the family of a gentleman connected with him by blood, to whose daughter, Leonora, he makes love, and wins her affections. Each time when Don Juan returns to Portugal, he forgets his plighted faith and leaves the lady to languish. At last, she comes with her father to Lisbon in the train of the Spanish princess, Isabella, now married to the king's son. But even there the false knight refuses to recognize his \* obligations. In her \* 222 despair, she presents herself to the king, and explains her position in the following conversation, which is a favorable specimen of the easy narrative in which resides so much of the charm of Lope's drama. As Leonora enters, she exclaims:—

Prince, whom in peace and war men perfect call,  
Listen a woman's cry !

*King.*

Begin ; — I hear

*Leonora.* Fadrique — he of ancient Lara's house,

And governor of Seville — is my sire.

*King.* Pause there, and pardon first the courtesy  
That owes a debt to thy name and to his,  
Which ignorance alone could fail to pay.

*Leonora.* Such condescending gentleness, my lord,  
Is worthy of the wisdom and the wit  
Which through the world are blazoned and admired. —  
But to my tale. Twice came there to Castile  
A knight from this thy land, whose name I hide  
Till all his frauds are manifest. For thou,  
My lord, dost love him in such wise, that, wert  
Thou other than thou art, my true complaints  
Would fear to seek a justice they in vain  
Would strive to find. Each time within our house  
He dwelt a guest, and from the very first  
He sought my love.

*King.* Speak on, and let not shame  
Oppress thy words, for to the judge and priest  
Alike confession's voice should boldly come

*Leonora.* I was deceived. He went and left me sad  
To mourn his absence, for of them he is  
Who leave behind their knightly, nobler parts,  
When they themselves are long since fled and gone.  
Again he came, his voice more sweetly tuned,  
More siren-like, than ever I heard the voice,  
Nor knew its hidden fraud. O, would that Heaven  
Had made us, in its highest justice, deaf,  
Since tongues so false it gave to men ! He lured,  
He lured me as the fowler lures the bird  
In snares and meshes hid beneath the grass  
I struggled, but in vain ; for Love, heaven's child,  
Has power the mightiest fortress to subdue.  
He pledged his knightly word, — in writing pledged it,  
Trusting that afterwards, in Portugal,  
The debt and all might safely be denied ; —  
As if the heavens were narrower than the earth,  
And justice not supreme. In short, my lord,  
He went ; and, proud and vain, the banners bore  
That my submission marked, not my defeat ;  
For where love is, there comes no victory.  
His spoils he carried to his native land,  
As if they had been torn in heathen war  
From Africa ; such as in Arcila,  
In earliest youth, thyself with glory won ;  
Or such as now, from shores remote, thy ships  
Bring home, — dark slaves, to darker slavery.  
No written word of his came back to me.  
My honor wept its obsequies, and built its tomb  
With Love's extinguished torches. Soon, the prince,

Thy son, was wed with our Infanta fair, —  
 God grant it for a blessing to both realms ! —  
 And with her, as ambassador, my sire  
 To Lisbon came, and I with him But here —  
 Even here — his promises that knight denies,  
 And so disheartens and despises me,  
 That, if your Grace no remedy can find,  
 The end of all must be the end of life, —  
 So heavy is my misery.

*King.* That scroll ?

Thou hast it ?

*Leonora* Surely. It were an error  
 Not to be repaired, if I had lost it.

*King.* It cannot be but I should know the hand,  
 If he who wrote it in my household serve.

*Leonora* This is the scroll, my lord.

*King.* And John de Sosa's is  
 The signature ! But yet, unless mine eyes  
 Had seen and recognized his very hand,  
 I never had believed the tale thou bring'st, —  
 So highly deem I of his faithfulness.<sup>6</sup>

\* 224 \* The *dénouement* naturally consists in the marriage, which is thus made a record of the king's perfect justice.

Columbus, as we have intimated, appears in this piece. He is introduced with little skill, but the dignity of his pretensions is not forgotten. In another drama, devoted to the discovery of America, and called "The New World of Columbus," his character is further and more truly developed. The play itself embraces the events of the great Admiral's life between his first vain effort to obtain countenance in Portugal and his triumphant presentation of the spoils of the New World to Ferdinand and Isabella at Barcelona,—a period amounting to about fourteen years.<sup>7</sup> It is one of Lope's more wild and extravagant attempts, but it is not without marks of his peculiar talent, and it fully embodies the national feeling in regard to America, as a world rescued from heathenism. Some of its scenes are laid in Portugal; others on the plain of Granada, at the moment of its fall; others in the caravel of Columbus during the mutiny; and yet others in the West Indies, and before his sovereigns on his return home.

\* 225 \* Among the personages, besides such as might be reasonably anticipated from the course of the story, are Gonzalvo de Córdova, sundry Moors, several American Indians, and several spiritual beings, such as Providence, Christianity, and Idolatry;

This passage is near the end of the piece, and leads to the *dénouement* by one of those flowing narratives, like an Italian *novella*, to which Lope frequently resorts, when the intriguing fable of the drama has been carried far enough to fill up the three customary acts. Aciila, referred to in the text with skill, was taken from the Moors the 24th of August, 1471.

<sup>7</sup> Comedias, Tom IV, Madrid, 1614; and also in the Appendix to Ochoa's "Teatro Escogido de Lope de Vega" (Paris, 1838, 8vo). Fernando de Zaraté took some of the materials for his "Conquista de Mexico," (Comedias Escogidas, Tom XXX, Madrid, 1668,) such as the opening of Jornada II, from this play of Lope de Vega.

the last of whom struggles with great vehemence, at the tribunal of Providence, against the introduction of the Spaniards and their religion into the New World, and in passages like the following seems in danger of having the best of the argument.

O Providence Divine, permit them not  
To do me this most plain unrighteousness<sup>1</sup>  
'T is but base avarice that spurs them on.  
Religion is the color and the cloak,  
But gold and silver, hid within the earth,  
Are all they truly seek and strive to win.<sup>2</sup>

The greater part of the action and the best portions of it pass in the New World; but it is difficult to imagine anything more extravagant than the whole fable. Dramatic propriety is constantly set at naught. The Indians, before the appearance of Europeans among them, sing about Phœbus and Diana; and while, from the first, they talk nothing but Spanish, they frequently pretend, after the arrival of the Spaniards, to be unable to understand a word of their language. The scene in which Idolatry pleads its cause against Christianity before Divine Providence, the scenes with the Demon, and those touching the conversion of the heathen, might have been presented in the rudest of the old Moralities. Those, on the contrary, in which the natural feelings and jealousies of the simple and ignorant natives are brought out, and those in which Columbus appears,—always dignified and gentle,—are not without merit. Few, however, can be said to be truly good or poetical; and yet a poetical interest is kept up through the worst of them, and the story they involve is followed to the end with a living curiosity.

The common traditions are repeated, that \* 226 Columbus \* was born at Nervi, and that he received from a dying pilot at Madeira the charts that led him to his grand adventure; but it is singular, that, in contradiction to all this, Lope, in other parts of the play, should have hazarded the suggestion, that Columbus was moved by Divine inspiration. The friar, in the scene of the mutiny, declares it expressly; and Columbus himself, in his discourse with his brother Bartholomew, when their fortunes seemed all but desperate, plainly alludes to it, when he says:—

A hidden Deity still drives me on,  
 Bidding me trust the truth of what I feel,  
 And, if I watch, or if I sleep, impels  
 The strong will boldly to work out its way.  
 But what is this that thus possesses me?  
 What spirit is it drives me onward thus?  
 Where am I borne? What is the road I take?  
 What track of destiny is this I tread?  
 And what the impulse that I blindly follow?  
 Am I not poor, unknown, a broken man,  
 Depending on the pilot's anxious trade?  
 And shall I venture on the mighty task  
 To add a distant world to this we know?<sup>9</sup>

The conception of the character in this particular is good, and, being founded, as we know it was, on the personal convictions of Columbus himself, might have been followed out by further developments with poetical effect. But the opportunity is neglected, and, like many other occasions for success, is thrown away by Lope, through haste and carelessness.

tant from the mode in which its subject is treated, and interesting from the circumstance that its history can be more exactly traced than that of \*any \* 227 other of Lope's plays. It is founded on the dark and hideous story in the annals of Ferrara, during the fifteenth century, which Lord Byron found in Gibbon's "Antiquities of the House of Brunswick," and made the subject of his "Parisina,"<sup>10</sup> but which Lope, following the old chronicles of the duchy, has presented in a somewhat different light, and thrown with no little skill into a dramatic form.

The Duke of Ferrara, in his tragedy, is a person of mark and spirit,— a commander of the Papal forces, and a prince of statesmanlike experience and virtues. He marries when already past the middle age of life, and sends his natural son, Frederic, to receive his beautiful bride, a daughter of the Duke of Mantua, and to conduct her to Ferrara. Before he reaches Mantua, however, Frederic meets her accidentally on the way; and his first interview with his step-mother is when he rescues her from drowning. From this moment they become gradually more and more attached to each other, until their attachment ends in guilt; partly through the strong impulses of their own natures, and partly from the coldness and faithlessness of the Duke to his young and passionate wife.

On his return home from a successful campaign, the Duke discovers the intrigue. A struggle ensues between his affection for his son and the stinging sense of his own dishonor. At last he determines to punish; but in such a manner as to hide the grounds of his

<sup>10</sup> The story was well known, from its peculiar horrors, though the events occurred in 1405, — more than two centuries before the date of the play.

Lope, in the Preface to his version of it, says it was extant in Latin, French, German, Tuscan, and Castilian.

offence. To effect this, he confines his wife in a darkened room, and so conceals and secures her person, that she can neither move, nor speak, nor be seen. He then sends his offending son to her, under the pretence that beneath the pall that hides her is placed a traitor, whom the son is required to kill in order to protect his father's life; and when the desperate young man rushes from the room, ignorant who \* 228 has been his victim, he is instantly cut \* down by the bystanders, on his father's outcry, that he has just murdered his step-mother, with whose blood his hands are, in fact, visibly reeking.

Lope finished this play on the 1st of August, 1631, when he was nearly sixty-nine years old; and yet there are few of his dramas, in the class to which it belongs, that are more marked with poetical vigor, and in none is the versification more light and various.<sup>11</sup> The characters, especially those of the father and son, are better defined and better sustained than usual; and the whole was evidently written with care, for there are not infrequently large alterations, as well as many minute verbal corrections, in the original manuscript, which is still extant.

It was not licensed for representation till the 9th of May, 1632,—apparently from the known unwillingness of the court to have persons of rank, like the Duke of Ferrara, brought upon the stage in a light so odious. At any rate, when the tardy permission was granted, it was accompanied with a certificate that the Duke was treated with the decorum “due to his person”; though, even with this assurance, it was acted but once, notwithstanding it made a strong

impression at the time, and was brought out by the company of Figueroa, the most successful of the period,— Arias, whose acting Montalvan praises highly, taking the part of the son.<sup>12</sup> In 1634, Lope printed it, with more than common care, at Barcelona, dedicating it to his great patron, the Duke of Sessa, among “the servants of whose house,” he says, “he was inscribed”; and the next year, immediately after his death, it appeared again, without the Dedication, in the twenty-first volume of his plays, prepared anew by himself for the press, but published by his daughter Felicia.<sup>13</sup>

\* Like “Punishment, not Vengeance,” several \* 229 other dramas of its class are imbued with the deepest spirit of tragedy. “The Knights Command-

<sup>12</sup> Gayangos says, that the reason the representation was stopped was from a supposed allusion in the story to the case of Don Carlos. I do not know on what ground he says it, and it does not seem probable.

<sup>13</sup> I possess the original MS., entirely in Lope's handwriting, with many alterations, corrections, and interlineations by himself. It is prepared for the actors, and has the license for representing it by Pedro de Vargas Machuca, a poet himself, and Lope's friend, who was much employed to license plays for the theatre. He also figured at the “Justas Poéticas” of San Isidro, published by Lope in 1620 and 1622, and in the “Justa” in honor of the Virgen del Pilar, published by Caceres in 1629, in neither of which, however, do his poems give proof of much talent, though there is no doubt of his popularity with his contemporaries (Alvarez y Baena, Hijos de Madrid, Tom. IV p 199.) He claimed to be descended from the Diego Perez de Vargas of the Ballads and Chronicles, who, having lost his arms of offence at the battle of Xerez in the time of St Ferdinand, tore off the branch of an olive-tree, and so labored the Moors with it that he received the sobriquet of “Machuca,” or *the Pounder*. (Almela Valerio de las

Hystorias Escolasticas, Toledo, 1541, f. 15, a — Lope de Vega, Laurel de Apolo, 1630, f 75.) At the top of each page in the MS. of Lope de Vega is a cross with the names or ciphers of “Jesus, Maria, Josephus, Christus”, and at the end, “Laus Deo et Mariae Virginis,” with the date of its completion and the signature of the author. Whether Lope thought it possible to consecrate the gross immoralities of such a drama by religious symbols, I do not know, but if he did, it would not be inconsistent with his character or the spirit of his time. A cross was commonly put at the top of Spanish letters, — a practice alluded to in Lope's “Perro del Hontelano,” (Jornada II,) and one that must have led often to similar incongruities. But this seems to have been discontinued at the end of the eighteenth century. At least, in a drama acted then, where reforms in the beginning of MSS. are proposed, one asks, whether anything is to be done with the cross. To which the other answers —

*Essa está ja reformada,  
Porque si uno escribe al diablo  
No se espante de la carta.*

ers of Córdova" is an instance in point.<sup>14</sup> It is a parallel to the story of *Ægisthus* and Clytemnestra in its horrors; but the husband, instead of meeting the fate of Agamemnon, puts to death, not only his guilty wife, but all his servants and every living thing in his household, to satisfy his savage sense of honor. Poetry is abundant in many of its scenes, but the atrocities of the rest will hardly permit it to be perceived.

"The Star of Seville," on the other hand, though much more truly tragic, is liable to no such objection.<sup>15</sup>

In some respects it resembles Corneille's "Cid." At

the command of his king, and from the truest

\* 230 \* Castilian loyalty, a knight of Seville kills his friend, a brother of the lady whom he is about to marry. The king afterwards endeavors to hold him harmless for the crime; but the royal judges refuse to interrupt the course of the law in his favor, and the brave knight is saved from death only by the plenary confession of his guilty sovereign. It is one of the very small number of Lope's pieces that have no comic

<sup>14</sup> *Comedias*, Tom II Madrid, 1609. Thrice at least, — viz in this play, in his "Fuente Ovejuna," and in his "Peribañez," — Lope has shown us commanders of the great military orders of his country in very odious colors, representing them as men of the most fierce pride and the grossest passions, like the Front-de-Bœuf of Ivanhoe

<sup>15</sup> Old copies of this play are excessively scarce, and I obtained, therefore, many years ago, a manuscript of it, from which it was reprinted twice in this country by Mr F Sales, in his "Obras Maestras Dramáticas" (Boston, 1828 and 1840), the last time with corrections, kindly furnished by Don A Duran, of Madrid, — a curious fact in Spanish bibliography, and one that should be mentioned to the honor of Mr. Sales, whose various publications have done much to spread the love of Spanish literature in the United States,

and to whom I am indebted for my first knowledge of it. The same play is well known on the modern Spanish stage, and has been reprinted, both at Madrid and London, with large alterations, under the title of "Sancho Ortiz de las Roelas." An excellent abstract of it, in its original state, and faithful translations of parts of it, are to be found in Lord Holland's *Life of Lope* (Vol I. pp 155–200); out of which, and not out of the Spanish original, Baron Zedlitz composed "Der Stern von Sevilla"; a play by no means without merit, which was printed at Stuttgart in 1830, and has been often acted in different parts of Germany. The localities referred to in the "Estrella de Sevilla," including the house of Bustos Tabera, the lover of Estrella, are still shown at Seville. *Latour, Études sur l'Espagne*, Paris, 1855, Tom. II. p. 52, etc.

and distracting underplot, and is to be placed among the loftiest of his efforts. Not a few of its scenes are admirable ; especially that in which the king urges the knight to kill his friend ; that in which the lovely and innocent creature whom the knight is about to marry receives, in the midst of the frank and delightful expressions of her happiness, the dead body of her brother, who has been slain by her lover ; and that in which the Alcaldes solemnly refuse to wrest the law in obedience to the royal commands. The conclusion is better than that in the tragedy of Corneille. The lady abandons the world and retires to a convent.

Of the great number of Lope's heroic dramas on national subjects, a few may be noticed, in order to indicate the direction he gave to this division of his theatre. One, for instance, is on the story of Bamba, taken from the plough to be made king of Spain ;<sup>16</sup> and another, "The Last Goth," is on the popular traditions of the loss of Spain by Roderic ;<sup>17</sup> — the first being among the earliest of his published plays,<sup>18</sup> and the last not published till twelve years after his death, but both \*written in one spirit and upon \* 231 the same system. On the attractive subject of Bernardo del Carpio he has several dramas. One is called "The Youthful Adventures of Bernardo," and relates his exploits down to the time when he discovered the secret of his birth. Another, called "Achievements of Bernardo del Carpio," I have never seen, but it is among the plays Lord Holland had read. And a third, "Marriage in Death," involves the misconduct of

<sup>16</sup> Comedias, Tom I, Valladolid, 1604, ff 91, etc, in which Lope has wisely followed the old monkish traditions, rather than either the "Crónica General," (Parte II. c 51,) or the yet more sobered account of Mariana (Hist., Lib. VI c 12).

<sup>17</sup> Comedias, Tom XXV, Caragoça, 1647, ff 369, etc. It is called "Tragico-comedia."

King Alfonso, and the heart-rending scene in which the dead body of Bernardo's father is delivered to the hero, who has sacrificed everything to filial piety, and now finds himself crushed and ruined by it.<sup>19</sup> The seven Infantes of Lara are not passed over, as we see both in the play that bears their name, and in the more striking one on the story of Mudarra, "El Bastardo Mudarra."<sup>20</sup> Indeed, it seems as if no available point in the national annals were missed by Lope;<sup>21</sup> and that, after bringing on the stage the great events in Spanish history and tradition consecutively down to his own times, he looks round on all sides for subjects, at home and abroad, taking one from the usurpation of Boris Gudunow at Moscow, in 1606,<sup>22</sup> another from the conquest of Arauco, in 1560,<sup>23</sup> and another from the great league that ended with the battle of Lepanto in 1571; in which last, to avoid the awkwardness of a

sea-fight on the stage, he is guilty of introducing

\* 232 the greater awkwardness of an allegorical \* figure of Spain describing the battle to the audience in Madrid, at the very moment when it is supposed to be going on near the shores of Greece.<sup>24</sup>

<sup>19</sup> The first two of these plays, which are not to be found in the collected dramatic works of Lope, have often been printed separately; but the last occurs, I believe, only in the first volume of the *Comedias*, (Valladolid, 1604, f 98,) and in the reprints of it. It makes free use of the old ballads of Durandarte and Belerma.

<sup>20</sup> The "Siete Infantes de Lara" is in the *Comedias*, Tom V., Madrid, 1615, and the "Bastardo Mudarra" is in Tom XXIV., Zaragoza, 1641.

<sup>21</sup> Thus, the attractive story of "El Mejor Alcalde el Rey" is, as he himself tells us at the conclusion, taken from the fourth part of the "Crónica General."

<sup>22</sup> "El Gran Duque de Muscovia," *Comedias*, Tom. VII., Madrid, 1617

<sup>23</sup> "Arauco Domado," *Comedias*, Tom. XX., Madrid, 1629. The scene

is laid about 1560, but the play is intended as a compliment to the living son of the conqueror. In the *Dedication* to him, Lope asserts it to be a true history, but there is, of course, much invention mingled with it, especially in the parts that do honor to the Spaniards. Among its personages is the author of the "Araucana," Alonso de Ercilla, who comes upon the stage beating a drum! Another and earlier play of Lope may be compared with the "Arauco"; I mean "Los Guanches de Tenerife" (*Comedias*, Tom X., Madrid, 1620, f 128). It is on the similar subject of the conquest of the Canary Islands, in the time of Ferdinand and Isabella, and, as in the "Arauco Domado," the natives occupy much of the canvas.

<sup>24</sup> "La Santa Liga," *Comedias*, Tom. XV., Madrid, 1621.

The whole class of these heroic and historical dramas, it should be remembered, makes little claim to historical accuracy. A love story, filled as usual with hairbreadth escapes, jealous quarrels, and questions of honor, runs through nearly every one of them; and though, in some cases, we may trust to the facts set before us, as we must in "The Valiant Cespedes," where the poet gravely declares that all except the love adventures are strictly true,<sup>25</sup> still in no case can it be pretended, that the manners of an earlier age, or of foreign nations, are respected, or that the general coloring of the representation is to be regarded as faithful. Thus, in one play, we see Nero hurrying about the streets of Rome, like a Spanish gallant, with a guitar on his arm, and making love to his mistress at her grated window.<sup>26</sup> In another, Belisarius, in the days of his glory, is selected to act the part of Pyramus in an interlude before the Emperor Justinian, much as if he belonged to Nick Bottom's company, and afterwards has his eyes put out, on a charge of making love to the Empress.<sup>27</sup> And in yet a third, Cyrus the Great, after he is seated on his throne, marries

<sup>25</sup> "El Valiente Cespedes," *Comedias*, Tom XX, Madrid, 1629. This notice is specially given to the reader by Lope, out of tenderness to the reputation of Doña María de Cespedes, who does not appear in the play with all the dignity which those who, in Lope's time, claimed to be descended from her might exact at his hands.

<sup>26</sup> In "Roma Abrasada," Acto II. f. 89, already noticed, *ante*, p 219

XXV, Zaragoza, 1633,) as the work of

Montalvan, both he and Lope being then alive. And, after all, it turns out to belong to neither of them, for Von Schack found, in the Duke of Ossuna's admirable collection at Madrid, this very play in the handwriting of Mira de Mescua, and signed by him as its author. What renders the affair more odd is, that there is, with the autograph play, the autograph *aprovacion* of Lope, containing a graceful compliment to Mira de Mescua as the author, and dated July, 1625. (Nachtrage, 1854, 8vo, p 57) I leave both text and note, published several years before the date of this discovery, as they were originally printed, because they afford such amusing proof of a recklessness not uncommon among the publishers of Spanish dramas in the seventeenth century.

\* 233 a shepherdess.<sup>28</sup> But there \* is no end to such absurdities in Lope's plays; and the explanation of them all is, that they were not felt to be such at the time. Truth and faithfulness in regard to the facts, manners, and costume of a drama were not supposed to be more important, in the age of Lope, than an observation of the unities;—not more important than they were supposed to be a century later, in France, in the unending romances of Calprenède and Scudéry;—not more important than they are deemed in an Italian opera now:—so profound is the thought of the greatest of all the masters of the historical drama, that “the best in this kind are but shadows, and the worst are no worse, if imagination amend them.”

<sup>28</sup> “Contra Valor no hay Desdicha.” Like the last, it has been often reprinted. It begins with the romantic account of Cyrus's exposure to death, in consequence of his grandfather's dream, and ends with a battle and his victory over Astyages and all his enemies.

THE historical drama of Lope was but a deviation from the more truly national type of the “Comedia de Capa y Espada,” made by the introduction of historical names for its leading personages, instead of those that belong to fashionable and knightly life. This, however, was not the only deviation he made.<sup>1</sup> He went sometimes quite as far on the other side, and created a variety or subdivision of the theatre, founded on *common life*, in which the chief personages, like those of “The Watermaid,” and “The Slave of her Lover,” belong to the lower classes of society.<sup>2</sup> Of such dramas, he has left only a few, but these few are interesting.

\* Perhaps the best specimen of them is “The \* 235 Wise Man at Home,” in which the hero, if he

<sup>1</sup> We occasionally meet with the phrase *comedias de ruido*, but it does not mean a class of plays separated from the others by different rules of composition. It refers to the machinery used in their exhibition; so that *comedias de capa y espada*, and especially *comedias de santos*, which often demanded a large apparatus, were not unfrequently *comedias de ruido*, otherwise called *comedias de caso* or *comedias de fabrica*. In the same way *comedias de apariencias* were plays demanding much scenery and scene-shifting.

<sup>2</sup> “La Moza de Cantaro” and “La Esclava de su Galan” have continued to be favorites down to our own times. The first was printed at London, not many years ago, and the last at Paris, in Ochoa’s collection, 1838, 8vo, and at Bielefeld, in that of Schutz, 1840, 8vo.

Lope sometimes went very low down, among courtesans and rogues, for the subjects of his plays; as in the “Anzuelo de Fenisa,” (the story of which, I suppose, he took from the Decameron, VII<sup>th</sup> day, 10th tale,) “El Rufian Di-choso,” and some others.

may be so called, is Mendo, the son of a poor charcoal-burner.<sup>3</sup> He has married the only child of a respectable farmer, and is in an easy condition of life, with the road to advancement, at least in a gay course, open before him. But he prefers to remain where he is. He refuses the solicitations of a neighboring lawyer or clerk, engaged in public affairs, who would have the honest Mendo take upon himself the airs of an *hidalgo* and *caballero*. Especially upon what was then the great point in private life,—his relations with his pretty wife,—he shows his uniform good sense, while his more ambitious friend falls into serious embarrassments, and is obliged at last to come to him for counsel and help.

The doctrine of the piece is well explained in the following reply of Mendo to his friend, who had been urging him to lead a more showy life, and raise the external circumstances of his father.

He that was born to live in humble state  
 Makes but an awkward knight, do what you will.  
 My father means to die as he has lived,  
 The same plain collier that he always was ;  
 And I, too, must an honest ploughman die  
 'T is but a single step, or up or down ,  
 For men there must be that will plough and dig,  
 And, when the vase has once been filled, be sure  
 'T will always savor of what first it held <sup>4</sup>

The story is less important than it is in many of Lope's dramas; but the sketches of common life are

<sup>3</sup> Comedias, Tom. VI, Madrid, 1615, ff 101, etc. It may be worth notice, that the character of Mendo is like that of Camacho in the Second Part of Don Quixote, which was first printed in the same year, 1615. The resemblance between the two, however, is not very strong, and perhaps is wholly accidental, although Lope was not careful to make acknowledgments.

sometimes spirited, like the one in which Mendo describes his first sight of his future wife, busied in household work, and \* the elaborate scene \* 236 where his first child is christened.<sup>5</sup> The characters, on the other hand, are better defined and drawn than is common with him; and that of the plain, practically wise Mendo is sustained, from beginning to end, with consistency and skill, as well as with good dramatic effect.<sup>6</sup>

Another of these more domestic pieces is called "The Damsel Theodora," and shows how gladly and with what ingenuity Lope seized on the stories current in his time and turned them to dramatic account. The tale he now used, which bears the same title with the play, and is extremely simple in its structure, is claimed to have been written by an Aragonese, of whom we know only that his name was Alfonso.<sup>7</sup> The damsels Theodora, in this original fiction, is a slave in Tunis, and belongs to a Hungarian merchant living

<sup>5</sup> There is in these passages something of the euphuistical style then in favor, under the name of the *estilo culto*, with which Lope sometimes humored the more fashionable portions of his audience, though on other occasions he bore a decided testimony against it.

<sup>6</sup> This play, I think, gave the hint to Calderon for his "Alcalde de Zalamea," in which the character of Pedro Crespo, the peasant, is drawn with more than his accustomed distinctness. It is the last piece in the common collection of Calderon's *Comedias*, and nearly all its characters are happily touched.

<sup>7</sup> This is among the more curious of the old popular Spanish tales. N Antonio (Bib. Nov., Tom. I. p. 9) assigns no age to its author, and no date to the published story. Denis, in his "Chroniques de l'Espagne," etc., (Paris, 1839, 8vo, Tom. I. p. 285,) gives no additional light, but, in one of his notes, treats its ideas on natural history as those of the *moyen âge*. It seems, however, from internal evidence, to have

been composed after the fall of Granada. Gayangos gives editions of the "Donzella Teodor" in 1537 and 1540, and mentions an Arabic version of it, which leads him to the conjecture that the Aragonese, Alfonso, to whom Antonio attributes the story, is no other than the converted Jew, Pedro Alfonso, who in the twelfth century wrote the "Disciplina Clericalis." (See *ante*, Vol. I. pp. 63, 64, note, and the Spanish translation of this History, Tom. II. pp. 353-357.) But I cannot think it is older than the time of Charles V; probably not older than the capture of Tunis, in 1535. The copy I use is of 1726, showing that it was in favor in the eighteenth century, and I possess another printed for popular circulation about 1845. We find early allusions to the Donzella Teodor, as a well-known personage; for example, in "The Modest Man at Court" of Tirso de Molina, where one of the characters, speaking of a lady he admires, cries out, "Que Donzella Teodor!" Cigarralles de Toledo, Madrid, 1624, 4to, p. 158.

there, who has lost his whole fortune. At her suggestion, she is offered by her master to the king of Tunis, who is so much struck with her beauty and with the amount of her knowledge, that he purchases her at a price which re-establishes her master's condition. The point of the whole consists in the exhibition

of this knowledge through discussions with  
\* 237 \* learned men; but the subjects are most of them of the commonest kind, and the merit of the story is quite inconsiderable,—less, for instance, than that of “Friar Bacon,” in English, to which, in several respects, it may be compared.<sup>8</sup>

But Lope knew his audiences, and succeeded in adapting this old tale to their taste. The dams<sup>el</sup> Theodora, as he arranges her character for the stage, is the daughter of a professor at Toledo, and is educated in all the learning of her father's schools. She, however, is not raised by it above the influences of the tender passion, and, running away with her lover, is captured by a vessel from the coast of Barbary, and carried as a slave successively to Oran, to Constantinople, and finally to Persia, where she is sold to the Sultan for an immense sum on account of her rare knowledge, displayed in the last act of the play much as it is in the original tale of Alfonso, and sometimes in the same words. But the love intrigue, with a multitude of jealous troubles and adventures, runs through the whole; and as the Sultan is made to understand at last the relations of all the parties, who are strangely assembled before him, he gives the price

<sup>8</sup> The popular English story of “Fryer Bacon” hardly goes back further than to the end of the sixteenth century, though some of its materials may be traced to the “Gesta Romanorum.” Robert Greene's play on it was printed

in 1594. Both may be considered as running parallel with the story and play of the “Donzella Teodor,” so as to be read with advantage when comparing the Spanish drama with the English.

of the damsel as her dower, and marries her to the lover with whom she originally fled from Toledo. The principal jest, both in the drama and the story, is, that a learned doctor, who is defeated by Theodora in a public trial of wits, is bound by the terms of the contest to be stripped naked, and buys off his ignominy with a sum which goes still further to increase the lady's fortune and the content of her husband.<sup>9</sup>

The last of Lope's plays to be noticed among those whose subjects are drawn from common life is a more direct appeal, perhaps, than any other of its class to the popular feeling. It is his "Captives in Algiers,"<sup>10</sup> and has been already alluded to as partly borrowed or pilfered \* from a play of Cervantes. \* 238 In its first scenes, a Morisco of Valencia leaves the land where his race had suffered so cruelly, and, after establishing himself among those of his own faith in Algiers, returns by night as a corsair, and, from his familiar knowledge of the Spanish coast, where he was born, easily succeeds in carrying off a number of Christian captives. The fate of these victims, and that of others whom they find in Algiers, including a lover and his mistress, form the subject of the drama. In the course of it, we have scenes in which Christian Spaniards are publicly sold in the slave-market; Christian children torn from their parents and cajoled out of their faith;<sup>11</sup> and a Christian gentleman made to suffer the most dreadful forms of martyrdom for his religion; — in short, we have set before us whatever could most painfully and powerfully excite the interest and sympathy of an audience in Spain at a moment when such multi-

tudes of Spanish families were mourning the captivity of their children and friends.<sup>12</sup> It ends with an account of a play to be acted by the Christian slaves in one of their vast prison-houses, to celebrate the recent marriage of Philip the Third; from which, as well as from a reference to the magnificent festivities that followed it at Denia, in which Lope, as we know, took part, we may be sure that the "Cautivos de Argel" was written as late as 1598, and probably not much later.<sup>13</sup>

A love-story unites its rather incongruous materials into something like a connected whole; but the part we read with the most interest is that assigned to

Cervantes, who appears under his family name \* 239 of Saavedra, without \* disguise, though without

any mark of respect.<sup>14</sup> Considering that Lope took from him some of the best materials for this very piece, and that the sufferings and heroism of Cervantes at Algiers must necessarily have been present to his thoughts when he composed it, we can hardly do the popular poet any injustice by adding, that he ought either to have given Cervantes a more dignified part, and alluded to him with tenderness and consideration, or else have refrained from introducing him at all.

<sup>12</sup> See, *passim*, Haedo, "Historia de Argel" (Madrid, 1612, folio) He reckons the number of Christian captives, chiefly Spaniards, in Algiers, at twenty-five thousand

There are frequent intimations in Spanish plays of the return of renegades from Barbary to such portions of the coasts of their native land as were most familiar to them, for the purpose of carrying Christians into captivity; and Lope de Vega, in his "Peregrino en su Patria," Libro II, describes a particular spot on the shores of Valencia, where such violences had often occurred. No doubt they were common. See further the account, *post*, in Chapter XXV, of the "Redentor Cautivo" of

Matos Fragoso, and, in a note, that of the "Azote de su Patria," by Moreto. Cervantes, speaking as the captive in Don Quixote, says that these renegadoes could run over from Tetuan in the night, and, after a successful foray, return so as to sleep at home

<sup>13</sup> Lope, *Obras Suetas*, Tom III p. 377 I am much disposed to think the play referred to as acted in the prisons of Algiers is Lope's own moral play of the "Marriage of the Soul to Divine Love," in the second book of the "Peregrino en su Patria"

<sup>14</sup> The passages in which Cervantes occurs are on ff 245, 251, and especially 262 and 277, *Comedias*, Tom. XXV.

The three forms of Lope's drama which have thus far been considered, and which are nearly akin to each other,<sup>15</sup> were, no doubt, the spontaneous productions of his own genius; modified, indeed, by what he found already existing, and by the taste and will of the audiences for which he wrote, but still essentially his own. Probably, if he had been left to himself and to the mere influences of the theatre, he would have preferred to write no other dramas than such as would naturally come under one of these divisions. But neither he nor his audiences were permitted to settle the whole of this question. The Church, always powerful in Spain, but never so powerful as during the latter part of the reign of Philip the Second, when Lope was just rising into notice, was offended with the dramas then so much in favor, and not without reason. Their free love-stories, their duels, and, indeed, their ideas generally upon domestic life and personal character, have, unquestionably, anything but a Christian tone.<sup>16</sup> A contro-

<sup>15</sup> The fusion of the three classes may be seen at a glance in Lope's fine play, "El Mejor Alcalde el Rey," (Comedias, Tom XXI, Madrid, 1635,) founded on a passage in the fourth part of the "General Chronicle" (ed 1604, f 327). The hero and heroine belong to the condition of peasants, the person who makes the mischief is their liege lord; and, from the end of the second act, the king and one or two of the principal persons about the court play leading parts. On the whole, it ranks technically with the *comedias heróicas* or *historiales*, and yet the best and most important scenes are those relating to common life, while others of no little consequence belong to the class of *capa y espada*.

<sup>16</sup> How the Spanish theatre, as it existed in the time of Philip IV, ought to have been regarded, may be judged by the following remarks on such of its plays as continued to be represented at the end of the eighteenth century, read in 1796 to the Spanish Academy of

History, by Jovellanos, — a personage who will be noticed when we reach the period during which he lived.

"As for myself," says that wise and faithful magistrate, "I am persuaded there can be found no proof so decisive of the degradation of our taste as the cool indifference with which we tolerate the representation of dramas, in which modesty, the gentler affections, good faith, decency, and all the virtues and principles belonging to a sound morality, are openly trampled under foot. Do men believe that the innocence of childhood and the fervor of youth, that an idle and dainty nobility and an ignorant populace, can witness without injury such examples of effrontery and grossness, of an insolent and absurd affectation of honor, of contempt of justice and the laws, and of public and private duty, represented on the stage in the most lively colors, and rendered attractive by the enchantment of scenic illusions and the graces of music and verse? Let us, then, honestly confess

\* 240 versy, therefore, \* naturally arose concerning their lawfulness, and this controversy was continued till 1598, when, by a royal decree, the representation of secular plays in Madrid was entirely forbidden, and the common theatres were closed for nearly two years.<sup>17</sup>

Lope was compelled to accommodate himself to this new state of things, and seems to have done it easily and with his accustomed address. He had, as we have seen, early written *religious plays*, like the old Mysteries and Moralities; and he now undertook to infuse

their spirit into the more attractive forms of his

\* 241 \* secular drama, and thus produce an entertainment which, while it might satisfy the popular

the truth. Such a theatre is a public nuisance, and the government has no just alternative but to reform it or suppress it altogether." *Memorias de la Acad.*, Tom V p 397

Elsewhere, in the same excellent discourse, its author shows that he was by no means insensible to the poetical merits of the old theatre, whose moral influences he deprecated.

"I shall always be the first," he says, "to confess its inimitable beauties, the freshness of its inventions, the charm of its style, the flowing naturalness of its dialogue, the marvellous ingenuity of its plots, the ease with which everything is at last explained and adjusted; the brilliant interest, the humor, the wit, that mark every step as we advance,—but what matters all this, if this same drama, regarded in the light of truth and wisdom, is infected with vices and corruptions that can be tolerated neither by a sound state of morals nor by a wise public policy?" *Ibid.*, p 413

<sup>17</sup> C Pellicer, *Origen del Teatro*, Madrid, 1804, 12mo, Tom I. pp 142-148. Plays were prohibited in Barcelona in 1591 by the bishop; but the prohibition was not long respected, and in 1597 was renewed with increased earnestness. Bisbe y Vidal, *Tratado de las Comedias*, Barcelona, 1618, 12mo, f. 94;—a curious book, attacking the

Spanish theatre with more discretion than any other old treatise against it that I have read, but not with much effect. Its author would have all plays carefully examined and expurgated before they were licensed, and then would permit them to be performed, not by professional actors, but by persons belonging to the place where the representation was to occur, and known as respectable men and decent youths; for, he adds, "when this was done for hundreds of years, none of those strange vices were committed that are the consequence of our present modes" (f 106) Bisbe y Vidal is a pseudonyme for Juan Ferrer, the head of a large congregation of devout men at Barcelona, and a person who was so much scandalized at the state of the theatre in his time, that he published this attack on it for the benefit of the brotherhood whose spiritual leader he was. (Torres y Amat, *Biblioteca, Art Ferrer*) It is encumbered with theological learning; but less so than other similar works of the time, and runs into absurdities worthy the bigotry of the age and the ignorance of the people, as, for instance, when it attributes to the drama the introduction of heresy—el mayor mal que a una republica o reyno le puede venir—and the success of Luther's doctrines in Germany. Chap. XI. Ferrer was a Jesuit.

audiences of the capital, would avoid the rebukes of the Church. His success was as marked as it had been before ; and the new varieties of form in which his genius now disported itself were scarcely less striking.

His most obvious resource was the Scriptures, to which, as they had been used more than four centuries for dramatic purposes, on the greater religious festivals of the Spanish Church, the ecclesiastical powers could hardly, with a good grace, now make objection. Lope, therefore, resorted to them freely ; sometimes constructing dramas out of them which might be mistaken for the old *Mysteries*, were it not for their more poetical character, and their sometimes approaching so near to his own intriguing comedies, that, but for the religious parts, they might seem to belong to the merely secular and fashionable theatre that had just been interdicted.

Of the first, or more religious sort, his “Birth of Christ” may be taken as a specimen.<sup>18</sup> It is divided

<sup>18</sup> Comedias, Tom. XXIV., Zaragoza, 1641, ff 110, etc. Such plays were often acted at Christmas, and went under the name of *Nacimientos*, — a relique of the old dramas mentioned in the “Partidas,” and written in various forms after the time of Juan de la Encina and Gil Vicente. They seem, from hints in the “Viage” of Roxas, 1602, and elsewhere, to have been acted in private houses, in the churches, on the public stage, and in the streets, as they happened to be asked for. They were not exactly *autos*, but very like them, as may be seen from the “Nacimiento de Christo” by Lope de Vega, (in a curious volume entitled “Navidad y Corpus Christi Festejados,” Madrid, 1664, 4to, f. 346), — a drama quite different from this one, though bearing the same name ; and quite different from another *Nacimiento de Christo*, in the same volume, (f. 93,) attributed to Lope, and called “*Auto del Nacimiento de Christo*”

to *Nuestro Señor*.” There are besides, in this volume, *Nacimientos* attributed to Cubillo (f 375) and Valdivielso (f. 369)

“*Nacimientos*” continued to be represented chiefly in pantomime and in private houses through the eighteenth century, and into the nineteenth. I have a poetical tract, entitled “Disseño metrico en que se manifiesta un Nacimiento con las figuras correspondientes segun el estilo que se practica en las casas particulares de este corte, ec., por D. Antonio Manuel de Cárdenas, Conde del Sacro Palacio,” Madrid, 1766, 18mo. It is in the ballad style, and describes minutely how they borrowed the Madonna and child from a convent, the ox from a neighboring village, etc. Another similar description, but in *quintillas*, is entitled “*Liras a la Representacion del Drama, El Nacimiento, Pieza inedita de D J. B. Colomés*,” Valencia, 1807, 18mo.

into three acts, and begins in Paradise, immediately after the creation. The first scene introduces Satan, Pride, Beauty, and Envy; — Satan appearing with “dragon’s wings, a bushy wig, and above it a \* 242 serpent’s \* head”; and Envy carrying a heart in her hand and wearing snakes in her hair. After some discussion about the creation, Adam and Eve approach in the characters of King and Queen. Innocence, who is the clown and wit of the piece, and Grace, who is dressed in white, come in at the same time, and, while Satan and his friends are hidden in a thicket, hold the following dialogue, which may be regarded as characteristic, not only of this particular drama, but of the whole class to which it belongs: —

*Adam.* Here, Lady Queen, upon this couch of grass and flowers  
Sit down.

*Innocence.* Well, that’s good, i’ faith ;  
He calls her Lady Queen.

*Grace.* And don’t you see  
She is his wife ; flesh of his flesh indeed,  
And of his bone the bone ?

*Innocence.* That’s just as if  
You said, She, through his being, being hath. —  
What dainty compliments they pay each other !

*Grace.* Two persons are they, yet one flesh they are.

*Innocence.* And may their union last a thousand years,  
And in sweet peace continue evermore !

*Grace.* The king his father and his mother leaves  
For his fair queen.

*Innocence.* And leaves not overmuch,  
Since no man yet has been with parents born.  
But, in good faith, good master Adam,  
All fine as you go on, pranked out by Grace,  
I feel no little trouble at your course,  
Like that of other princes made of clay.  
But I admit it was a famous trick,  
In your most sovereign Lord, out of the mud  
A microcosm nice to make, and do it  
In one day.

*Grace.* He that the greater worlds could build  
By his commanding power alone, to him  
It was not much these lesser works on earth

To do. And see you not the two great lamps  
Which overhead he hung so fair?

*Innocence.*

And how

The earth he sowed with flowers, the heavens with stars?<sup>19</sup>

\* Immediately after the fall, and therefore, \* 243 according to the common Scriptural computation, about four thousand years before she was born, the Madonna appears and personally drives Satan down to perdition, while, at the same time, an Angel expels Adam and Eve from Paradise. The Divine Prince and the Celestial Emperor, as the Saviour and the Supreme Divinity are respectively called, then come upon the vacant stage, and, in a conference full of theological subtilties, arrange the system of man's redemption, which, at the Divine command, Gabriel,—

Accompanied with armies all of stars

descending to Galilee, announces as about to be accomplished by the birth of the Messiah. This ends the first act.

The second opens with the rejoicings of the Serpent, Sin, and Death,—confident that the World is now fairly given up to them. But their rejoicings are short. Clarionets are sounded, and Divine Grace appears on the upper portion of the stage, and at once expels the sinful rout from their boasted possessions;

<sup>19</sup> *Adan.* Aquí, Reyna, en esta alfóbra  
De yerua y flores te assienta

Porque es como ser su ser

Y en esta paz se eternizan.

explaining afterwards to the World, who now comes on as one of the personages of the scene, that the Holy Family are immediately to bring salvation to men.

The World replies with rapture :—

O holy Grace, already I behold them ;  
And, though the freezing night forbids, will haste  
To border round my hoar frost all with flowers ;  
To force the tender buds to spring again

\* 244 \* From out their shrunken branches ; and to loose  
The gentle streamlets from the hill-tops cold,  
That they may pour their liquid crystal down ;  
While the old founts, at my command, shall flow  
With milk, and ash-trees honey pure distil  
To satisfy our joyful appetites.<sup>21</sup>

The next scene is in Bethlehem, where Joseph and Mary appear begging for entrance at an inn, but, owing to the crowd, they are sent to a stable just outside the city, in whose contiguous fields shepherds and shepherdesses are seen suffering from the frosty night, but jesting and singing rude songs about it. In the midst of their troubles and merriment, an angel appears in a cloud announcing the birth of the Saviour ; and the second act is then concluded by the resolution of all to go and find the divine child and carry him their glad salutations.

The last act is chiefly taken up with discussions of the same subjects by the same shepherds and shepherdesses, and an account of the visit to the mother and child ; some parts of which are not without poetical merit. It ends with the appearance of the three Kings, preceded by dances of Gypsies and Negroes,

<sup>21</sup> Gracia santa, ya los veo

and with the worship and offerings brought by all to the new-born Saviour.

Such dramas do not seem to have been favorites with Lope, and perhaps were not favorites with his audiences. At least, few of them appear among his printed works;— the one just noticed, and another, called “The Creation of the World and Man’s First Sin,” being the most prominent and curious;<sup>22</sup> and one on the atonement, entitled “The Pledge Redeemed,” being the most wild and gross. But to the proper stories of the Scriptures he somewhat oftener resorted, and with characteristic talent. Thus, we have full-length plays on \* the history of Tobias and \* 245 the seven-times-wedded maid;<sup>23</sup> on the fair Esther and Ahasuerus;<sup>24</sup> and on the somewhat unsuitable subject of the Ravishment of Dinah, the daughter of Jacob, as it is told in the Book of Genesis.<sup>25</sup> In all these, and in the rest of the class to which they belong, Spanish manners and ideas, rather than Jewish, give their coloring to the scene; and the story, though substantially taken from the Hebrew records, is thus rendered much more attractive, for the purposes of its representation at Madrid, than it would have been in its original simplicity; as, for instance, in the case of the “Esther,” where a comic underplot between a coquettish shepherdess and her lover is much relied upon for the popular effect of the whole.<sup>26</sup>

<sup>22</sup> It is in the twenty-fourth volume of the *Comedias* of Lope, Madrid, 1632, and is one of the very few of his religious plays that have been occasionally reprinted.

<sup>23</sup> “*Historia de Tobias*,” *Comedias*, Tom. XV., Madrid, 1621, ff. 281, etc.

<sup>24</sup> “*La Hermosa Ester*,” *Ibid.*, ff. 151, etc.

<sup>25</sup> “*El Robo de Dina*,” *Comedias*,

Tom. XXIII., Madrid, 1638, ff. 118, etc. To this may be added a better one, in Tom. XXII., Madrid, 1635, “*Los Trabajos de Jacob*,” on the beautiful story of Joseph and his brethren.

<sup>26</sup> The underplot is slightly connected with the main story of Esther, by a proclamation of King Ahasuerus, calling before him all the fair maidens of his empire, which, coming to the ears of

Still, even these dramas were not able to satisfy audiences accustomed to the more national spirit of plays founded on fashionable life and intriguing adventures. A wider range, therefore, was taken. Striking religious events of all kinds—especially those found in the lives of holy men—were resorted to, and ingenious stories were constructed out of the

\* 246 \* miracles and sufferings of saints, which were often as interesting as the intrigues of Spanish gallants, or the achievements of the old Spanish heroes, and were sometimes hardly less free and wild. Saint Jerome, under the name of the “Cardinal of Bethlehem,” is brought upon the stage in one of them, first as a gay gallant, and afterwards as a saint scourged by angels, and triumphing, in open show, over Satan.<sup>27</sup> In another, San Diego of Alcalá rises, from being the attendant of a poor hermit, to be a general with military command, and, after committing most soldier-like atrocities in the Fortunate Islands, returns and dies at home in the odor of sanctity.<sup>28</sup> And in yet others, his-

Silena, the shepherdess, she insists upon leaving her lover, Selvagio, and trying the fortune of her beauty at court. She fails, and on her return is rejected by Selvagio, but still maintains her coquettish spirit to the last, and goes off saying or singing, as gayly as if it were part of an old ballad,—

For the vulture that flies apart,  
I left my little bird's nest,  
But still I can soften his heart,  
And soothe down his pride to rest

The best parts of the play are the more religious; like Esther's prayers in the first and last acts, and the ballad sung at the triumphant festival when Ahasuerus yields to her beauty, but the whole, like many other plays of the same sort, is intended, under the guise of a sacred subject, to serve the purposes of the secular theatre.

Perhaps one of the most amusing instances of incongruity in Lope, and their number is not few, is to be found

in the first *jornada* of the “Trabajos de Jacob,” where Joseph, at the moment he escapes from Potiphar's wife, leaving his cloak in her possession, says in soliloquy .—

So mayest thou, woman-like, upon my cloak  
Thy vengeance wreak, as the bull wreaks his  
wrath

Upon the cloak before him played, the man  
Meanwhile escaping safe.

Y assi haras en essa capa,  
Con venganza de muger,  
Lo que el toro suele hacer  
Del hombre que se escapa

Yet, absurd as the passage is for its incongruity, it may have been loudly applauded by an audience that thought much more of bull-fights than of the just rules of the drama.

torical subjects of a religious character are taken, like the story of the holy Bamba torn from the plough in the seventh century, and by miraculous command made king of Spain;<sup>29</sup> or like the life of the Moham-medan prince of Morocco, who, in 1593, was converted to Christianity and publicly baptized in presence of Philip the Second, with the heir of the throne for his godfather.<sup>30</sup>

All these, and many more like them, were represented with the consent of the ecclesiastical powers,—sometimes even in convents and other religious houses, but oftener in public, and always under auspices no less obviously religious.<sup>31</sup> The favorite mate-rials for such dramas, \* however, were found, at \* 247 last, almost exclusively in the lives of popular saints; and the number of plays filled with such his-tories and miracles was so great, soon after the year 1600, that they came to be considered as a class by themselves, under the name of "Comedias de Santos," or Saints' Plays. Lope wrote many of them. Besides

Such a baptism—and one brought on the stage, too—sounds very strange, but strange things of the sort occurred occa-sionally from the intimate relations that often subsisted between the Chris-tian captives in Barbary and their mis-believing masters. For instance, in 1646, the oldest son of the Bey of Tunis escaped to Palermo, for the ex-press purpose of becoming a Christian, and was there, with great ceremony, received into the bosom of the Chuich. See "Relacion de la Venida a Sicilia del Príncipe Mamet, hijo primogenito de Amat Dey de Tunis, a volverse

Who wrote the play I do not know, for the account of the festival, intending, perhaps, to pun, only says: "Por ser el *Autor* de la Compañía, la modestia le venera en silencio" A masque followed, a poetical *certamen*, etc., — but all under religious auspices. those already mentioned, we have from his pen dramatic compositions on the lives of Saint Francis, San Pedro de Nolasco, Saint Thomas Aquinas, Saint Julian, Saint Nicholas of Tolentino, Santa Teresa, three on San Isidro de Madrid, and not a few others. Many of them, like Saint Nicholas of Tolentino,<sup>32</sup> are very strange and extravagant; others are full of poetry; but perhaps none will give a more true idea of the entire class than the first one he wrote, on the subject of the favored saint of his own city, San Isidro de Madrid.<sup>33</sup>

It seems to have all the varieties of action and character that belong to the secular divisions of the Spanish drama. Scenes of stirring interest occur in

it among warriors just returned to Madrid from  
 \* 248 a \*successful foray against the Moors; gay  
 scenes, with rustic dancing and frolics, at the  
 marriage of Isidro and the birth of his son; and scenes  
 of broad farce with the sacristan, who complains, that,  
 owing to Isidro's power with Heaven, he no longer

<sup>32</sup> "San Nicolas de Tolentino," Comedias, Tom. XXIV, Zaragoza, 1641, ff. 167, etc. Each act, as is not uncommon in the old Spanish theatre, is a sort of separate play, with its separate list of personages prefixed. The first has twenty-one, among which are God, the Madonna, History, Mercy, Justice, Satan, etc. It opens with a masquerading scene in a public square, of no little spirit; immediately after which we have a scene in heaven, containing the Divine judgment on the soul of one who had died in mortal sin; then another spirited scene, in a public square, among loungers, with a sermon from a fervent, fanatical monk; and afterwards, successive scenes between Nicholas, who has been moved by this sermon to enter a convent, and his family, who consent to his purpose with reluctance; the whole ending with a dialogue of the rudest humor between Nicholas's servant, who is the buffoon

of the piece, and a servant-maid, to whom he was engaged to be married, but whom he now abandons, determined to follow his master into a religious seclusion, which, at the same time, he is making ridiculous by his jests and parodies. This is the first act. The other two acts are such as might be anticipated from it

<sup>33</sup> This is not either of the plays ordered by the city of Madrid to be acted in the open air in 1622, in honor of the canonization of San Isidro, and found in the twelfth volume of Lope's *Obras Sueltas*; though, on a comparison with these last, it will be seen that it was used in their composition. It, in fact, was printed five years earlier, in the seventh volume of Lope's *Comedias*, Madrid, 1617, and continued long in favor, for it is reprinted in Parte XXVIII. of "Comedias Escogidas de los Mejores Ingenios," Madrid, 1667, 4to.

gets fees for burials, and that he believes Death is gone to live elsewhere. But through the whole runs the loving and devout character of the Saint himself, giving it a sort of poetical unity and power. The angels come down to plough for him, that he may no longer incur reproach by neglecting his labors in order to attend mass; and at the touch of his goad, a spring of pure water, still looked upon with reverence, rises in a burning waste to refresh his unjust master. Popular songs and poetry, meanwhile,<sup>34</sup> with a parody of the old Moorish ballad of "Gentle River, Gentle River,"<sup>35</sup> and allusions to the holy image of Almudena, and the church of Saint Andrew, give life to the dialogue, as it goes on; — all familiar as household words at Madrid, and striking chords which, when this drama was first represented, still vibrated in every heart. At the end, the body of the Saint, after his death, is exposed before the well-known altar of his favorite church; and there, according to the old traditions, his former master and the queen come to worship him, and, with pious sacrilege, endeavor to bear away from his person relics for their own protection; but are punished on the spot by a miracle, which thus serves at once as the final and crowning testimony to the divine merits of the Saint, and as an appropriate *dénouement* for the piece.

No doubt, such a drama, extending over forty or fifty years of time, with its motley crowd of personages,—among whom are angels and demons, Envy,

Falsehood, and the River Manzanares, — would \* 249 now be accounted \* grotesque and irreverent, rather than anything else. But in the time of Lope, the audiences not only brought a willing faith to such representations, but received gladly an exhibition of the miracles which connected the saint they worshipped and his beneficent virtues with their own times and their personal well-being.<sup>36</sup> If to this we add the restraints on the theatre, and Lope's extraordinary facility, grace, and ingenuity, which never failed to consult and gratify the popular taste, we shall have all the elements necessary to explain the great number of religious dramas he composed, whether in the nature of Mysteries, Scripture stories, or lives of saints. They belonged to his age and country as much as he himself did.

But Lope adventured with success in another form of the drama, not only more grotesque than that of the full-length religious plays, but intended yet more directly for popular edification, — the “Autos Sacramentales,” or Sacramental Acts, — a sort of religious plays performed in the streets during the season when the gorgeous ceremonies of the “Corpus Christi” filled them with rejoicing crowds.<sup>37</sup> No form of the Spanish drama is older, and none had so long a reign, or maintained during its continuance so strong a hold on the

<sup>36</sup> How far these plays were felt to be religious by the crowds who witnessed them may be seen in a thousand ways; among the rest, by the fact mentioned by Madame d'Aulnoy, in 1679, that, when St. Anthony, on the stage, repeated his *Confiteor*, the audience all fell on their knees, smote their breasts heavily, and cried out, *Med culpó.* Voyage d'Espagne. À la Haye, 1693, 18mo, Tom. I. p. 56.

<sup>37</sup> *Auto* was originally a forensic term, from the Latin *actus*, and meant a de-

cree or a judgment of a court. Afterwards it was applied to these religious dramas, which were called *Autos sacramentales*, or *Autos del Corpus Christi*, and to the *autos de fe* of the Inquisition; in both cases, because they were considered solemn religious acts. Covarrubias, Tesoro de la Lengua Castellana, ad verb. *Auto*. general favor. Its representations, as we have already seen, may be found among the earliest intimations of the national literature ; and, as we shall learn hereafter, they were with difficulty suppressed by the royal authority after the middle of the eighteenth century. In the age of Lope, and in that immediately following, they were at the height of their success, and had become an important \* part of the religious cere- \* 250 monies arranged for the solemn sacramental festival to which they were devoted, not only in Madrid, but throughout Spain ; all the theatres being closed for a month to give place to them and to do them honor.<sup>38</sup>

Yet to our apprehensions, notwithstanding their religious claims, they are almost wholly gross and irreverent. Indeed, the very circumstances under which they were represented would seem to prove that they were not regarded as really solemn. A sort of rude mumming, which certainly had nothing grave about it, preceded them, as they advanced through the thronged streets, where the windows and balconies of the better sort of houses were hung with silks and tapestries to honor the occasion. First in this extraordinary procession came the figure of a misshapen marine monster,

<sup>38</sup> Great splendor was used, from the earliest times down to the present century, in the processions of the Corpus Christi throughout Spain, as may be judged from the accounts of them in Valencia, Seville, and Toledo, in the *Semanario Pintoresco*, 1839, p 167 ; 1840, p 187 ; and 1841, p 177. In those of Toledo, there is an intimation that Lope de Rueda was employed in the dramatic entertainments connected with them in 1561, and that Alonso Cisneros, Cristóbal Navarro, and other known writers for the rude popular stage of that time, were his successors ; — all serving to introduce Lope and Calderon

But, at all periods, from first to last, the proper *autos* were rude, gross, and

indecent. In fact, they were finally forbidden as such by Charles III in 1765. The wonder is that in a state of society claiming to be Christian they were sustained alike by the Church and the civil power ; for in 1609, Mariana, in his treatise “*De Spectaculis*,” had made it plain enough that they were unworthy all such countenance. In the Spanish version of this remarkable treatise, made by the great historian himself, I find one more chapter (the twelfth) in which he says that the most gross of all the dances (the *zarabanda*) was performed in the Corpus Christi ceremonies of the *autos* with all its indecent gestures. See *post*, p. 452, note, for the *Zarabanda*.

called the *Tarasca*, half serpent in form, borne by men concealed in its cumbrous bulk, and surmounted by another figure representing the Woman of Babylon,— the whole so managed as to fill with wonder and terror the poor country people that crowded round it, some of whose hats and caps were generally snatched away by the grinning beast, and regarded as the lawful plunder of his conductors.<sup>39</sup>

Then followed a company of fair children, with garlands on their heads, singing hymns and litanies of the Church; and sometimes companies of men and women with castanets, dancing the national dances. Two or more huge Moorish or negro giants, commonly called the *Gigantones*, made of pasteboard, came next, jumping about grotesquely, to the great alarm of some of the less experienced part of the crowd, and to \* 251 the \* great amusement of the rest. Then, with much pomp and fine music, appeared the priests, bearing the Host under a splendid canopy; and after them a long and devout procession, where was seen, in Madrid, the king, with a taper in his hand, like the meanest of his subjects, together with the great officers of state and foreign ambassadors, who all crowded in to swell the splendor of the scene.<sup>40</sup> Last of all came showy cars, filled with actors from the public theatres, who were to figure on the occasion, and add to its

<sup>40</sup> The most lively description I have seen of this procession is contained in the *loa* to Lope's first *fiesta* and *auto* (Obras Suetas, Tom. XVIII. pp 1-7) Another description, to suit the festival as it was got up about 1655-1665, will be found when we come to Calderon. It is given here as it occurred in the

period of Lope's success, and a fancy drawing of the procession, as it may have appeared at Madrid in 1623, is to be found in the *Semanario Pintoresco*, 1846, p 185. But Lope's *loa* is the best authority. A good authority for it, as it was got up in the provinces, may be found in Ovando's poetical description of it at Malaga in 1655, where, among other irreligious extravagances, Gypsies with tambourines danced in the procession *Ocios de Castalia por Juan de Ovando Santarem*, 4to, Malaga, 1663, f. 87, ec.

attractions, if not to its solemnity;— personages who constituted so important a part of the day's festivity, that the whole was often called, in popular phrase, The Festival of the Cars,— “La Fiesta de los Carros.”<sup>41</sup>

This procession — not, indeed, magnificent in the towns and hamlets of the provinces, as it was in the capital, but always as imposing as the resources of the place where it occurred could make it — stopped from time to time under awnings in front of the house of some distinguished person,— perhaps that of the President of the Council of Castile at Madrid, perhaps that of the *alcalde* of a village,— and there waited reverently till certain religious offices could be performed by the ecclesiastics; the multitude, all the while, kneeling, as if in church. As soon as these duties were over, or at a later hour of the day, the actors from the cars appeared on a neighboring stage, in the open air, and performed, according to their limited service, the sacramental *auto* prepared for the occasion, and always alluding to it directly. Of such *autos*, we know, on good authority, that Lope wrote about four hundred.<sup>42</sup>

Of these above thirty \* are still extant, including several in manuscript, and a considerable number which were published only that the towns and villages of the interior might enjoy the same devout pleasures that were enjoyed by the court and capital;— so universal was the fanaticism for this strange form of amusement, and so deeply was it seated in the popular character. Even Lope, on his death-bed, told Montalvan, that he regretted

<sup>41</sup> A good idea of the contents of the *carro* may be found in the description of the one met by Don Quixote, (Parte II. c. 11,) as he was returning from Toboso

<sup>42</sup> Montalvan, in his *Fama Póstuma*.

he had not given his whole life to writing *autos* and other similar religious poetry.<sup>43</sup>

At an earlier period, and perhaps as late as the time of Lope's first appearance, this part of the festival consisted of a very simple exhibition, accompanied with rustic songs, eclogues, and dancing, such as we find it in a large collection of manuscript *autos*, of which two that have been published are slight and rude in their structure and dialogue, and seem to date from a period as early as that of Lope;<sup>44</sup> but during his lifetime, and chiefly under his influence, it became a formal and well-defined popular entertainment, divided into three parts, each

\* 253 of which \* was quite distinct in its character from the others, and all of them dramatic.

<sup>43</sup> Preface of Joseph Ortis de Villena, prefixed to the *Autos* in Tom XVIII of the *Obras Sueltas*. They were not printed till 1644, nine years after Lope's death, and then they appeared at Zaragoza. One other *auto*, attributed to Lope, "El Tuano Castigado," occurs in a very rare volume, entitled "Navidad y Corpus Christi Festejados," collected by Isidro de Robles, and already referred to.

The whole number of Lope's *autos* as given by Chorley is printed and unquestionable, 18, others, more or less uncertain, 26, except three which are autographs.

<sup>44</sup> The manuscript collection mentioned in the text was acquired by the National Library at Madrid in 1844. It fills 468 leaves in folio, and contains ninety-five dramatic pieces. All of them are anonymous except one, which is said to be by Maestro Ferruz, and is on the subject of Cain and Abel; and all but one seem to be on religious subjects. This last is called "Entremes de las Esteras," and is the only one bearing that title. The rest are called *Coloquios*, *Farsas*, and *Autos*, nearly all being called *Autos*, but some of them *Farsas del Sacramento*, which seems to have been regarded as synonymous. One only is dated. It is called "Auto de la Resurreccion de Christo," and is licensed to be acted March 28, 1568.

Two have been published in the Museo Literario, 1844, by Don Eugenio de Tapia, of the Royal Library, Madrid, one of the well-known Spanish scholars and writers of our own time. The first, entitled "Auto de los Desposorios de Moisen," is a very slight performance, and, except the Prologue or Argument, is in prose. The other, called "Auto de la Residencia del Hombrie," is no better, but is all in verse. In a subsequent number, Don Eugenio publishes a complete list of the titles, with the *figuras* or personages that appear in each. It is much to be desired that all the contents of this MS should be properly edited. Meanwhile, we know that *saynetas* were sometimes interposed between different parts of the performances, that allegorical personages were abundant; and that the *Bobo* or Fool constantly recurs. Some of them were probably earlier than the time of Lope de Vega; perhaps as early as the time of Lope de Rueda, who, as I have already said in note 38, *ante*, may have prepared *autos* of some kind for the city of Toledo, in 1561. But the language and versification of the two pieces that have been printed, and the general air of the fictions and allegories of the rest, so far as we can gather them from what has been published, indicate a period nearly or quite as late as that of Lope de Vega.

First of all, in its more completed state, came the *loa*. This was always in the nature of a prologue; but sometimes, in form, it was a dialogue spoken by two or more actors. One of the best of Lope's is of this kind. It is filled with the troubles of a peasant who has come to Madrid in order to see these very shows, and has lost his wife in the crowd; but, just as he has quite consoled himself and satisfied his conscience by determining to have her cried once or twice, and then to give her up as a lucky loss and take another, she comes in and describes with much spirit the wonders of the procession she had seen, precisely as her audience themselves had just seen it; thus making, in the form of a prologue, a most amusing and appropriate introduction for the drama that was to follow.<sup>45</sup> Another of Lope's *loas* is a discussion between a gay gallant and a peasant, who talks, in rustic fashion, on the subject of the doctrine of transubstantiation.<sup>46</sup> Another is given in the character of a Morisco, and is a monologue, in the dialect of the speaker, on the advantages and disadvantages of his turning Christian in earnest, after having for some time made his living fraudulently by begging in the assumed character of a Christian pilgrim.<sup>47</sup> All of them are amusing, though burlesque; but some of them are anything rather than religious.

After the *loa* came an *entremes*. All that remain to us of Lope's *entremeses* are mere farces, like the interludes used every day in the secular theatres. In one

<sup>45</sup> This is the first of the *loas* in the volume, and, on the whole, the best. My friend, Mr J. R. Chorley, whose knowledge of Spanish literature, and especially of whatever relates to Lope, is so ample and accurate, doubts whether the *loas* that have been published among Lope's Works are all really his,

and refers me, for proof, to the Preface of the *Comedias*, Tom VIII, and to the Prologo of *Pando y Mier* to the *Autos* of *Calderon*. I have no doubt he is right. For an account of *Loas*, see *post*, Chap XXVI.

instance he makes an *entremes* a satire upon lawyers, in which a member of the craft, as in the old French "Maistre Pathelin," is cheated and robbed by a seemingly simple peasant, who first renders him extremely \* ridiculous, and then escapes by disguising himself as a blind ballad-singer, and dancing and singing in honor of the festival,—a conclusion which seems to be peculiarly irreverent for this particular occasion.<sup>48</sup> In another instance, he ridicules the poets of his time by bringing on the stage a lady who pretends she has just come from the Indies, with a fortune, in order to marry a poet, and succeeds in her purpose; but both find themselves deceived, for the lady has no income but such as is gained by a pair of castanets, and her husband turns out to be a ballad-maker. Both, however, have good sense enough to be content with their bargain, and agree to go through the world together singing and dancing ballads, of which, by way of *finale* to the *entremes*, they at once give the crowd a specimen.<sup>49</sup> Yet another of Lope's successful attempts in this way is an interlude containing within itself the representation of a play on the story of Helen, which reminds us of the similar entertainment of Pyramus and Thisbe in the "Midsummer Night's Dream"; but it breaks off in the middle,—the actor who plays Paris running away in earnest with the actress who plays Helen, and the piece ending with a burlesque scene of confusions and reconciliations.<sup>50</sup> And finally, another is a parody of the procession itself, with its giants, cars, and all; treating the whole with the gayest ridicule.<sup>51</sup>

Thus far, all has been avowedly comic in the dramatic exhibitions of these religious festivals. But the *autos* or sacramental acts themselves, with which the whole concluded, and to which all that preceded was only introductory, claim to be more grave in their general tone, though in some cases, like the prologues and interludes, parts of them are too whimsical and extravagant to be anything but amusing. “The Bridge of the World” is one of this class.<sup>52</sup> It represents the Prince of Darkness placing the giant Leviathan on the bridge of the world, to defend its passage against all \* comers who do not confess his supremacy. Adam and Eve, who, as we are told in the directions to the players, appear “dressed very gallantly after the French fashion,” are naturally the first that present themselves.<sup>53</sup> They subscribe to the hard condition, and pass over in sight of the audience. In the same manner, as the dialogue informs us, the patriarchs, with Moses, David, and Solomon, go over; but at last the Knight of the Cross, “the Celestial Amadis of Greece,” as he is called, appears in person, overthrows the pretensions of the Prince of Darkness, and leads the Soul of Man in triumph across the fatal passage. The whole is obviously a parody of the old story of the Giant defending the Bridge of Mantible;<sup>54</sup> and when to this are added parodies of the ballad of “Count Claros” applied to Adam,<sup>55</sup>

<sup>52</sup> It is the last in the collection, and, as to its poetry, one of the best of the twelve, if not the very best.

<sup>53</sup> The direction to the actors is, “Salen Adan y Eva vestidos de Franceses muy galanes.”

<sup>54</sup> See Historia del Emperador Carlos Magno, Cap. 26, 30, etc.

<sup>55</sup> The giant says to Adam, referring to the temptation.—

which is out of the beautiful and well-known old ballad of the “Conde Claros,” beginning “Pésame de vos, el Conde,” which has been already noticed, *ante*, Vol. I. p. 109. It must have been perfectly familiar to many persons in Lope’s audience, and how the allusion to it could have produced any other than an irreverent effect I know not.

and of other old ballads applied to the Saviour,<sup>56</sup> the confusion of allegory and farce, of religion and folly, seems to be complete.

Others of the *autos* are more uniformly grave. “The Harvest” is a spiritualized version of the parable in Saint Matthew on the Field that was sowed with Good Seed and with Tares,<sup>57</sup> and is carried through with some degree of solemnity; but the unhappy tares, that are threatened with being cut down and cast into the fire, are nothing less than Judaism, Idolatry, Heresy, and all Sectarianism, who are hardly to be saved from their fate by their conversion through the mercy of the Lord of the Harvest and his fair spouse, the Church. However, notwithstanding a few such absurdities and awkwardnesses in the allegory, and some very misplaced compliments to the reigning

royal family, this is one of the best of the class

\* 256 to which it belongs, and \* one of the most solemn. Another of those open to less reproach than usual is called “The Return from Egypt,”<sup>58</sup> which, with its shepherds and gypsies, is not without the grace of an eclogue, and, with its ballads and popular songs, has some of the charms that belong to Lope’s secular dramas. These two, with “The Wolf turned Shepherd,”<sup>59</sup>—which is an allegory on the subject of the Devil taking upon himself the character of the true shepherd of the flock,—constitute as fair, or perhaps, rather, as favorable, specimens of the genuine Spanish *auto* as can be found in the elder school. All of them rest on the grossest of the prevailing notions

<sup>56</sup> The address of the music, “Si dormis, Príncipe mio,” refers to the ballads about those whose lady-loves had been carried captive among the Moors.

<sup>57</sup> “La Siega,” (Obras Sueltas, Tom. XVIII. p 328,) of which there is an

in religion ; all of them appeal, in every way they can, whether light or serious, to the popular feelings and prejudices ; many of them are imbued with the spirit of the old national poetry ; and these, taken together, are the foundation on which their success rested,—a success which, if we consider the religious object of the festival, was undoubtedly of extraordinary extent and extraordinary duration.

But the *entremeses* or interludes that were used to enliven the dramatic part of this rude, but gorgeous ceremonial, were by no means confined to it. They were, as has been intimated, acted daily in the public theatres, where, from the time when the full-length dramas were introduced, they had been inserted between their different divisions or acts, to afford a lighter amusement to the audience. Lope wrote a great number of them ; how many is not known. From their slight character, however, hardly more than thirty have been preserved, and some of those that bear his name are probably not his. But we have enough that are genuine to show that in this, as in the other departments of his drama, popular effect was chiefly sought, and that, as everywhere else, the flexibility of his genius is manifested in the variety of forms in which it exhibits its resources. Generally speaking, those we possess are written in prose, are very short, and have no plot ; being merely farcical dialogues drawn from common or vulgar life.

The “*Melisendra*,” however, one of the first published, \* is an exception to this remark. It \* 257 is composed almost entirely in verse, is divided into acts, and has a *loa* or prologue ;—in short, it is a parody in the form of a regular play, founded on the story of Gayferos and Melisendra in the old bal-

lads.<sup>60</sup> The “Padre Engañado,” which Holcroft brought upon the English stage under the name of “The Father Outwitted,” is another exception, and is a lively farce of eight or ten pages, on the ridiculous troubles of a father who gives his own daughter in disguise to the very lover from whom he supposed he had carefully shut her up.<sup>61</sup> But most of them, like “The Indian,” “The Cradle,” and “The Robbers Cheated,” would occupy hardly more than fifteen minutes each in their representation,— slight dialogues of the broadest farce, continued as long as the time between the acts would conveniently permit, and then abruptly terminated to give place to the principal drama.<sup>62</sup> A vigorous spirit, and a popular, rude humor are rarely wanting in them.

But Lope, whenever he wrote for the theatre, seems to have remembered its old foundations, and to have shown a tendency to rest upon them as much as possible of his own drama. This is apparent in the very *entremeses* we have just noticed. They are to be traced back to Lope de Rueda, whose short farces were of the same nature, and were used, after the introduction of dramas of three acts, in the same way.<sup>63</sup> It is apparent, too, as we have seen, in his moral and allegorical plays, in his sacramental acts, and in his dramas taken from the Scripture and the lives of the saints; all founded on the earlier *Mysteries* and *Moralities*. And now we find the same tendency again in yet one more

<sup>60</sup> *Primera Parte de Entremeses*, “Entremeses Primero de Melisendia,” *Comedias*, Tom I., Valladolid, 1604, 4to, ff. 333, etc. It is founded on the fine old ballads of the *Romancero* of 1550—1555, “Asentado está Gayferos,” etc.; the same out of which the puppet-show man made his exhibition at the inn before Don Quixote, Parte II. c. 26.

<sup>61</sup> *Comedias*, Valladolid, 1604, Tom. I. p. 337.

<sup>62</sup> All three of these pieces are in the same volume.

<sup>63</sup> “Lope de Rueda,” says Lope de Vega, “was an example of these precepts in Spain; for from him has come down the custom of calling the old plays *Entremeses*.” (*Obras Seltas*, Tom. IV. p. 407) A single scene taken out and used in this way as an *entremes* was called a *Paso* or “passage.” We have noted such by Lope de Rueda, etc. See *ante*, pp. 48, 53.

class, that of his eclogues \* and pastorals, — a \* 258 form of the drama which may be recognized at least as early as the time of Juan de la Enzina. Of these Lope wrote a considerable number, that are still extant, — twenty or more, — not a few of which bear distinct marks of their origin in that singular mixture of a bucolic and a religious tone that is seen in the first beginnings of a public theatre in Spain.

Some of the eclogues of Lope, we know, were performed ; as, for instance, “The Wood and no Love in it,” — *Selva sin Amor*, — which was represented with costly pomp and much ingenious apparatus before the king and the royal family.<sup>64</sup> Others, like seven or eight in his “*Pastores de Belen*,” and one published under the name of “*Tomé de Burguillos*,” — all of which claim to have been arranged for Christmas and different religious festivals, — so much resemble such as we know were really performed on these occasions, that we can hardly doubt that, like those just mentioned, they also were represented.<sup>65</sup> While yet others, like the first he ever published, called the “*Amorosa*,” and his last, addressed to Philis, together with one on the death of his wife, and one on the death of his son, were probably intended only to be read.<sup>66</sup> But all may have been acted, if we are to judge from the habits of the age, when, as we know, eclogues never destined for the stage were represented, as much as if they had been expressly written for it.<sup>67</sup> At

I. p. 352,) and most of those in the "Arcadua," (Tom. VI,) were acted, and written in order to be acted. Why the poem to his friend Claudio, (Tom. IX. p. 355,) which is in fact an account of some passages in his own life, with nothing pastoral in its tone or form, is called "an eclogue," I do not know, unless he went to the Greek *ἐκλογή*,

nor will I undertake to assign to any particular class the "Military Dialogue in Honor of the Marquis of Espinoia," (Tom. X. p. 337,) though I think it is dramatic in its structure, and was probably represented, on some show occasion, before the Marquis himself. Such representations occurred in other countries about the same period, but rarely, I think, of a bucolic nature. One, however, is mentioned by that prince of gossips, *Talemant des Réaux*, in his notice of "La Presidente Perrot," as performed in Paris, in a private house.

LOPE DE VEGA, CONTINUED — HIS CHARACTERISTICS AS A DRAMATIC WRITER. — HIS STORIES, CHARACTERS, AND DIALOGUE — HIS DISREGARD OF RULES, OF HISTORICAL TRUTH, AND MORAL PROPERTY — HIS COMIC UNDERPLOT AND GRACIOSO — HIS POETICAL STYLE AND MANNER — HIS FITNESS TO WIN GENERAL FAVOR. — HIS SUCCESS — HIS FORTUNE, AND THE VAST AMOUNT OF HIS WORKS.

THE extraordinary variety in the character of Lope's dramas is as remarkable as their number, and contributed not a little to render him the monarch of the stage while he lived, and the great master of the national theatre ever since. But though this vast variety and inexhaustible fertility constitute, as it were, the two great corner-stones on which his success rested, still there were other circumstances attending it that should by no means be overlooked, when we are examining, not only the surprising results themselves, but the means by which they were obtained.

The first of these is the principle which may be considered as running through the whole of his full-length plays, — that of making all other interests subordinate to the interest of the story. Thus, the characters are a matter evidently of inferior moment with him ; so that the idea of exhibiting a single passion giving a consistent direction to all the energies of a strong will, as in the case of Richard the Third, or, as in the case of Macbeth, distracting them all no less consistently, does not occur in the whole range of his dramas. Sometimes, it is true, though rarely, as in *Sancho Ortiz*, he develops a marked and generous spirit, with

distinctive lineaments ; but in no case is this  
\* 261 the \* main object, and in no case is it done with  
the appearance of an artist-like skill or a delib-  
erate purpose. On the contrary a great majority of  
his characters are almost as much standing masks as  
Pantalone is on the Venetian stage, or Scapin on the  
French. The *primer galan*, or hero, all love, honor, and  
jealousy ; the *dama*, or heroine, no less loving and  
jealous, but yet more rash and heedless ; and the  
brother, or if not the brother, then the *barba*, or old  
man and father, ready to cover the stage with blood,  
if the lover has even been seen in the house of the  
heroine,— these recur continually, and serve, not only  
in the secular, but often in the religious pieces, as the  
fixed points round which the different actions, with  
their different incidents, are made to revolve.

In the same way, the dialogue is used chiefly to  
bring out the plot, and hardly at all to bring out the  
characters. This is obvious in the long speeches,  
sometimes consisting of two or three hundred verses,  
which are as purely narrative as an Italian *novella*, and  
often much like one ; and it is seen, too, in the crowd  
of incidents that compose the action, which not infre-  
quently fails to find space sufficient to spread out all  
its ingenious involutions, and make them easily intelli-  
gible ; a difficulty of which Lope once gives his audi-  
ence fair warning, telling them at the outset of the  
piece, that they must not lose a syllable of the first  
explanation, or they will certainly fail to understand  
the curious plot that follows.

Obeying the same principle, he sacrifices regularity  
and congruity in his stories, if he can but make them  
interesting. His longer plays, indeed, are regularly  
divided into three *jornadas*, or acts ; but this, though

he claims it as a merit, is not an arrangement of his own invention, and is, moreover, merely an arbitrary mode of producing the pauses necessary to the convenience of the actors and spectators ; pauses which, in Lope's theatre, have too often nothing to do with the structure and proportions of the piece itself.<sup>1</sup> As for the six plays which, \* as he intimates, were written according to the rules, Spanish criticism has sought for them in vain ;<sup>2</sup> nor do any of them, probably, exist now, if any ever existed, unless "La Melindrosa" — The Prude — may have been one of them. But he avows very honestly that he regards rules of all kinds only as obstacles to his success. "When I am going to write a play," he says, "I lock up all precepts, and cast Terence and Plautus out of my study, lest they should cry out against me, as truth is wont to do even from such dumb volumes ; for I write according to the art invented by those who sought the applause of the multitude, whom it is but just to humor in their folly, since it is they who pay for it." <sup>3</sup>

The extent to which, following this principle, Lope sacrificed dramatic probabilities and possibilities, geog-

In his *Dorotea* (Act III sc 4) Lope goes out of his way to ridicule the precepts of art, as he calls them ; but Figueroa (*Placa Universal*, 1615, f. 322, b) rebukes him for thus

yielding to vulgar taste and popular ignorance

When, however, he published the twelfth volume of his *Comedias*, 1619, he seemed to fancy that he was writing more carefully, for he says, he wrote them not for the multitude, but for fourteen or fifteen people "que tuvo en su imaginacion" It would be difficult, however, to tell how he would apply this remark to "El Marques de Mantua," which is the seventh in the volume, or the "Fuente Ovejuna," which is the last.

raphy, history, and a decent morality, can be properly understood only by reading a large number of his plays. But a few instances will partially illustrate it. In his "First King of Castile," the events fill thirty-six years in the middle of the eleventh century, and a Gypsy is introduced four hundred years before Gypsies were known in Europe.<sup>4</sup> The whole romantic story of the Seven Infantes of Lara is put into the play of "Mudarra."<sup>5</sup> In "Spotless Purity," Job, David, Jeremiah, Saint John the Baptist, and the University of Salamanca figure together;<sup>6</sup> and in "The Birth of Christ" we have, for the two extremes, the creation of the world and the Nativity.<sup>7</sup> So much for

\* 263 history. Geography is treated \*no better, when Constantinople is declared to be four thousand leagues from Madrid,<sup>8</sup> and Spaniards are made to disembark from a ship in Hungary.<sup>9</sup> And as to morals, it is not easy to tell how Lope reconciled his opinions to his practice. In the Preface to the twentieth volume of his Theatre, he declares, in reference to his own "Wise Vengeance," that its title is absurd, because all revenge is unwise and unlawful; and yet it seems as if one half of his plays go to justify it. It is made a merit in *San Isidro*, that he stole his master's grain to give it to the starving birds.<sup>10</sup>

<sup>9</sup> This extraordinary disembarkation

takes place in the "Animal de Ungria" (*Comedias*, Tom. IX, Barcelona, 1618, ff. 137, 138). One is naturally reminded of Shakespeare's "Winter's Tale", but it is curious that the Duke de Luynes, a favorite minister of state to Louis XIII, made precisely the same mistake, at about the same time, to Lord Herbert of Cherbury, then (1619-1621) ambassador in France. But Lope certainly knew better, and I doubt not Shakespeare did, however ignorant the French statesman may have been. Herbert's *Life*, by himself, London, 1809, 8vo, p. 217.

<sup>10</sup> See "San Isidro Labrador," in Co-

The prayers of Nicolas de Tolentino are accounted sufficient for the salvation of a kinsman who, after a dissolute life, had died in an act of mortal sin;<sup>11</sup> and the cruel and atrocious conquest of Arauco is claimed as an honor to a noble family and a grace to the national escutcheon.<sup>12</sup>

But all these violations of the truth of fact and of the commonest rules of Christian morals, of which nobody was more aware than their perpetrator, were overlooked by Lope himself, and by his audiences, in the general interest of the plot. A dramatized novel was the form he chose to give to his plays, and he succeeded in settling it as the main principle of the Spanish stage. "Tales," he declares, "have the same rules with dramas, the purpose of whose authors is to content and please the public, \* though \* 264 the rules of art may be strangled by it."<sup>13</sup> And elsewhere, when defending his opinions, he says: "Keep the explanation of the story doubtful till the last scene; for, as soon as the public know how it will end, they turn their faces to the door, and their backs to the stage."<sup>14</sup> This had never been said before; and though some traces of intriguing plots are to be found from the time of Torres de Naharro, yet nobody ever thought of relying upon them, in this way, for success,

till Lope had set the example, which his school have so faithfully followed.

Another element which he established in the Spanish Drama was the comic underplot. Nearly all his plays, "The Star of Seville" being the only brilliant exception, have it;—sometimes in a pastoral form, but generally as a simple admixture of farce. The characters contained in this portion of each of his dramas are as much standing masks as those in the graver portion, and were perfectly well known under the name of the *graciosos* and *graciosas*, or drolls, to which was afterwards added the *velete*,<sup>144</sup> or a little, old, testy esquire, who is always boasting of his descent, and is often employed in teasing the *gracioso*. In most cases they constitute a parody on the dialogue and adventures of the hero and heroine, as Sancho is partly a parody of Don Quixote, and in most cases they are the servants of the respective parties;—the men being good-humored cowards and gluttons, the women mischievous and coquettish, and both full of wit, malice, and an affected simplicity. Slight traces of such characters are to be found on the Spanish stage as far back as the servants in the "Serafina" of Torres Naharro; and in the middle of that century, the *bobo*, or fool, figures freely in the farces of Lope de Rueda, as the *simple* had done before in those of Enzina. But the variously witty *gracioso*, the full-blown parody of the heroic characters of the play, the dramatic *pícaro*,

is the work of Lope de Vega. He first introduced \* 265 it into the "Francesilla," where the oldest of the tribe, under the name of Tristan, was represented by Rios, a famous actor of his time,

<sup>144</sup> Figueroa (Pasagero, 1617, f. 111) calls the *velete* "natural enemigo del lacayo."

and produced a great effect; <sup>15</sup> — an event which, Lope tells us, in the Dedication of the drama itself, in 1620, to his friend Montalvan, occurred before that friend was born, and therefore before the year 1602.

From this time the *gracioso* is found in nearly all of his plays, and in nearly every other play produced on the Spanish stage, from which it passed, first to the French, and then to all the other theatres of modern times. Excellent specimens of it may be noted in the sacristan of the “Captives of Algiers,” in the servants of the “Saint John’s Eve,” and in the servants of the “Ugly Beauty”; in all which, as well as in many more, the *gracioso* is skilfully turned to account, by being made partly to ridicule the heroic extravagances and rhodomontade of the leading personages, and partly to shield the author himself from rebuke by good-humoredly confessing for him that he was quite aware he deserved it. Of such we may say, as Don Quixote did, when speaking of the whole class to the Bachelor Samson Carrasco, that they are the shrewdest fellows in their respective plays. But of others, whose ill-advised wit is inopportunely thrust,

<sup>15</sup> See the Dedication of the “France-silla” to Juan Pérez de Montalvan, in *Comedias*, Tom XIII., Madrid, 1620, where we have the following words: “And note in passing that this is the first play in which was introduced the character of the jester, which has been so often repeated since. Ríos, unique in all parts, played it, and is worthy of this record I pray you to read it as a new thing; for when I wrote it you were not born.” The *gracioso* was generally distinguished by his name on the Spanish stage, as he was afterwards on the French stage. Thus, Calderon often calls his *gracioso* Clarin, or Trumpet; as Molière called his Sganarelle. The *simple*, who, as I have said, can be traced back to Enzina, and who was, no doubt, the same with the *bobo*, is mentioned as very successful, in 1596,

by Lopez Pinciano, who, in his “Filosofía Antigua Poética,” (1596, p 402,) says, “They are characters that commonly amuse more than any others that appear in the plays.” The *gracioso* of Lope was, like the rest of his theatre, founded on what existed before his time; only the character itself was further developed, and received a new name. D Quixote, Clemencin, Parte II. cap. 3, note

But he was eminently in the national taste, and rose, at once, in Lope’s hands, to be an important personage. When the Persiles and Sigismundo was written, this personage was considered altogether indispensable, as we can see from the humorous troubles occasioned by the absolute necessity of introducing one into a play in which such a figure could find no proper place. Lib. III. c. 2.

with their foolscaps and baubles, into the gravest and most tragic scenes of plays like "Marriage in Death," we can only avow, that, though they were demanded by the taste of the age, nothing in any age can suffice for their justification.

\* 266 \* An important circumstance which should not be overlooked, when considering the means of Lope's great success, is his poetical style, the metres he adopted, and especially the use he made of the elder poetry of his country. In all these respects, he is to be praised; always excepting the occasions when, to obtain universal applause, he permitted himself the use of that obscure and affected style which the courtly part of his audience demanded, and which he himself elsewhere condemned and ridiculed.<sup>16</sup>

No doubt, indeed, much of his power over the mass of the people of his time is to be sought in the charm that belonged to his versification; not infrequently careless, but almost always fresh, flowing, and effective. Its variety, too, was remarkable. No metre of which the language was susceptible escaped him. The Italian octave stanzas are frequent; the *terza rima*, though more sparingly used, occurs often; and hardly a play is without one or more sonnets. All this was to please the more fashionable and cultivated among his audience, who had long been enamored of whatever was Italian; and though some of it was unhappy

<sup>16</sup> The specimens of his bad taste in this particular occur but too frequently; e.g. in "El Cuerdo en su Casa" (Comedias, Tom. VI, Madrid, 1615, ff. 105, etc.), in the "Niña de Plata" (Comedias, Tom. IX, Barcelona, 1618, ff. 125, etc.), in the "Cautivos de Argel" (Comedias, Tom. XXV, Zaragoza, 1647, p. 241), and in other places. But in opposition to all this, see his deliberate condemnation of such eu-

phuistical follies in his *Obras Sueltas*, Tom. IV pp. 459-482; and the jests at their expense in his "Amistad y Obligacion," and his "Melindres de Belisa" (Comedias, Tom. IX, Barcelona, 1618)

As a general remark, Lope's language is natural, pure, and idiomatic. Vargas y Ponce (Declamacion, p. 23) is too strong, when he says that it is *always* so.

enough, like sonnets with echoes,<sup>17</sup> it was all fluent and all successful.

Still, as far as his verse was concerned, — besides the *silvas*, or masses of irregular lines, the *quintillas*, or five-line stanzas, and the *liras*, or six-line, — he relied, above everything else, upon the old national ballad-measure ; — both the proper *romance*, with *asobantes*, \* and the *redondilla*, with rhymes between the first and fourth lines and between the second and third. In this he was unquestionably right. The earliest attempts at dramatic representation in Spain had been somewhat lyrical in their tone, and the more artificial forms of verse, therefore, especially those with short lines interposed at regular intervals, had been used by Juan de la Enzina, by Torres Naharro, and by others ; though, latterly, in these, as in many respects, much confusion had been introduced into Spanish dramatic poetry. But Lope, making his drama more narrative than it had been before, settled it at once and finally on the true national narrative measure. He went further. He introduced into it much old ballad-poetry, and many separate ballads of his own composition. Thus, in "The Sun Delayed," the Master of Santiago, who has lost his way, stops and sings a ballad ;<sup>18</sup> and in his "Poverty no Disgrace," he has inserted a beautiful one, beginning, —

<sup>17</sup> Sonnets seem to have been a sort of choice morsels thrown in to please the over-refined portion of the audience. In general, only one or two occur in a play, but in the "Discreta Venganza" (Comedias, Tom XX, Madrid, 1629) there are five. In the "Palacios de Galiana" (Comedias, Tom XXIII, Madrid, 1638, f 256) there is a foolish sonnet with echoes, and another in the "Historia de Tobias" (Comedias, Tom. XV., Madrid, 1621, f 244). The sonnet in ridicule of sonnets, in the "Niña

de Plata," (Comedias, Tom IX, Barcelona, 1618, f 124,) is witty, and has been imitated in French and in English "Figuroa, (Pasagero, 1617, f 111), in ridicule of the practice, says you must not put more than seven sonnets into a play. But sonnets, as ornaments, are known in the drama of other countries. Shakespeare has them, e g in the heartbroken letter of Helen to her mother-in-law, "All's Well that Ends Well," Act III sc 4

<sup>18</sup> "El Sol Parado," Comedias, Tom.

You hasten to the fight ;  
The trumpet rings upon your ear,  
And victory claims her right <sup>19</sup>

Probably, however, he produced a still greater effect when he brought in passages, not of his own, but of old and well-known ballads, or allusions to them. Of these his plays are full. For instance, his "Sun Delayed," and his "Envy of Nobility," are all redolent of the Morisco ballads that were so much admired in his time ; the first taking those that relate to the loves of Gazul and Zayda,<sup>20</sup> and the last those from the

"Civil Wars of Granada," about the wild feuds \* 268 of the Zegrис and the \* Abencerrages.<sup>21</sup> Hardly

less marked is the use he makes of the old ballads on Roderic, in his "Last Goth";<sup>22</sup> of those concerning the Infantes of Lara, in his several plays relating to their tragical story ;<sup>23</sup> and of those about Bernardo del Carpio, in "Marriage and Death."<sup>24</sup> Occasionally, the effect of their introduction must have been very great. Thus, when, in his drama of "Santa Fé," crowded with the achievements of Hernando del

<sup>19</sup> "Pobreza no es Vileza," *Comedias*, Tom XX, Madrid, 1629, f 61.

<sup>20</sup> He has even ventured to take the beautiful and familiar ballad, "Sale la Estrella de Venus," — which is in the Romancero General, the "Guerras de Granada," and many other places, — and work it up into a dialogue "El Sol Parado," *Comedias*, Tom XVII, Madrid, 1621, ff 223, 224

<sup>21</sup> In the same way he seizes upon the old ballad, "Reduan bien se te acuerda," and uses it in the "Embidia de la Nobleza," *Comedias*, Tom. XXIII., Madrid, 1638, f. 192.

<sup>22</sup> For example, the ballad in the *Romancero* of 1555, beginning "Despues que el Rey Rodrigo," at the end of *Jornada II*, in "El Ultimo Godo," *Comedias*, Tom XXV, Zaragoza, 1647

<sup>23</sup> Compare "El Bastardo Mudarra" (*Comedias*, Tom XXIV, Zaragoza, 1641, ff 75, 76) with the ballads "Ruy Velasquez de Lara," and "Llegados son los Infantes", and, in the same play, the dialogue between Mudarra and his mother, (f. 83,) with the ballad, "Sentados á un ajedrez"

<sup>24</sup> "El Casamiento en la Muerte," (*Comedias*, Tom. I., Valladolid, 1604, ff 198, etc.,) in which the following well-known old ballads are freely used, viz "O Belerma 'O Belerma'" "No tiene heredero alguno"; "Al pie de un tumulo negro", "Bañando está las prisones"; and others.

Pulgar, Garcilasso de la Vega, and whatever was most glorious and imposing in the siege of Granada, one of his personages breaks out with a variation of the familiar and grand old ballad,—

With canvas walls so fair,  
And tents that cover all the ground  
With silks and velvets rare,<sup>25</sup> —

it must have stirred his audience as with the sound of a trumpet.

Indeed, in all respects, Lope well understood how to win the general favor, and how to build up and strengthen his fortunate position as the leading dramatic poet of \* his time. The ancient \* 269 foundations of the theatre, as far as they existed when he appeared, were little disturbed by him. He carried on the drama, he says, as he found it ; not venturing to observe the rules of art, because, if he had done so, the public never would have listened to him.<sup>26</sup> The elements that were floating about, crude and unsettled, he used freely ; but only so far as they suited his general purpose. The division into three acts, known so little, that he attributed it to Virues, though it was made much earlier ; the ballad-measure,

<sup>25</sup> It is in the last chapter of the "Guerras Civiles de Granada", but Lope has given it, with a slight change in the phraseology, as follows.—

Y al reedor muchas tiendas  
De terciopelo y damasco

It occurs in many collections of ballads, and is founded on the fact, that a sort of village of rich tents was established near Granada, which, after an accidental conflagration, was turned into a town, that still exists, within whose walls were signed both the commission of Columbus to seek the New World,

and the capitulation of Granada. The imitation of this ballad by Lope is in his "Cerco de Santa Fe," Comedias, Tom. I., Valladolid, 1604, f. 69. For an account of Santa Fé, which was visited by Navagiero in 1526, see his *Viaggio*, 1563, f. 18. It is now much dilapidated. It took its name, Havermann says, from the belief that it was the only city in Spain where no Moslem prayer had ever been offered.

<sup>26</sup> He says this apparently as a kind of apology to foreigners, in the Preface to the "Peregrino en su Patria," 1603, where he gives a list of his plays to that date.

which had been timidly used by Tarrega and two or three others, but relied upon by nobody ; the intriguing story and the amusing underplot, of which the slight traces that existed in Torres Naharro had been long forgotten, — all these he seized with the instinct of genius, and formed from them, and from the abundant and rich inventions of his own overflowing fancy, a drama which, as a whole, was unlike anything that had preceded it, and yet was so truly national, and rested so faithfully on tradition, that it was never afterwards disturbed, till the whole literature, of which it was so brilliant a part, was swept away with it.

Lope de Vega's immediate success, as we have seen, was in proportion to his great powers and favorable opportunities. For a long time, nobody else was willingly heard on the stage ; and during the whole of the forty or fifty years that he wrote for it, he stood quite unapproached in general popularity. His unnumbered plays and farces, in all the forms that were demanded by the fashions of the age, or permitted by religious authority, filled the theatres both of the capital and the provinces ; and so extraordinary was the impulse he gave to dramatic representations, that, though there were only two companies of strolling players at Madrid when he began, there were, about the period of his death, no less than forty, comprehending nearly a thousand persons.<sup>27</sup>

\*270 \*Abroad, too, his fame was hardly less remarkable. In Rome, Naples, and Milan, his dramas were performed in their original language ; in France and Italy, his name was announced in order to fill the theatres when no play of his was to be per-

formed ;<sup>28</sup> and once even, and probably oftener, one of his dramas was represented in the seraglio at Constantinople.<sup>29</sup> But perhaps neither all this popularity, nor yet the crowds that followed him in the streets and gathered in the balconies to watch him as he passed along,<sup>30</sup> nor the name of Lope, that was given to whatever was esteemed singularly good in its kind,<sup>31</sup> is so striking a proof of his dramatic success as the fact, so often complained of by himself and his friends, that multitudes of his plays were fraudulently noted down as they were acted, and then printed for profit throughout Spain ; and that multitudes of other plays appeared under his name, and were represented all over the provinces, that he had never even heard of till they were published or performed.<sup>32</sup>

<sup>28</sup> This is stated by the well-known Italian poet, Marini, in his Eulogy on Lope, *Obras Sueltas*, Tom. XXI p 19. His plays were often printed in Italy while he was living and after his death. I have a copy of a neat edition of his "Vellocino de Oro," published at Milan in 1649

The Thirty Years' War made it distasteful

<sup>30</sup> This is said in a discourse preached over his mortal remains in St Sebastian's, at his funeral. *Obras Sueltas*, Tom. XIX p 329.

(*Obras Sueltas*, Tom. XX p 53) Cervantes intimates the same thing in his *extremes*, "La Guarda Cuidadosa"

<sup>32</sup> His complaints on the subject begin as early as 1603, before he had published any of his plays himself, (*Obras Sueltas*, Tom. V p xvii,) and are renewed in the "Egloga á Claudio," (*Ibid*, Tom. IX p 369,) printed after his death, besides which they occur in the Prefaces to his *Comedias*, (Tom. IX, XI, XIII, XV, XXI, and elsewhere,) as a matter that seems to have been always troubling him. I have one of these spurious publications. It is entitled "Las Comedias del Famoso Poeta, Lope de Vega Carpio, recopiladas por Bernardo Grassa, ec, Año 1626, Çaragoça, 4to, ff 289 Eleven Loas open this curious volume, nearly all of them ending with an earnest request for silence; and it contains twelve plays, being, in fact, an imperfect and irregular reprint of the first volume of the "Comedias."

An amusing story is told by Figueroa (*Plaza Universal*, 1615, f. 237, a) of the way in which plays were sometimes stolen. He says that there was a gentleman by the name of Luis Ramirez de Arellano, (the same person, I suppose, who was one of the secre-

A large income naturally followed such popularity, for his plays were liberally paid for by the actors;<sup>33</sup> and he \* had patrons of a munificence unknown in our days, and always undesirable.<sup>34</sup>

\* 271 But he was thriftless and wasteful, exceedingly charitable, and, in hospitality to his friends, prodigal. He was, therefore, almost always embarrassed. At the end of his "Jerusalem," printed as early as 1609, he complains of the pressure of his domestic affairs;<sup>35</sup> and in his old age he addressed some verses, in the nature of a petition, to the still more thriftless Philip the Fourth, asking the means of living for himself and his daughter.<sup>36</sup> After his death, his poverty was fully admitted by his executor; and yet, considering the relative value of money, no poet, perhaps, ever received so large a compensation for his works.

taries to the Count de Lemos,) who could carry off a whole play after hearing it three times, and actually did it in the cases of the "Dama Boba" and the "Principe Perfeto," well-known dramas of Lope de Vega. This, of course, was very annoying. On one occasion, therefore, when the "Galan de la Membrilla"—which is in the tenth volume of Lope's plays, with a sharp, satirical preface—was representing, Sanchez, a well-known *autor* and actor of the time, so mutilated his part that the offended audience cried out upon him to know the reason of his conduct, to which he replied that there was a person present, pointing him out, who would carry off the whole play in his memory, if it were not altered. The consequence was that, after some uproar, Luis de Arellano was compelled to leave the theatre. Figueroa says that he was present and witnessed this strange scene. Lope de Vega, alluding to this mode of stealing plays, says there were two persons especially skilful in it, one of whom was called by the populace (el vulgo) "Memorilla," and the other "Gran Memoria." "A esto se añade el hurtar las comedias estos que llaman el vulgo al uno *Memoria* y al otro *Gran Memoria* los cuales con algarzo versos que apren-

den mezclan infinitos suyos barbaros, con que ganan la vida, vendiendolas," etc. *Comedias*, Parte XIII, Madrid, 1620, Prologo.

<sup>33</sup> Montalvan sets the price of each play at five hundred reals, and says that in this way Lope received, during his life, eighty thousand ducats. *Obra*, Tom. XX, p. 47

<sup>34</sup> The Duke of Sessa alone, besides many other benefactions, gave Lope, at different times, twenty-four thousand ducats, and a sinecure of three hundred more per annum. *Ul supra*.

<sup>35</sup> Libro XX, last three stanzas. Again in 1620, dedicating his "Verdadero Amante" to his son Lope, who showed poetical aspirations, he alleges his own example to warn his child never to indulge his taste for verse, adding, "I have, as you know, a poor house, and my bed and board are no better."

<sup>36</sup> "I have a daughter, and am old," he says "The Muses give me honor, but not income," etc. (*Obra*, Tom. XVII, p. 401.) From his will it appears that Philip IV. promised an office to the person who should marry this daughter, and failed to keep his word. See note at the end of Chap. XIV, *ante*, where in Lope's will is a notice of this claim on the king.

It should, however, be remembered, that no other poet ever wrote so much with popular effect. For, if we begin with his dramatic compositions, which are the best of his efforts, and go down to his epics, which, on the whole, are the worst,<sup>37</sup> we shall find the amount of what was received with favor, as it came from the press, quite unparalleled. And when to this we are compelled to add his own assurance, just before his death, that the greater part of his works still remained in manuscript,<sup>38</sup> we pause in astonishment, and,

\* before we are able to believe the account, demand some explanation that shall make it credible ; — an explanation which is the more important, because it is the key to much of his personal character, as well as of his poetical success. And it is this. No poet of any considerable reputation ever had a genius so nearly related to that of an improvisator, or ever indulged his genius so freely in the spirit of improvisation. This talent has always existed in the southern countries of Europe ; and in Spain has, from the first, produced, in different ways, the most extraordinary results. We owe to it the invention and perfection of the old ballads, which were originally improvised and then preserved by tradition ; and we owe to it the *seguidillas*, the *boleros*, and all the other forms of popular poetry

<sup>37</sup> Like some other distinguished authors, however, he was inclined to undervalue what he did most happily, and to prefer what is least worthy of preference. Thus, in the Preface to his *Comedias*, (Vol. XV, Madrid, 1621,) he shows that he preferred his longer poems to his plays, which he says he holds but “as the wild-flowers of his field, that grow up without care or culture.”

<sup>38</sup> This might be inferred from the account in Montalvan’s “*Fama Póstuma*” ; but Lope himself declares it distinctly in the “*Egloga à Claudio*,”

where he says, “The printed part of my writings, though too much, is small, compared with what remains unpublished.” (*Obras Sueltas*, Tom. IX. p. 369.) Indeed, we know we have hardly a fourth part of his full-length plays ; only about thirty *autos* out of four hundred ; only twenty or thirty *entremeses* out of the “infinite number” ascribed to him. Pacheco, in his notice of Lope, printed in 1609, says that his works would give an average of three sheets [tres pliegos] for every day of his life to that time. *Obras Sueltas*, Tom. XIV. p. xxxi.

that still exist in Spain, and are daily poured forth by the fervent imaginations of the uncultivated classes of the people, and sung to the national music, that sometimes seems to fill the air by night as the light of the sun does by day.

In the time of Lope de Vega, the passion for such improvisation had risen higher than it ever rose before, if it had not spread out more widely. Actors were expected sometimes to improvise on themes given to them by the audience.<sup>39</sup> Extemporaneous dramas, with all the varieties of verse demanded by a taste formed in the theatres, were not of rare occurrence. Philip the Fourth, Lope's patron, had such performed in his presence, and bore a part in them himself.<sup>40</sup> And the famous Count de Lemos, the viceroy of Naples, to whom Cervantes was indebted for so much kindness, kept, as an *apanage* to his viceroyalty, a poetical court, of which the two Argensolas were the chief ornaments, and in which extemporaneous plays were acted with brilliant success.<sup>41</sup>

\* 273 \* Lope de Vega's talent was undoubtedly of near kindred to this genius of improvisation, and produced its extraordinary results by a similar process, and in the same spirit. He dictated verse, we are told, with ease, more rapidly than an amanuensis could take it down;<sup>42</sup> and wrote out an entire play in two days, which could with difficulty be transcribed by a copyist in the same time. He was not absolutely

<sup>39</sup> Bisbe y Vidal, "Tratado de Comedias," (1618, f. 102,) speaks of the "glosses which the actors make extempore upon lines given to them on the stage."

an improvisator, for his education and position naturally led him to devote himself to written composition, but he was continually on the borders of whatever belongs to an improvisator's peculiar province ; he was continually showing, in his merits and defects, in his ease, grace, and sudden resource, in his wildness and extravagance, in the happiness of his versification and the prodigal abundance of his imagery, that a very little more freedom, a very little more indulgence given to his feelings and his fancy, would have made him at once and entirely, not only an improvisator, but the most remarkable one that ever lived.

FRANCISCO GOMEZ DE QUEVEDO Y VILLEGRAS, the contemporary of both Lope de Vega and Cervantes, was born at Madrid, in 1580.<sup>1</sup> His family came from that mountainous region at the northwest, to which, like other Spaniards, he was well pleased to trace his origin;<sup>2</sup> but his father held an office of some dignity at the court of Philip the Second, which led to

<sup>1</sup> A diffuse life of Quevedo was published at Madrid, in 1663, by Don Pablo Antonio de Tarsia, a Neapolitan, and is inserted in the tenth volume of the edition of Quevedo's Works, by Sanchez, Madrid, 1791—1794, 11 tom., 8vo. A shorter, and, on the whole, a more satisfactory, life of him is to be found in Baena, *Hijos de Madrid*, Tom. II. pp 137—154, but the best is the one prefixed to the collection of Quevedo's Works, the first and second volumes of which are in the *Biblioteca de Autores Espanoles*, (Tom. XXIII, 1852, and Tom. XLVIII, 1859,) and edited with extraordinary knowledge of whatever relates to its subject, by Don Aureliano Fernandez Guerra y Orbe. It is only to be regretted that this work has not yet (1859) been continued, but I trust it will be. No Spanish author will better reward care and diligence in explanatory notes than Quevedo, and none needs them more. I must be permitted to add, that I do not accept all Don Aureliano's conclusions, such, for instance, as that Quevedo in *all* he wrote, even in his *Sueños*, had a *political* purpose in view. See pp. x, xv, and xxi.

<sup>2</sup> In his "Grandes Anales de Quince Dias," speaking of the powerful President Acevedo, he says "I was unwelcome to him, because, coming myself from the mountains, I never flattered the ambition he had to make himself out to be above men to whom we, in our own homes, acknowledge no superiors" *Obrias*, Tom XI p. 63

An anecdote will show how much was thought of this mountain spirit of honor, which was supposed to descend from the days of Pelayo, when the mountain country alone kept its loyalty and faith. After Philip IV had entered Pamplona, 23d April, 1646, he called to him the Marquis of Carpio, who bore the sword of state, and sheathed it with his own royal hands, because, as he declared, in that kingdom it was not needed "thus," says the contemporary account, "giving those about him to understand that all the men of Navarre were faithful and loyal" *Relacion embiada de Pamplona de la Entrada que hizo su Magestad en aquella Ciudad*. Sevilla, 1646, 4to, pp. 4.

his residence \* in the capital at the period of \* 275 his son's birth ; — a circumstance which was no doubt favorable to the development of the young man's talents. But whatever were his opportunities, we know that, when he was fifteen years old, he was graduated in theology at the University of Alcalá, where he not only made himself master of such of the ancient and modern languages as would be most useful to him, but extended his studies into the civil and canon law, mathematics, medicine, politics, and other still more various branches of knowledge, showing that he was thus early possessed with the ambition of becoming a universal scholar. His accumulations, in fact, were vast, as the learning scattered through his works plainly proves, and bear witness, not less to his extreme industry than to his extraordinary natural endowments.

On his return to Madrid, he seems to have been associated both with the distinguished scholars and with the fashionable cavaliers of the time ; and an adventure, in which, as a man of honor, he found himself accidentally involved, had wellnigh proved fatal to his better aspirations. A woman of respectable appearance, while at her devotions in one of the parish churches of Madrid, during Holy Week, was grossly insulted in his presence. He defended her, though both parties were quite unknown to him. A duel followed on the spot ; and, at its conclusion, it was found he had killed a person of rank. He fled, of course, and, taking refuge in Sicily, was invited to the splendid court then held there by the Duke of Ossuna, viceroy of Philip the Third, and was soon afterwards employed in important affairs of state, — sometimes, as we are told by his nephew, in such

as required personal courage and involved danger to his life.<sup>8</sup>

\* 276 \* At the conclusion of the Duke of Ossuna's administration of Sicily, Quevedo was sent, in 1615, to Madrid, as a sort of plenipotentiary to confirm to the crown all past grants of revenue from the island, and to offer still further subsidies. So welcome a messenger was not ungraciously received. His former offence was overlooked; a pension of four hundred ducats was given him; and he returned, in great honor, to the Duke, his patron, who was already transferred to the more important and agreeable viceroyalty of Naples.

Quevedo now became minister of finance at Naples, and fulfilled the duties of his place so skilfully and honestly, that, without increasing the burdens of the people, he added to the revenues of the state. An important negotiation with Rome was also intrusted to his management; and in 1617 he was again in Madrid, and stood before the king with such favor, that he was made a knight of the Order of Santiago. On his return to Naples, or at least during the nine years he was absent from Spain, he made treaties with Venice and Savoy, as well as with the Pope, and was almost constantly occupied in difficult and delicate affairs connected with the administration of the Duke of Ossuna.

But in 1620 all this was changed. The Duke fell

<sup>8</sup> I think his life was in greater danger somewhat later, — at Venice in 1618, — when, by means of his perfect Venetian accent, he escaped, in the disguise of a beggar, from the officers of justice, who pursued him as one involved in the conspiracy which St. Real, Lafosse, and Otway have rendered classical, but which is so wild and ro-

mantic that its reality has sometimes been doubted. He was subsequently burnt in effigy, after the fashion of the Inquisition, by order of the Venetian Senate, but he was not, I think, guilty of the particular offence they imputed to him, a matter, no doubt, of small consequence in their eyes.

from power, and those who had been his ministers shared his fate. Quevedo was exiled to his patrimonial estate of Torre de Juan Abad, where and elsewhere he endured an imprisonment or detention of two years and a half; and then was released without trial and without having had any definite offence laid to his charge. He was, however, cured of all desire for public honors or royal favor. He refused the place of Secretary of State, and that of Ambassador to Genoa, both of which were offered him, accepting the merely titular rank of Secretary to the King. He, in fact, was now determined to give himself to letters; and did so for the rest of his life. But though he never took office, he occasionally mingled in the political discussions of his time, as may be seen in his "*Tira la Piedra*," which is on the debasement of the coin (already sternly rebuked by \* *Mariana*); in his \* 277 "*Memorial de St. Iago*," which cost him an exile of several months in 1628; and in his letter to Louis the Thirteenth on the war of 1635. Others of his minor works show that such interests always tempted him.

In 1634 he was married; but his wife soon died, and left him to contend alone with the troubles of life that still pursued him. In 1639 some satirical verses were placed under the king's napkin at dinner-time; and, without proper inquiry, they were attributed to Quevedo. In consequence of this he was seized, late at night, with great suddenness and secrecy, in the palace of the Duke of Medina-Cöeli, and thrown into rigorous confinement in the royal convent of San Márcos de Leon. There, in a damp and unwholesome cell, his health was soon broken down by diseases from which he never recovered; and the little that remained to him of his property was wasted

away till he was obliged to depend on charity for support. With all these cruelties the unprincipled favorite of the time, the Count Duke Olivares, seems to have been connected ; and the anger they naturally excited in the mind of Quevedo may well account for two papers against that minister which have generally been attributed to him, and which are full of personal severity and bitterness.<sup>4</sup> A heart-rending letter, too, which, when he had been nearly two years in prison, he wrote to Olivares, should be taken into the account, in which he in vain appeals to his persecutor's sense of justice, telling him, in his despair, "No clemency can add many years to my life ; no rigor can take many away."<sup>5</sup> At last, the hour of the favorite's disgrace arrived ; and, amidst the jubilee of Madrid, he was driven into exile. The release of Quevedo followed as a matter \* of course, since it was already admitted that another had written the verses<sup>6</sup> for which he had been punished by nearly four years of the most unjust suffering.<sup>7</sup>

\* 278 4 The first is the very curious paper entitled "Carta de su Privanza y Muerte del Conde Duque de Olivares," in the Seminario Erudito (Madrid, 1787, 4to, Tom III ), and the other is "Memorial de Don F Quevedo contra el Conde Duque de Olivares," in the same collection, Tom XV

5 This letter, often reprinted, is in Mayans y Siscar, "Cartas Morales," etc , Valencia, 1773, 12mo, Tom. I p 151. Another letter to his friend Adan de la Parra, giving an account of his mode of life during his confinement, shows that he was extremely industrious. Indeed, industry was his main resource a large part of the time he was in San Marcos de Leon. Seminario Erudito, Tom I. p 65

7 In his Dedication of his Life of St. Paul to the President of Castile, we have this extraordinary account of his arrest and imprisonment :—

"I was seized in a maner so rigorous at eleven o'clock on the night of the 7th of Decembei, and hurried away, in my old age, so unprovided, that the officer who made the arrest gave me a baize cloak and two shirts, by way of alms, and one of the alguazils gave me some woollen stockings. I was imprisioned four years, — two of them as if I were a wild beast, shut up alone, without human intercourse, and where I should have died of hunger and destitution if the charity of my Lord the Duke of Medina-Coeli had not been in place of a sure and full patrimony to me down to the present day. From this cruel chain of linked calamities, the justice and mercy of his Majesty released me by means of a petition given to him by your Excellency, to whom I referred my cause, in the whole course of which no complaint was ever made against me, nor any confession asked of me, neither after my release was any judicial paper found in relation to it." Obras,

But justice came too late. Quevedo remained, indeed, a little time at Madrid, among his friends, endeavoring to recover some of his lost property ; but failing in this, and unable to subsist in the capital, he retired to the mountains from which his race had descended. His infirmities, however, accompanied him wherever he went ; his spirits sunk under his trials and sorrows ; and he died, wearied out with life, in 1645.<sup>8</sup>

Quevedo sought success, as a man of letters, in a great number of departments,— from theology and metaphysics down to stories of vulgar life and Gypsy ballads. But many of his manuscripts were taken from him when his papers were twice seized by the government, and many others seem to have been accidentally lost in the course of a life full of change and adventure. From these and other causes, his friend Antonio de Tarsia tells us that the greater part of his works could not be published ; and we know that many are still to be found in his own handwriting both in the National Library of Madrid, and in other collections, public and private.<sup>9</sup> \* Those \* 279 already printed fill eleven considerable volumes, eight of prose and three of poetry ; leaving us probably little to regret concerning the fate of the rest, unless, perhaps, it be the loss of his dramas, of which two are said to have been represented with applause at Madrid, during his lifetime.<sup>10</sup>

Tom. VI. p. 8. His confinement extended from December 7, 1639, to early in June, 1643.

<sup>8</sup> His nephew, in a Preface to the second volume of his uncle's Poems, (published at Madrid, 1670, 4to,) says that Quevedo died of two imposthumes on his chest, which were formed during his last imprisonment.

The portrait of Quevedo, wearing a huge pair of spectacles, which is well engraved for the fourth volume of Se-

dano's *Parnaso Español*, is by Velazquez, and is strongly marked with the character we attribute to the author of the *Visions*. Stirling's *Artists of Spain*, 1848, Vol. II. p. 635

<sup>10</sup> Besides these dramas, whose names

Of his poetry, so far as we know, he himself published nothing with his name, except such as occurs in his poor translations from Epictetus and Phocylides; but in the tasteful and curious collection of his friend Pedro de Espinosa, called "Flowers of Illustrious Poets," printed when Quevedo was only twenty-five years old, a few of his minor poems are to be found. This was probably his first appearance as an author; and it is worthy of notice, that, taken together, these few poems announce much of his future poetical character, and that two or three of them, like the one beginning,

A wight of might  
Is Don Money, the knight," <sup>11</sup>

are among his happy efforts. But though he himself published scarcely any of them, the amount of his verses found after his death is represented to have been very great; much greater, we are assured, than could be discovered among his papers a few years later,<sup>12</sup> — probably because, just before he died, "he denounced," as we are told, "all his works to the Holy Tribunal of the Inquisition, in order that the parts less becoming a modest reserve might be reduced, *as they were*, to just measure by serious and prudent reflection.<sup>13</sup>

are unknown to us, he wrote, in conjunction with Ant. Hurtado de Mendoza, and at the command of the Count Duke Olivares, who afterwards treated him so cruelly, a play called "Quien mas miente, medra mas," — *He that lies most, will rise most*, — for the gorgeous entertainment that prodigal minister gave to Philip IV on St John's eve, 1631. See the account of it in the notice of Lope de Vega, *ante*, p. 212, and *post*, Chapter XXI<sup>o</sup>, note. There were ten "entremeses" and ten "bayles" among his dramas, some of which were published by his nephew in the "Tres Ultimas Musas" in 1670, and some in

the "Entremeses Nuevos, 1643"; but I think there are others still in manuscript.

<sup>12</sup> "Not the twentieth part was saved of the verses which many persons knew to have been extant at the time of his death, and which, during our constant intercourse, I had countless times held in my hands," says Gonzalez de Salas, in the Preface to the first part of Quevedo's Poems, 1648

<sup>13</sup> Preface to Tom. VII. of Obras

\* Such of his poetry as was easily found was, \* 280 however, published ; — the first part by his learned friend Gonzalez de Salas, in 1648, and the rest, in a most careless and crude manner, by his nephew, Pedro Alderete, in 1670, under the conceited title of "The Spanish Parnassus, divided into its Two Summits, with the Nine Castilian Muses." The collection itself is very miscellaneous, and it is not always easy to determine why the particular pieces of which it is composed were assigned rather to the protection of one Muse than of another. In general, they are short. Sonnets and ballads are far more numerous than anything else ; though *canciones*, odes, elegies, epistles, satires of all kinds, idyls, *quintillas*, and *redondillas* are in great abundance. There are, besides, four *entremeses* of little value, and the fragment of a poem on the subject of *Orlando Furioso*, intended to be in the manner of Berni, but running too much into caricature.

The longest of the nine divisions is that which passes under the name and authority of Thalia, the goddess who presided over rustic wit, as well as over comedy. Indeed, the more prominent characteristics of the whole collection are a broad, grotesque humor, and a satire sometimes marked with imitations of the ancients, especially of Juvenal and Persius, but oftener overrun with puns, and crowded with conceits and allusions, not easily understood at the time they first appeared, and now quite unintelligible.<sup>14</sup> His bur-

His request on his death-bed, that nearly all his works, printed or manuscript, might be suppressed, is triumphantly recorded in the Index Expurgatorius of 1667, p. 425. Some of them are, no doubt, foul with an indecency which will never permit them to be printed, or, at least, never ought to permit it.

<sup>14</sup> "Los equívocos y las alusiones suyas," says his editor in 1648, "son tan frecuentes y multiplicados, aquello ; y estas, así en un solo verso y aun en una palabra, que es bien infalible que mucho número sin advertirse se haya de perder." *Obras*, Tom. VII., *Elogios*, etc.

lesque sonnets, in imitation of the Italian poems of that class, are the best in the language, and have a bitterness rarely found in company with so much wit. Some of his lighter ballads, too, are to be placed in the very first rank, and fifteen that he wrote in the wild dialect of the Gypsies have ever since been the delight of the lower classes of his countrymen, and are still, or were lately, to be heard among \* 281 their \*other popular poetry, sung to the guitars of the peasants and the soldiery throughout Spain.<sup>15</sup> In regular satire he has generally followed the path trodden by Juvenal; and, in the instances of his complaint "Against the Existing Manners of the Castilians," and "The Dangers of Marriage," has proved himself a bold and successful disciple.<sup>16</sup> Some of his amatory poems, and some of those on religious subjects, especially when they are in a melancholy tone, are full of beauty and tenderness;<sup>17</sup> and once or twice, when most didactic, he is no less powerful than grave and lofty.<sup>18</sup>

His chief fault—besides the indecency of some of his poetry, and the obscurity and extravagance that pervade yet more of it—is the use of words and phrases that are low and essentially unpoetical. This, so far as we can now judge, was the result partly of haste and carelessness, and partly of a false theory. He sought for strength, and he became affected and

rude. But we should not judge him too severely. He wrote a great deal, and with extraordinary facility, but refused to print; professing his intention to correct and prepare his poems for the press when he should have more leisure and a less anxious mind. That time, however, never came. We should, therefore, rather wonder that we find in his works so many passages of the purest and most brilliant wit and poetry, than complain that they are scattered through so very large a mass of what is idle, unsatisfactory, and sometimes unintelligible.

Once, and once only, Quevedo published a small volume of poetry, which has been supposed to be his own, though not originally appearing as such. The occasion was worthy of his genius, and his success was equal to \* the occasion. For some \* 282 time, Spanish literature had been overrun with a species of affectation resembling the euphuism that prevailed in England a little earlier. It passed under the name of *cultismo*, or the polite style; and when we come to speak of its more distinguished votaries, we shall have occasion fully to explain its characteristic extravagances. At present, it is enough to say, that, in Quevedo's time, this fashionable fanaticism was at the height of its folly; and that, perceiving its absurdity, he launched against it the shafts of his unsparing ridicule, in several shorter pieces of poetry, as well as in a trifle called "A Compass for the Polite to steer by," and in a prose satire called "A Catechism of Phrases to teach Ladies how to talk Latinized Spanish."<sup>19</sup>

But finding the disease deeply fixed in the national

<sup>19</sup> There are several poems about *cultismo*, *Obras*, Tom. VIII, pp. 82, etc. The "Aguja de Navegar Cultos" is in Tom. I. p. 443; and immediately fol-

lowing it is the Catechism, whose whimsical title I have abridged somewhat freely.

taste, and models of a purer style of poetry wanting to resist it, he printed, in 1631,—the same year in which, for the same purpose, he published a collection of the poetry of Luis de Leon,—a small volume which he announced as “Poems by the Bachiller Francisco de la Torre,”—a person of whom he professed, in his Preface, to know nothing, except that he had accidentally found his manuscripts in the hands of a bookseller, with the Approbation of Alonso de Ercilla attached to them; and that he supposed him to be the ancient Spanish poet referred to by Boscan nearly a hundred years before. But this little volume is a work of no small consequence. It contains sonnets, odes, *canciones*, elegies, and eclogues; many of them written with antique grace and simplicity, and all in a style of thought easy and natural, and in a versification of great exactness and harmony. It is, in short, one of the best volumes of miscellaneous poems in the Spanish language.<sup>20</sup>

\* 283 \* No suspicion seems to have been whispered, either at the moment of their first publication, or for a long time afterwards, that these poems were the productions of any other than the unknown personage of the sixteenth century whose name appeared on their title-page. In 1753, however, a second edition of them was published by Velazquez, the author of the “Essay on Spanish Poetry,” claiming them to be entirely

<sup>20</sup> Perhaps there is a little too much of the imitation of Petrarch and of the Italians in the Poems of the Bachiller de la Torre, but they are, I think, not only graceful and beautiful, but generally full of the national tone, and of a tender spirit, connected with a sincere love of nature and natural scenery. I would instance the ode, “Alexis que contraria,” in the edition of Velazquez, (p. 17,) and the truly Horatian ode

(p. 44) beginning, “O tres y cuatro veces venturosa,” with the description of the dawn of day, and the sonnet to Spring (p. 12.) The first eclogue, too, and all the *endechas*, which are in the most flowing Adonian verse, should not be overlooked. Sometimes he has unrhymed lyrics, in the ancient measures, not always successful, but seldom without beauty.

the work of Quevedo;<sup>21</sup> — a claim which has been frequently noticed since, some critics admitting and some denying it, but none, in any instance, fairly discussing the grounds on which it is placed by Velazquez, or settling their validity.<sup>22</sup>

The question, no doubt, is among the more curious of those that involve literary authorship; but it can hardly be brought to an absolute decision. The argument, that the poems thus published by Quevedo are really the work of an unknown Bachiller de la Torre, is founded, first, on the alleged approbation of them by Ercilla,<sup>23</sup> which, though referred to by Valdivielso, as well as by Quevedo, has never been printed; and, secondly, on the fact, that, in their general tone, they are unlike the recognized poetry of Quevedo, being all in a severely simple and \* pure style, \* 284 whereas he himself not infrequently runs into the affected style he undoubtedly intended by this work to counteract and condemn.

On the other hand, it may be alleged, that the pretended Bachiller de la Torre is clearly not the Bachiller de la Torre referred to by Boscan and Quevedo, who

<sup>21</sup> "Poesías que publicó D. Francisco de Quevedo Villegas, Cavallero del Orden de Santiago, Señor de la Torre de Juan Abad, con el nombre del Bachiller Francisco de la Torre. Añades en esta segunda edición un Discurso, en que se descubre ser el verdadero autor el mismo D. Francisco de Quevedo, por D. Luis Joseph Velazquez," etc. Madrid, 1753, 4to.

<sup>22</sup> Quintana denies it in the Preface to his *Poesías Castellanas* (Madrid, 1807, 12mo, Tom I p. xxxix). So does Fernandez, (or Estala for him,) in his Collection of "Poesías Castellanas" (Madrid, 1808, 12mo, Tom. IV. p. 40); and, what is of more significance, so does Wolf, in the *Jahrbücher der Literatur*, Wien, 1835, Tom LXIX. p. 189. On the other side are Alvarez y Baena,

in his Life of Quevedo; Sedano, in his "Parnaso Español"; Luzan, in his "Poética"; Montiano, in an *Apresación*, and Bouterwek, in his History Martinez de la Rosa and Faber seem unable to decide. But none of them gives any reasons. I have in the text, and in the subsequent notes, stated the case as fully as seems needful, and have no doubt that Quevedo was the author; or that he knew and concealed the author; or if he really found the manuscript in the way he describes, that he altered and prepared the poetry in it so as to fit it to his especial purpose.

<sup>23</sup> We know, concerning the conclusion of Ercilla's life, only that he died as early as 1595; thirty-six years before the publication of the Bachelor, and when Quevedo was only fifteen years old.

lived in the time of Ferdinand and Isabella, and whose rude verses are found in the old *Cancioneros* from 1511 to 1573 ;<sup>24</sup> that, on the contrary, the forms of the poems published by Quevedo, their tone, their thoughts, their imitations of Petrarch and of the ancients, their versification, and their language,—except a few antiquated words which could easily have been inserted,—all belong to his own age ; that among Quevedo's recognized poems are some, at least, which prove he was capable of writing any one among those attributed to the Bachiller de la Torre ; and finally, that the name of the Bachiller Francisco de la Torre is merely an ingenious disguise of his own, since he was himself a Bachelor at Alcalá, had been baptized Francisco, and was the owner of Torre de la Abad, in which he sometimes resided, and which was twice the place of his exile.<sup>25</sup>

There is, therefore, no doubt, a mystery about the whole matter which will probably never be cleared up ; and we can now come to only one of three conclusions :—either that the poems in question were found by him, as he says they were, in which case he must have altered them materially, so that they could serve the object he avowed in publishing them ; or that they

are the work of some contemporary and friend

\* 285 of Quevedo, whose name \* he knew and con-

<sup>24</sup> It is even doubtful who this Bachiller de la Torre of Boscan was. Velazquez (Pref. v) thinks it was probably *Alonso de la Torre*, author of the “*Vision Deleytable*,” (circa 1461,) of which we have spoken (Vol. I. p. 377); and Alvarez y Baena (*Hijos de Madrid*, Tom. IV. p. 169) thinks it may perhaps have been *Pedro Diaz de la Torre*, who died in 1504, one of the counsellors of Ferdinand and Isabella. But, in either case, the name does not correspond with that of Quevedo's Bachiller *Francisco de la Torre*, any better than the style, thoughts, and forms of

the few poems which may be found in the *Cancionero* of 1573, at ff 124–127, etc., do with those published by Quevedo. *Gayangos* (Spanish translation of this History, Tom. II. p. 560) says there are, in the *Cancionero* of Estuñiga, poems by a *Fernando de la Torre*, and that he lived in the time of John II., i. e. before 1454. But, as *Gayangos* adds truly, this does not, *en lo mas minimo*, help to clear up the question.

<sup>25</sup> He was exiled there in 1628, for six months, as well as imprisoned there in 1620. *Obras*, Tom. X. p. 88.

cealed ; or that they were selected by himself out of the great mass of his own unpublished manuscripts, choosing such as would be least likely to betray their origin, and most likely, by their exact finish and good taste, to rebuke the folly of the affected and fashionable poetry of his time. But whoever may be their author, one thing is certain,— they are not unworthy the genius of any poet belonging to the brilliant age in which they appeared.<sup>26</sup>

Quevedo's principal works, however, — those on which his reputation mainly rests, both at home and abroad, — are in prose. The more grave will hardly come under our cognizance. They consist of a treatise on the Providence of God, including an essay on the Immortality of the Soul ; a treatise addressed to Philip the Fourth, singularly called “God's Politics and Christ's Government,” in which he endeavors to collect a complete body of political philosophy from the example of the Saviour ;<sup>27</sup> treatises on a Holy Life and on the Militant Life of a Christian ; and biographies of Saint Paul and Saint Thomas of Villanueva. These, with translations of Epictetus and the false Phocylides, of Anacreon, of Seneca,

<sup>26</sup> It is among the suspicious circumstances accompanying the first publication of the Bachiller de la Torre's works, that one of the two persons who give the required *Aprobaciones* is Vander Hammen, who played the same sort of trick upon the public of which Quevedo is accused, a vision he wrote being, to this day, printed as Quevedo's own, in Quevedo's works. The other person who gives an *Aprobacion* to the Bachiller de la Torre is Valdivielso, a critic of the seventeenth century, whose name often occurs in this play ; whose authority on such points is small ; and who does not say that he ever *saw* the manuscript or the *Approbation* of Ercilla. See, for Vander Hammen, *post*, p. 291.

<sup>27</sup> His “*Politica de Dios*” was begun during his first imprisonment, and the first edition — or rather what was subsequently enlarged into the First Book — of it was published in 1626, with a dedication dated from his prison, 25th April, 1621, to the Count Olivares, who became afterwards his cruel persecutor. This dedication, however, was superseded by one to the King, prefixed to the completed treatise, and found among Quevedo's papers after his death. I have a copy of the very curious edition first above referred to, which, with several other of his works, was published at Zaragoza, probably, I think, because the censorship of the press was a little less severe in Aragon than it was in Castile.

“ *De Remediis utriusque Fortunæ*,” of Plutarch’s “ *Marcus Brutus*,” and other similar works, seem to have been chiefly produced by his sufferings, and to have constituted the occupation of his weary hours during his different imprisonments. As \* 286 their titles indicate, \* they belong, except the *Anacreon*, to theology and metaphysics rather than to elegant literature. They, however, sometimes show the spirit and the style that mark his serious poetry ; — the same love of brilliancy, and the same extravagance and hyperbole, with occasional didactic passages full of dignity and eloquence. Their learning is generally abundant, but it is often pedantic and cumbersome.<sup>28</sup>

Not so his prose satires. By these he is remembered, and will always be remembered, throughout the world. The longest of them, called “ *The History and Life of the Great Sharper, Paul of Segovia*,” was first printed in 1626. It belongs to the style of fiction invented by Mendoza, in his “ *Lazarillo*,” and has most of the characteristics of its class ; showing, notwithstanding the evident haste and carelessness with which it was written, more talent and spirit than any of them, except its prototype. Like the rest, it sets forth the life of an adventurer, cowardly, inso-

<sup>28</sup> These works, chiefly theological, metaphysical, and ascetic, fill more than six of the eleven octavo volumes that constitute Quevedo’s works in the edition of 1791–1794, and belong to the class of didactic prose.

The Life of St. Thomas de Villanueva, by Quevedo, is an abridgment, hastily made in twelve days from a larger work on the same subject, to meet the popular demand for the approaching canonization of that admirable person in 1620. It makes a neat little volume, which I possess, and which may be read with pleasure by the severest Protestant, — with the same pleasure that he

would look on one of Murillo’s grand pictures of the charities of the same beneficent man of God. This little volume, it should be added, is the earliest of Quevedo’s known publications, and one of the rarest books in the world.

Quevedo valued himself a good deal on his “ *Marco Bruto*,” which he was employed in correcting just before he died, and on his “ *Romulo*,” which was a translation from a work of the same title, by the Marquis Malvezzi, an Italian diplomatist much in the service of Philip IV, and at one time his Ambassador in London.

lent, and full of resources, who begins in the lowest and most infamous ranks of society, but, unlike most others of his class, he never fairly rises above his original condition; for all his ingenuity, wit, and spirit only enable him to struggle up, as it were by accident, to some brilliant success, from which he is immediately precipitated by the discovery of his true character. Parts of it are very coarse. Once or twice it becomes — at least according to the notions of the Romish Church — blasphemous. And almost always it is in the nature of a caricature, overrun with conceits, puns, and a reckless, fierce humor. But everywhere it teems with wit and the most cruel sarcasm against all \* orders and conditions of \* 287 society. Some of its love adventures are excellent. Many of the disasters it records are extremely ludicrous. But there is nothing genial in it; and it is hardly possible to read even its scenes of frolic and riot at the University, or those among the gay rogues of the capital or the gayer vagabonds of a strolling company of actors, with anything like real satisfaction. It is a satire too hard, coarse, and unrelenting to be amusing.<sup>29</sup>

<sup>29</sup> Watt, in his Bibliotheaca, art *Quevedo*, cites an edition of "El Gran Tañao," at Zaragoza, 1626, and I think there is a copy of it in the British Museum. Since that time, it has appeared in the original in a great number of editions, both at home and abroad. Into Italian it was translated by P. Franco, as early as 1634; into French by Genest, the well-known translator of that period, as early as 1641; and into English, anonymously, as early as 1657. Many other versions have been made since, — the last, known to me, being one of Paris, 1843, 8vo, by A. Germond de Lavigne. His translation is made with spirit; but, besides that he has thrust into it passages from other works of Quevedo, and a story by

Salas Barbadillo, he has made a multitude of petty additions, alterations, and omissions; some desirable, perhaps, from the indecency of the original, others not; and winds off the whole with a conclusion of his own, which savors of the sentimental and extravagant school of Victor Hugo. There is, also, a translation of it into English, in a collection of some of Quevedo's Works, printed at Edinburgh, in 3 vols., 8vo, 1798; and a German translation in Bertuch's Magazin der Spanischen und Portug. Litteratur (Dessau, 1781, 8vo, Band II). But neither of them is to be commended for its fidelity. Dr Julius says, there was a German translation of it published at Leipzig (1826, 2 vols.) by a female hand,

This, too, is the character of most of his other prose satires, which were chiefly written, or at least published, nearly at the same period of his life ; — the interval between his two great imprisonments, when the first had roused up all his indignation against a condition of society which could permit such intolerable injustice as he had suffered, and before the crushing severity of the last had broken down alike his health and his courage. Among them are the treatise “On all Things and many more,” — an attack on pretension and cant ; “The Tale of Tales,” which is in ridicule of the too frequent use of proverbs ; and “Time’s Proclamation,” which is apparently directed against whatever came uppermost in its author’s thoughts when he was writing it. These, however, with several more of the same sort, may be passed over to speak of a few better known and of more importance.<sup>30</sup>

\* 288 \* The first is called the “Letters of the Knight of the Forceps,” and consists of two-and-twenty notes of a miser to his lady-love, refusing all her applications and hints for money, or for amusements that involve the slightest expense. Nothing can exceed their dexterity, or the ingenuity and wit that seem anxious to defend and vindicate the mean vice, which, after all, they are only making so much the more ridiculous and odious.<sup>31</sup>

The next is called “Fortune no Fool, and the Hour of All”; — a long apologue, in which Jupiter, sur-

and another by Guttenstern in 1841. He kindly forbears to give the lady’s name, though she had put it on her own title-page.

<sup>30</sup> They are in Vols. I. and II. of the edition of his Works, Madrid, 1791, 8vo.

<sup>31</sup> The “Cartas del Cavallero de la Tenaza” were first printed, I believe,

in 1627 ; and there is a very good translation of them in Band I of the Magazin of Bertuch, an active man of letters, the friend of Musaus, Wieland, and Goethe, who, by translations, and in other ways, did much, between 1769 and 1790, to promote a love for Spanish literature in Germany.

rounded by the deities of Heaven, calls Fortune to account for her gross injustice in the affairs of the world ; and, having received from her a defence no less spirited than amusing, determines to try the experiment, for a single hour, of apportioning to every human being exactly what he deserves. The substance of the fiction, therefore, is an exhibition of the scenes of intolerable confusion which this single hour brings into the affairs of the world ; turning a physician instantly into an executioner ; marrying a match-maker to the ugly phantom she was endeavouring to pass off upon another ; and, in the larger concerns of nations, like France and Muscovy, introducing such violence and uproar, that, at last, by the decision of Jupiter and with the consent of all, the empire of Fortune is restored, and things are allowed to go on as they always had done. Many parts of it are written in the gayest spirit, and show a great happiness of invention ; but, from the absence of much of Quevedo's accustomed bitterness, it may be suspected, that, though it was not printed till several years after his death, it was probably written before either of his imprisonments.<sup>32</sup>

\* But what is wanting of severity in this \* 289 whimsical fiction is fully made up in his *Visions*, six in number, some of which seem to have been published separately soon after his first persecution, and all of them in 1635.<sup>33</sup> Nothing can well be more

<sup>32</sup> I know of no edition of "La Fortuna con Seso" earlier than one I possess, printed at Zaragoza, 1650, 12mo ; and as N. Antonio declares this satire to have been a posthumous work, I suppose there is none older. It is there said to be translated from the Latin of Rifroscancot Viveque Vasgel Duacense ; an imperfect anagram of Quevedo's own name, Francisco Quevedo Villegas. But

it must have been written as early as 1638, because it speaks of Louis XIII. as being without hope of issue, and Louis XIV. was born in that year.

<sup>33</sup> One of these *Sueños* is dated as early as 1607, — the "Zahurdas de Pluton" ; but none, I think, was printed earlier than 1627, and all the six that are certainly by Quevedo were first printed together in a small collec-

free and miscellaneous than their subjects and contents. One, called "El Alguazil alguazilado," or The Catchpole Caught, is a satire on the inferior officers of justice, one of whom being possessed, the demon complains bitterly of his disgrace in being sent to inhabit the body of a creature so infamous. Another, called "Visita de los Chistes," A Visit in Jest, is a visit to the empire of Death, who comes sweeping in surrounded by physicians, surgeons, and especially a great crowd of idle talkers and slanderers, and leads them all to a sight of the infernal regions, with which Quevedo at once declares he is already familiar through the crimes and follies to which he has long been accustomed on earth. But a more distinct idea of his free and bold manner will probably be obtained from the opening of his "Dream of Skulls," or "Dream of the Judgment," than from any enumeration of the subjects and contents of his Visions; especially since, in this instance, it is a specimen of that mixture of the solemn and the ludicrous in which he so much delighted.

\* 290      \* "Methought I saw," he says, "a fair youth borne with prodigious speed through the heav-

tion of his satirical works that appeared at Barcelona, in 1635, entitled "Juguetes de la Fortuna." They were translated into French by Genest, and printed in 1641. Into English they were very freely rendered by Sir Roger L'Estrange, and published in 1668 with such success, that the tenth edition of them was printed at London in 1708, 8vo, and I believe there was yet one more. This is the basis of the translations of the Visions found in Quevedo's Works, Edinburgh, 1798, Vol. I., and in Roscoe's Novelists, 1832, Vol. II. All the translations I have seen are bad. The best is that of L'Estrange, or at least the most spirited; but still L'Estrange is not always faithful when he knew the meaning, and he is sometimes unfaithful from ignorance. In-

deed, the great popularity of his translations was probably owing, in no small degree, to the additions he boldly made to his text, and the frequent accommodations he hazarded of its jests to the scandal and taste of his times by allusions entirely English and local. The Visions, besides the translation of Genest above referred to, were evidently in fashion in France still later, for I have seen, — (1.) *L'algouasil* (sic) burlesque imité de Don F. de Quevedo, &c., par le Sieur de Bourneuf P. Paris, 1657, 8vo, pp. 143; (2) *L'Enfer burlesque tirée*, &c., par M. I. C. Paris, 1668, 12mo, pp. 81; and (3.) *Horreur des Horreurs sans Horreurs tirée des Visions*, &c., par Mons Isaulnay Paris, 1671, 8vo. They are all in verse.

ens, who gave a blast to his trumpet so violent, that the radiant beauty of his countenance was in part disfigured by it. But the sound was of such power, that it found obedience in marble and hearing among the dead; for the whole earth began straightway to move, and give free permission to the bones it contained to come forth in search of each other. And thereupon I presently saw those who had been soldiers and captains start fiercely from their graves, thinking it a signal for battle; and misers coming forth, full of anxiety and alarm, dreading some onslaught; while those who were given to vanity and feasting thought, from the shrillness of the sound, that it was a call to the dance or the chase. At least, so I interpreted the looks of each of them, as they sprang forth; nor did I see one, to whose ears the sound of that trumpet came, who understood it to be what it really was. Soon, however, I noted the way in which certain souls fled from their former bodies; some with loathing, and others with fear. In one an arm was missing, in another an eye; and while I was moved to laughter as I saw the varieties of their appearance, I was filled with wonder at the wise providence which prevented any one of them, all shuffled together as they were, from putting on the legs or other limbs of his neighbors. In one graveyard alone I thought that there was some changing of heads, and I saw a notary whose soul did not quite suit him, and who wanted to get rid of it by declaring it to be none of his.

“But when it was fairly understood of all that this was the Day of Judgment, it was worth seeing how the voluptuous tried to avoid having their eyes found for them, that they need not bring into court witnesses against themselves, — how the malicious tried to avoid

their own tongues, and how robbers and assassins seemed willing to wear out their feet in running away from their hands. And turning partly round, I saw one miser asking another (who, having been embalmed and his bowels left at a distance, was waiting \* 291 silently till they should \* arrive), whether, because the dead were to rise that day, certain money-bags of his must also rise. I should have laughed heartily at this, if I had not, on the other side, pitied the eagerness with which a great rout of notaries rushed by, flying from their own ears, in order to avoid hearing what awaited them, though none succeeded in escaping, except those who in this world had lost their ears as thieves, which, owing to the neglect of justice, was by no means the majority. But what I most wondered at was, to see the bodies of two or three shop-keepers, that had put on their souls wrong side out, and crowded all five of their senses under the nails of their right hands."

The "Casa de los Locos de Amor," the Lovers' Mad-house,— which is placed among Quevedo's Visions, though it has been declared to be the work of his friend Lorenzo Vander Hammen, to whom it is dedicated,— lacks, no doubt, the freedom and force which characterize the Vision of the Judgment.<sup>34</sup> But this

<sup>34</sup> The six unquestioned *Sueños* are in Tom. I of the Madrid edition of Quevedo, 1791. The "Casa de los Locos de Amor" is in Tom. II ; and as N. Antonio (Bib. Nov., I 462, and II 10) says Vander Hammen, a Spanish author of Flemish descent, *told him* that he wrote it himself, we are bound to take it from the proper list of Quevedo's works. This, however, has been sometimes thought to be a piece of vanity and falsehood in Vander Hammen, because in 1627 he had dedicated several of the Visions—the one in question among the rest—to Francisco Ximenez de Urrea, *as the works of Que-*

*vedo*. But it is much more likely that Quevedo should have countenanced this little *supercherie* of his friend, than that Nicolas Antonio should have been deliberately imposed upon by Vander Hammen. Besides, large portions of the "Casa de los Locos de Amor" are beneath the talent of Quevedo, and not at all in his manner. Vander Hammen was the author of several works now forgotten ; but, in his time, he was connected with men of note. Lope de Vega dedicated to him "El Bobo del Colegio," in 1620, begging him to publish his "Secretario," which, however, I believe, never was printed.

is a remark that can by no means be extended to the Vision of "Las Zahurdas de Pluton," Pluto's Pigsties, which is a show of what may be called the rabble of Pandemonium; "El Mundo por de Dentro," The World Inside Out; and "El Entremetido, la Dueña, y el Soplón," The Busybody, the Duenna, and the Informer; — all of which are full of the most truculent sarcasm, recklessly cast about by one to whom the world had not been a friend, nor the world's law.

In these Visions, as well as in nearly all that Quevedo \* wrote, much is to be found that indicates a bold, original, and independent spirit. His age and the circumstances amidst which he was placed have, however, left their traces both on his poetry and on his prose. Thus, his long residence in Italy is seen in his frequent imitations of the Italian poets, and once, at least, in the composition of an original Italian sonnet;<sup>35</sup> — his cruel sufferings during his different persecutions are apparent in the bitterness of his invectives everywhere, and especially in one of his Visions, dated from his prison, against the administration of justice and the order of society; — while the influence of the false taste of his times, which, in some of its forms, he manfully resisted, is yet no less apparent in others, and persecutes him with a perpetual desire to be brilliant, to say something quaint or startling, and to be pointed and epigrammatic. But over these, and over all his other defects, his genius from time to time rises, and reveals itself with great power. He has not, indeed, that sure perception of the ridiculous which leads Cervantes, as if by instinct, to the exact measure of satirical retribution; but he perceives quickly and strongly; and though he often

errs, from the exaggeration and coarseness to which he so much tended, yet, even in the passages where these faults most occur, we often find touches of a solemn and tender beauty, that show he had higher powers and better qualities than his extraordinary wit, and add to the effect of the whole, though without reconciling us to the broad and gross farce that is too often mingled with his satire.<sup>36</sup>

<sup>36</sup> A violent attack was made on Quevedo, ten years before his death, in a volume entitled "El tribunal de la Justa Venganza," printed at Valencia, 1635, 12mo, pp. 294, and said to be written by the Licenciado Arnaldo Franco-Furt, a pseudonyme, which is supposed to conceal the names of Montalvan, of Father Niseno, who busied himself in getting Quevedo put on the Index Expurgatorius, and of other persons, for such a satirist could not be wanting in enemies. The "Tribunal" is thrown into the form of a trial, before regular judges, of the satirical works of Quevedo then published, and, except when the religious prejudices of the authors prevail over their judgment, is not more severe than Quevedo's license merited. No honor, however, is done to his genius or his wit, and personal malice seems apparent in many parts of it. At the beginning it is intimated that it was written at Seville.

Probably the Jesuits there had a hand in it, but, as it is admitted that there were several authors, so it is possible that it was prepared in different places.

In 1794, Sancha printed, at Madrid, a translation of Anacreon, with notes by Quevedo, making 160 pages, but not numbering them as a part of the eleventh volume, 8vo, of Quevedo's Works, which he completed that year. They are more in the terse and classical manner of the Bachiller de la Torre than the same number of pages anywhere among Quevedo's earlier printed works, but the translation is not very strict, and the spirit of the original is not so well caught as it is by Estevan Manuel de Villegas, whose "Eroticas" will be noticed hereafter. The version of Quevedo is dedicated to the Duke of Ossuna, his patron, Madrid, 1st April, 1609. Villegas did not publish till 1617, but it is not likely that he knew anything of the labors of Quevedo.

THE want of a great capital, as a common centre for letters and literary men, was long felt in Spain. Until the time of Ferdinand and Isabella, the country, broken into separate kingdoms, and occupied by continual conflicts with a hated enemy, had no leisure for the projects that belong to a period of peace; and even later, when there was tranquillity at home, the foreign wars and engrossing interests of Charles the Fifth in Italy, Germany, and the Netherlands led him so much abroad, that there was still little tendency to settle the rival claims of the great cities; and the court resided occasionally in each of them, as it had from the time of Saint Ferdinand. But already it was plain that the preponderance which for a time had been enjoyed by Seville was gone. Castile had prevailed in this, as it had in the greater contest for giving a language to the country; and Madrid, which had been a favorite residence of the Emperor, because he thought its climate dealt gently with his infirmities, began, from 1560, under the arrangements of Philip the Second, to be regarded as the real capital of the whole monarchy.<sup>1</sup>

<sup>1</sup> Quintana, *Historia de Madrid*, 1630, folio, Lib III. c. 24—26. Cabrera, *Historia de Felipe*, II, Madrid, 1619, folio, Lib V. c. 9; where he says Charles V. had intended to make Madrid

his capital. Charles, indeed, permitted Madrid in 1544 to take a crown into its escutcheon, since which time it has been called *Villa Imperial y Coronada* (*Origen de Madrid*, ec, por Juan Ant.

\* 295 \* On no department of Spanish literature did this circumstance produce so considerable an influence as it did on the drama. In 1583, the foundations for the two regular theatres that have continued such ever since were already laid ; and from about 1590, Lope de Vega, if not the absolute monarch of the stage that Cervantes describes him to have been somewhat later, was at least its controlling spirit. The natural consequences followed. Under the influence of the nobility, who thronged to the royal residence, and led by the example of one of the most popular writers and men that ever lived, the Spanish theatre rose like an exhalation ; and a school of poets — many of whom had hastened from Seville, Valencia, and other parts of the country, and thus extinguished the hopes of an independent drama in the cities they deserted — was collected around him in the new capital, until the dramatic writers of Madrid became suddenly more numerous, and in many respects more remarkable, than any other similar body of poets in modern times.

The period of this transition of the drama is well marked by a single provincial play, the “Comedia Jacobina,” printed at Toledo in 1590, but written, as its author intimates, some years earlier. It was the work of Damian de Vegas, an ecclesiastic of that city, and is on the subject of the blessing of Jacob by Isaac. Its structure is simple, and its action direct and unembarrassed. As it is religious throughout, it belongs, in this respect, to the elder school of the drama ; but, on

Pellicer. Madrid, 4to, 1803, p. 97.) But it has always been a favored city. In 1658, Alonso Núñez de Castro, General Chronicler of Spain and author of several works of consequence to the national history, published a thorough-

ly Spanish book to show forth the glories of the capital, entitled “Solo Madrid es Corte.” The display in it of the wealth of the hierarchy and of some of the great military orders may well be called astounding.

the other hand, as it is divided into three acts, has a prologue and epilogue, a chorus and much lyrical poetry in various measures, as well as poetry in *terza rima* and blank verse, it is not unlike what was attempted about the same time, on the secular stage, by Cervantes and Argensola. Though uninteresting in its plot, and dry and hard in its versification, it is not wholly without poetical merit; but we have no proof that it ever was acted in Madrid, or, indeed, that it was known on the stage \* beyond the limits \* 296 of Toledo; a city to which its author was much attached, and where he seems always to have lived.<sup>2</sup>

Whether Francisco de Tarrega, who can be traced from 1591 to 1608, was one of those who early came from Valencia to Madrid as writers for the theatre, is uncertain. But we have proof that he was a canon of the cathedral in the first-named city, and yet was well known in the new capital, where his plays were acted and printed.<sup>3</sup> One of them is important, because it shows the modes of representation in his time, as well as the peculiarities of his own drama. It begins with a *loa*, which in this case is truly a compliment, as its name implies; but it is, at the same time, a witty and

<sup>2</sup> The "Comedia Jacobina" is found in a curious and rare volume of religious poetry, entitled "Libro de Poesia, Christiana, Moral, y Divina," por el Doctor Frey Damian de Vegas (Toledo, 1590, 12mo, ff. 503). It contains a poem on the Immaculate Conception, the turning-point of Spanish orthodoxy; a colloquy between a damsel and a too free lover; a colloquy between the Soul, the Will, and the Understanding, which may have been represented, and a great amount of religious poetry, both lyric and didactic, much of it in the old Spanish measures, and much in the Italian, but little of it better than the mass of poor verse on such subjects then in favor.

<sup>3</sup> It is ascertained that the Canon

Tarrega lived at Valencia in 1591, and wrote eleven or twelve plays, two of which are known only by their titles. The rest were printed at Madrid in 1614, and again in 1616. Cervantes praises him in the Preface to his *Comedias*, 1615, among the early followers of Lope, for his *discrecion e innumerables conceptos*. It is evident from the notice of the "Enemiga Favorable," by the wise canon in *Don Quixote*, that it was then regarded as the best of its author's plays, as it has been ever since. quaint ballad in praise of ugly women. Then comes what is called a “Dance at Leganitos,”—a popular resort in the suburbs of Madrid, which here gives its name to a rude farce founded on a contest in the open street between two lackeys.<sup>4</sup>

After the audience have thus been put in \* 297 good-humor, \* we have the principal play, called “The Well-disposed Enemy”; a wild, but not uninteresting, heroic drama, of which the scene is laid at the court of Naples, and the plot turns on the jealousy of the Neapolitan king and queen. Some attempt is made to compress the action within probable limits of time and space; but the character of Laura— at first in love with the king and exciting him to poison the queen, and at last coming out in disguise as an armed champion to defend the same queen when she is in danger of being put to death on a false accusation of infidelity— destroys all regularity of movement, and is a blemish that extends through the whole piece. Parts of it, however, are spirited, like the opening,— a scene full of life and nature,— where the court rush in from a bull-fight, that had been suddenly broken up by the personal danger of the king; and parts of it are poetical, like the first interview between Laura and Belisardo, whom she finally marries.<sup>5</sup> But the impression left by the

\* This farce, much like an *entremes* or *saynete* of modern times, is a quarrel between two lackeys for a damsel of their own condition, which ends with one of them being half drowned by the other in a public fountain. It winds up with a ballad older than itself; for it alludes to a street as being about to be constructed through Leganitos, while one of the personages in the farce speaks of the street as already there. The ballad seems to be claimed by Salas Barbadillo. At least, I find it among his

Rimas, (1612, f 125, b,) and the fountain is appropriately introduced, for Leganitos was famous for it (See Cervantes, Ilustre Fregona, and Don Quixote, Parte II. c. 22, with the note of Pellicer) Such little circumstances abound in the popular portions of the old Spanish drama, and added much to its effect at the time it appeared, and especially to its effect when represented.

<sup>5</sup> The “Enemiga Favorable” is the last play in an important volume marked as the fifth of the Collection of the

whole is, that, though the path opened by Lope de Vega is the one that is followed, it is followed with footsteps ill-assured, and a somewhat uncertain purpose.

Gaspar de Aguilar was, as Lope tells us, the rival of Tarrega.<sup>6</sup> He was secretary to the Viscount Chelva, and afterwards major-domo to the Duke of Gandia, one of the most prominent noblemen at the court of Philip the Third. But an allegorical poem, which Aguilar wrote, in honor of his last patron's marriage, found so little favor, that its unhappy author, disengaged and repulsed, died of mortification.

He lived, \*as Tarrega probably did, both in \*298 Valencia and in Madrid, and wrote several minor poems, besides one of some length on the expulsion of the Moors from Spain, which was printed in 1610. The last date we have relating to his unfortunate career is 1623.

Of the eight or nine plays he published, only two can claim our notice. The first is "The Merchant Lover," praised by Cervantes, who, like Lope de Vega, mentions Aguilar more than once with respect. It is the story of a rich merchant, who pretends to have lost his fortune in order to see whether either of two ladies to whose favor he aspires loved him for his own sake rather than for that of his money; and he

"*Diferentes Comedias*," published at Alcalá in 1615, at Madrid in 1616, and at Barcelona the same year, of which Lord Taunton has a copy at Stoke, and of which there is another at the Biblioteca Ambrogiana in Milan, both of which I have seen (See Vol. III., Appendix F.) The play in question is divided into three *jornadas*, called *actos*, and shows otherwise that it was constructed on the model of Lope's dramas. But Tarrega wrote also at least one religious play, "The Foundation of the Order of Mercy." It is

the story of a great robber who becomes a great saint, and may have suggested to Calderon his "Devocion de la Cruz." Six more of his plays may be found in the very rare "Doze Comedias de quattro Poetas de Valencia," 1609, which I possess, but they are not so good as the "Enemiga Favorable" I think there are twelve of his plays, in all, still extant.

<sup>6</sup> "Laurel de Apolo," (Madrid, 1630, 4to, f. 21,) where Lope says, speaking of Tarrega, "Gaspar Aguilar *competia* con él en la dramática poesía."

finally marries the one who, on this hard trial, proves herself to be disinterested. It is preceded by a  *prólogo*, or *loa*, which in this case is a mere jesting tale ; and it ends with six stanzas, sung for the amusement of the audience, about a man who, having tried unsuccessfully many vocations, and, among the rest, those of fencing-master, poet, actor, and tapster, threatens, in despair, to enlist for the wars. Neither the beginning nor the end, therefore, has anything to do with the subject of the play itself, which is written in a spirited style, but sometimes shows bad taste and extravagance, and sometimes runs into conceits.

One character is happily hit,— that of the lady who loses the rich merchant by her selfishness. When he first tells her of his pretended loss of fortune, and seems to bear it with courage and equanimity, she goes out saying,—

Heaven save me from a husband such as this,  
Who finds himself so easily consoled !  
Why, he would be as gay, if it were *me*  
That he had lost, and not his money !

And again, in the second act, where she finally rejects him, she says, in the same jesting spirit,—

Would you, sir, see that you are not a man,—  
Since all that ever made you one is gone, —  
\* (The figure that remains availng but  
To bear the empty name that marked you once,) —  
Go and proclaim aloud your loss, my friend,  
And then inquire of your own memory  
What has become of you, and who you are ;  
And you will learn, at once, that you are not  
The man to whom I lately gave my heart.<sup>7</sup>

What, perhaps, is most remarkable about this drama is, that the unity of place is observed, and possibly the unity of time ; a circumstance which shows that the freedom of the Spanish stage from such restraints was not yet universally acknowledged.

Quite different from this, however, is “The Unforeseen Fortune”; a play which, if it have only one action, has one whose scene is laid at Saragossa, at Valencia, and along the road between these two cities, while the events it relates fill up several years. The hero, just at the moment he is married by proxy in Valencia, is accidentally injured in the streets of Saragossa, and carried into the house of a stranger, where he falls in love with the fair sister of the owner, and is threatened with instant death by her brother, if he does not marry her. He yields to the threat. They are married, and set out for Valencia. On the way, he confesses his unhappy position to his bride, and very coolly proposes to adjust all his difficulties by putting her to death. From this, however, he is turned aside, and they arrive in Valencia, where she serves him, from blind affection, as a voluntary slave ; even taking care of a child that is borne to him by his Valencian wife.

Other absurdities follow. At last she is driven to declare publicly who she is. Her ungrateful husband then attempts to kill her, and thinks he has succeeded. \*He is arrested for the supposed \*300 murder ; but at the same instant her brother arrives, and claims his right to single combat with the offender. Nobody will serve as the base seducer’s second. At the last moment, the injured lady herself, presumed till then to be dead, appears in the lists, disguised in complete armor, not to protect her guilty

husband, but to vindicate her own honor and prowess. Ferdinand, the king, who presides over the combat, interferes, and the strange show ends by her marriage to a former lover, who has hardly been seen at all on the stage,—a truly “Unforeseen Fortune,” which gives its name to the ill-constructed drama.

The poetry, though not absolutely good, is better than the action. It is generally in flowing *quintillas*, or stanzas of five short lines each, but not without long portions in the old ballad-measure. The scene of an entertainment on the sea-shore near Valencia, where all the parties meet for the first time, is good. So are portions of the last act. But, in general, the whole play abounds in conceits and puns, and is poor. It opens with a *loa*, whose object is to assert the universal empire of man; and it ends with an address to the audience from King Ferdinand, in which he declares that nothing can give him so much pleasure as the settlement of all these troubles of the lovers, except the conquest of Granada. Both are grotesquely inappropriate.<sup>8</sup>

Better known than either of the last authors is another Valencian poet, Guillen de Castro, who, like them, was respected at home, but sought his fortunes in the capital. He was born of a noble family, in 1569, and seems to have been early distinguished, in his native city, as a man of letters; for, in 1591, he was a member of the *Nocturnos*, one of the most successful of the fantastic associations established

<sup>8</sup> The accounts of Aguilar are found in Rodriguez, pp. 148, 149, and in Ximeno, Tom. I. p. 255, who, as is often the case, has done little but arrange in better order the materials collected by Rodriguez. Seven of Aguilar's plays are in collections printed at Valencia in 1609 and 1616, min-

gled with the plays of other poets. A copy of the “*Suerte sin Esperanza*,” which I possess, without date or paging, seems older. A copy of his “*Venganza Honrosa*” is to be found as the fifth play in Vol. V. of the “*Diferentes Comedias*,” mentioned *ante*, note 5.

in Spain, in imitation \* of the *Academias* that \* 301 had been for some time fashionable in Italy. His literary tendencies were further cultivated at the meetings of this society, where he found among his associates Tarrega, Aguilar, and Artieda.<sup>9</sup>

His life, however, was not wholly devoted to letters. At one time, he was a captain of cavalry ; at another, he stood in such favor with Benevente, the munificent viceroy of Naples, that he had a place of consequence intrusted to his government ; and at Madrid he was so well received, that the Duke of Ossuna gave him an annuity of nearly a thousand crowns, to which the reigning favorite, the Count Duke Olivares, added a royal pension. But his unequal humor, his discontented spirit, and his hard obstinacy ruined his fortunes, and he was soon obliged to write for a living. Cervantes speaks of him, in 1615, as among the popular authors for the theatre, and in 1620 he assisted Lope at the festival of the canonization of San Isidro, wrote several of the pieces that were exhibited, and gained one of the prizes. Six years later he was still earning a painful subsistence as a dramatic writer ; and in 1631 he died so poor, that he was buried by charity.<sup>10</sup>

Very few of his works have been published, except his plays. Of these we have nearly forty, printed be-

<sup>9</sup> In the note of Cerdá y Rico to the "Diana" of Gil Polo, 1802, pp 515 - 519, is an account of this *Academy*, and a list of its members. Barrera says it lasted only from October 4, 1591, to April 13, 1593, and that Aguilar was one of its founders.

<sup>10</sup> Rodriguez, p 177 ; Ximeno, Tom. I p. 305 ; Fuster, Tom I p 235. The last is important on this subject. The portrait of Guillen — together with the portraits of Gaspar de Aguilar, Luis Vives, Ausias March, Jayme Roig, Francisco Tarrega, Franciscó de Borja, and

other distinguished Valencians — was painted for a gallery in Valencia by Juan de Ribalta, who died in 1628. Those of Tarrega, Aguilar, and Guillen de Castro are likely to have been originals, since these poets were contemporary with Ribalta, and the whole collection, consisting of thirty-one heads, was extant in the Monastery of La Murta de San Geronimo, when Cean Bermudez prepared his Dictionary of Artists. See Tom IV, 1800, p. 181. They are now, I believe, in possession of the Academy of San Carlos at Valencia.

tween 1614 and 1630. They belong decidedly to the school of Lope, between whom and Guillen de Castro there was a friendship, which can be traced back, by the Dedication of one of Lope's plays, and by several passages in his miscellaneous works, to the period of

Lope's exile to Valencia; while, on the side \* 302 of Guillen de \* Castro, a similar testimony is borne to the same kindly regard by a volume of his own plays, addressed to Marcela, Lope's favorite daughter.

The marks of Guillen de Castro's personal condition, and of the age in which he lived and wrote, are no less distinct in his dramas than the marks of his poetical allegiance. His "Mismatches in Valencia" seems as if its story might have been constructed out of facts within the poet's own knowledge. It is a series of love intrigues, like those in Lope's plays, and ends with the dissolution of two marriages by the influence of a lady, who, disguised as a page, lives in the same house with her lover and his wife, but whose machinations are at last exposed, and she herself driven to the usual resort of entering a convent. His "Don Quixote," on the other hand, is taken from the First Part of Cervantes's romance, then as fresh as any Valencian tale. The loves of Dorothea and Fernando, and the madness of Cardenio, form the materials for its principal plot, and the *dénouement* is the transportation of the knight, in a cage, to his own house, by the curate and barber, just as he is carried home by them in the romance;—parts of the story being slightly altered to give it a more dramatic turn, though the language of the original fiction is often retained, and the obligations to it are fully recognized. Both of these dramas are written chiefly in the old *redondillas*, with

a careful versification ; but there is little poetical invention in either of them, and the first act of the “ Mismatches in Valencia ” is disfigured by a game of wits, fashionable, no doubt, in society at the time, but one that gives occasion, in the play, to nothing but a series of poor tricks and puns.<sup>11</sup>

\* Very unlike them, though no less characteristic of the times, is his “ Mercy and Justice ” ; — the shocking story of a prince of Hungary condemned to death by his father for the most atrocious crimes, but rescued from punishment by the multitude, because his loyalty has survived the wreck of all his other principles, and led him to refuse the throne offered to him by rebellion. It is written in a greater variety of measures than either of the dramas just mentioned, and shows more freedom of style and movement ; relying chiefly for success on the story, and on that sense of loyalty which, though originally a great virtue in the relations of the Spanish kings and their people, was now become so exaggerated, that it was undermining much of what was most valuable in the national character.<sup>12</sup>

### “ Santa Bárbara, or the Mountain Miracle and Heav-

<sup>11</sup> Both these plays are in the first volume of his *Comedias*, printed in 1614, but I have the *Don Quixote* in a separate pamphlet, without paging or date, and with rude woodcuts, such as belong to the oldest Spanish publications of the sort. The first time *Don Quixote* appears in it, the stage direction is, “Enter *Don Quixote* on *Rozinante*, dressed as he is described in his book.” The *redondillas* in this drama, regarded as mere verses, are excellent ; e.g. *Cardenio*’s lamentations at the end of the first act : —

Donde me llevan los pies  
Sin la vida ? El seso pierdo ;  
Pero como seré cuerdo  
Si fué traydor el Marques ?

Que cordura, que concierto,  
Tendré yo, si estoy sin mí ?  
Sin ser, sin alma y sin ti ?  
Ay, Lucinda, que me has muerto ! —

and so on. Guerin de Bouscal, one of a considerable number of French dramatists (see *Puibusque*, Tom II p 441) who resorted freely to Spanish sources between 1630 and 1650, brought this drama of Guillen on the French stage in 1638.

<sup>12</sup> It is in the second volume of Guillen’s plays, but it is also in the “ *Flor de las Mejores Doce Comedias*,” etc., Madrid, 1652. Guillen dedicates his second volume, which I found in the Vatican, by a few affectionate words, to his cousin *Doña Ana Figuerola y de Castro*.

en's Martyr," belongs, again, to another division of the popular drama as settled by Lope de Vega. It is one of those plays where human and Divine love, in tones too much resembling each other, are exhibited in their strongest light, and, like the rest of its class, was no doubt a result of the severe legislation in relation to the theatre at that period, and of the influence of the clergy on which that legislation was founded. The scene is laid in Nicomedia, in the third century, when it was still a crime to profess Christianity; and the story is that of Saint Barbara, according to the legend that represents her to have been a contemporary of Origen, who, in fact, appears on the stage as one of the principal personages. At the opening of the drama, the heroine declares that she is already, in her heart, attached to the new sect; and at the end, she is its triumphant martyr, carrying with her, in a public profession of its faith,\* not only her lover, \* 304 but all the leading men of her native city.

One of the scenes of this play is particularly in the spirit and faith of the age when it was written; and was afterwards imitated by Calderon in his "Wonder-working Magician." The lady is represented as confined by her father in a tower, where, in solitude, she gives herself up to Christian meditations. Suddenly the arch-enemy of the human race presents himself before her, in the dress of a fashionable Spanish gallant. He gives an account of his adventures in a fanciful allegory, but does not so effectually conceal the truth that she fails to suspect who he is. In the mean time, her father and her lover enter. To her father the mysterious gallant is quite invisible, but he is plainly seen by the lover, whose jealousy is thus excited to the highest degree; and the first act ends

with the confusion and reproaches which such a state of things necessarily brings on, and with the persuasion of the father that the lover may be fit for a madhouse, but would make a very poor husband for his gentle daughter.<sup>13</sup>

The most important of the plays of Guillen de Castro are two which he wrote on the subject of Rodrigo the Cid,—“*Las Mocedades del Cid*,” The Youth, or Youthful Adventures, of the Cid;—both founded on the old ballads of the country, which, as we know from Santos, as well as in other ways, continued long after the time of Castro to be sung in the streets.<sup>14</sup> The first of these two dramas embraces the earlier portion of the hero's life. It opens with a solemn scene of his arming as a knight, and with the insult immediately afterwards offered to his aged father at the royal council-board; and then goes on with the trial of the spirit and \* courage of Rodrigo, \* 305 and the death of the proud Count Lozano, who had outraged the venerable old man by a blow on the cheek;—all according to the traditions in the old chronicles.

Now, however, comes the dramatic part of the action, which was so happily invented by Guillen de Castro. Ximena, the daughter of Count Lozano, is represented in the drama as already attached to the young knight; and a contest, therefore, arises between her sense of what she owes to the memory of her father and what she may yield to her own affection; a con-

<sup>13</sup> This *comedia de santo* does not appear in the collection of Guillen's plays; but my copy of it (Madrid, 1729) attributes it to him, and so does the Catalogue of Huerts, besides which, the internal evidence from its versification and manner is strong for its genuineness. The passages in which the lady speaks of Christ as her lover and spouse are, like all such passages in the

old Spanish drama, offensive to Protestant ears

<sup>14</sup> “*El Verdad en el Potro, y el Cid Resucitado*,” of Fr. Santos, (Madrid, 1686, 12mo,) contains (pp 9, 10, 51, 106, etc) ballads on the Cid, as he says they were *then* sung in the streets by the blind beggars. The same or similar statements are made by Sarmiento, nearly a century later.

test that continues through the whole of the play, and constitutes its chief interest. She comes, indeed, at once to the king, full of a passionate grief, that struggles with success, for a moment, against the dictates of her heart, and claims the punishment of her lover according to the ancient laws of the realm. He escapes, however, in consequence of the prodigious victories he gains over the Moors, who, at the moment when these events occurred, were assaulting the city. Subsequently, by the contrivance of false news of the Cid's death, a confession of her love is extorted from her; and at last her full consent to marry him is obtained, partly by Divine intimations, and partly by the natural progress of her admiration and attachment during a series of exploits achieved in her honor and in defence of her king and country.

This drama of Guillen de Castro has become better known throughout Europe than any other of his works; not only because it is the best of them all, but because Corneille, who was his contemporary, made it the basis of his own brilliant tragedy of "The Cid"; which did more than any other single drama to determine for two centuries the character of the theatre all over the continent of Europe. But though Corneille — not unmindful of the angry discussions carried on about the unities, under the influence of Cardinal Richelieu — has made alterations in the action of his play, which are fortunate and judicious, still he has relied, for its main interest, on that contest between the duties and the affections of the heroine which was first imagined by Guillen de Castro.

\* 306 \* Nor has he shown in this exhibition more spirit or power than his Spanish predecessor. Indeed, sometimes he has fallen into considerable

errors, which are wholly his own. By compressing the time of the action within twenty-four hours, instead of suffering it to extend through many months, as it does in the original, he is guilty of the absurdity of overcoming Ximena's natural feelings in relation to the person who had killed her father, while her father's dead body is still before her eyes. By changing the scene of the quarrel, which in Guillen occurs in presence of the king, he has made it less grave and natural. By a mistake in chronology, he establishes the Spanish court at Seville two centuries before that city was wrested from the Moors. And by a general straitening of the action within the conventional limits which were then beginning to bind down the French stage, he has, it is true, avoided the extravagance of introducing, as Guillen does, so incongruous an episode out of the old ballads as the miracle of Saint Lazarus; but he has hindered the free and easy movement of the incidents, and diminished their general effect.

Guillen, on the contrary, by taking the traditions of his country just as he found them, instantly conciliated the good-will of his audience, and at the same time imparted the freshness of the old ballad spirit to his action, and gave to it throughout a strong national air and coloring. Thus, the scene in the royal council, where the father of the Cid is struck by the haughty Count Lozano, several of the scenes between the Cid and Ximena, and several between both of them and the king, are managed with great dramatic skill and a genuine poetical fervor.

The following passage, where the Cid's father is waiting for him in the evening twilight at the place appointed for their meeting after the duel, is as characteristic, if not as striking, as any in the drama, and is

superior to the corresponding passage in the French play, which occurs in the fifth and sixth scenes of the third act.

The timid ewe bleats not so mournfully  
Its shepherd lost, nor cries the angry lion  
\* 307 \* With such a fierceness for its stolen young,  
As I for Roderic — My son ! my son !  
Each shade I pass, amid the closing night,  
Seems still to wear thy form and mock my arms !  
O, why, why comes he not ? I gave the sign, —  
I marked the spot, — and yet he is not here !  
Has he neglected ? Can he disobey ?  
It may not be ! A thousand terrors seize me.  
Perhaps some injury or accident  
Has made him turn aside his hastening step ; —  
Perhaps he may be slain, or hurt, or seized.  
The very thought freezes my breaking heart.  
O holy Heaven, how many ways for fear  
Can grief find out ! — But hark ! What do I hear ?  
Is it his footstep ? Can it be ? O, no !  
I am not worthy such a happiness !  
'T is but the echo of my grief I hear —  
But hark again ! Methinks there comes a gallop  
On the flinty stones He springs from off his steed !  
Is there such happiness vouchsafed to me ?  
Is it my son ?

My father ?

May I truly

Trust myself, my child ? O, am I, am I, then,  
Once more within thine arms ! Then let me thus  
Compose myself, that I may honor thee  
As greatly as thou hast deserved. But why  
Hast thou delayed ? And yet, since thou art here,  
Why should I weary thee with questioning ? —  
O, bravely hast thou borne thyself, my son ;  
Hast bravely stood the proof, hast vindicated well  
Mine ancient name and strength ; and well hast paid  
The debt of life which thou receivedst from me.  
Come near to me, my son. Touch the white hairs  
Whose honor thou hast saved from infamy,  
And kiss, in love, the cheek whose stain thy valor  
Hath in blood washed out. — My son ! my son !  
The pride within my soul is humbled now,  
And bows before the power that has preserved  
From shame the race so many kings have owned  
And honored <sup>16</sup>

\* The Second Part, which gives the adventures of the siege of Zamora, the assassination of King Sancho beneath its walls, and the defiance and duels that were the consequence, is not equal in merit to the First Part. Portions of it, such as some of the circumstances attending the death of the king, are quite incapable of dramatic representation, so gross and revolting are they; but even here, as well as in the more fortunate passages, Guillen has faithfully followed the popular belief concerning the heroic age he represents, just as it had come down to him, and has thus given to his scenes a life and reality that could hardly have been given by anything else.

Indeed, it is a great charm of this drama, that the popular traditions everywhere break through so constantly, imparting to it their peculiar tone and character. Thus, the insult offered to old Laynez in the council; the complaints of Ximena to the king on the death of her father, and the conduct of the Cid to herself; the story of the Leper; the base treason of Bellido Dolfos; the reproaches of Queen Urraca from the walls of the beleaguered city, and the defiance and duels that follow,<sup>16</sup>—all are taken from the old bal-

<sup>16</sup> This impeachment of the honor of the whole city of Zamora, for having harbored the murderer of King Sancho, fills a large place in the "Crónica General," (Parte IV,) in the "Crónica del Cid," and in the old ballads, and is called *El Reto de Zamora*, — a form of challenge preserved in this play of Guillen.

lads; often in their very words, and generally in their fresh spirit and with their picture-like details. The effect must have been great on a Castilian audience, always sensible to the power of the old popular poetry, and always stirred as with a battle-cry when the achievements of their earlier national heroes were recalled to them.<sup>17</sup>

\* 309 \* In his other dramas we find traces of the same principles and the same habits of theatrical composition that we have seen in those already noticed. The "Impertinent Curiosity" is taken from the tale which Cervantes originally printed in the First Part of his *Don Quixote*. The "Count Alarcos," and the "Count d' Irlos," are founded on the fine old ballads that bear these names. And the "Wonders of Babylon" is a religious play, in which the story of Susanna and the Elders fills a space somewhat too large, and in which King Nebuchadnezzar is unhappily introduced eating grass, like the beasts of the field.<sup>18</sup> But everywhere there is shown a desire to satisfy the demands of the national taste; and everywhere it is plain that Guillen is a follower of Lope de Vega, and is distinguished from his rivals rather by the sweetness of his versification than by any more prominent or original attribute.

Another of the early followers of Lope de Vega, and one recognized as such at the time by Cervantes, is Luis Velez de Guevara. He was born at Ecija in

len, and recognized as a legal form so far back as the *Partida VII*, Tft. III., "De los Rieptos."

<sup>17</sup> The plays of Guillen on the *Cid* have often been reprinted, though hardly one of his other dramas has been. Voltaire, in his Preface to *Corneille's Cid*, says *Corneille* took his hints from *Diamante*. But the reverse is the case. *Diamante* wrote after *Corneille*, and was

indebted to him largely, as we shall see hereafter. Lord Holland's *Life of Guillen*, already referred to, *ante*, p. 152, note, is interesting, though imperfect

<sup>18</sup> "Las Maravillas de Babilonia" is not in Guillen's collected dramas, and is not mentioned by Rodriguez or Fuster. But it is in a volume entitled "Flor de las Mejores Doce Comedias," Madrid, 1652, 4to.

Andalusia, according to some authorities in 1570, and according to others in 1572 or 1574, but seems to have lived almost entirely at Madrid, where he died in 1644, leaving the Conde de Lemos and the Duque de Veraguas, a descendant of Columbus, for his executors, by whose care he was buried with ceremonies and honors becoming their rank rather than his own. Twelve years before his death he is said, on good authority, to have already written four hundred pieces for the theatre ; and as neither the public favor nor that of the court seems to have deserted him during the rest of his long life, we may feel assured that he was one of the most successful authors of his time.<sup>19</sup>

His plays, however, were never collected for publication, and few of them have come down to us.

One of \* those that have been preserved is fortunately one of the best, if we are to judge of its relative rank by the sensation it produced on its first appearance, or by the hold it has since maintained on the national regard. Its subject is taken from a well-known passage in the history of Sancho the Brave, when, in 1293, the city of Tarifa, near Gibraltar, was besieged by that king's rebellious brother, Don John, at the head of a Moorish army, and defended by Alonso Perez, chief of the great house of the Guzmans. "And," says the old Chronicle, "right well did he defend it. But the Infante Don John had with him a young son of Alonso Perez, and sent and warned him that he must either surrender that city, or else he would put to death this child whom he had with him. And Don Alonso Perez answered, that

he held that city for the king, and that he could not give it up ; but that as for the death of his child, he would give him a dagger wherewith to slay him ; and so saying, he cast down a dagger from the rampart in defiance, and added, that it would be better he should kill this son, and yet five others if he had them, than that he should himself basely yield up a city of the king, his lord, for which he had done homage. And the Infante Don John, in great fury, caused that child to be put to death before him. But neither with all this could he take the city.”<sup>20</sup>

Other accounts add to this atrocious story, that, after casting down his dagger, Alonso Perez, smothering his grief, sat down to his noonday meal with his wife, and that, his people on the walls of the city witnessing the death of the innocent child, and bursting forth into cries of horror and indignation, he rushed out, but, having heard what was the cause of the disturbance, returned quietly again to the table, saying only, “I thought, from their outcry, that the Moors had made their way into the city.”<sup>21</sup>

\* 311 \* For thus sacrificing his other duties to his loyalty, in a way so well fitted to excite the imagination of the age in which he lived, Guzman received an appropriate addition to his armorial bearings, still seen in the escutcheon of his family, and the surname of “El Bueno,” — The Good, or The Faithful, — a title rarely forgotten in Spanish history, whenever he is mentioned.

This is the subject, and, in fact, the substance, of

“Isabel de Solís,” describing a real or an imaginary picture of the death of the young Guzman, gives a tender turn to the father’s conduct ; but the hard old chronicle is more likely to tell the truth, and the play follows it.

Guevara's play, "Mas pesa el Rey que la Sangre," or King before Kin. A good deal of skill, however, is shown in putting it into a dramatic form. Thus, King Sancho, at the opening, is represented as treating his great vassal, Perez de Guzman, with harshness and injustice, in order that the faithful devotion of the vassal, at the end of the drama, may be brought out with so much the more brilliant effect. And again, the scene in which Guzman goes from the king in anger, but with perfect submission to the royal authority ; the scene between the father and the son, in which they mutually sustain each other, by the persuasions of duty and honor, to submit to anything rather than give up the city ; and the closing scene, in which, after the siege has been abandoned, Guzman offers the dead body of his child as a proof of his fidelity and obedience to an unjust sovereign,— are worthy of a place in the best of the earlier English tragedies, and not unlike some passages in Greene and Webster. But it was as an expression of boundless loyalty — that great virtue of the heroic times of Spain — that this drama won universal admiration, and so became of consequence, not only in the history of the national stage, but as an illustration of the national character. Regarded in each of these points of view, it is one of the most striking and solemn exhibitions of the modern theatre.<sup>22</sup>

In most of his other plays, Guevara deviated less from the beaten track than he did in this deep tragedy. "The \* Diana of the Mountains," for \* 312 instance, is a poetical picture of the loyalty,

<sup>22</sup> The copy I use of this play was printed in 1745. Like most of the other published dramas of Guevara, it has a good deal of bombast, and some *Gongorism*. But a lofty tone runs through it, that always found an echo in the Spanish character.

dignity, and passionate force of character of the lower classes of the Spanish people, set forth in the person of a bold and independent peasant, who marries the beauty of his mountain region, but has the misfortune immediately afterwards to find her pursued by the love of a man of rank, from whose designs she is rescued by the frank and manly appeal of her husband to Queen Isabella, the royal mistress of the offender.<sup>23</sup> "The Potter of Ocaña," too, which, like the last, is an intriguing drama, is quite within the limits of its class; — and so is "Empire after Death," a tragedy full of a melancholy, idyl-like softness, which well harmonizes with the fate of Inez de Castro, on whose sad story it is founded.

In Guevara's religious dramas we have, as usual, the disturbing element of love adventures, mingled with what ought to be most spiritual and most separate from the dross of human passion. Thus, in his "Three Divine Prodigies," we have the whole history of Saint Paul, who yet first appears on the stage as a lover of Mary Magdalen; and in his "Satan's Court" we have a similar history of Jonah, who is announced as a son of the widow of Sarepta, and lives at the court of Nineveh, during the reign of Ninus and Semiramis, in the midst of atrocities which it seems impossible could have been hinted at before any respectable audience in Christendom.

Once, indeed, Guevara stepped beyond the wide privileges granted to the Spanish theatre; but his offence was not against the rules of the drama, but against the authority of the Inquisition. In "The Lawsuit of the Devil against the Curate of Madrile-

jos," which he wrote with Roxas and Mira de Mescua, he gives an account of the case of a poor mad girl who was treated as a witch, and escaped death only by confessing that she was full of demons, who are driven out of her on the stage, before the audience, by conjurations and exorcisms. The story has every appearance of being founded in fact, and is \* cu- \* 313 rious on account of the strange details it involves. But the whole subject of witchcraft, its exhibition and punishment, belonged exclusively to the Holy Office. The drama of Guevara was, therefore, forbidden to be represented or read, and soon disappeared quietly from public notice. Such cases, however, are rare in the history of the Spanish theatre, at any period of its existence.<sup>24</sup>

The most strict, perhaps, of the followers of Lope de Vega was his biographer and eulogist, Juan Perez de Montalvan. He was a son of the king's bookseller at Madrid, and was born in 1602.<sup>25</sup> At the age of seventeen he was already a licentiate in theology and a successful writer for the public stage, and at eighteen he contended with the principal poets of the time at the festival of San Isidro at Madrid, and gained, with Lope's assent, one of the prizes that were there offered.<sup>26</sup> Soon after this, he took the degree of Doctor in Divinity, and, like his friend and master, joined a fraternity of priests in Madrid, and received an office in the In-

My copy of the "Tres Portentos" is a pamphlet without date. Fifteen of the plays of Guevara are in the collection of *Comedias Escogidas*, to be noticed hereafter, and it is supposed many more can be collected.

quisition. In 1626, a princely merchant of Peru, with whom he was in no way connected, and who had never even seen him, sent him, from the opposite side of the world, a pension as his private chaplain to pray for him in Madrid ; all out of admiration for his genius and writings.<sup>27</sup>

In 1627, he published a small work on “The Life and Purgatory of Saint Patrick”; a subject popular in his Church, and on which he now wrote, probably, to satisfy the demands of his ecclesiastical position. But his nature breaks forth, as it were, in spite of

himself, and he has added to the common

\* 314 \* legends of Saint Patrick a wild tale, almost wholly of his own invention, and yet so interwoven with his principal subject as to seem to be a part of it, and even to make equal claims on the faith of the reader.<sup>28</sup>

In 1632, he says he had composed thirty-six dramas and twelve sacramental *autos* ;<sup>29</sup> and in 1636, soon after Lope’s death, he published the extravagant panegyric on him which has been already noticed. This was probably the last work he gave to the press ; for, not long after it appeared, he became hopelessly deranged, from the excess of his labors, and died on the 25th of June, 1638, when only thirty-six years old. One of his friends showed the same pious care for his memory which he had shown for that of his master ; and, gathering together short poems and other eulogies on him by above a hundred and fifty of the known and unknown authors of his time, published them

under the title of “Panegyrical Tears on the Death of Doctor Juan Perez de Montalvan”; — a poor collection, in which, though we meet the names of Antonio de Solis, Gaspar de Ávila, Tirso de Molina, Calderon, and others of note, we find very few lines worthy either of their authors or of their subject.<sup>30</sup>

Montalvan’s life was short, but it was brilliant. He early attached himself to Lope de Vega with sincere affection, and continued to the last the most devoted of his admirers; deserving in many ways the title given him by Valdivielso, — “the first-born of Lope de Vega’s genius.” Lope, on his side, was sensible to the homage thus frankly offered him; and not only assisted and encouraged his youthful follower, but received him almost as a member of his household and family. It has even been said, that the “Orfeo” — a poem on the subject of Orpheus \* and Eurydice, which \* 315 Montalvan published in August, 1624, in rivalry with one under the same title published by Jauregui in the June preceding — was in fact the work of Lope himself, who was willing thus to give his disciple an advantage over a formidable competitor. But this is probably only the scandal of the next succeeding generation. The poem itself, which fills about two hundred and thirty octave stanzas, though as easy and spirited as if it were from Lope’s hand, bears the marks rather of a young writer than of an old one; besides which, the verses prefixed to it by Lope, and especially his extravagant praise of it when afterwards speaking of his own drama on the same subject, render the suggestion that he wrote the work too great an imputa-

tion on his character.<sup>31</sup> But however this may be, Montalvan and Lope were, as we know from different passages in their works, constantly together; and the faithful admiration of the disciple was well returned by the kindness and patronage of the master.

Montalvan's chief success was on the stage, where his popularity was so considerable, that the booksellers found it for their interest to print under his name many plays that were none of his.<sup>32</sup> He himself prepared for publication two complete volumes of his dramatic works, which appeared in 1638 and 1639, and were reprinted in 1652; but besides this, he had earlier inserted several plays in one of his works of fiction, and printed many more in other ways, making in all above sixty; the whole of which seem to have been published, as far as they were published by himself, during the last seven years of his life.<sup>33</sup>

\* 316 \* If we take the first volume of his collection, which is more likely to have received his careful revision than the last, since all the certificates are dated 1635, and examine it, as an illustration of his theories and style, we shall easily understand the character of his drama. Six of the plays contained in it, or one half of the whole number, are of the class of *capa y espada*, and rely for their interest on some exhibition of jealousy, or some intrigue involving the point

<sup>32</sup> His complaints are as loud as Lope's or Calderon's, and are to be found in the Preface to the first volume of his plays, Alcalá, 1638, 4to, and in his "Para Todos," 1661, p. 169.

<sup>33</sup> The date of the first volume is 1639 on the title-page, but 1638 at the end. of honor. They are generally, like the one entitled "Fulfilment of Duty," unskilfully put together, though never uninteresting; and they all contain passages of poetical feeling, injured in their effect by other passages, in which taste seems to be set at defiance,—a remark particularly applicable to the play called "What 's done can't be helped." Four of the remaining six are historical. One of them is on the suppression of the Templars, which Raynouard, referring to Montalvan, took as a subject for one of the few successful French tragedies of the first half of the nineteenth century. Another is on Sejanus, not as he is represented in Tacitus, but as he appears in the "General Chronicle of Spain." And yet another is on Don John of Austria, which has no *dénouement*, except a sketch of Don John's life given by himself, and making out above three hundred lines. A single play of the twelve is an extravagant specimen of the dramas written to satisfy the requisitions of the Church, and is founded on the legends relating to San Pedro de Alcántara.<sup>34</sup>

The last drama in the volume, and the only one that has enjoyed a permanent popularity and been acted and printed ever since it first appeared, is the one called "The Lovers of Teruel." It is founded on a tradition, that, early in the thirteenth century, in the city of Teruel, in Aragon,—half-way between Saragossa and Valencia,—there lived two lovers, whose union was prevented by the lady's family, on the ground that the fortune of the cavalier was not so considerable as they ought to claim for her.

<sup>34</sup> It should perhaps be added, that another religious play of Montalvan, "El Divino Nazareno Sanson," containing the history of Samson from the contest with the lion to the pulling down of the Philistine temple, is less offensive.

\* 317 They, however, gave him a \*certain number of years to achieve the position they required of any one who aspired to her hand. He accepted the offer, and became a soldier. His exploits were brilliant, but were long unnoticed. At last he succeeded, and came home in 1217, with fame and fortune. But he arrived too late. The lady had been reluctantly married to his rival, the very night he reached Teruel. Desperate with grief and disappointment, he followed her to the bridal chamber and fell dead at her feet. The next day the lady was found, apparently asleep, on his bier in the church, when the officiating priests came to perform the funeral service. Both had died broken-hearted, and both were buried in the same grave.<sup>35</sup>

A considerable excitement in relation to this story having arisen in the youth of Montalvan, he seized the tradition on which it was founded, and wrought it into a drama. His lovers are placed in the time of Charles the Fifth, in order to connect them with that stirring period of Spanish history. The first act begins with several scenes, in which the difficulties and dangers of their situation are made apparent, and Isabella, the heroine, expresses an attachment which, after some

<sup>35</sup> I shall have occasion to recur to this subject when I notice a long poem published on it by Yague de Salas, in 1616. The story used by Montalvan is founded on a tradition already employed for the stage, but with an awkward and somewhat coarse plot, and a poor versification by Andres Rey de Artieda, in his "Amantes," published in 1581, and by Tirso de Molina, in his "Amantes de Teruel," 1635. These two plays, however, had long been forgotten, when an abstract of the first, and the whole of the second, appeared in the fifth volume of Aribau's "Biblioteca" (Madrid, 1848); a volume which contains thirty-six well-selected plays of Tirso de Molina, with valuable prefa-

tory discussions of his life and works. There can be no doubt, from a comparison of the "Amantes de Teruel" of Tirso with that of Montalvan, printed three years later, that Montalvan was largely indebted to his predecessor, but he has added to his drama much that is beautiful, and given to parts of it a tone of domestic tenderness that, I doubt not, he drew from his own nature. Aribau, Biblioteca de Autores Españoles, Tom. V. pp. xxxvii and 690. The story of the Lovers of Teruel is found also in Canto IX of the poetical Romance of Florando de Castilla, 1588, by Hieronymo de Huerta. See *post*, Chap. XXVII., note.

anxiety and misgiving, becomes a passion so devoted that it seems of itself to intimate their coming sorrows. Her father, however, when he learns the truth, consents to their union; but on condition that, within three years, the young man shall place himself in a position worthy the claims of such a bride.

Both of the lovers willingly \* submit, and the \* 318 act ends with hopes for their happiness.

Nearly the whole of the limited period elapses before we begin the second act, where we find the hero just landing in Africa for the well-known assault on the Goleta at Tunis. He has achieved much, but remains unnoticed and almost broken-hearted with long discouragement. At this moment, he saves the Emperor's life; but the next, he is forgotten again in the rushing crowd. Still he perseveres, sternly and heroically; and, led on by a passion stronger than death, is the first to mount the walls of Tunis and enter the city. This time, his merit is recognized. Even his forgotten achievements are recollected; and he receives at once the accumulated reward of all his services and sacrifices.

But when the last act opens, we see that he is destined to a fatal disappointment. Isabella, who has been artfully persuaded of his death, is preparing, with sinister forebodings, to fulfil her promise to her father and marry another. The ceremony takes place,—the guests are about to depart,—and her lover stands before her. A heart-rending explanation ensues, and she leaves him, as she thinks, for the last time. But he follows her to her apartment; and in the agony of his grief falls dead, while he yet expostulates and struggles with himself no less than with her. A moment afterwards her husband enters. She explains to him the

scene he witnesses, and, unable any longer to sustain the cruel conflict, faints and dies broken-hearted on the body of her lover.

Like nearly all the other pieces of the same class, there is much in the "Lovers of Teruel" to offend us. The inevitable part of the comic servant is peculiarly unwelcome; and so are the long speeches, and the occasionally inflated style. But notwithstanding its blemishes, we feel that it is written in the true spirit of tragedy. As the story was believed to be authentic when it was first acted, it produced the deeper effect; and whether true or not, being a tale of the simple sorrows of two young and loving hearts, whose dark fate

is the result of no crime on their part, it can

\* 319 never be read or acted \* without exciting a sin-

cere interest. Parts of it have a more familiar and domestic character than we are accustomed to find on the Spanish stage, particularly the scene where Isabella sits with her women at her wearisome embroidery, during her lover's absence; the scene of her discouragement and misgiving just before her marriage; and portions of the scene of horror with which the drama closes.

The two lovers are drawn with no little skill. Our interest in them never falters; and their characters are so set forth and developed, that the dreadful catastrophe is no surprise. It comes rather like the foreseen and irresistible fate of the old Greek tragedy, whose dark shadow is cast over the whole action from its opening.

When Montalvan took historical subjects, he endeavored, oftener than his contemporaries, to observe historical truth. In two dramas on the life of Don Carlos, he has introduced that prince substantially in the

colors he must at last wear, as an ungoverned madman, dangerous to his family and to the state; and if, in obedience to the persuasions of his time, the poet has represented Philip the Second as more noble and generous than we can regard him to have been, he has not failed to seize and exhibit in a striking manner the severe wariness and wisdom that were such prominent attributes in that monarch's character.<sup>36</sup> Don John of Austria, too, and Henry the Fourth of France, are happily depicted and fairly sustained in the plays in which they respectively appear as leading personages.<sup>37</sup>

\* Montalvan's *autos*, of which only two or \* 320 three remain to us, are not to be spoken of in the same manner. His "Polyphemus," for instance, in which the Saviour and a Christian Church are introduced on one side of the stage, while the principal Cyclops himself comes in as an allegorical representation of Judaism on the other, is as wild and extravagant as anything in the Spanish drama. A similar

<sup>36</sup> "El Principe Don Carlos" is the first play in the twenty-eighth volume of the *Comedias Escogidas*, 1667, and gives an account of the miraculous cure of the Prince from an attack of insanity; the other, entitled "El Segundo Seneca de España," is the first play in his "Para Todos," and ends with the marriage of the king to Anne of Austria, and the appointment of Don John as generalissimo of the League. The representation of characters and incidents in these plays is substantially the same that is found in Luis Cabrera de Cordoba's very courtly "Felipe Segundo, Rey de España," which, as it was published in 1619, probably furnished his materials to Montalvan, who was not prone to wander far for them. See Libro V c. 5, VII 22; and VIII. 5. The work of Cabrera is not very well written, though important to the history of the time, because he had access to excellent sources of information. He

lived till 1655, but, though he is said to have completed his history, and even to have once sent the remainder to press, no more than the First Part, coming down to 1583, has ever been published. Ranke's judgment of Cabrera in a remarkable paper on D Carlos (Jahrb der Lit Wien, XLVI 1829) is very wise and just.

<sup>37</sup> Don John is in the play that bears his name Henry IV is in "El Ma- rescal de Biron," of which I have a separate copy printed in 12mo, at Ba- celona, in 1635, preceded by the "His- toria Tragica de la Vida del Duque de Biron," by Juan Pablo Martyr Rizo,— on which the play was to a considerable degree founded, although the extrav- agant character of Doña Blanca has no warrant in history. The life by Rizo is an interesting piece of contemporary biography, published originally in 1629, seven years after the Marshal was exe- cuted.

remark may be made on the “Escanderbech,” founded on the history of the half-barbarous, half-chivalrous Iskander Beg, and his conversion to Christianity in the middle of the fifteenth century. We find it, in fact, difficult, at the present day, to believe that pieces like the first of these, in which Polyphemus plays on a guitar, and an island in the earliest ages of Greek tradition sinks into the sea amidst a discharge of squibs and rockets, can have been represented anywhere.<sup>38</sup>

But Montalvan followed Lope in everything, and, like the rest of the dramatic writers of his age, was safe from such censure as he would now receive, because he wrote to satisfy the demands of the popular audiences of Madrid.<sup>39</sup> He made the *novela*, or tale, the chief basis of interest for his drama, and relied mainly on the passion of jealousy to give it life and movement.<sup>40</sup> Bowing to the authority of the court, he avoided, we are told, representing rebellion on the stage, lest he should seem to encourage it; and was even unwilling to introduce men of rank in degrading situations, for fear disloyalty should be implied or imputed.

He would gladly, it is added, have re-  
\* 321 strained his action to twenty-four \* hours, and

limited each of the three divisions of his full-length dramas to three hundred lines, never leaving the stage empty in either of them. But such rules were not prescribed to him by the popular will, and he wrote too freely and too fast to be more anxious

about observing his own theories than his master was.<sup>41</sup>

His "Most Constant Wife," one of his plays which is particularly pleasing, from the firm, yet tender, character of the heroine, was written, he tells us, in four weeks, prepared by the actors in eight days, and represented again and again, until the great religious festival of the spring closed the theatres.<sup>42</sup> His "Double Vengeance," with all its horrors, was acted twenty-one days successively.<sup>43</sup> His "No Life like Honor"—one of his more sober efforts—appeared many times on both the principal theatres of Madrid at the same moment;—a distinction to which, it is said, no other play had then arrived in Spain, and in which none succeeded it till long afterwards.<sup>44</sup> And, in general, during the period when his dramas were produced, which was the old age of Lope de Vega, no author was heard on the stage with more pleasure than Montalvan, except his great master.

He had, indeed, his trials and troubles, as all have whose success depends on popular favor. Quevedo, the most unsparing satirist of his time, attacked the less fortunate parts of one of his works of fiction with a spirit and bitterness all his own; and, on another occasion, when one of Montalvan's plays had been hissed, wrote him a letter which professed to be consolatory, but which is really as little so as can well be imagined.<sup>45</sup> But, notwithstanding such occasional

unbecoming and hard. All this, however, is only the system of Lope, in his "Arte Nuevo," a little amplified

ticed. The letter attributed here to Quevedo is printed in the *Don Diego de Noche* (1623, f. 30) as if it were the work of Salas Barbadillo; but it must be Quevedo's. The feud was an old one. Montalvan's father, who, as we

ANOTHER of the persons who, at this time, sought popular favor on the public stage was Gabriel Tellez, an ecclesiastic of rank, better known as Tirso de Molina, — the name under which he slightly disguised himself when publishing works of a secular character. Of his life we know little, except that he was born in Madrid ; that he was educated at Alcalá ; that he entered the Church as early as 1613 ; and that he died in the convent of Soria, of which he was the head, probably in February, 1648 ; — some accounts representing him to have been sixty years old at the time of his death, and some seventy-eight or even eighty.<sup>1</sup>

In other respects we know more of him. As a writer for the theatre, we have five volumes of his dramas, published between 1627 and 1636 ; besides which, a considerable number of his plays can be found scattered through his other works, or printed each by itself. His talent seems to have been decidedly dramatic and satirical ; but the moral tone of his plots is lower than common, and many of his plays contain passages whose indecency has caused them to be so hunted down by the confessional and the Inquisition,

that copies of them are among the rarest of  
 \* 324 Spanish books.<sup>2</sup> Not a \* few of the less offensive, however, have maintained their place on the stage, and are still familiar, as popular favorites.

Of these, the best known out of Spain is "El Burlador de Sevilla," or The Seville Deceiver,— the earliest distinct exhibition of that Don Juan who is now seen on every stage in Europe, and known to the lowest classes of Germany, Italy, and Spain, in puppet-shows and street-ballads. The first rudiments for this character— which, it is said, may be traced historically to the great Tenorio family of Seville — had, indeed, been brought upon the stage by Lope de Vega, in the second and third acts of "Money makes the Man"; where the hero shows a similar firmness and wit amidst the most awful visitations of the unseen world.<sup>3</sup> But in the character as sketched by Lope there is nothing revolting. Tirso, therefore, is the first who showed it with all its original undaunted courage united to an unmixed depravity that asks only for selfish gratifications, and a cold, relentless humor that continues to jest when surrounded by the terrors of a supernatural retribution.

This conception of the character is picturesque, not-

<sup>2</sup> Of these five volumes, containing fifty-nine plays, and a number of *entremeses* and ballads, whose titles are given in Arribau's *Biblioteca*, (Madrid, 1848, Tom. V. p. xxxvi,) I have seen a complete set only in the Imperial Library at Vienna, and have been able with difficulty to collect between thirty and forty separate plays. Their author says, however, in the Preface to his "Cigarrales de Toledo," (1624,) that he had written three hundred, and I believe about eighty have been printed. There is an autograph play of his in the Duke of Ossuna's Library, dated Toledo, 30th May, 1613, and his "No peor Sordo" is believed to have been written in 1596.

<sup>3</sup> There are some details in this part of Lope's play, such as the mention of a walking stone statue, which leave no doubt in my mind that Tirso de Molina used it. Lope's play is in the twenty-fourth volume of his *Comedias* (Zaragoza, 1633), but it is one of his dramas that have continued to be reprinted and read. There is an excellent translation of Tirso's "Burlador de Sevilla" in the measures of the original, by C. A. Dohrn, in his "Spanische Dramen," Band I., 1841, and another by Braunfels, in his "Dramen nach dem Spanischen," Frankfort, 1856, Tom. I.

withstanding the moral atrocities it involves. It was, therefore, soon carried to Naples, and from Naples to Paris, where the Italian actors took possession of it. The piece thus produced, which was little more than an Italian translation of Tirso's, had great success in 1656 on the boards of that company, then very fashionable at the French court. Two or three French translations followed, and in 1665 Molière brought out his "Festin de \*Pierre," in which, \* 325 taking not only the incidents of Tirso, but often his dialogue, he made the real Spanish fiction known to Europe as it had not been known before.<sup>4</sup> From this time the strange and wild character conceived by the Spanish poet has gone through the world under the name of Don Juan, followed by a reluctant and shuddering interest, that at once marks what is most peculiar in its conception, and confounds all theories of dramatic interest. Zamora, a writer of the next half-century in Spain, Thomas Corneille in France, and Lord Byron in England, are the prominent poets to whom it is most indebted for its fame ; though perhaps the genius of Mozart has done more than any or all of them to reconcile the refined and elegant to its dark and disgusting horrors.<sup>5</sup>

At home, "The Deceiver of Seville" has never been the most favored of Tirso de Molina's works. That

<sup>4</sup> For the way in which this truly Spanish fiction was spread through Italy to France, and then, by means of Molière, throughout the rest of Europe, see Parfaits, "Histoire du Théâtre Français" (Paris, 12mo, Tom VIII, 1746, p 255, Tom IX, 1746, pp 3 and 343, and Tom X., 1747, p 420); and Cailhava, "Ait de la Comédie" (Paris, 1786, 8vo, Tom II p 175) Shadwell's "Libertine" (1676) is substantially the same story, with added atrocities ; and, if I mistake not, is the foundation of the short drama which

has often been acted on the American stage Shadwell's own play is too gross to be tolerated anywhere nowadays, and besides has no literary merit

<sup>5</sup> That the popularity of the mere fiction of Don Juan has been preserved in Spain may be seen from the many recent versions of it, and especially from the two plays of "Don Juan Tenorio" by Zorrilla, (1844,) and his two poems, "El Desafio del Diablo," and "Un Testigo de Bronce," (1845,) hardly less dramatic than the plays that had preceded them.

distinction belongs to "Don Gil in the Green Pantaloons," perhaps the most strongly marked of the successful intriguing comedies in the language. Doña Juana, its heroine, a lady of Valladolid, who has been shamefully deserted by her lover, follows him to Madrid, whither he had gone to arrange for himself a more ambitious match. In Madrid, during the fortnight the action lasts, she appears sometimes as a lady named Elvira, and sometimes as a cavalier named Don Gil; but never once, till the last moment, in her own proper person. In these two assumed characters, she confounds all the plans and plots of her faithless lover; makes his new mistress fall in love with her; \* 326 \* writes letters to herself, as a cavalier, from herself, as a lady; and passes herself off, sometimes for her own lover, and sometimes for other personages merely imaginary.

Her family at Valladolid, meantime, are made to believe she is dead; and two cavaliers appearing in Madrid, the one from design and the other by accident, in a green dress like the one she wears, all three are taken to be one and the same individual, and the confusion becomes so unintelligible, that her alarmed lover and her own man-servant — the last of whom had never seen her but in masculine attire at Madrid — are persuaded it is some spirit come among them in the fated green costume, to work out a dire revenge for the wrongs it had suffered in the flesh. At this moment, when the uproar and alarm are at their height, the relations of the parties are detected, and three matches are made instead of the one that had been broken off; — the servant, who had been most frightened, coming in at the instant everything is settled, with his hat stuck full of tapers and his clothes

covered with pictures of saints, and crying out, as he scatters holy water in everybody's face :—

Who prays, who prays for my master's poor soul, —  
His soul now suffering purgatory's pains  
Within those selfsame pantaloons of green ?

And when his mistress turns suddenly round and asks him if he is mad, the servant, terror-struck at seeing a lady, instead of a cavalier, with the countenance and voice he at once recognizes, exclaims in horror :—

I do conjure thee by the wounds — of all  
Who suffer in the hospital's worst ward, —  
Abrenuntio ! — Get thee behind me !

*Juana.* Fool ! Don't you see that I am your Don Gil,  
Alive in body, and in mind most sound ? —  
That I am talking here with all these friends,  
And none is frightened but your foolish self ?

*Servant.* Well, then, what are you, sir, — a man or woman ?  
Just tell me that.

*Juana.* A woman, to be sure

*Servant.* No more ! enough ! That word explains the whole ; —  
Ay, and if thirty worlds were going mad,  
It would be reason good for all the uproar.

\* The chief characteristic of this play is its \* 327 extremely ingenious and involved plot. Few foreigners, perhaps not one, ever comprehended all its intrigue on first reading it, or on first seeing it acted. Yet it has always been one of the most popular plays on the Spanish stage ; and the commonest and most ignorant in the audiences of the great cities of Spain do not find its ingenuities and involutions otherwise than diverting.

Quite different from either of the preceding dramas, and in some respects better than either, is Tirso's “Bashful Man at Court,” — a play often acted, on its first appearance, in Italy, as well as in Spain, and one in which, as its author tells us, a prince of Castile once performed the part of the hero. It is not properly

historical, though partly founded on the story of Pedro, Duke of Coimbra, who, in 1449, after having been regent of Portugal, was finally despoiled of his power and defeated in an open rebellion.<sup>6</sup> Tirso supposes him to have retired to the mountains, and there, disguised as a shepherd, to have educated a son in complete ignorance of his rank. This son, under the name of Mireno, is the hero of the piece. Finding himself possessed of nobler sentiments and higher intelligence than those of the rustics among whom he lives, he half suspects that he is of noble origin; and, escaping from his solitude, appears at court, determined to try his fortune. Accident helps him. He enters the service of the royal favorite, and wins the love of his daughter, who is as free and bold, from an excessive knowledge of the world, as her lover is humble and gentle in his ignorance of it. There his rank is discovered, and the play ends happily.

A story like this, even with the usual accompaniment of an underplot, is too slight and simple to produce much effect. But the character of the principal personage, and its gradual development, rendered it long a favorite on the Spanish stage. Nor was this preference unreasonable. His noble pride, struggling

against the humble circumstances in which he  
 \* 328 finds himself placed; the suspicion \* he hardly

dares to indulge, that his real rank is equal to his aspirations, — a suspicion which yet governs his life; and the modesty which tempers the most ambitious of his thoughts, form, when taken together, one of the most lofty and beautiful ideals of the old Castilian character.<sup>7</sup>

<sup>6</sup> Crónica de D. Juan el Segundo, ad ann. printed as early as 1624, in the "Cigarrales de Toledo," (Madrid, 1624, 4to, p. 100,) and took its name, I suppose,

Some of Tirso's secular dramas deal chiefly in recent events and well-settled history, like his trilogy on the achievements of the Pizarros in the New World, and their love-adventures at home. Others are founded on facts, but with a larger admixture of fiction, like the one on the election and pontificate of Sixtus Quintus. But his religious dramas and *autos* are as extravagant as those of the other poets of his time, and could hardly be more so.

His mode of treating his subjects seems to be capricious. Sometimes he begins his dramas with great naturalness and life, as in one that opens with the accidents of a bull-fight,<sup>8</sup> and in another, with the confusion consequent on the upsetting of a coach;<sup>9</sup> while, at other times, he seems not to care how tedious he is, and once breaks ground in the first act with a speech above four hundred lines long.<sup>10</sup> Perhaps the most characteristic of his openings is in his "Love for Reasons of State," where we have, at the outset, a scene before a lady's balcony, a rope-ladder, and a duel, all full of Castilian spirit. His more obvious defects are the too great similarity of his characters and incidents; the too frequent introduction of disguised ladies to help on the intrigue; and the needless and shameless indelicacy of some of his stories,—a fault rendered more remarkable by the circumstance, that he himself was an ecclesiastic of rank, and honored in Madrid as a public preacher. His more uniform merits are an invention which seems never to tire or to become exhausted; a most happy power of gay narration; an extraordinary command of his native

from a Spanish proverb, "Mozo vergonzoso no es para palacio."—"At court in truth a bashful youth can find no place at all."

\* 329 \* Castilian ; and a rich and flowing versification in all the many varieties of metre demanded by the audiences of the capital, who were become more nice and exacting in this, perhaps, than in any other single accessory of the drama.

But however various and capricious were the forms of Tirso's drama, he was, in substance, always a follower of Lope de Vega, and one who succeeded in vindicating for himself a place very near his great master. That he was of the school of Lope, he himself distinctly announces, boasting of it, and entering, at the same time, into an ingenious and elaborate defence of its principles and practice, as opposed to those of the classical school ; a defence which, it is worthy of notice, was published twelve years before the appearance of Corneille's "Cid," and which, therefore, to a considerable extent, anticipated in Madrid the remarkable controversy about the unities occasioned by that tragedy in Paris after 1636,<sup>11</sup> and subsequently made the foundation of the dramatic schools of Corneille, Racine, and Voltaire.

Contemporary with these events and discussions lived Antonio Mira de Mescua, well known from 1602 to 1635

<sup>11</sup> Cigarrales de Toledo, 1624, pp. 183-188. In 1631, there was published at Milan a small volume in 12mo, entitled "Favores de las Musas hechas a D Sebastian Francisco de Medrano en varias Rimas y Poesias que compusó en la mas celebre Académia de Madrid, donde fué Presidente meritisimo." It was edited by Alonso de Castillo Solorzano, the well-known writer of tales, and contains a little bad lyrical poetry, and three plays not much better. The author, I suppose, is not the same with Francisco de Medrano, to be noticed hereafter among the lyrical poets, and I should hardly mention the present volume, if it were not that one of its plays, — "El Luzero Echipsado," — on the subject of John the

Baptist, — is divided into five acts, has a chorus, and is confined in its action within the limits of twenty-four hours, — "para que se vea," says the editor, "que ay en España quien lo sabe hacer con todo primor." This was five years before the date of Corneille's *Cid*. The volume in question was to have been followed by others, but none appeared, though its author did not die till 1653.

I cannot help adding that a great deal more has been said about the "unities" as peculiar to the French school in modern times than belongs to the case. It seems to me from the five choruses in *Henry V* that Shakespeare understood the whole matter as well as Cardinal Richelieu did.

as a writer for the stage, and much praised by Cervantes and Lope de Vega. He was a native of Guadix in the kingdom of Granada, and in his youth became archdeacon of its cathedral ; but in 1610 he was at Naples, attached to the poetical court of the Count de Lemos, and in 1620 he gained a prize in Madrid, where he died in 1635 while in the office of chaplain to Philip the \* Fourth. He wrote secular plays, *autos*, \* 330 and lyrical poetry ; but his works were never collected and are now found with difficulty, though not a few of his lighter compositions are in nearly all the respectable selections of the national poetry from his own time to the present. His manner was very unequal.

He, like Tirso de Molina, was an ecclesiastic of rank, but did not escape the troubles common to writers for the stage. One of his dramas, "The Unfortunate Rachel," founded on the fable which represents Alfonso the Eighth as having nearly sacrificed his crown to his passion for a Jewess of Toledo, was much altered, by authority, before it could be acted, though Lope de Vega had been permitted to treat the same subject at large in the same way, in the nineteenth book of his "Jerusalem Conquered." Mira de Mescua, too, was concerned in the drama of "The Curate of Madrilejos," which, as we have seen, was forbidden to be read or acted even after it had been printed. Still, there is no reason to suppose he did not enjoy the consideration usually granted to successful writers for the theatre. At least, we know he was much imitated. His "Slave of the Devil" was not only remodelled and reproduced by Moreto in "Fall to rise again," but was freely used by Calderon in two of his best-known dramas. His "Gallant both Brave and True" was employed by

Alarcon in "The Trial of Husbands." And his "Palace in Confusion" is the groundwork of Corneille's "Don Sancho of Aragon."<sup>12</sup>

\* 331 \* Joseph de Valdivielso, another ecclesiastic of high condition, was also a writer for the stage at the same time. He was connected with the great cathedral of Toledo, and with its princely primate, the Cardinal Infante. But he lived in Madrid, where he was a member of the same religious congregation with Cervantes and Lope, and where he was intimately associated with the principal men of letters of his time. He flourished from about 1607 to about 1633, and can be traced, during the whole of that period, by his certificates of approbation, and by commendatory verses which were prefixed to the works of his friends as they successively appeared. His own publications are almost entirely religious; — those for the stage consisting of a single volume printed in 1622, and containing twelve *autos* and two religious plays.

The twelve *autos* seem, from internal evidence, to have been written for the city of Toledo, and certainly to have been performed there, as well as in other cities of Spain. He selected them from a large number, and

<sup>12</sup> The notices of Mira de Mescua, or Amescua, as he is sometimes called, are scattered like his works. He is mentioned in Roxas, "Viage" (1602), and I have his "Desgraciada Raquel," both in a printed copy, where it is attributed to Diamante, and in an autograph MS, where it is sadly cut up to suit the ecclesiastical censors, whose permission to represent it is dated April 10, 1635. Guevara indicates his birthplace and ecclesiastical office in the "Diablo Cojuelo," Tranco VI. Antonio (Bib. Nov., ad verb.) gives him extravagant praise, and says that his dramas were collected and published together. But this, I believe, is a mistake. Like his shorter poems, they

can be found only separate, or in collections made for other purposes. See, also, in relation to Mira de Mescua, Montalvan, "Para Todos," the Catalogue at the end; and Pellicer, Biblioteca, Tom. I p. 89. The story on which the "Raquel" is founded is a fiction, and therefore need not so much have disturbed the censors of the theatre. (Castro, Crónica de Sancho el Deseado, Alonso el Octavo, etc., Madrid, 1665, folio, pp. 90, etc.) Two *autos* by Mira de Mescua are to be found in "Navidad y Corpus Christi Festejados," Madrid, 1664, 4to, and a few of his miscellaneous poems in Rivadeneyra's Biblioteca, Tom. XLII., 1857.

they undoubtedly enjoyed, during his lifetime, a wide popularity. Some, perhaps, deserved it. "The Prodigal Son," long a tempting subject wherever religious dramas were known, was treated with more than usual skill. "Psyche and Cupid," too, is better managed for Christian purposes than that mystical fancy commonly was by the poets of the Spanish theatre. And "The Tree of Life" is a well-sustained allegory, in which the old theological contest between Divine Justice and Divine Mercy is carried through in the old theological spirit, beginning with scenes in Paradise and ending with the appearance of the Saviour. But, in general, the *autos* of Valdivielso are not better than those of his contemporaries.

His two plays are not so good. "The Birth of the Best," as the Madonna is often technically called, and "The Guardian Angel," which is, again, an allegory, not unlike that of "The Tree of Life," are both of them crude and wild compositions, even within the broad limits permitted to the religious drama.

One \* reason of their success may perhaps be \* 332 found in the fact, that they have more of the tone of the elder poetry than almost any of the sacred plays of the time; — a remark that may be extended to the *autos* of Valdivielso, in one of which there is a spirited parody of the well-known ballad on the challenge of Zamora after the murder of Sancho the Brave. But the social position of their author, and perhaps his quibbles and quaintnesses, which humored the bad taste of his age, must be taken into consideration before we can account for the extensive popularity he undoubtedly enjoyed.<sup>18</sup>

Another sort of favor fell to the share of Antonio de Mendoza, who wrote much for the court between 1623 and 1643, and died in 1644. His Works — besides a number of ballads and short poems addressed to the Duke of Lerma and other principal persons of the kingdom — contain a Life of Our Lady, in nearly eight hundred *redondillas*, and five plays, to which several more may be added from different miscellaneous collections. The poems are of little value; the plays are better. “He Deserves Most who Loves Most” may have contributed materials to Moreto’s “Disdain met with Disdain,” and is certainly a pleasant drama, with natural situations and an easy dialogue. “Society changes Manners” is another real comedy with much life and gayety. And “Love for Love’s Sake,” which has been called its author’s happiest effort, but which is immensely long and abounds in instances of bad taste, enjoyed the distinction of being acted before the court by the queen’s maids of honor, who took all the parts, — those of the cavaliers, as well as those of the women.<sup>14</sup>

Joseph de Valdivielso, Toledo, 1622, 4to, 183 leaves. Compare the old ballad, “Ya cabalga Diego Ordoñez,” which can be traced to the Romancero of 1550-1555, with the “Crónica del Cid,” c 66, and the “Cautivos Libres,” f 25, a, of the Doce Autos. It will show how the old ballads rang in the ears of all men, and penetrated everywhere into Spanish poetry. There is a *nacimiento* of Valdivielso in the “Navidad y Corpus Christi,” mentioned in the preceding note; but it is very slight and poor. Montalvan, who is a good authority, says in the dedication of his “Amantes de Teruel,” that as a writer of *autos* Valdivielso was the first of his time. This was about 1636, and therefore before Calderon’s great success.

<sup>14</sup> I have a copy of his “Vida de Nuestra Señora,” published by his nephew in 1652, but his works were

not collected till long after his death, and were then printed from a manuscript found in the library of the Archbishop of Lisbon, Luis de Souza, under the affected title, “El Fenix Castellano, D Antonio de Mendoza, renascido,” etc., an excessively rare book, containing the five “comedias” and other works (Lisboa, 1690, 4to). The only notices of consequence that I find of him are in Montalvan’s “Para Todos,” and in Antonio, Bib Nova. A second edition of his works, with trifling additions, appeared at Madrid in 1728, 4to. “Querer por solo querer,” which was acted at Aranjuez for the fiesta of Philip IV in 1623, was translated, in light verse, by Sir Richard Fanshawe, who was sent as ambassador to Madrid by both Charles I and Charles II., and died there in 1666. His version, like an uncommonly large proportion of the

\* Ruiz de Alarcon, who was his contemporary, \* 333 was less favored during his lifetime than Mendoza, but has much more merit. He was born at Tasco, in Mexico, but was descended from a family that belonged to Alarcon in the mother country. As early as 1622 he was in Madrid, and assisted in the composition of a poor play in honor of the Marquis of Cañete for his victories in Arauco, which was the joint work of nine persons. In 1628, he published the first volume of his Dramas, on the title-page of which he calls himself Prolocutor of the Royal Council for the Indies; a place both of trust and profit. It is dedicated to the Duke of Medina de las Torres, but it contains also an address to the *Público Vulgar*, or the Rabbble, in a tone of savage contempt for the audiences of Madrid, which, if it intimates that he had been ill-treated on the stage, proves also that he felt strong enough to defy his enemies. To the eight plays contained in this volume he added twelve more in 1635, with a Preface, which, again, leaves little doubt that his merit was undervalued, as he says he found it difficult to vindicate for himself even the authorship of not a few of the plays he had written. He died in 1639.<sup>15</sup>

original play, is rhymed, and is among the very curious and rare books in the English language. It is cited in the preface to Lady Fanshawe's Memoirs, as if published in 1671, but my copy is dated 1670. At the end is an account, also translated from Mendoza, of a series of magnificent allegorical festivities the preceding year at Aranjuez, evidently very brilliant, and described in the very spirit of a fantastic Castilian courtier. Notices of Mendoza's honors may be found in Schack's *Nachtrage*, p 92. He was one of the Royal Secretaries, but what was of vastly more consequence, he was Secretary of the Inquisition. Montalvan, when dedicating to

him "La Toquera Vizcayna," says neatly, that he does it on condition that Mendoza shall forget his own dramas

<sup>15</sup> Alarcon seems, in consequence of these remonstrances, or perhaps in consequence of the temper in which they were made, to have drawn upon himself a series of attacks from the poets of the time, Góngora, Lope de Vega, Mendoza, Montalvan, and others, some of whom stoop so low as to ridicule him for an unhappy deformity of his person. See *Puibusque, Histoire Comparée des Littératures Espagnole et Française*, 2 tom., 8vo, Paris, 1843, Tom. II pp 155-164, and 430-437, — a book written with much taste and knowledge of

\* 334 \* His “Domingo de Don Blas,” one of the few among his works not found in the collection printed by himself, is a sketch of the character of a gentleman sunk into luxury and effeminacy by the possession of a large fortune suddenly won from the Moors in the time of Alfonso the Third of Leon; but who, at the call of duty, rouses himself again to his earlier energy, and shows the old Castilian character in all its loyalty and generosity. The scene where he refuses to risk his person in a bull-fight, merely to amuse the Infante, is full of humor, and is finely contrasted, first, with the scene where he runs all risks in defence of the same prince, and afterwards, still more finely, with that where he sacrifices the prince, because he had failed in loyalty to his father.

“How to gain Friends” gives us another exhibition of the principle of loyalty in the time of Peter the Cruel, who is here represented only as a severe, but just, administrator of the law in seasons of great trouble. His minister and favorite, Pedro de Luna, is one of the most noble characters offered to us in the whole range of the Spanish drama;—a character belonging to a class in which Alarcon has several times succeeded.

A better-known play than either, however, is the “Weaver of Segovia.” It is in two parts. In the first,—which is not believed to be by Alarcon, and is of inferior merit,—its hero, Fernando Ramirez, is represented as suffering the most cruel injustice at the hands of his sovereign, who has put his father to death under a false imputation of treason, and reduced Ramirez himself to the misery of earning his subsistence,

the subject to which it relates. It where the date of Alarcon's death is gained the prize of 1842. See, also, given by Pellicer y Tobar. *Semanario Erudito*, Tom. XXXI. p. 57,

disguised as a weaver. Six years elapse, and in the second part he appears again, stung by new wrongs and associated with a band of robbers, at whose head, after spreading terror through the mountain range of the \* Guadarrama, he renders such service to his ungrateful king, in the crisis of a battle against the Moors, and extorts such confessions of his own and his father's innocence from their dying enemy, that he is restored to favor, and becomes, in the Oriental style, the chief person in the kingdom he has rescued. He is, in fact, another Charles de Mohr, but has the advantage of being placed in a period of the world and a state of society where such a character is more possible than in the period assigned to it by Schiller, though it can never be one fitted for exhibition in a drama that claims to have a moral purpose.

“Truth itself Suspected” is, on the other hand, obviously written for such a purpose. It gives us the character of a young man, the son of a high-minded father, and himself otherwise amiable and interesting, who comes from the University of Salamanca to begin the world at Madrid, with an invincible habit of lying. The humor of the drama, which is really great, consists in the prodigious fluency with which he invents all sorts of fictions to suit his momentary purposes ; the ingenuity with which he struggles against the true current of facts, although it runs every moment more and more strongly against him ; and the final result, when, nobody believing him, he is reduced to the necessity of telling the truth, and — by a mistake which he now finds it impossible to persuade any one he has really committed — loses the lady he had won, and is overwhelmed with shame and disgrace.

Parts of this drama are full of spirit ; such as the

description of a student's life at the University, and that of a brilliant festival given to a lady on the banks of the Manzanares ; both tinged with the Gongorism becoming a fop of the period. These, with the exhortations of the young man's father, intended to cure him of his shameful fault, and not a little of the dialogue between the hero — if he may be so called — and his servant, are excellent. It is the piece from which Corneille took the materials for his "Menteur," and thus, in 1642, laid the foundations of classical French comedy in a play of Alarcon, as, six years before,

he had laid the foundations for its classical \* 336 tragedy \* in the "Cid" of Guillen de Castro.

Alarcon, however, was then so little known, that Corneille honestly supposed himself to be using a play of Lope de Vega, and said so ; though it should be remembered, that when, some years afterwards, he found out his mistake, he did Alarcon the justice to restore him to his rights, adding that he would gladly give the two best plays he had ever written to be the author of the one he had so freely used.

It would not be difficult to find other dramas of Alarcon showing equal judgment and spirit. Such, in fact, is the one entitled "Walls have Ears," which, from its mode of exhibiting the ill consequences of slander and mischief-making, may be regarded as the counterpart to "Truth itself Suspected." And such, too, is the "Trial of Husbands," which has had the fortune to pass under the names of Lope de Vega and Montalvan, as well as of its true author, and would cast no discredit on either of them.<sup>16</sup> But it is enough to add to what we have already said of Alarcon, that

<sup>16</sup> It reminds me of that part of the Belmont, and I am not sure but its Merchant of Venice which passes at story goes back to a common source.

his style is excellent,—generally better than that of any but the very best of his contemporaries,—with less richness, indeed, than that of Tirso de Molina, and adhering more to the old ballad measure than that of Lope, but purer in versification than either of them, more simple and more natural; so that, on the whole, he is to be ranked with the very best Spanish dramatists during the best period of the national theatre.<sup>17</sup>

\* Other writers who devoted themselves to the drama were, however, as well known at the time they lived as he was, if not always as much valued. Among them may be mentioned Luis de Belmonte, whose “Renegade of Valladolid” and “God the best Guardian” are singular mixtures of what is sacred with what is profane; Jacinto Cordero, whose “Victory through Love” was long a favorite on the stage; Andres Gil Enriquez, the author of a pleasant play called “The Net, the Scarf, and the Picture”; Diego Ximenez de Enciso, who wrote grave historical plays on the life of Charles the Fifth at Yuste, and on the death of Don Carlos; Gerónimo de Villaizan, whose

<sup>17</sup> Repertorio Americano, Tom III. p 61, Tom IV p 93, Denis, Chroniques de l'Espagne, Paris, 1839, 8vo, Tom. II p 231, Comedias Escogidas, Tom XXVIII, 1667, p 131 Corneille's opinion of the “Verdad Sospechosa,” which is often misquoted, is to be found in his “Examen du Menteur.” I will only add, in relation to Alarcon, that, in “Nunca mucho costó poco,” he has given us the character of an imperious old nurse, which is well drawn, and made effective by the use of picturesque, but antiquated, words and phrases.

Since the first edition of this work was published, (1849,) all the plays attributed to Alarcon, including one to which he was only a contributor, and two whose genuineness is doubtful, have been collected and published, with much

care and taste, (Biblioteca de Autores Españoles, Tom XX, 1852,) by D Juan Eugenio de Hartzenbusch. Their number is twenty-seven, and among them is the *First Part* of the “*Texedor de Segovia*,” which, as Alarcon published the *Second Part* in his *second* volume, without any allusion to a first one, we suppose, as Hartzenbusch does, there is good ground for believing not to be his. There is also internal evidence, I think, to the same effect.

There is a French translation of five of the plays of Alarcon and abstracts of the rest by Alphonse Royer, 1865. If anybody would like to see how a Spanish *comedia* can be spoiled, I commend him to Royer's version of the “*Ganar Amigos*.” It is the only one in verse. The four others are in prose, and are better.

best play is "A Great Remedy for a Great Wrong"; and many others, such as Carlos Boil, Felipe Godinez, Miguel Sanchez, and Rodrigo de Herrera, who shared, in an inferior degree, the favor of the popular audiences at Madrid.<sup>18</sup>

Writers distinguished in other branches of literature were also tempted by the success of those devoted to the stage to adventure for the brilliant prizes it scattered on all sides. Salas Barbadillo, who wrote many pleasant tales and died in 1635, left behind him two dramas, of which one claims to be in the manner of Terence.<sup>19</sup> Solorzano, who died ten years later, and was known in the same forms of elegant literature with Barbadillo, is the author of a spirited play, founded on the story of a lady, who, after having accepted a noble lover from interested motives, gives him up for the servant of that lover, put forward in disguise, as if he \* were possessor of the very estates for which she had accepted his master.<sup>20</sup>

Góngora wrote one play, and parts of two others, still

<sup>18</sup> The plays of these authors are found in the large collection entitled "Comedias Escogidas," Madrid, 1652-1704, 4to, with the exception of those of Sanchez and Villaizan, which I possess separate, of Sanchez one, of Villaizan two. Of Belmonte, who is the author of the "Sastre del Campillo," commonly attributed to Lope de Vega, (see Shack's Nachtrage, 1854, p. 62,) there are eleven in the collection, and of Godinez, five. Those of Miguel Sanchez, who was very famous in his time, and obtained the addition to his name of *El Divino*, are nearly all lost, but his "Guarda Cuidadosa" may be found in the "Diferentes Comedias," Parte V., 1616, mentioned *ante*, p. 297, note 5. I observe from the "Noches de Plazer" of Castillo Solorzano, (1631, f. 5, b,) that Diego Ximenez de Enciso was a native of Seville and a *Ventiquaturo* of that city. Felipe Godinez (who is mentioned by Cervantes, but not, I

think, by Antonio, by Lope de Vega, or by the common historians of Seville, where he was born) wrote a considerable number of plays, to be found in the old collections. He was alive in 1644, and enjoyed a good reputation in his time.

<sup>19</sup> The plays of Salas Barbadillo, viz. "Victoria de España y Fiancia" and "El Galan Triamposo y Pobie," are in his "Coronas del Parnaso," left for publication at his death, and published the same year, 1635, Madrid, 12mo. Other dramas by him are scattered through his other Works, — some of them called *comedias antiguas*, by which he means *entremeses*, because they were like the early dramas of Lope de Rueda and his school, which were used as *entremeses* in the time of Barbadillo.

<sup>20</sup> It is called "El Mayorazgo," and is found with its *loa* at the end of the author's "Alivios de Casandra," 1640. Several other dramas are found scattered through his tale.

preserved in the collection of his Works;<sup>21</sup> and Quevedo, to please the great favorite, the Count Duke Olivares, assisted in the composition of at least a single drama, which is now lost, if it be not preserved, under another name, in the works of Antonio de Mendoza.<sup>22</sup> But the circumstances of chief consequence in relation to all these writers are, that they belonged to the school of Lope de Vega, and that they bear witness to the vast popularity of his drama in their time, which could control men such as they were.

Indeed, so attractive was the theatre now become, that ecclesiastics and the higher nobility, who, from their position in society, did not wish to be known as dramatic authors, still wrote for the stage, sending their plays to the actors or to the press anonymously. Such persons generally announced their dramas as written by "A Wit of this Court," — *Un Ingenio de esta Corte*, — and a large collection of pieces could now be made, which are known only under this mask; a mask, it may be observed, often significant of the pretensions of those whom it claims partly to conceal. Even Philip the Fourth, who was a lover of the arts and of letters, is said to have sometimes used it; and there is a common tradition, but an erroneous one, that "Giving my Life for my Lady, or The Earl of Essex," was his. Possibly, however, one or two other plays were either from his hand, or indebted to his poetical talent and skill. But even this is not very probable.<sup>23</sup>

<sup>21</sup> These are, "Las Firmezas de Isabella," "El Doctor Carlino," and "La Comedia Venatoria," — the last two unfinished, and the very last allegorical.

<sup>22</sup> The play written to please the Count Duke was by Quevedo and Antonio de Mendoza, and was entitled "Quien mas miente medra mas," — "He that lies most will rise most." (C. Pellicer, *Origen del Teatro*, Tom. I.

p 177) This play is lost, unless, as I suspect, it is the "Empeños del Mentir," that occurs in Mendoza's Works, 1690, pp 254 — 296. There are also four *entremeses* of Quevedo in his Works, 1791, Vol IX.

<sup>23</sup> Philip IV was a lover of letters. Translations of Francesco Guicciardini's "Wars in Italy," and of the "Description of the Low Countries," by his

\* 339 \* One of the most remarkable of these “Comedias de un Ingenio” is that called “The Devil turned Preacher.” Its scene is laid in Lucca, and its original purpose seems to have been to glorify Saint Francis, and to strengthen the influence of his followers. At any rate, in the long introductory speech of Lucifer, that potentate represents himself as most happy at having so far triumphed over these his great enemies, that a poor community of Franciscans, established in Lucca, is likely to be starved out of the city by the universal ill-will he has excited against them. But his triumph is short. Saint Michael descends with the infant Saviour in his arms, and requires Satan himself immediately to reconvert the same inhabitants whose hearts he had hardened; to build up the very convent of the holy brotherhood which he had so nearly overthrown; and to place the poor friars, who

nephew, Luigi Guicciardini, made by Philip, and preceded by a well-written *Prólogo*, are said to be in the National Library at Madrid (C Pellicer, *Orígen*, Tom I p 162, *Huerta*, *Teatro Hespañol*, Madrid, 1785, 12mo, Parte I, Tom III p 159, and *Ochoa*, *Teatro*, Paris, 1838, 8vo, Tom V p 98) “King Henry the Feeble” is also among the plays sometimes ascribed to Philip IV., who is said to have often joined in improvising dramas,—an amusement well known at the court of Madrid, and at the hardly less splendid court of the Count de Lemos at Naples (C Pellicer, *Teatro*, Tom I p 163, and J. A. Pellicer, *Bib de Traductores*, Tom I. pp 90–92, where a curious account, already referred to, is given of one of these Neapolitan exhibitions, by Estrada, who witnessed it) But I have great doubts concerning all these suggestions. That Philip IV. did not write the “Conde de Sex,” which I possess in Vol XXXI of the *Diferentes Comedias*, 1636, is settled by Schack, (*Nachtrage*, 1854, p 102,) who found the original in the autograph of Coello, a known dramatist who died in 1652. It may be well to add, however, when

speaking of this play, that there is a very acute and extended examination of it by Lessing, who, with Wieland, gave the first impulse to that love for Spanish literature in Germany which the Schlegels, Bouterwek, and Schack have since so well sustained (See *Hamburgische Dramaturgie*, Berlin, 1805, Tom II pp 58–126) But as to Philip IV., to whom poems are attributed in the *Biblioteca* of Rivadeneyra, (Tom XLII, 1857, pp 151, 152,) and in the Spanish translation of this History, (Tom II p 563,) I doubt the genuineness of all of them. Philip IV. was a sensualist,—not, indeed, without a taste for letters and the arts,—but not an author in any proper sense of the word. And yet one of the court flatterers of the time could say of him “Es de los mas perfetos músicos y mas felices poetas que oy se conocen, sin que para esta verdad sea menester de valernos de la lisonja” Pellicer de Salas, *Lecciones solemnes de Gongora*, 1630, col 696, 697 The two sonnets attributed to Don Carlos of Austria, brother of Philip IV., are probably his, and are not bad for a prince. were now pelted by the boys in the streets, upon a foundation of respectability safer than that from which he had driven them. The humor of the piece consists in his conduct while executing the unwelcome task thus imposed upon him. To do it, he takes, at once, the habit of the monks he detests ; he goes round to beg for them ; \* he superintends the \* 340 erection of an ampler edifice for their accommodation ; he preaches ; he prays ; he works miracles ; — and all with the greatest earnestness and unction, in order the sooner to be rid of a business so thoroughly disagreeable to him, and of which he is constantly complaining in equivocal phrases and bitter side-speeches, that give him the comfort of expressing a vexation he cannot entirely control, but dares not openly make known. At last he succeeds. The hateful work is done. But the agent is not dismissed with honor. On the contrary, he is obliged, in the closing scene, to confess who he is, and to avow that nothing, after all, awaits him but the flames of perdition, into which he visibly sinks, like another Don Juan, before the edified audience.

The action occupies above five months. It has an intriguing underplot, which hardly disturbs the course of the main story, and one of whose personages — the heroine herself — is gentle and attractive. The character of the Father Guardian of the Franciscan monks, full of simplicity, humble, trustful, and submissive, is also finely drawn ; and so is the opposite one, — the *gracioso* of the piece, — a liar, a coward, and a glutton ; ignorant and cunning ; whom Lucifer amuses himself with teasing, in every possible way, whenever he has a moment to spare from the disagreeable work he is so anxious to finish.

In some of the early copies, this drama, so characteristic of the age to which it belongs, is attributed to Luis de Belmonte, and in some of them to Antonio de Coello, called erroneously *Luis de Coello* in the “Catalogo” of Huerta. Later, it is declared, though on what authority we are not told, to have been written by Francisco Damian de Cornejo, a Franciscan monk. All this, however, is uncertain, although Belmonte is more likely to have been its author than either of the others. But we know, that, for a long time after it appeared, it used to be acted as a devout work, favorable to the interests of the Franciscans, who then possessed great influence in Spain. In the latter part of the eighteenth century, however, this state of things was partly changed, and its public performance, for some reason or other, was forbidden. About 1800, it

\* 341 \* reappeared on the stage, and was again acted, with great profit, all over the country, — the Franciscan monks lending the needful monastic dresses for an exhibition they thought so honorable to their order. But in 1804 it was put anew under the ban of the Inquisition, and so remained until after the political revolution of 1820, which gave absolute liberty to the theatre.<sup>24</sup>

<sup>24</sup> C Pellicer, *Origen*, Tom I p 184, note, *Suplemento al Índice, etc*, 1805, and an excellent article by Louis de Vieil Castel, in the *Revue des Deux Mondes*, July 15, 1840. To these should be added the pleasant description given by Blanco White, in his admirable “*Doblado’s Letters*,” (1822, pp 163 – 169,) of a representation he himself witnessed of the “*Diablo Predicador*,” in the court-yard of a poor inn, where a cow-house served for the theatre, or rather the stage, and the spectators, who paid less than twopence apiece for their places, sat in the open air, under a bright starry sky.

My friend, Mr J. R. Chorley, has

drawn my attention to the fact, that a poor play by Francisco de Malaspina, entitled “*La Fueza de la Verdad*,” is nearly identical in its subject with the “*Diablo Predicador*.” It is in the *Comedias Escogidas*, Tom XIV, 1661, f 182, and at the opening, the Devil puts his case with more force and ingenuity, I think, than he does in the “*Diablo Predicador*.” In two MSS of the last, it is attributed to Francisco de Villegas, but the common opinion that it was written by Belmonte is the more likely one. Schack’s *Nachtrage*, 1854, p 62.

Belmonte was born about 1587; was in the “*Certainenes*” for San Isidro at

The school of Lope,<sup>25</sup> to which all the writers we have just enumerated, and many more, belonged, was not received with an absolutely universal applause. Men of learning, from time to time, refused to be reconciled to it; and severe or captious critics found in its gross irregularities and extravagances abundant opportunity for the exercise of a spirit of complaint. Alonso Lopez, commonly called *El Pinciano*, in his “Art of Poetry founded on the Doctrines of the Ancients,” — a modest treatise, which he printed as early as 1596, — shows plainly, in his discussions on the nature of tragedy and comedy, that he was far from consenting to the forms of the drama then beginning to prevail on the theatre. The Argensolas, who, about ten years earlier, had attempted to introduce another and more classical type, would, of course, be even less satisfied with the tendency of things in their time; and one of them, Bartolomé, speaks his opinion very openly in his didactic satires. Others joined them, among whom were Artieda, in a poetical epistle to the Marquis of Cuellar; \* Villegas, the sweet \* 342 lyrical poet, in his seventh elegy; and Cristóval de Mesa, in different passages of his minor poems, and in the Preface to his ill-constructed tragedy of “Pompey.” If to these we add a scientific discussion on the True Structure of Tragedy and Comedy, in the third and fourth of the Poetical Tables of Cascales, and

Madrid in 1620 and 1622, and seems to have been alive in 1649. In the address to the reader, preceding the drama on the Marquis of Cañete, which it took nine poets to make so dull, (see *post*, Chap. XXVII note 14,) he says of himself, “Estando yo en Lima el año de 605”, — so that he was in Peru when he was young, and ought to have known better than to assist in doing honor to such a man as he would illustrate.

<sup>25</sup> For the school of Lope, see Biblioteca de Autores Españoles, (Tom. XLIII. and XLV, 1857 and 1858,) where Don Ramon de Mesonero Romanos has made a collection of fifty-nine plays to illustrate it. a harsh account of the whole popular Spanish stage, by Suarez de Figueroa, in which little is noticed but its follies, we shall have, if not everything that was said on the subject by the scholars of the time, at least everything that needs now to be remembered. The whole is of less consequence than the frank admissions of Lope de Vega, in his "New Art of the Drama."<sup>26</sup>

The opposition of the Church, more formidable than that of the scholars of the time, was, in some respects, better founded, since many of the plays of this period were indecent, and more of them immoral. The ecclesiastical influence, as we have seen, had, therefore, been early directed against the theatre, partly on this account and partly because the secular drama had superseded those representations in the churches which had so long been among the means used by the priesthood to sustain their power with the mass of the people. On these grounds, in fact, the plays of Torres Naharro were suppressed in 1545, and a petition was sent, in 1548, by the Cortes, to Charles the Fifth, against the printing and publishing of all indecent farces.<sup>27</sup>

\* 343 For a \* long time, however, little was done

I have arranged them according to their dates, because, in this case, the order of time is important, and because it should be noticed that all come within the period of Lope's success as a dramatist.

Gayangos, in his translation of this History, (Tom II pp 558-560,) gives an account of an attack, in 1617, on Lope as a dramatist, by a certain Pedro Torres de Ramila, and of answers to it by Julio Columbario (a pseudonyme for Francisco Lopez de Aguilar) and Alfonso Sanchez, — all in Latin, and all, apparently, in the bitterest spirit of Spanish literary controversy. But Lope suffered little personally in this way. His popularity was overwhelming. After his death, he was often attacked, e g by Antonio Lopez de Vega, (see *post*, Chap XXIX,) who did it, very ungratefully, in his *Herachito y Democrito*, (1641, pp 176, sqq.,) for Lope had been kind to him earlier.

but to suspend dramatic representations in seasons of court mourning, and on other occasions of public sorrow or trouble ; — this being, perhaps, thought by the clergy an exercise of their influence that would, in the course of events, lead to more important concessions.

But as the theatre rose into importance with the popularity of Lope de Vega, the discussions on its character and consequences grew graver. Even just before that time, in 1587, Philip the Second consulted some of the leading theologians of the kingdom, and was urged to suppress altogether the acted drama ; but, after much deliberation, he followed the milder opinion of Alonso de Mendoza, a professor at Salamanca, and determined still to tolerate it, but to subject it constantly to a careful and even strict supervision. In 1597, the same Philip, more monk than king, ordered, according to the custom of the time, the public representations at Madrid to be suspended, in consequence of the death of his daughter, the Duchess of Savoy. But Philip was now old and infirm. The opposers of the theatre, among whom was Lupercio de Argensola, gathered around him.<sup>28</sup> The discussion was renewed with increased earnestness, and in 1598, not long before he breathed his last in the Escorial, with his dying eyes fastened on its high altar, he forbade theatrical representations altogether. No attack, however, on the theatre and its actors was so grave and pungent as that of Mariana in his *De Rege*, 1599, repeated and reinforced in his *De Spectaculis*, ten years later. The wonder is that it produced so little effect, coming as it did, in its first form, during the dark period immediately following the death of the king.

<sup>28</sup> Pellicer, Bib. de Traductores, Tom. I. p. 11.

Little, in truth, was really effected by this struggle on the part of the Church, except that the dramatic poets were compelled to discover ingenious modes for evading the authority exercised against them, and that the character of the actors was degraded by it. To drive the drama from ground where it was so well intrenched

behind the general favor of the people was \* 344 impossible. The \*city of Madrid, already the acknowledged capital of the country, begged that the theatres might again be opened; giving, as one reason for their request, that many religious plays were performed, by some of which both actors and spectators had been so moved to penitence as to hasten directly from the theatre to enter religious houses;<sup>29</sup> and as another reason, that the rent paid by the companies of actors to the hospitals of Madrid was important to the very existence of those great and beneficent charities.<sup>30</sup>

Moved by such arguments, Philip the Third, in 1600, when the theatres had been shut hardly two years, summoned a council of ecclesiastics and four of the principal secular authorities of the kingdom, and laid the whole subject before them. Under their advice, — which still condemned in the strongest manner the theatres as they had heretofore existed in Spain, — he

<sup>29</sup> As a set-off to this alleged religious effect of the *comedias de santos*, we have, in the Address that opens the "Tratado de las Comedias," (1618,) by Bisbe y Vidal, an account of a young girl who was permitted to see the representation of the "Conversion of Mary Magdalen" several times, as an act of devotion, and ended her visits to the theatre by falling in love with the actor that personated the Saviour, and running off with him, or rather following him to Madrid.

<sup>30</sup> The account, however, was sometimes the other way. Bisbe y Vidal

(f 98) says that the hospitals made such efforts to sustain the theatres, in order to get an income from them afterwards, that they themselves were sometimes impoverished by the speculations they ventured to make, and adds, that in his time (c. 1618) there was a person alive, who, as a magistrate of Valencia, had been the means of such losses to the hospital of that city, through its investments and advances for the theatre that he had entered a religious house, and given his whole fortune to the hospital, to make up for the injury he had done it.

permitted them to be opened anew; diminishing, however, the number of actors, forbidding all immorality in the plays, and allowing representations only on Sundays and three other days in the week, which were required to be Church festivals, if such festivals should occur. This decision has, on the whole, been hardly yet disturbed, and the theatre in Spain, with occasional alterations and additions of privilege, has continued to rest safely on its foundations ever since; — closed, indeed, sometimes, in seasons of public mourning, as it was three months on the death of Philip the Third, and again in 1665, by the bigotry of the queen regent, but never \*interrupted for any long period, and never again called to contend for its existence.

The truth is, that, from the beginning of the seventeenth century, the popular Spanish drama was too strong to be subjected either to classical criticism or to ecclesiastical control. In the "Amusing Journey" of Roxas, an actor who travelled over much of the country in 1602, visiting Seville, Granada, Toledo, Valladolid, and many other places, we find plays acted everywhere, even in the smallest villages, and the drama, in all its forms and arrangements, accommodated to the public taste far beyond any other popular amusement.<sup>31</sup> In 1632, Montalvan — the best authority on such a subject — gives us the names of a crowd of writers for Castile alone; and three years later, Fabio Franchi, an Italian, who had lived in Spain, published a eulogy on Lope, which enumerates nearly

which was required to have seventeen (Viage, Madrid, 1614, 12mo, ff 51 — 53.) These nicknames and distinctions were long known in Spain. Four of them occur in "Estebanillo Gonzalez," 1646, c. 6.

thirty of the same dramatists, and shows anew how completely the country was imbued with their influence. There can, therefore, be no doubt, that, at the time of his death, Lope's name was the great poetical name that filled the whole breadth of the land with its glory, and that the forms of the drama originated by him were established, beyond the reach of successful opposition, as the national and popular forms of the drama for all Spain.<sup>32</sup>

but it goes on the untenable ground, that the plays then represented were liable to no objection on the score of morals. Ricardo del Turia — probably a pseudonyme for Luis Ferrer y Cardona, governor of Valencia, to whom, in my copy of the "Comedias de Poetas de Valencia," 1609, that volume is dedicated — takes, on the contrary, in his Preface to the second volume, 1616, the theatre as it really existed, and defends it not without learning and acuteness. He died in 1641. Barrera, however, maintains that Pedro Juan de Toledo was the person disguised under the name of Ricardo de Turia.

TURNING from Lope de Vega and his school, we come now to his great successor and rival, Pedro Calderon de la Barca, who, if he invented no new form of the drama, was yet so eminently a poet in the national temper, and had a success so brilliant, that he must necessarily fill a large space in all inquiries concerning the history of the Spanish theatre.

He was born at Madrid, on the 17th of January, 1600; <sup>1</sup> and one of his friends claims kindred for him with nearly all the old kings of the different Spanish monarchies, and even with most of the crowned heads of his time, throughout Europe.<sup>2</sup> This is \* ab- \* 347

<sup>1</sup> There has been some discussion, and a general error, about the date of Calderon's birth, but in a rare book, entitled "Obelisco Fúnebre," published in his honor, by his friend Gaspar Augustin de Lara, (Madrid, 1684, 4to,) and written immediately after Calderon's death, it is distinctly stated, on the authority of Calderon himself, that he was born January 17, 1600. This settles all doubts. The certificate of baptism given in Baena, "Hijos de Madrid," Tom. IV p 228, only says that he was baptized February 14, 1600, but why that ceremony, contrary to custom, was so long delayed, or why a person in the position of Vera Tassis y Villaroel, who, like Lara, was a friend of Calderon, should have placed

the poet's birth on January 1st, we cannot now even conjecture

<sup>2</sup> See the learned genealogical introduction to the "Obelisco Fúnebre," just cited. The name of *Calderon*, as its author tells us, came into the family in the thirteenth century, when one of its number, being prematurely born, was supposed to be dead, but was ascertained to be alive by being unceremoniously thrown into a caldron — *caldron* — of warm water. As he proved to be a great man, and was much favored by St. Ferdinand and Alfonso the Wise, his nickname became a name of honor, and five *caldrons* were, from that time, borne in the family arms. The additional surname of *Barca* came in later, with an estate — *solar* — of

surd. But it is of consequence to know that his family was respectable, and its position in society such as to give him an opportunity for early intellectual culture ; — his father being Secretary to the Treasury Board under Philip the Second and Philip the Third, and his mother of a noble family, that came from the Low Countries long before. Perhaps, however, the most curious circumstance connected with his origin is to be found in the fact, that, while the two masters of the Spanish drama, Lope de Vega and Calderon, were both born in Madrid, the families of both are to be sought for, at an earlier period, in the same little rich and beautiful valley of Carriero, where each possessed an ancestral fief.<sup>8</sup>

When only nine years old, he was placed under the Jesuits, and from them received instructions which, like those Corneille was receiving at the same moment, in the same way, on the other side of the Pyrenees, imparted their coloring to the whole of his life, and especially to its latter years. After leaving the Jesuits, he went to Salamanca, where he studied with distinction the scholastic theology and philosophy then in fashion, and the civil and canon law. But when he was graduated from that University in 1619, he was already known as a writer for the theatre ; and when he arrived at Madrid, he seems, probably on this account, to have been at once noticed by some of those

one of the house, who afterwards perished, fighting against the Moors ; in consequence of which, a castle, a gauntlet, and the motto, *Por la fe moriré*, were added to their escutcheon, which, thus arranged, constituted the not inappropriate arms of the poet in the seventeenth century.

<sup>8</sup> See the notice of Calderon's father in Baena, Tom I p 305, that of Calderon himself, Tom IV p 228 ; and that of Lope de Vega, Tom III p 350 ;

but, especially, see the different facts about Calderon scattered through the dull prose introduction to the "Obelisco Fúnebre," and its still more dull poetry. The biographical sketch of him by his friend Vera Tassis y Villalob, originally prefixed to the fifth volume of his *Comedias*, and to be found in the first volume of the editions since, is formal, pedantic, and unsatisfactory, like most notices of the old Spanish authors.

persons about the court who could best promote his advancement and success.

In 1620, he entered, with the leading spirits of his time, into the first poetical contest opened by the city of Madrid in honor of San Isidro, and received for his \* efforts the public compliment of Lope \* 348 de Vega's praise.<sup>4</sup> In 1622, he appeared at the second and greater contest proposed by the capital, on the canonization of the same saint; and gained — all that could be gained by one individual — a single prize, with still further and more emphatic praises from the presiding spirit of the show.<sup>5</sup> In the same year, too, when Lope published a considerable volume containing an account of all these ceremonies and rejoicings, we find that the youthful Calderon approached him as a friend, with a few not ungraceful lines, which Lope, to show that he admitted the claim, prefixed to his book. But from that time we entirely lose sight of Calderon as an author, or obtain only uncertain hints of him, for ten years, except that in 1630 he figures in Lope de Vega's "Laurel of Apollo," among the crowd of poets born in Madrid.<sup>6</sup>

Much of this interval seems to have been filled with service in the armies of his country. At least, he was

<sup>4</sup> His sonnet for this occasion is in Lope de Vega, *Obras Sueltas*, Tom. XI. p. 432, and his *octavas* are at p. 491. Both are respectable for a youth of twenty. The praises of Lope, which are unmeaning, are at p. 593 of the same volume. Who obtained the prizes at this festival of 1620 is not known.

<sup>5</sup> The different pieces offered by Calderon for the festival of May 17, 1622, are in Lope de Vega, *Obras Sueltas*, Tom. XII. pp. 181, 239, 303, 363, 384. Speaking of them, Lope (p. 413) says, a prize was given to "Don Pedro Calderon, who, in his tender years, earns the laurels which time is wont to produce only with hoary hairs." The six

or eight poems offered by Calderon at these two poetical joustings are valuable, not only as being the oldest of his works that remain to us, but as being among the few specimens of his verse that we have, except his dramas. Cervantes, in his *Don Quixote*, intimates that, at such poetical contests, the first prize was given from personal favor, or from regard to the rank of the aspirant, and the second with reference only to the merit of the poem presented (Parte II c. 18). Calderon took, on this occasion, only the *third* prize for a *cancion*, the first being given to Lope, and the second to Zarate.

in the Milanese in 1625, and afterwards, as we are told, went to Flanders, where a disastrous war was still carried on with unrelenting hatred, both national and religious. That he was not a careless observer of men and manners, during his campaigns, we see by the plots of some of his plays, and by the lively local descriptions with which they abound, as well as by the characters of his heroes, who often come fresh from these same wars, and talk of their adventures with an air of

reality that leaves no doubt that they speak of  
\* 349 what had \* absolutely happened. But we soon  
find him in the more appropriate career of letters. In 1632, Montalvan tells us that Calderon was already the author of many dramas, which had been acted with applause; that he had gained many public prizes; that he had written a great deal of lyrical verse; and that he had begun a poem on the General Deluge. His reputation as a poet, therefore, at the age of thirty-two, was an enviable one, and was fast rising.<sup>7</sup>

A dramatic author of such promise could not be overlooked in the reign of Philip the Fourth, especially when the death of Lope, in 1635, left the theatre without a master. In 1636, therefore, Calderon was formally attached to the court, for the purpose of furnishing dramas to be represented in the royal theatres; and in 1637, as a further honor, he was made a knight of the Order of Santiago. His very distinctions, however, threw him back once more into a military life. When he was just well entered on his brilliant career as a poet, the rebellion excited by France in Catalonia burst forth with great violence, and all the members of

the four great military orders of the kingdom were required, in 1640, to appear in the field and sustain the royal authority. Calderon, like a true knight, presented himself at once to fulfil his duty. But the king was so anxious to enjoy his services in the palace, that he was willing to excuse him from the field, and asked from him yet another drama. In great haste, the poet finished his "Contest of Love and Jealousy,"<sup>8</sup> and then joined the army; serving loyally through the campaign in the body of troops commanded by the Count Duke Olivares in person, and remaining in the field till the rebellion was quelled.

After his return, the king testified his increased regard for Calderon by giving him a pension of thirty gold crowns a month, and by employing him in the arrangements for \*the festivities of the \*350 court, when, in 1649, the new queen, Anna Maria of Austria, made her entrance into Madrid. From this period, he enjoyed a high degree of favor during the life of Philip the Fourth, and until the death of that Prince had a controlling influence over whatever related to the drama, writing secular and religious plays for the theatres and *autos* for the Church with uninterrupted applause.

In 1651, he followed the example of Lope de Vega and other men of letters of his time, by entering a religious brotherhood; and the king two years afterwards gave him the place of chaplain in a chapel consecrated to the "New Kings" at Toledo;—a burial-place set apart for royalty, and richly endowed from the time of Henry of Trastamara. But it was found that his

<sup>8</sup> It has been said that Calderon has given to none of his dramas the title *Vera Tassis* assigns to this one, viz. "Certámen de Amor y Zelos." But this is a mistake. No play with this precise title is to be found among his printed works; but it is the last but one in the list of his plays furnished by Calderon himself to the Duke of Veraguas, in 1680.

duties there kept him too much from the court, to whose entertainment he had become important. In 1663, therefore, he was created chaplain of honor to the king, who thus secured his regular presence at Madrid; though, at the same time, he was permitted to retain his former place, and even had a second added to it. In the same year, he became a Priest of the Congregation of Saint Peter, and soon rose to be its head; an office of some importance, which he held during the last fifteen years of his life, fulfilling its duties with great gentleness and dignity.<sup>9</sup>

This accumulation of religious benefices, however, did not lead him to intermit in any degree his dramatic labors. On the contrary, it was rather intended to stimulate him to further exertion; and his fame was now so great, that the cathedrals of Toledo, Granada, and Seville constantly solicited from him religious plays to be performed on the day of the Corpus Christi, — that great festival, for which, during nearly thirty-seven years, he furnished similar entertainments regularly, at the charge of the city of Madrid. For these services, as well as for his services at court, he was richly rewarded, so that he accumulated an ample fortune.

After the death of Philip the Fourth, which \* 351 happened \* in 1665, he seems to have enjoyed less of the royal patronage. Charles the Second had a temper very different from that of his predecessor; and Solís, the historian, speaking of Calderon, with reference to these circumstances, says pointedly, “He died without a Mæcenas.”<sup>10</sup> But still he contin-

ued to write as before, for the court, and for the churches ; and retained, through his whole life, the extraordinary general popularity of his best years.<sup>11</sup> He died in 1681, on the 25th of May,— the Feast of the Pentecost,— while all Spain was ringing with the performance of his *autos*, in the composition of one more of which he was himself occupied almost to the last moment of his life.<sup>12</sup>

The next day, he was borne, as his will required, without any show, to his grave in the church of San Salvador, by the Priests of the Congregation over which he had so long presided, and to which he now left the whole of his fortune. But a gorgeous funeral ceremony followed a few days later, to satisfy the claims of the popular admiration ; and even at Valencia, Naples, Lisbon, Milan, and Rome, public notice was taken of his death by his countrymen, as of a national calamity.<sup>13</sup> A monument to his memory was

because it comes from a friend, and was written, — at least the poetical part of it, — as the author tells us, within fifty-three days after Calderon's death

<sup>11</sup> It seems probable that Calderon wrote no plays expressly for the public stage after he became a priest, in 1651, confining himself to *autos* and to "Comedias" for the court, which last, however, were at once transferred to the theatres of the capital. Thus "La Fieia, el Rayo, y la Piedra," a drama which lasted seven hours on its first representation at the palace, was immediately given to the public of Madrid and acted thirty-seven afternoons consecutively. It may be hoped, that, the court ceremonies being omitted, the city audiences were not so long detained.

<sup>12</sup> "Estava un auto entones en los fines, como su autor" (Obelisco, Canto I., st. 22. See also a sonnet at the end of the volume) Solís, the historian, in one of his letters, says, "Our friend Don Pedro Calderon is just dead, and went off, as they say the swan does, singing, for he did all he could, even when he was in immediate danger, to finish the second *auto* for the Corpus.

But, after all, he completed only a little more than half of it, and it has been finished in some way or other by Don Melchor de Leon" (Cartas de N. Antonio y A. Solís, publicadas por Mayans y Siscar, Leon de Francia, 1733, 12mo, p. 75.)

Melchor Fernandez de Leon was a well-known dramatist of this period, but, by no means, one to tread in the footsteps of Calderon

MacCarthy says that the Pleyto Matrimonial was left unfinished by Calderon and was completed by Zamora, as may be seen, he says, in Vol IV of the Autos. See MacCarthy's Mysteries of Corpus Christi, 1857, p. 104, note

<sup>13</sup> Lara, in his "Advertencias," speaks of "the funeral eulogies printed in Valencia." Vera Tassis mentions them also, without adding that they were printed. A copy of them would be very interesting, as they were the work of "the illustrious gentlemen" of the household of the Duke of Veraguas, Calderon's friend. The substance of the poet's will is given in the "Obelisco," Canto I., st. 32, 33.

\* 352 soon \* erected in the church where he was buried ; but in 1840 his remains were removed to the more splendid church of the Atocha, where they now rest.<sup>14</sup>

Calderon, we are told, was remarkable for his personal beauty, which he long preserved by the serenity and cheerfulness of his spirit. The engravings published soon after his death show, at least, a strongly marked and venerable countenance, to which in fancy we may easily add the brilliant eye and gentle voice given to him by his friendly eulogist, while in the ample and finely turned brow we are reminded of that with which we are familiar in the portraits of our own great dramatic poet.<sup>15</sup> His character, throughout, seems to have been benevolent and kindly. In his old age, we learn that he used to collect his friends round him on his birthdays, and tell them amusing stories of his childhood ;<sup>16</sup> and during the whole of the active part of his life, he enjoyed the regard of many of the distinguished persons of his time, who, like the Count

<sup>14</sup> An account of the first monument and its inscription is to be found in Baena, Tom IV p 231, and an account of the removal of the poet's ashes to the convent of "Our Lady of Atocha" is in the Foreign Quarterly Review, April, 1841, p 227. An attempt to do still further honor to the memory of Calderon was made by the publication of a life of him, and of poems in his honor by Zamacola, Zorrilla, Hartzenbusch, etc., in a folio pamphlet, Madrid, 1840, as well as by a subscription.

<sup>15</sup> His fine capacious forehead is noticed by his eulogist, and is obvious in the prints of 1682 and 1684, which little resemble the copies made from them by later engravers —

Considerává de su rostro grave  
Lo capaz de la frente, la viveza  
De los ojos alegres, lo suave  
De la voz, etc

Canto I, st 41

Whether either of the prints referred to is made from a portrait of Calderon by Alonso Cano, or from one by Juan

de Alfaro, or from some other, I do not know. Those by the two first, however, are likely to have been the best. Stirling's Artists of Spain, Vol II. p 803, Vol III p 1116

Since the above was published, in 1849, a gay description of himself by Calderon has been found and printed (Bib. de Autores Españoles, Tom XXIV, 1853, p 585). It is thrown into the form of a ballad, and, although the only copy of it known to exist is imperfect, it is very curious. He addresses it to a lady, and countenances his claim to a very proud ancestry, but not one so proud as Lara afterwards set up for him, — alludes to the remarkable prominence of his forehead, so obvious in the old prints, — says he is of a middle stature and of a pale complexion, that he takes no snuff, and that the hope of a prize at the Festival of San Isidro made a poet of him. It is a pleasant *jeu-d'esprit*

<sup>16</sup> Prólogo to the "Obelisco"

Duke Olivares and the Duke of Veraguas, seem to have been attracted to him quite as much by the gentleness of his nature as by his genius and fame.

In a life thus extending to above fourscore years, \* nearly the whole of which was devoted \* 353 to letters, Calderon produced a large number of works. Except, however, a panegyric on the Duke of Medina de Rioseco, who died in 1647, and a single volume of *autos*, which is said to have been printed in 1676, and of which there is certainly an edition in 1690, he published hardly anything of what he wrote ;<sup>17</sup> and yet, beside several longer works,<sup>18</sup> he

<sup>17</sup> The account of the entrance of the new queen into Madrid, in 1649, written by Calderon, was indeed printed ; but it was under the name of Lorenzo Ramirez de Prado, who, assisted by Calderon, arranged the festivities of the occasion

<sup>18</sup> The unpublished works of Calderon, as enumerated by Vera Tassis, Barea, and Lara, are —

(1) "Discurso de los Quattro Novísimos", or what, in the technics of his theology, are called the four last things to be thought upon by man ; viz Death, Judgment, Heaven, and Hell. Lara says Calderon read him three hundred octave stanzas of it, and proposed to complete it in one hundred more. It is, no doubt, lost

(2) "Tratado defendiendo la Nobleza de la Pintura" It is probable that this Defence of Painting was a "Deposicion" of eighteen pages made by Calderon to the *Procurador de Cámara*, in order to defend the professors of the art from a sort of military conscription with which they were threatened. At any rate, this curious document, of which I find no other notice, is printed in the "Cajon de Sastre Literato, ec., por Don Francisco Mariano Nifo, or Nipho," (Tom. IV, 1781, pp 25, sqq.) — a confused collection of extracts, sometimes rare and interesting, and sometimes quite worthless, from Spanish authors of the earlier times, mixed up with odds and ends of the personal opinions and fancies of Señor Nipho himself, who was a translator

and hack writer of the reigns of Ferdinand VI and Charles III

(3) "Otro tratado, Defensa de la Comedia"

(4) "Otro tratado, sobre el Diluvio General" The last two *tratados* were probably poems, like the "Discurso" At least, that on the Deluge is mentioned as such by Montalvan and by Laia

(5) "Lágrimas, que vierte un Alma arrepentida á la Hora de la Muerte" This, however, is not unpublished, though so announced by Vera Tassis. It is a little poem in the ballad measure, which I detected first in a singular volume, where probably it first appeared, entitled "Avisos para la Muerte, escritos por algunos Ingenios de España á la Devocion de Bernardo de Oviedo, Secretario de su Majestad, ec., publicados por D. Luis Arellano," Valencia, 1634, 18mo, 90 leaves, reprinted, Zaragoza, 1648, and often besides. It consists of the contributions of thirty poets, among whom are no less personages than Luis Velez de Guevara, Juan Pérez de Montalvan, and Lope de Vega. The burden of Calderon's poem, which is given with his name attached to it, is "O dulce Jesus mio, no entres, Señor, con vuestro siervo en juicio !" and a translation of it may be found in Cardinal Diepenbrock's "Geistliche Blumenstraus," 1852, p 186. The two following stanzas are a favorable specimen of the whole —

O quanto el nacer, O quanto,  
Al morir es parecido !

\* 354 prepared for the academies \* of which he was a member, and for the poetical festivals and joustings then so common in Spain, a great number of odes, songs, ballads, and other poems, which gave him not a little of his fame with his contemporaries.<sup>19</sup> His brother, indeed, printed some of his full-length dramas in 1635 and 1637; <sup>20</sup> but we are expressly told, although the fact is doubtful, that Calderon himself never sent any of them to the press; <sup>21</sup> and even in the case of the *autos*, where he deviated from his established custom, he says he did it unwillingly, and only lest their sacred character should be impaired by imperfect and surreptitious publications.

For forty-eight years of his life, however, the press teemed with dramatic works bearing his name on their titles. As early as 1633, they began to appear in the popular collections; but many of them were not his,

Pues, si nacimos llorando,  
Llorando tambien morimos  
O dulce Jesus mio, etc

Un gemido la primera  
Salva fué que al mundo fizimos,  
Y el ultimo vale que  
Le hazemos es un gemido  
O dulce Jesus mio, etc

How much resembles here our birth  
The final hour of all!  
Weeping at first we see the earth,  
And weeping hear Death's call  
O, spare me, Jesus, spare me, Saviour dear,  
Nor meet thy servant as a Judge severe!

When first we entered this dark world,  
We hailed it with a moan,  
And when we leave its confines dark,  
Our farewell is a groan  
O, spare me, Jesus, spare me, Saviour dear,  
Nor meet thy servant as a Judge severe!

The whole of the little volume in which it occurs may serve to illustrate Spanish manners, in an age when a gentleman of condition and a courtier sought spiritual comfort by such means and in such sources

Fifteen miscellaneous poems of Calderon — eight of which I had already known separately — have been brought together since the preceding account was first published in 1849, and may now be found in the Biblioteca de Au-

tores Españoles, Tom. XIV, 1850, pp 724, ec., and Tom. XXIV, 1853, p 585. But they can be only a small portion of what Calderon wrote, — probably only a small portion of what he printed anonymously or circulated in manuscript after the fashion of his time. Of one of them, entitled *Psalle et Sile*, from an inscription in the choir of the cathedral at Toledo, I found a copy of the original edition, with the *Aprobacion*, dated December 31, 1661, in the Hof Bibliothek at Vienna

<sup>19</sup> Lara and Vera Tassis, both personal friends of Calderon, speak of the number of these miscellanies as very great

<sup>20</sup> There were four volumes in all, and Calderon, in his Preface to the *Autos*, 1690, seems to admit their genuineness, though he abstains, with apparent caution, from directly declaring it, lest he should seem to imply that their publication had ever been authorized by him.

<sup>21</sup> "All men well know," says Lara, "that Don Pedro never sent any of his *comedias* to the press, and that those which were printed were printed against his will" Obelisco, Prólogo

and the rest were so disfigured by the imperfect manner in which they had been written down during their representations, that he says he could often hardly recognize them himself.<sup>22</sup> His editor and friend,

<sup>22</sup> The publication of Calderon's plays in the earliest editions of them is a matter of importance which has never been cleared up, probably in consequence of its obscurity and difficulty I will, therefore, endeavor to do it as far as I can from the materials in my possession

The first play of Calderon that I know to have been printed is "El Astrologo Fingido," which I possess in the very rare "Comedias de diferentes Autores," (Tom. XXV, Zaragoza, 1633,) with a Licencia of 1632, when its author was thirty-two years old In the table of contents it is called "El Amante Astrologo," and in the dedication of it to Frán Ximenez de Uirea, Pedro Escuer, the editor, says that he had taken great pains to print it from a good copy, — an assertion which the text he has given hardly justifies

Three more plays of Calderon appear in Tom. XXVIII of the same collection, edited by Escuer, Huesca, 1634 These three plays are, — (1) "La Industria contra el Poder," which is here ascribed to Lope de Vega, but which is really Calderon's "Amor, Honor y Poder," (2) "De un Castigo tres Venganzas," now called "Un Castigo en tres Venganzas," and (3) "La Cruz en la Sepultura," which is a first and very inferior recension of the well-known "Devocion de la Cruz" I have this volume also

Again, three plays of Calderon occur in Vol. XXX of the "Comedias de diferentes Autores," which, as my copy, though otherwise perfect, lacks its title-page, I learn only from Bellinghausen (p. 21) was printed at Zaragoza in 1636 The three plays referred to are, — (1) "La Dama Duende," (2) "La Vida es Sueño," and (3) "El Privilegio de las Mujeres," which, as here given, he wrote, according to Hartzenbusch, with Montalvan and Coello, and which, in this form, is the original sketch of the "Armas de la Hermosura"

One play only can be found in Vol. XXXI, Barcelona, 1638, f. 22, "Con quien vengo vengo," where it appears, like the other plays in this volume, with-

out his name But it is his Hartzenbusch gives it the date of 1639 Of course this is a mistake of a year at least

Four plays of Calderon appear in Vol. XLII, Zaragoza, 1650, viz (1) "No ay Burlas con el Amor," (2) "El Señeto a Voces," and (3) "El Pinto de su Deshonra", — but "Del Rey abajo Ninguno" is also attributed to him, though everybody knows it belongs to Roxas, and, on the other hand, (4) his "Hija del Ayre" is attributed to Ant. Enriquez Gomez

One play only is to be found in Vol. XLIII, Zaragoza, 1650, published by Escuer, viz "La Desdicha de la Voz"

How many more there may be by Calderon in this collection, designated as the *Diferentes Comedias*, it is not possible to ascertain, as so few of its volumes are known to exist No doubt there were others besides those I have enumerated

But in 1652 began the collection of the *Comedias Escogidas*, better known than the last, but still troublesome to read In the very first volume, published in that year, are three plays of Calderon, to the publication of which it seems as if he must have directly assented, since his *Aprobacion*, dated 18 May, 1652, is the first thing in the volume This, however, is only the beginning Forty-six more volumes of this new collection appeared during his lifetime, and contain forty-eight plays attributed to him, many of them not his, and almost all full of errors, additions, and oversights But two deserve especial notice, viz "Las Armas de la Hermosura," and "La Señora y la Criada," the last now known as "El Acaso y el Error" They are in Vol. XLVI, 1679, and Vera Tassis, the friend of Calderon, in his *Advertencia* to the *Comedias de Calderon*, Tom. V, 1694, says that Calderon himself gave them to him, Vera Tassis, to be printed, and *corrected their proof-sheets* We have, therefore, these two plays at least exactly as Calderon prepared them, and on his own authority

But while, in both these larger col-

\* 355 \* Vera Tassis, gives several lists of plays, amounting in all to a hundred and fifteen,

lections, as well as in others of less pretension, separate plays of Calderon were constantly reprinted during his lifetime, often in the most lawless manner, an attempt was made to publish them together in a way that should give them the semblance, at least, if not the substance, of their author's authority. Two volumes were published for this purpose by his brother Joseph. Of the first, which I have never seen, but which appeared in 1635, the accounts are very indistinct, but it probably contained the same plays with the first volume of the collection by Vera Tassis, printed in 1685 (Hartzenbusch, Tom IV, p. 654.) The second volume, published by the same person, appeared in 1637. I possess it, and the plays, though not exactly in the same order, are the same plays with those published by Vera Tassis as his Volume II, in 1686. There is a second edition of this second volume, Madrid, 1641, of which I found a copy in the Magliabecchi Library, Florence. In 1664, a third volume appeared, prepared by Ventura y Veigaia, and in 1672, Vol IV, with a letter prefixed by himself, and a list of forty-one plays published as his, which he repudiates. And finally, in 1677, a fifth volume was published at Barcelona, of whose ten plays he denies four in the Preface to the only volume of *autos* he ever published, but of which four I suppose two are really his, notwithstanding his denial.

And here the matter rested until after Calderon's death in 1681. Then Vera Tassis y Villaruel, who calls himself "his best friend," — *su mayor amigo*, — took it up in earnest, not later than 1682, as we see by the *aprovaciones* and *licencias* to his publications of the *Comedias*. At first he seems to have assumed that the five volumes noted above as printed during Calderon's life might be deemed of sufficient authority to constitute the foundation of his own collection, for he began it in 1683 by printing a *sixth* volume with *aprovaciones*, etc., of 1682, and among them the famous one of *Guerra*, 14 April, 1682, (see *post*, Chap XXIV, note,) which he took the trouble to reprint in his Vol. V., 1694, and which excited a

long controversy (See *post*, Chap XXIV.) This Vol VI he followed up with Vol VII the same year, 1683, and with Vol VIII in 1684. But he now apparently became dissatisfied with the five volumes printed earlier by Calderon's brother and other persons, and in 1685 he published a new Vol I, containing, I think, the plays in that of 1635, with their *licencias* of that date. In 1686 he went on with Vol II, which contains the plays in the Vol II of 1637, though in a different order, but it should be noted that the "Mayor Monstruo del Mundo" is now much altered and improved. In 1687 he continued with Vol III, saying that Ventura de la Vega had indeed already published it "con la vana ostentacion de amigo de nuestro Don Pedio," but that his edition was very incorrect, and in one play omitted two hundred verses. In 1688, he further published Vol IV, and in 1691, Vol IX, but with *aprovaciones* of 1682, showing that he had, from the first, made arrangements for publishing the entire collection of his friend's *Comedias*. And, finally, in 1694, he went back again in the series and printed a fresh Vol V, calling it "La verdadera quinta Parte," to distinguish it from the one Calderon had repudiated, and giving in his Preface a list of one hundred and twenty-one plays rightly ascribed to Calderon, and a list of one hundred and six plays falsely ascribed to him. These nine volumes, thus irregularly published by Vera Tassis between 1683 and 1694 are to Calderon what the first folio edition of his plays is to Shakespeare, and to eight of the nine in my copy of them is prefixed a head of Calderon engraved in 1682, by Fossmann, whom Stirling regards (p. 1053) as perhaps the best engraver of the time of Charles II, and whose engraving of Calderon is, I think, better, and from a different and more agreeable likeness, than that of Eberhard in the *Obelisco Funebre*, 1684.

These materials — but above all the edition of Vera Tassis — constitute the proper foundation for researches respecting the *Comedias* of Calderon. A very bad reprint of this edition appeared at Madrid in 1723 — 1726, in nine volumes, and a better one by Apontes, 1760 —

printed by the cupidity of \* the booksellers \* 356 as Calderon's, without having any claim whatsoever to that honor ; and he adds, that many others, \* which Calderon had never seen, were \* 357 sent from Seville to the Spanish possessions in America.<sup>23</sup>

By means like these, the confusion became at last so great, that the Duke of Veraguas, then the honored head of the family of Columbus, and Captain-General

1763, in eleven volumes, which in its turn was eclipsed by a third very carefully prepared by an accomplished Spanish scholar, J J Keil, of Leipzig, who published it in that city in four large octavos in 1827–1830. Occasionally, from the earliest times, single plays of Calderon have been printed, much like the old quartos of Shakespeare, and exactly such as were published of all the Spanish dramatists down to the beginning of the present century, and indeed pretty well into it. Selections, too, were made by Huerta, Ortega, Ochoa, and others. But all this was unsatisfactory.

At last J E Hartzenbusch, to whom Spanish literature owes much in many ways, undertook an edition for Rivadeneira, and published it in the Biblioteca de Autores Españoles (Tom VII, IX, XII, XIV, 1848–1850), leaving nothing to be asked, if we consider the state of the materials for such a work as he found them, and not much to be hoped from future researches. He gives us one hundred and twenty-two Comedias, including ten either known to have been partly written by Calderon, or believed to be so on satisfactory evidence. Nine plays, however, which are in Calderon's own list of 1680, still remain to be accounted for, but we have now in Hartzenbusch's edition four not mentioned there, and not in previous collections. This is something, but more may perhaps yet be discovered, and more certainly should be sought for. In addition to the Comedias, Hartzenbusch gives us fifteen Entremeses, Mojungangas, and Jacaras Entremesadas attributed to Calderon, I fear on slight authority, and to which, on authority not better, I could add one more *entremes* in my possession, said, on its title-page, to be

his work, viz “Pelicano y Raton.” But all of them have little value, and fail to satisfy the expectations excited by the *Gracias* in his full-length Comedias. I need not add that the edition of Hartzenbusch is by far the best we have of Calderon's plays,—the most ample and the most carefully prepared, with good prefatory matter and excellent appendices.

I hope he will, in the same way, edit the *autos*, which, being the property of the city of Madrid under the will of their author, were not, for a long time, permitted to be published, lest the printed copies should impair the effect of the annual, popular representations in the streets (Lara, *Prólogo*). Calderon, indeed, collected twelve of them for publication in his lifetime, and prepared a preface for them, but although the *Aprobacion*, *Licencia*, etc., are dated 1676, I have never seen any edition earlier than the one printed at Madrid, 1690, which I possess, though, I doubt not, there was one of 1677, nor were more than these twelve published till the edition of 1717 appeared in six volumes, of which there is a tolerable reprint by Apontes, 1759–60. They need a good editor, like Hartzenbusch, and would well reward his labors.

<sup>23</sup> Probably several more may be added to the list of dramas that are attributed to Calderon, and yet are not his. I have noted “El Gairote mas bien Dado,” in “El Mejor de los mejores Libros de Comedias,” 1653, 4to, where it is given with two that are genuine, and “El Escandalo de Grecia,” which is in *Comedias Escogidas*, Tom XI, 1659, where, at the end of the play, (f 176, b,) it is impudently announced as his in the usual form of claiming authorship on the Spanish stage.

of the kingdom of Valencia, wrote a letter to Calderon in 1680, asking for a list of his dramas, by which, as a friend and admirer, he might venture to make a collection of them for himself. The reply of the poet, complaining bitterly of the conduct of the booksellers, which had made such a request necessary, is accompanied by a list of one hundred and eleven full-length dramas and seventy sacramental *autos*, which he claims as his own.<sup>24</sup> This catalogue constitutes the proper basis for a knowledge of Calderon's dramatic works, down to the present day. All the plays mentioned in it have not, indeed, been found. Nine are not \* 358 in the editions of Vera \* Tassis, in 1682, of Apontes, in 1760, or of Hartzenbusch, in 1850; but, on the other hand, a few not in Calderon's list have been added to theirs upon what has seemed sufficient authority; so that we have now seventy-three sacramental *autos*, with their introductory *loas*,<sup>25</sup> and one hundred and eight *comedias*, or — including plays partly his — one hundred and twenty-two, on which his reputation as a dramatic poet is at present to rest.<sup>26</sup>

<sup>24</sup> This correspondence, so honorable to Calderon, as well as to the head of the family of Columbus, who signs himself proudly, *El Almirante Duque*, — as Columbus himself had required his descendants always to sign themselves, (Navarrete, Tom II p 229,) — is to be found in the “Obelisco,” and again in Huerta, “Teatro Hespanol,” (Madrid, 1785, 12mo, Parte II Tom. III,) and, with additions by Vera Tassis, *Comedias de Calderon*, Tom I, 1685, and Tom V, 1694. The complaints of Calderon about the booksellers are very bitter, as well they might be, for in 1676, in his Preface to his *autos*, he says that their frauds took away from the hospitals and other charities — which yet received only a small part of the profits of the theatre — no less than twenty-six thousand ducats annually.

<sup>25</sup> All the *loas*, however, are not Calderon's, but it is no longer possible to determine which are not so. “No son todas suyas” is the phrase applied to them in the *Prólogo* of the edition of 1717.

<sup>26</sup> Vera Tassis tells us, indeed, in his Life of Calderon, that Calderon wrote a hundred *saynetes*, or short farces; about a hundred *autos sacramentales*; two hundred *loas*, and more than one hundred and twenty *comedias*. But he collected for his edition (1683–1694) only the *comedias* mentioned in the text, and thirteen more, intended for an additional volume that never was printed. See notices of Calderon, by F. W. V. Schmidt, in the *Wiener Jahrbücher der Literatur*, Bande XVII, XVIII, and XIX, 1822, to which I am much indebted, and which deserve to be printed separately, and preserved.

In examining this large mass of Calderon's dramatic works, it will be most convenient to take first, and by themselves, those which are quite distinct from the rest, and which alone he thought worthy of his care in publication,— his *autos* or dramas for the Corpus Christi day. Nor are they undeserving of this separate notice. There is little in the dramatic literature of any nation more characteristic of the people that produced it than this department of the Spanish theatre; and, among the many poets who devoted themselves to it, none had such success as Calderon.

Of the early character and condition of the *autos*, and their connection with the Church, we have already spoken, when noticing Juan de la Enzina, Gil Vicente, Lope de Vega, and Valdivielso. They \* were, from the twelfth and thirteenth centuries, among the favorite amusements of the mass of the people; but with the period at which we are now arrived, they had gradually risen to be of great importance. That they were spread through the whole country, even into the small villages, we may see in the Travels of Agustin Roxas,<sup>27</sup> who played them everywhere, and in the Second Part of Don Quixote, where the mad knight is represented as

The above wish, expressed in the first edition of this work, in 1849, has been more than fulfilled by the following publication "Die Schauspiele Calderon's dargestellt und erlautert von Fried. Wilh. Val Schmidt aus gedruckten und ungedruckten Papieren des Verfassers zusammengesetzt, ergänzt und herausgegeben von Leopold Schmidt," Elberfield, 1857, 8vo, pp. 543. The editor is the son of the author, and seems to inherit his father's taste and learning, giving us a work of more value to those who wish to make a critical study of Calderon, than any other extant. But it should be observed, that this important work is almost entirely confined

to a careful examination of the one hundred and eight *comedias* in the editions of Vera Tassis and Apontes, to a slight inquiry into the one hundred and six plays falsely attributed to Calderon, of which Vera Tassis gives the titles in his Verdadera quinta Parte, 1694; to a notice of a few of Calderon's *autos*, and to such other casual investigations as these different subjects suggest. It is carefully edited, with a few judicious notes and additions by the son, made in the conscientious spirit of the father.

meeting a car that was carrying the actors for the Festival of the Sacrament from one hamlet to another.<sup>28</sup> This, it will be remembered, was all before 1615. During the next thirty years, and especially during the last portion of Calderon's life, the number and consequence of the *autos* were much increased, and they were represented with great luxury and at great expense in the streets of all the larger cities;—so important were they deemed to the influence of the clergy, and so attractive had they become to all classes of society,—to the noble and the cultivated no less than to the multitude.<sup>29</sup>

In 1655, when they were at the height of their success, Aarsens de Somerdyck, an accomplished Dutch traveller, gives us an account of them as he witnessed their exhibition at Madrid.<sup>30</sup> In the forenoon of the festival, he says, a procession occurred such as we have seen was usual in the time of Lope de Vega, where the king and court appeared, without distinction of rank, preceded by two fantastic figures of giants, and sometimes by the grotesque form of the *Tarasca*,—one of which, we are told, in a pleasant story of Santos, passing by night from a place where it had been exhibited the preceding day to one where it was to be exhibited the day following, so alarmed a body of muleteers who accidentally met it, that they roused up the country, as if a real monster were come

<sup>29</sup> In 1640 and 1641, and probably in other years, there were four *autos* represented in the streets of Madrid, during the festival of the Corpus Christi; and in the last-mentioned year we are told that the giants and the *tarasca* had new dresses in good taste. rious, with Barbier, *Dictionnaire d'Anonymes*, Paris, 1824, 8vo, No 19,281. The *auto* which the Dutch traveller saw was, no doubt, one of Calderon's, since Calderon then, and for a long time before and after, furnished the *autos* for the city of Madrid. Madame d'Aulnoy describes the same gorgeous procession as she saw it in 1679, (*Voyage*, ed. 1693, Tom III. pp 52—55,) with the impudent *auto*, as she calls it, that was performed that year.

among them to lay waste the land.<sup>31</sup> These misshapen figures and all this strange procession, with music of hautboys, tambourines, and castanets, with banners and with religious shows, followed the sacrament through the streets for some hours, and then returned to the principal church, and were dismissed.

In the afternoon they assembled again and performed the *autos*, on that and many successive days, before the houses of the great officers of state, where the audience stood either in the balconies and windows that would command a view of the exhibition, or else in the streets. The giants and the Tarascas were there to make sport for the multitude; the music came, that all might dance who chose; torches were added to give effect to the scene, though the performance was only by daylight; and the king and the royal family enjoyed the exhibition, sitting in state under a magnificent canopy in front of the stage prepared for it at least once near the palace.

As soon as the principal personages were seated, the *loa* was spoken or sung; then came a farcical *entremes*; afterwards the *auto* itself; and finally, something by way of conclusion that would contribute to the general amusement, like music or dancing. And this was continued, in different parts of the city, daily for a month, during which the theatres were shut and the regular actors were employed in the streets, in the service of the Church.<sup>32</sup>

<sup>31</sup> *La Verdad en el Potro*, Madrid, 1686, 12mo, pp 291, 292. The Dutch traveller had heard the same story, but tells it less well. (*Voyage*, p 121.) The Tarasca was no doubt excessively ugly. *Montalvan* (*Comedias*, Madrid, 4to, 1638, f 13) alludes to it for its monstrous deformity.

So does Ovando, describing a procession in Malaga, in 1655:—

On the same occasion and on the same authority, we learn that gypsy girls, dancing with tambourines, formed a part of the show, — a strange addition to a Christian festival.

Of the entertainments of this sort which Calderon furnished for Madrid, Toledo, and Seville, he has left, as has been said, no less than seventy-three. They are

all allegorical, and all, by the music and show  
\* 361 with which they \*abounded, are nearer to operas than any other class of dramas then known in Spain; some of them reminding us, by their religious extravagance, of the treatment of the gods in the plays of Aristophanes, and others, by their spirit and richness, of the poetical masques of Ben Jonson. They are upon a great variety of subjects, and show, by their structure, that elaborate and costly machinery must have been used in their representation. That they are a most remarkable exhibition of the spirit of the Catholic religion, on its poetical side, can no more be doubted than the fact that they often produced a devout effect on the multitudes that thronged to witness their performance.

Including the *loa* that accompanied each, the *autos* of Calderon are nearly or quite as long as the full-length plays which he wrote for the secular theatre. Some of them indicate their subjects by their titles, like "The First and Second Isaac," "God's Vineyard," and "Ruth's Gleanings." Others, like "The True God Pan" and "The First Flower of Carmel," give no such intimations. All are crowded with shadowy personages, such as Sin, Death, Mohammedanism, Judaism, Justice, Mercy, and Charity; and the uniform purpose and end of all is to set forth and glorify the doctrine of the Real Presence in the Eucharist. The great Enemy of man, of course, fills a large space in them,—Quevedo says too large, adding, that, at last, he had grown to be quite a presuming and vainglorious personage, coming on the stage

dressed finely, and talking as if the theatre were altogether his own.<sup>33</sup>

There is necessarily a good deal of sameness in the structure of dramas like these ; but it is wonderful with what ingenuity Calderon has varied his allegories, sometimes mingling them with the national history, as in the case of the two *autos* on Saint Ferdinand ; oftener with incidents and stories from Scripture, like "The Brazen Serpent" and "The Captivity of the Ark" ; and always, where he could, seizing any popular occasion to produce an effect, as he did after the completion of the Escorial \* and of the Buen Retiro, and \* 362 after the marriage of the Infanta María Teresa ; each of which events contributed materials for a separate *auto*. Almost all of them have passages of striking lyrical poetry, as well as gorgeous descriptive passages ; and a few, of which "Devotion to the Mass" is the chief, make a free use of the old ballads.

One of the most characteristic of the collection, and one that has great poetical merit in separate portions, is "The Divine Orpheus."<sup>34</sup> It opens with the entrance of a huge black car, in the shape of a boat, which is drawn along the street toward the stage where the *auto* is to be acted, and contains the Prince of Darkness, set forth as a pirate, and Envy, as his steersman ; both supposed to be thus navigating through a portion of chaos.<sup>35</sup> They hear, at a distance, sweet music which

<sup>35</sup> Such dramatic representations and such cars were occasionally a part of other great solemnities besides those of the *Corpus Christi*, which were the greatest of all. Thus, at Huesca, in 1657, after the birth of Don Felipe Prospero, a son of Philip IV, who died

young, among the rejoicings of the city was a grand dramatic entertainment, in which a vast car appeared, that opened into six parts and discovered the newborn prince kneeling before the *Custodia* that contained the wafer of the sacrament, — "Thus," says the contemporary account of these shows, "thus intimating that the Princes of the august House of Austria are born divinely taught to worship the most holy sacrament." *Relacion de las Fiestas que la*

proceeds from another car, advancing from the opposite quarter in the form of a celestial globe, covered with the signs of the planets and constellations, and containing Orpheus, who represents allegorically the Creator of all things. This is followed by a third car, setting forth the terrestrial globe, within which are the Seven Days of the Week, and Human Nature, all asleep. These cars open, so that the personages they contain can come upon the stage and retire back again, as if behind the scenes, at their pleasure;—the machines themselves constituting, in this as in all such representations, an important part of the scenic arrangements of the exhibition, and, in the popular estimation, not unfrequently the most important part.<sup>36</sup>

\* 363 \* On their arrival at the stage, the Divine

Orpheus, with lyrical poetry and music, begins the work of creation, using always language borrowed from Scripture; and at the suitable moment, as he advances, each Day presents itself, roused from its ancient sleep and clothed with symbols indicating the nature of the work that has been accomplished; after which, Human Nature is, in the same way, summoned forth, and appears in the form of a beautiful woman, who is the Eurydice of the fable. Pleasure dwells with her in Paradise; and, in her exuberant happiness, she sings a hymn in honor of her Creator, founded on the hundred and thirty-sixth Psalm, the poetical effect of which is diminished by an unbecoming scene of allegorical gallantry that immediately follows between the Divine Orpheus himself and Human Nature.<sup>37</sup>

The temptation and fall succeed; and then the graceful Days, which had before always accompanied Human Nature and scattered gladness in her path, disappear one by one, and leave her to her trials and her sins. She is overwhelmed with remorse, and, endeavoring to escape from the consequences of her guilt, is conveyed by the bark of Lethe to the realms of the Prince of Darkness, who, from his first appearance on the scene, has been laboring, with his coadjutor, Envy, for this very triumph. But his triumph is short. The Divine Orpheus, who has, for some time, represented the character of our Saviour, comes upon the stage, weeping over the fall, and sings a song of love and grief to the accompaniment of a harp made partly in the form of a cross; after which, rousing himself in his omnipotence, he enters the realms of darkness, amidst thunders and earthquakes; overcomes all opposition; rescues Human Nature from perdition; places her, with the seven redeemed Days of the Week, on a fourth car, in the form of a ship, so ornamented as to represent the Christian Church and the mystery of the Eucharist; and then, as the gorgeous machine sweeps away, the exhibition ends with the shouts of the actors in \* the drama, accompanied by the answering shouts of the devout spectators on their knees wishing the good ship a good voyage and a happy arrival at her destined port.<sup>38</sup>

ture and of scriptural allusions is, of course, abundant. Perhaps the most striking instance of this is in Calderon's "Cena de Baltasar," in Tom. II, 1759.

<sup>38</sup> Allegorical ships were not uncommon in religious exhibitions. We have noticed two such already in Lope's early drama entitled "The Soul's Voyage" (See *ante*, Chap. XV.) Another, floating on a sea of silver before the Chapel of the Sacrament, in the Cathedral of Granada, was exhibited at a festival

there in November, 1635, — got up in consequence of an outrage which had been offered to the Holy Sacrament four months earlier by a French heretic, and for which it was intended thus to atone, — *desagraviar*, — the Ship of Faith firing broadsides of texts of Scripture at Luther, Wiclif, Calvin, and Ecclampadius, who were swimming about and vainly striving to repeat the outrage. See *Descripción de la grandiosa y celebre Fiesta, ec., por D Pedro de*

That these Sacramental Acts produced a great effect, there can be no doubt. Allegory of all kinds, which, from the earliest periods, had been attractive to the Spanish people, still continued so to an extraordinary degree; and the imposing show of the *autos*, their music, and the fact that they were represented in seasons of solemn leisure, at the expense of the government, and with the sanction of the Church, gave them claims on the popular favor which were enjoyed by no other form of popular amusement. They were written and acted everywhere throughout the country, and by all classes of people, because they were everywhere demanded. How humble were some of their exhibitions in the villages and hamlets may be seen from Roxas, who gives an account of an *auto* on the story of Cain, in which two actors performed all the parts;<sup>39</sup> and from Lope de Vega<sup>40</sup> and Cervantes,<sup>41</sup> who speak of *autos* being written by barbers and acted by shepherds. On the other hand, we know that in Madrid no expense was spared to add to their solemnity and effect, and that everywhere they had the countenance and support of the public authorities. Nor has their influence even yet entirely ceased. In 1765, Charles the Third forbade their public representation; but the popular will and the habits of five centuries could not

be immediately broken down by a royal decree.

\* 365 *Autos*, \* therefore, or dramatic religious farces resembling them, are still heard in some of the remote villages of the country; while, in the former

Of *full-length religious plays* and *plays of saints* Calderon wrote, in all, thirteen or fourteen. This was, no doubt, necessary to his success; for at one time during his career, such plays were much demanded. The death of Queen Isabella, in 1644, and of Balthasar, the heir-apparent, in 1646, caused a suspension of public representations on the theatres, and revived the question of their lawfulness. New rules were prescribed about the number of actors and their costumes, and an attempt was made even to drive from the theatre all plays in-

How much the *autos* were valued to the last, even by respectable ecclesiastics, may be inferred from the grave admiration bestowed on them by Martin Panzano, chaplain to the Spanish embassy at Turin, in his Latin treatise, "De Hispanorum Literatura," (Mantua, 1759, folio,) intended as a defence of his country's literary claims, in which, speaking of the *autos* of Calderon, only a few years before they were forbidden, he says they were dramas, "in quibus neque in inveniendo acumen, nec in disponendo ratio, neque in ornando aut venustas, aut nitor, aut majestas desiderantur" — p. lxxv.

Even in Germany, genuine "miracle-plays" have not wholly disappeared, as we have seen they had not in France in 1805. (See *ante*, Period I Chap. XIII note 3.) Thus, once in ten years, if not oftener, at Oberammergau, in Bavaria, a "Passions-schauspiel," beginning with the entrance of the Saviour into Jerusalem, and ending with his resurrection, is acted in fulfilment of a vow made there during a pestilence in 1633. I have the eighth edition of the poetical parts of this singular play, printed at Munich in 1850, and an ac-

count of the representation of it, which occurred thirteen times in the course of that year, published at Leipzig in 1851, by Eduard Devrient, 4to, pp. 43, with plates to illustrate it just as it appeared, acted in the open air, and another volume of documents about it by M. Van Deutinger, Munchen, 1851. The whole leaves no doubt that this extraordinary exhibition, at which six thousand persons are sometimes present, is made in the religious spirit of the Middle Ages; all the people in the village where it occurs taking part in the show, or in the preparations for it. The principal drama is broken into scenes by twenty-eight *tableaux*, in pantomime, of events from the Old Testament, and is among the most wild and strange relics of the Theatrical of the Middle Ages that have come down to our times. The wonder is that it has reached us, not embalmed as a literary curiosity, but as a living interest of living men, educated in a wholly different state of the world from the one that originally produced it, and to which alone it seems fitted. Pecuniary profit, however, is, no doubt, one of the main-springs of its continued success. It forms a large interest in an English novel entitled "Quits," written by an English lady married in Bavaria, who must have witnessed it in order to have described it so well.

volving the passion of love. and especially all  
 \* 366 the plays of \* Lope de Vega. This irritable state of things continued till 1649. But nothing of consequence followed. The regulations that were made were not executed in the spirit in which they were conceived. Many plays were announced and acted as religious which had no claim whatever to the title ; and others, religious in their external framework, were filled up with an intriguing love-plot, as free as anything in the secular drama had been. Indeed, there can be no doubt that the attempts thus made to constrain the theatre were successfully opposed or evaded, especially by private representations in the houses of the nobility ;<sup>43</sup> and that, when these attempts were given up, the drama, with all its old attributes and attractions, broke forth with a greater extravagance of popularity than ever ;<sup>44</sup> — a fact apparent from the crowd of dramatists that became famous, and from the circumstance that so many of the clergy, like Tarrega, Mira de Mescua, Montalvan, Tirso de Molina, and Calderon, to say nothing of Lope de Vega, who

<sup>43</sup> These representations in private houses had long been common Bisbe y Vidal (*Tratado*, 1618, c 18) speaks of them as familiar in Barcelona, and treats them, in his otherwise severe attack on the theatre, with a gentleness that shows he recognized their influence

<sup>44</sup> It is not easy to make out how much the theatre was really interfered with during these four or five years , but the dramatic writers seem to have felt themselves constrained in their course, more or less, for a part of that time, if not the whole of it The accounts are to be found in Casiano Pellicer, *Origen*, etc , *de la Comedia*, Tom. I pp 216 - 222, and Tom. II p 135 ; — a work important, but ill digested Conde, the historian, once told me that its materials were furnished chiefly by the author's father, the learned editor of *Don Quixote*, and that the son did not know how to put them together.

A few hints and facts on the subject of the secular drama of this period may also be found in Ulloa y Peñea's defence of it, written apparently to meet the troubles of 1644 - 1650, but not published until 1659, 4to He contends that there was never any serious purpose to break up the theatre, and that even Philip II meant only to regulate, not to suppress it (p 343) Don Luis Crespé de Borja, Bishop of Orihuela and ambassador of Philip IV. at Rome, who had previously favored the theatre, made, in Lent, 1646, an attack on it in a sermon, which, when published three years afterwards, excited a considerable sensation, and was answered by Andres de Avila y Heredia, el Señor de la Garena, and sustained by Padre Ignacio Camargo But nothing of this sort much hindered or helped the progress of the drama in Spain

was particularly exact in his duties as a priest, were all successful writers for the stage.<sup>45</sup>

\* Of the religious plays of Calderon, one of \* 367 the most remarkable is "The Purgatory of Saint Patrick." It is founded on the little volume by Montalvan, already referred to, in which the old traditions of an entrance into Purgatory from a cave in an island off the coast of Ireland, or in Ireland itself, are united to the fictitious history of Ludovico Enio, a Spaniard, who, except that he is converted by Saint Patrick and "makes a good ending," is no better than another Don Juan.<sup>46</sup> The strange play in which these are principal figures opens with a shipwreck. Saint Patrick and the godless Enio drift ashore and find themselves in Ireland,— the sinner being saved from drowning by the vigorous exertions of the saint. The king of the country, who immediately appears on the stage, is an atheist, furious against Christianity ; and after an exhibition, which is not without poetry, of the horrors of savage heathendom, Saint Patrick is sent as a slave into the interior of the island, to work for this brutal master.

<sup>45</sup> The clergy writing loose and immoral plays is only one exemplification of the unsound state of society so often set forth in Madame d'Aulnoy's *Travels in Spain*, in 1679-80,— a curious and amusing book, which sometimes throws a strong light on the nature of the religious spirit that so frequently surprises us in Spanish literature. Thus, when she is giving an account of the constant use made of the rosary or chaplet of beads, — a well-known passion in Spain, connected, perhaps, with the Mohammedan origin of the rosary, of which the Christian rosary was made a rival, — she says, "They are going over their beads constantly when they are in the streets, and in conversation ; when they are playing *ombre*, making love, telling lies, or talking scandal. In short, they are forever muttering over their chaplets, and even in the most ceremonious society it goes on just

the same, how devoutly you may guess. But custom is very potent in this country." Ed 1693, Tom II p 124

<sup>46</sup> The "Vida y Purgatorio del Glorioso San Patricio," (1627,) of which I have a copy, (Madrid, 1739, 18mo,) was long a popular book of devotion, both in Spanish and in French. That Calderon used it is obvious throughout his play. Wright, however, in his pleasant work on St. Patrick's Purgatory, (London, 1844, 12mo, pp 156-159,) supposes that the French book of devotion was made up chiefly from Calderon's play, whereas they resemble each other only because both were taken from the Spanish prose work of Montalvan. See *ante*, p. 314. Enio, under different names, is known to the old monkish accounts of St. Patrick, from the twelfth century, but it is Montalvan and Calderon who have made him the personage we now recognize.

The first act ends with his arrival at his destination, where, in the open fields, after a fervent prayer, he is comforted by an angel, and warned of the will of Heaven, that he should convert his oppressors.

Before the second act opens, three years elapse, during which Saint Patrick has visited Rome and been regularly commissioned for his great work in Ireland, where he now appears, ready to undertake it. He immediately performs miracles of all kinds, and, among the rest, raises the dead before the audience; but still the old heathen king refuses to be converted, unless

the very Purgatory, Hell, and Paradise preached  
 \* 368 to him are made sure to the \*senses of some  
 well-known witness. This, therefore, is divinely  
 vouchsafed to the intercession of Saint Patrick. A com-  
 munication with the unseen world is opened through a  
 dark and frightful cave. Enio, the godless Spaniard,  
 already converted by an alarming vision, enters it and  
 witnesses its dread secrets; after which he returns,  
 and effects the conversion of the king and court by a  
 long description of what he had seen. This, however,  
 is the only catastrophe to the play.

Besides its religious story, the Purgatory of Saint Patrick has a love-plot, such as might become the most secular drama, and a *gracioso* as rude and free-spoken as the rudest of his class.<sup>47</sup> But the whole was intended to produce what was then regarded as a religious effect; and there is no reason to suppose that it failed of its purpose. There is, however, much

<sup>47</sup> When Enio determines to adventure into the cave of Purgatory, he gravely urges his servant, who is the *gracioso* of the piece, to go with him; to which the servant replies, —

I never heard before that any man  
 Took lackey with him when he went to hell!  
 No, — to my native village will I haste,  
 Where I can live in something like content,

Or, if the matter must to goblins come,  
 I think my wife will prove enough of one  
 For my purgation

Comedias, 1760, Tom II p 264

There is, however, a good deal that is solemn in this wild drama. Enio, when he goes to the infernal world, talks, in the spirit of Dante himself, of

Treading on the very ghosts of men.

in it that would be unseemly under any system of faith; some wearying metaphysics; and two speeches of Enio's, each above three hundred lines long,— the first an account of his shameful life before his conversion, and the last a narrative of all he had witnessed in the cave, absurdly citing for its truth fourteen or fifteen obscure monkish authorities, all of which belong to a period subsequent to his own.<sup>48</sup> Such as it is, however, the Purgatory of Saint Patrick is commonly ranked among the best religious plays of the Spanish theatre in the seventeenth century.

It is, indeed, on many accounts, less offensive than the more famous drama, "Devotion to the Cross," printed in 1635, which is founded on the adventures of a man who, though his life is a tissue of gross and atrocious crimes, is yet made an object of the especial favor of God, because he shows a uniform external \* reverence for whatever has the form of a \* 369 cross; and who, dying in a ruffian brawl, as a robber, is yet, in consequence of this devotion to the cross, miraculously restored to life, that he may confess his sins, be absolved, and then be transported directly to heaven. The whole seems to be absolutely an invention of Calderon, and, from the fervent poetical tone of some of its devotional passages, it has always been a favorite in Spain, and, what is yet more remarkable, has found ardent admirers in Protestant Christendom.<sup>49</sup>

<sup>48</sup> See chapters 4 and 6 of Montalvan's "Patricio"

<sup>49</sup> It is beautifully translated by A. W. Schlegel, — the first play in his collection of 1803, — preserving rigorously the measures and manner of the original, and following its *asonantes* as well as its rhymes. All the translations of Schlegel from the Spanish theatre are worth reading. The amplest edition of them is the one in two vols., 12mo, Leipzig, 1845, containing fragments of

the "Cabellos de Absalon" and "Las Amazonas" of Calderon, and of the "Numancia" of Cervantes. A drama of Tirso de Molina, "El Condenado por Desconfiado," goes still more profoundly into the peculiar religious faith of the age, and may well be compared with the "Devocion de la Cruz," which it preceded in time, and perhaps surpasses in poetical merit. It represents a reverend hermit, Paulo, as losing the favor of God, simply from want of trust in

“The Wonder-working Magician,” founded on the story of Saint Cyprian,—the same legend on which Milman has founded his “Martyr of Antioch,”—is, however, more attractive than either of the dramas just mentioned, and, like “El Joseph de las Mugeres,” reminds us of Goethe’s “Faust.” It opens—after one of those gorgeous descriptions of natural scenery in which Calderon loves to indulge—with an account by Cyprian, still unconverted, of his retirement, on a day devoted to the service of Jupiter, from the bustle and confusion of the city of Antioch, in order to spend the time in inquiries concerning the existence of One Supreme Deity. As he seems likely to arrive at conclusions not far from the truth, Satan, to whom such a result would be particularly unwelcome, breaks in upon his studies, and, in the dress of a fine gentleman, announces himself to be a man of learning, who has accidentally lost his way. In imitation of a fashion not rare among scholars at European universities in the poet’s time, this personage offers to hold a dispute with Cyprian on any subject whatever. Cyprian naturally

chooses the one that then troubled his thoughts;

\* 370 \* and after a long, logical discussion, according

to the discipline of the schools, obtains a clear victory,—though not without feeling enough of his adversary’s power and genius to express a sincere admiration for both. The evil spirit, however, though defeated, is not discouraged, and goes away, determined to try the power of temptation.

it; while Enrico, a robber and assassin, obtains that favor by an exercise of faith and trust at the last moment of a life which had been filled with the most revolting crimes. Satan complains, I think, very justly of this state of the case in a play of Malaspina, (*La Fuerza de la Verdad*, Jorn. I.,) where he says,

that the rebellious angels were thrust down to perdition for a single offence without any power to regain, by penitence, their lost places in heaven, while man, though he make a god of his sins, can, at last, recover the Divine favor by a sigh or a few tears.

For this purpose he brings upon the stage Lelius, son of the governor of Antioch, and Florus,—both friends of Cyprian,—who come to fight a duel, near the place of his present retirement, concerning a fair lady named Justina, against whose gentle innocence the Spirit of all Evil is particularly incensed. Cyprian interferes; the parties refer their quarrel to him; he visits Justina, who is secretly a Christian, and supposes herself to be the daughter of a Christian priest; but, unhappily, Cyprian, instead of executing his commission, falls desperately in love with her; while, in order to make out the running parody on the principal action, common in Spanish plays, the two lackeys of Cyprian are both found to be in love with Justina's maid.

Now, of course, begins the complication of a truly Spanish intrigue, for which all that precedes it is only a preparation. That same night Lelius and Florus, the two original rivals for the love of Justina, who favors neither of them, come separately before her window to offer her a serenade, and while there, Satan deceives them both into a confident belief that the lady is disgracefully attached to some other person; for he himself, in the guise of a gallant, descends from her balcony, before their eyes, by a rope-ladder, and, having reached the bottom, sinks into the ground between the two. As they did not see each other till after his disappearance, though both had seen him, each takes the other to be this favored rival, and a duel ensues on the spot. Cyprian again opportunely interferes, but, having understood nothing of the vision or the rope-ladder, is astonished to find that both renounce Justina as no longer worthy their regard. And thus ends the first act.

In the two other acts, Satan is still a busy, bustling personage. He appears in different forms; first, \* 371 as if \* just escaped from shipwreck; and afterwards, as a fashionable gallant; but uniformly for mischief. The Christians, meantime, through his influence, are persecuted. Cyprian's love grows desperate; and he sells his soul to the Spirit of Evil for the possession of Justina. The temptation of the fair Christian maiden is then carried on in all possible ways; especially in a beautiful lyrical allegory, where all things about her—the birds, the flowers, the balmy air—are made to solicit her to love with gentle and winning voices. But in every way the temptation fails. Satan's utmost power is defied and defeated by the mere spirit of innocence. Cyprian, too, yields, and becomes a Christian, and with Justina is immediately brought before the governor, already exasperated by discovering that his own son is a lover of the fair convert. Both are ordered to instant execution; the buffoon servants make many poor jests on the occasion; and the piece ends by the appearance on a dragon of Satan himself, who is compelled to confess the power of the Supreme Deity, which in the first scenes he had denied, and to proclaim, amidst thunder and earthquakes, that Cyprian and Justina are already enjoying the happiness won by their glorious martyrdom.<sup>50</sup>

Few pieces contain more that is characteristic of the old Spanish stage than this one; and fewer still show so plainly how the civil restraints laid on the theatre

<sup>50</sup> An interesting, but somewhat too metaphysical, discussion of this play, with prefatory remarks on the general merits of Calderon, by Karl Rosenkranz, appeared at Leipzig in 1829, (12mo,) entitled, "Ueber Calderon's Tragödie

vom wunderthatigen Magus" Beautiful translations of some scenes from it were first published in Shelley's Posthumous Poems, London, 8vo, 1824, pp. 362-392.

were evaded, and the Church was conciliated, while the popular audiences lost nothing of the forbidden amusement to which they had been long accustomed from the secular drama.<sup>51</sup> Of such plays Calderon wrote fifteen, if we include \* in the number \* 372 his "Aurora in Copacobana," which is on the conquest and conversion of the Indians in Peru;<sup>52</sup> and his "Origin, Loss, and Recovery of the Virgin of the

<sup>51</sup> How completely a light, worldly tone was taken in these plays may be seen in the following words of the Madonna, when she personally gives St. Ildefonso a rich vestment, — the *chasuble*, — in which he is to say mass —

Receive this robe, that, at my holy feast,  
Thou mayst be seen as such a gallant should be  
My taste must be consulted in thy dress,  
Like that of any other famous lady

Comedias, 1760, Tom VI p 113

The lightness of tone in this passage is the more remarkable, because the miracle alluded to in it is the crowning glory of the great cathedral of Toledo, on which volumes have been written, and on which Murillo has painted one of his greatest and most solemn pictures, while a little earlier, Fray Juan Sanchez Cotan received, as he claimed, the honor of a sitting from the Madonna herself, when he was engaged in representing the same miraculous scene Stirling's Artists, 1848, Vol. I. p. 439, Vol. II. p 915

Figueroa (Pasagero, 1617, ff 104-106) says, with much truth, in the midst of his severe remarks on the drama of his time, that the *comedias de santos* were so constructed, that the first act contained the youth of the saint, with his follies and love-adventures, the second, his conversion and subsequent life, and the third his miracles and death, but that they often had loose and immoral stories to render them attractive They were, however, of all varieties; and it is curious, in such a collection of dramas as the one in forty-eight volumes, extending over the period from 1652 to 1704, to mark in how many ways the theatre endeavored to conciliate the Church; some of the plays being filled entirely with saints, demons, angels, and allegorical personages, and deserving the character

given to the "Fenix de España," (Tom. XLIII, 1678,) of being sermons in the shape of plays, while others are mere intriguing comedies, with an angel or a saint put in to consecrate their immoralities, like "La Defensora de la Reyna de Ungria," by Fernando de Zarate, in Tom XXIX, 1668.

In other countries of Christendom besides those in which the Church of Rome bears sway, this sort of irreverence in relation to things divine has more or less shown itself among persons accounting themselves religious. The Puritans of England in the days of Cromwell, from their belief in the constant interference of Providence about their affairs, sometimes addressed supplications to God in a spirit not more truly devout than that shown by the Spaniards in their *autos* and their *comedias de santos*. Both felt themselves to be peculiarly regarded of Heaven, and entitled to make the most peremptory claims on the Divine favor and the most free allusions to what they deemed holy. But no people ever felt themselves to be so absolutely soldiers of the cross as the Spaniards did, from the time of their Moorish wars; no people ever trusted so constantly to the recurrence of miracles in the affairs of their daily life, and therefore no people ever talked of divine things as of matters in their nature so familiar and commonplace. Traces of this state of feeling and character are to be found in Spanish literature on all sides. See Calderon's *auto* "No ay instante sin milagro."

<sup>52</sup> The remarks of Malsburg on this play are well worth reading. They are in the Preface to his translations from Calderon, Leipzig, 1821, Vol IV. He cites passages on the subject of the play from the Inca Garcilasso to illustrate it

Reliquary," — a strange collection of legends, extending over above four centuries, full of the spirit of the old ballads, and relating to an image of the Madonna still devoutly worshipped in the great cathedral at Toledo.

**CALDERON, CONTINUED.—HIS SECULAR PLAYS — DIFFICULTY OF CLASSIFYING THEM — THEIR PRINCIPAL INTEREST — NATURE OF THEIR PLOTS — LOVE SURVIVES LIFE — PHYSICIAN OF HIS OWN HONOR.—PAINTER OF HIS OWN DISHONOR — NO MONSTER LIKE JEALOUSY.—FIRM-HEARTED PRINCE**

PASSING from the religious plays of Calderon to the secular, we at once encounter an embarrassment which we have already felt in other cases,— that of dividing them all into distinct and appropriate classes. It is even difficult to determine, in every instance, whether the piece we are considering belongs to one of the religious subdivisions of his dramas or not; since the “Wonder-working Magician,” for instance, is hardly less an intriguing play than “First of all my Lady”; and “Aurora in Copacobana” is as full of spiritual personages and miracles, as if it were not, in the main, a love-story. But, even after setting this difficulty aside, as we have done, by examining separately all the dramas of Calderon that can, in any way, be accounted religious, it is not possible to make a definite classification of the remainder.

Some of them, such as “Nothing like Silence,” are absolutely intriguing comedies, and belong strictly to the school of the *capa y espada*; others, like “A Friend Loving and Loyal,” are purely heroic, both in their structure and their tone; and a few others, such as “Love survives Life,” and “The Physician of his own Honor,” belong to the most terrible inspirations of genuine tragedy. Twice, in a different direction, we

have operas, which are yet nothing but plays in  
 \* 374 the national taste, with music added;<sup>1</sup> \* and  
 once we have a burlesque drama,—“Cephalus and Procris,”—in which, using the language  
 of the populace, Calderon parodies an earlier and suc-  
 cessful performance of his own.<sup>2</sup> But, in the great  
 majority of cases, the boundaries of no class are re-  
 spected; and in many of them even more than two  
 forms of the drama melt imperceptibly into each  
 other. Especially in those pieces whose subjects are  
 taken from known history, sacred or profane, or from  
 the recognized fictions of mythology or romance, there  
 is frequently a confusion that seems as though it were  
 intended to set all classification at defiance.<sup>3</sup>

Still, in this confusion there was a principle of order,  
 and perhaps even a dramatic theory. For—if we ex-  
 cept “Luis Perez the Galician,” which is a series of  
 sketches to bring out the character of a notorious rob-  
 ber, and a few show pieces, presented on particular  
 occasions to the court with great magnificence—all  
 Calderon’s full-length dramas depend for their success

<sup>1</sup> “La Púrpura de la Rosa,” and “Las Fortunas de Andrómeda y Perseo,” are both of them plays in the national taste, and yet were sung throughout. The last is taken from Ovid’s *Metamorphoses*, Lib IV and V, and was produced before the court with a magni-  
 cent theatrical apparatus. The first, which was written in honor of the mar-  
 riage of Louis XIV with the Infanta  
 Maria Teresa, 1660, was also taken from  
 Ovid, (*Met.*, Lib X), and in the *los* that precedes it we are told expressly,  
 “The play is to be *wholly* in music,  
 and is intended to *introduce* this style  
 among us, that other nations may see  
 they have competitors for those distinc-  
 tions of which they boast.” Operas in  
 Spain, however, never had any perma-  
 nent success, though they had in Por-  
 tugal. But music was often introduced  
 into Spanish dramas, especially Cal-  
 deron’s.

<sup>2</sup> “Zelos aun del Ayre matan,” which Calderon parodied, is on the same subject with his “Cephalus and Procris,” to which he added, not very appropriately, the story of Erostratus and the burning of the temple of Diana

<sup>3</sup> For instance, the “Armas de la Hermosura,” on the story of Coriolanus, and the “Mayor Encanto Amor,” on the story of Ulysses

Four times, it should be observed, Calderon varied in his *Comedias* from the full-length measure of three *Jorna-  
 das*, viz in the “Púrpuria de la Rosa,” where he made the first attempt in  
 Opera, and the “Golfo de la Sirenas,” which is a sort of Piscatory Eclogue,  
 each of them having only one *Jornada* ; and in the “Laurel de Apolo,” and the  
 “Jaruín de Falerna,” which have only  
 two.

on the interest excited by an involved plot, constructed out of surprising incidents.<sup>4</sup> He avows this himself, when he declares one of them to be —

The most surprising tale

\* 375

This is a play of Pedro Calderon,  
Upon whose scene you never fail to find  
A hidden lover or a lady fair  
Most cunningly disguised <sup>6</sup>

But to this principle of making a story which shall sustain an eager interest throughout Calderon has sacrificed almost as much as Lope de Vega did. The facts of history and geography are not felt for a moment as limits or obstacles. Coriolanus is a general who has served under Romulus ; and Veturia, his wife, is one of the ravished Sabines.<sup>7</sup> The Danube, which must have been almost as well known to a Madrid audience from the time of Charles the Fifth as the Tagus, is placed between Russia and Sweden.<sup>8</sup> Jerusalem is on the sea-coast.<sup>9</sup> Herodotus is made to describe America.<sup>10</sup>

How absurd all this was Calderon knew as well as anybody. Once, indeed, he makes a jest of it all ; for one of his ancient Roman clowns, who is about to tell a story, begins, —

A friar, — but that's not right, — there are no friars  
As yet in Rome.<sup>11</sup>

<sup>4</sup> Calderon was famous for what are called *coups de théâtre*, so famous, that *lances* de Calderon became a sort of proverb.

Nor is the preservation of national or individual character, except perhaps the Moorish, a matter of any more moment in his eyes. Ulysses and Circe sit down, as if in a saloon at Madrid, and, gathering an academy of cavaliers and ladies about them, discuss questions of metaphysical gallantry. Saint Eugenia does the same thing at Alexandria in the third century. And Judas Maccabæus, Herod the Tetrarch of Judæa, Jupangui the Inca of Peru, and Zenobia, are all, in their general air, as much Spaniards of \* 376 the time of Philip the Fourth, as if \* they had never lived anywhere except at his court.<sup>12</sup> But we rarely miss the interest and charm of a dramatic story, sustained by a rich and flowing versification, and by long narrative passages, in which the most ingenious turns of phraseology are employed in order to provoke curiosity and enchain attention.

No doubt, this is not the dramatic interest to which we are most accustomed, and which we most value. But still it is a dramatic interest, and dramatic effects are produced by it. We are not to judge Calderon by the example of Shakespeare, any more than we are to judge Shakespeare by the example of Sophocles. The "Arabian Nights" are not the less brilliant because the admirable practical fictions of Miss Edgeworth are so different. The gallant audiences of Madrid still give the full measure of an intelligent admiration to the dramas of Calderon, as their fathers did ; and even the poor Alguacil, who sat as a guard of ceremony on the stage while the "Niña de Gomez Arias" was acting, was so deluded by the cunning of the scene, that, when a noble Spanish lady was dragged forward

<sup>12</sup> *El Mayor Encanto Amor*, Jorn. II.; *El Joseph de las Mugeres*, Jorn III., etc.

to be sold to the Moors, he sprang, sword in hand, among the performers to prevent it.<sup>13</sup> It is in vain to say that dramas which produce such effects are not dramatic. The testimony of two centuries and of a whole nation proves the contrary.

Admitting, then, that the plays of Calderon are really dramas, and that their basis is to be sought in the structure of their plots, we can examine them in the spirit, at least, in which they were originally written. And if, while thus inquiring into their character and merits, we fix our attention on the different degrees in which love, jealousy, and a lofty and sensitive honor and loyalty enter into their composition and give life and movement to their respective actions, we shall hardly fail to form a right estimate of what Calderon did for the Spanish secular theatre in its highest departments.

\* Under the first head,—that of the passion \* 377 of love,—one of the most prominent of Calderon's plays occurs early in the collection of his works, and is entitled “Love survives Life.” It is founded on events that happened in the rebellion of the Moors of Granada which broke out in 1568, and though some passages in it bear traces of the history of Mendoza,<sup>14</sup> yet it is mainly taken from the half-fanciful, half-serious narrative of Hita, where its chief details are recorded as unquestionable facts.<sup>15</sup> The

<sup>14</sup> Compare the eloquent speeches of El Zaguer, in Mendoza, ed. 1776, Lib I. p. 29, and Malec, in Calderon, Jorn. I; or the description of the Alpujarras, in the same *jornada*, with that of Mendoza, p. 43, etc.

<sup>15</sup> The story of Tuzani is found in Chapters XXII, XXIII, and XXIV of the second volume of Hita's “Guerras de Granada,” and is the best part of it. Hita says he had the account from Tuzani himself, long afterwards, at Madrid, and it is not unlikely that a great part of it is true. Calderon, though sometimes using its very words, makes considerable alterations in it, to bring it within the forms of the drama;

action occupies about five years, beginning three years before the absolute outbreak of the insurgents, and ending with their final overthrow.

The first act passes in the city of Granada, and explains the intention of the conspirators to throw off the Spanish yoke, which had become intolerable. Tuzani, the hero, is quickly brought to the foreground of the piece by his attachment to Clara Malec, whose aged father, dishonored by a blow from a Spaniard, causes the rebellion to break out somewhat prematurely. Tuzani at once seeks the haughty offender. A duel follows, and is described with great spirit; but it is interrupted,<sup>16</sup> and the parties separate to renew their quarrel on a bloodier theatre.

The second act opens three years afterwards, in the mountains south of Granada, where the insurgents are \* strongly posted, and where they are attacked by Don John of Austria, represented as coming fresh from the great victory at Lepanto, which yet happened, as Calderon and his audience well knew, a year after this rebellion was quelled. The marriage of Tuzani and Clara is hardly celebrated, when he is hurried away from her by one of the chances of war; the fortress where the ceremonies had taken place falling suddenly into the hands of the

Well said

The spirited opening of many of Calderon's plays is noticed, as it may be observed here, in a well-considered Latin *Essay on his poetical merits*, enti-

tled, "De Poeseos Dramaticæ genere Hispanico, præsertim de Petro Calderone de la Barca" (Hafniæ, 1817, 12mo, pp 158). Its author, Joannes Ludovicus Heiberg, who was then only twenty-six years old, has since been a distinguished Danish poet and dramatist, as his father had been before him. He regards the two great characteristics of Calderon to have been his nationality and his romantic spirit, and, under the impulse of these attributes, he adds, as his final conclusion "Drama Calderonicum est Drama Hispanicum gentile ad summam perfectionem perductum." p. 145.

Spaniards. Clara, who had remained in it, is murdered in the *mêlée* by a Spanish soldier for the sake of her rich bridal jewels ; and though Tuzani arrives in season to witness her death, he is too late to intercept or recognize the murderer.

From this moment darkness settles on the scene. Tuzani's character changes, or seems to change, in an instant, and his whole Moorish nature is stirred to its deepest foundations. The surface, it is true, remains, for a time, as calm as ever. He disguises himself carefully in Castilian armor, and glides into the enemy's camp in quest of vengeance, with that fearfully cool resolution which marks, indeed, the predominance of one great passion, but shows that all the others are roused to contribute to its concentrated energy. The ornaments of Clara enable her lover to trace out the murderer. But he makes himself perfectly sure of his proper victim by coolly listening to a minute description of Clara's beauty and of the circumstances attending her death ; and when the Spaniard ends by saying, "I pierced her heart," Tuzani springs upon him like a tiger, crying out, "And was the blow like this?" — and strikes him dead at his feet. The Moor is surrounded, and is recognized by the Spaniards as the fiercest of their enemies ; but, even from the very presence of Don John of Austria, he cuts his way through all opposition, and escapes to the mountains. Hita says he afterwards knew him personally.

The power of this painful tragedy consists in the living impression it gives us of a pure and elevated love, contrasted with the wild elements of the age in which it is placed ; — the whole being idealized by passing through Calderon's excited imagination, but still, in the main, \*taken from history \* 379

and resting on known facts. Regarded in this light, it is a solemn exhibition of violence, disaster, and hopeless rebellion, through whose darkening scenes we are led by that burning love which has marked the Arab wherever he has been found, and by that proud sense of honor which did not forsake him as he slowly retired, disheartened and defeated, from the rich empire he had so long enjoyed in Western Europe. We are even hurried by the course of the drama into the presence of whatever is most odious in war, and should be revolted, as we are made to witness, with our own eyes, its guiltiest horrors; but in the midst of all, the form of Clara rises, a beautiful vision of womanly love, before whose gentleness the tumults of the conflict seem, at least, to be hushed; while, from first to last, in the characters of Don John of Austria, Lope de Figueroa,<sup>17</sup> and Garcés, on one side, and the venerable Malec and the fiery Tuzani, on the other, we are dazzled by a show of the times that Calderon brings

<sup>17</sup> This character of Lope de Figueroa may serve as a specimen of the way in which Calderon gave life and interest to many of his dramas. Lope is an historical personage, and figures largely in the second volume of Hita's "Guerras," as well as elsewhere. He was the commander under whom Cervantes served in Italy, and probably in Portugal, when he was in the *Tercio de Flándes*, — the Flanders regiment, — one of the best bodies of troops in the armies of Philip II. Lope de Figueroa appears again, and still more prominently, in another good play of Calderon, "El Alcalde de Zalamea," published as early as 1653, but the last in the common collection. Its hero is a peasant, finely sketched, partly from Lope de Vega's Mendo, in the "Cuervo en su Casa"; and it is said at the end that it is a true story, whose scene is laid in 1581, at the very time Philip II. was advancing toward Lisbon, and when Cervantes was probably with this regiment at Zalamea.

It should be added, that Calderon, in this play, is much indebted to Lope's "Alcalde de Zalamea," of which a copy is to be found at Holland House, but which I have not met with elsewhere. Nor is this a solitary instance of such indebtedness. On the contrary, like most of his contemporaries in the same position, he borrowed freely from his predecessors. Thus, his "Cabellos de Absalon" is much taken from Tirso's "Venganza de Tamar"; his "Médico de su Honra" is indebted for its story to a play of Lope with the same name, very little known, his "Niña de Gomez Arias" is partly from a play with the same name by Luis Velez de Guevara, and so of others. How far such free borrowing was, under the circumstances of the case, and the opinion of the times, justifiable, we can hardly tell. Stealing it could not have been, for it was too openly done and the audiences of the court and city understood it all. Schack, *Nachtrage*, 1854, pp. 82-87

before us, and of the passions which deeply marked the two most romantic nations that were ever brought into a conflict so direct.

The play of "Love survives Life," so far as its plot is concerned, is founded on the passionate love of Tuzani \* and Clara, without any intermixture \* 380 of the workings of jealousy, or any questions arising, in the course of that love, from an over-excited feeling of honor. This is rare in Calderon, whose dramas are almost always complicated in their intrigue by the addition of one or both of these principles; giving the story sometimes a tragic and sometimes a happy conclusion. It should be noted, however, to his honor, that throughout the whole play of "Love survives Life" he renders the Moorish character a generous justice, which was denied to it by Cervantes and Lope de Vega.

One of the best-known and most admired of these mixed dramas is "The Physician of his own Honor," printed in 1637,—a play whose scene is laid in the time of Peter the Cruel, but one which seems to have no foundation in known facts, and in which the monarch has an elevation given to his character not warranted by history.<sup>18</sup> His brother, Henry of Trastamara, is represented as having been in love with a lady who, notwithstanding his lofty pretensions, is given in marriage to Don Gutierre de Solís, a Spanish nobleman of high rank and sensitive honor. She is sincerely attached to her husband, and true to him. But the prince is accidentally thrown into her presence.

<sup>18</sup> About this time, there was a strong disposition shown by the overweening sensibility of Spanish loyalty to relieve the memory of Peter the Cruel from the heavy imputations left resting on it by Pedro de Ayala, of which I have taken notice, (Period I. Chap. IX., note 18,)

and of which traces may be found in Moreto, and the other dramatists of the reign of Philip IV. Peter the Cruel appears also in the "Niña de Plata" of Lope de Vega, but with less strongly marked attributes.

His passion is revived ; he visits her again, contrary to her will ; he leaves his dagger, by chance, in her apartment ; and, the suspicions of the husband being roused, she is anxious to avert any further danger, and begins, for this purpose, a letter to her lover, which her husband seizes before it is finished. His decision is instantly taken. Nothing can be more deep and tender than his love ; but his honor is unable to endure the idea, that his wife, even before her marriage, had been interested in another, and that after it she had seen him privately. When, therefore, she awakes from the swoon into which she had fallen at the moment he tore from her \* the equivocal beginning of her letter, she finds at her side a note containing only these fearful words :—

My love adores thee, but my honor hates ;  
And while the one must strike, the other warns  
Two hours hast thou of life. Thy soul is Christ's ;  
O, save it, for thy life thou canst not save !<sup>19</sup>

At the end of these two fatal hours, Gutierre returns with a surgeon, whom he brings to the door of the room in which he had left his wife.

*Don Gutierre.* Look in upon this room. What seest thou there ?

*Surgeon.* A death-like image, pale and still, I see,  
That rests upon a couch On either side  
A taper lit, while right before her stands  
The holy crucifix Who it may be  
I cannot say , the face with gauze-like silk  
Is covered quite <sup>20</sup>

Gutierre, with the most violent threats, requires him to enter the room and bleed to death the person who has

thus laid herself out for interment. He goes in and accomplishes the will of her husband, without the least resistance on the part of his victim. But when he is conducted away, blindfold as he came, he impresses his bloody hand upon the door of the house, that he may recognize it again, and immediately reveals to the king the horrors of the scene he has just passed through.

The king rushes to the house of Gutierre, who ascribes the death of his wife to accident, not from the least desire to conceal the part he himself had in it, but from an unwillingness to explain his conduct, by confessing reasons for it which involved his honor. The king makes no direct reply, but requires him instantly to marry Leonore, a lady then present, whom Gutierre was bound in honor to have married long before, and who had already made known to \* the king her complaints of his falsehood. Gu- \* 382 tierre hesitates, and asks what he should do, if the prince should visit his wife secretly and she should venture afterwards to write to him; intending by these intimations to inform the king what were the real causes of the bloody sacrifice before him, and that he would not willingly expose himself to their recurrence. But the king is peremptory, and the drama ends with the following extraordinary scene.

<i>King</i>	There is a remedy for every wrong.	
<i>Don Gutierre</i>	A remedy for such a wrong as this?	
<i>King.</i>	Yes, Gutierre.

<i>Don Gutierre</i>	What mean your royal words, my lord?	
<i>King.</i>	No more but this; cleanse straight your doors, — A bloody hand is on them.	
<i>Don Gutierre.</i>	My lord, when men In any business and its duties deal,	

They place their arms escutcheoned on their doors.

*I* deal, my lord, *in honor*, and so place

A bloody hand upon my door to mark

My honor is my blood made good.

*King.*

Then give thy hand to Leonore.

I know her virtue hath deserved it long

*Don Gutierrez* I give it, sire But, mark me, Leonore,  
It comes all bathed in blood

*Leonore.*

I heed it not;

And neither fear nor wonder at the sight

*Don Gutierrez.* And mark me, too, that, if already once  
Unto mine honor I have proved a leech,  
I do not mean to lose my skill.

*Leonore.*

Nay, rather,

If *my* life prove tainted, use that same skill  
To heal it.

*Don Gutierrez.* I give my hand, but give it  
On these terms alone <sup>21</sup>

\* 383 \* Undoubtedly such a scene could be acted only on the Spanish stage; but undoubtedly, too, notwithstanding its violation of every principle of Christian morality, it is entirely in the national temper, and has been received with applause down to our own times.<sup>22</sup>

“The Painter of his own Dishonor” is another of the dramas founded on love, jealousy, and the point of honor, in which a husband sacrifices his faithless wife and her lover, and yet receives the thanks of each of their fathers, who, in the spirit of Spanish chivalry, not only approve the sacrifice of their own children, but offer their persons to the injured husband to defend

him against any dangers to which he may be exposed in consequence of the murders he has committed.<sup>23</sup> “For a Secret Wrong, Secret Revenge,” is yet a third piece, belonging to the same class, and ending tragically like the two others.<sup>24</sup>

But as a specimen of the effects of mere jealousy, and of the power with which Calderon could bring on the stage its terrible workings, the drama he has called “No Monster like Jealousy” is to be preferred to anything else he has left us.<sup>25</sup> It is founded on the well-known story, in Josephus, of the cruel jealousy of Herod, Tetrarch of Judæa, who twice gave orders to \* have his wife, Mariamne, destroyed, in case \* 384 he himself should not escape alive from the perils to which he was exposed in his successive contests with Antony and Octavius; — all out of dread lest, after his death, she should be possessed by another.<sup>26</sup>

In the early scenes of Calderon’s drama, we find Herod, with this passionately cherished wife, alarmed

<sup>23</sup> “El Pintor de su Deshonra,” *Comedias*, Tom XI. A translation of this play into German, with one of the “Dicha y Desdicha del Nombre,” was published in Berlin in 1850, in a small volume, as a supplement to the translations of Gries from Caldeion. They are both made with lightness and taste, and their author — a lady deceased — published in 1825 translations of the “Niña de Gomez Arias,” and of the “Galan Fantasma.”

<sup>24</sup> “A Secreto Agravio, Secreta Venganza,” *Comedias*, Tom VI, was printed in 1637. Caldeion, at the end, vouches for the truth of the shocking story, which he represents as founded on facts that occurred at Lisbon just before the embarkation of Don Sebastian for Africa, in 1578. Some objection was made to acting this play at Cadiz in 1818, on account of its immorality, but it was defended in a short tract entitled “Discurso en Razon de la Tragedia, A Secreto Agravio,” ec., pp. 12,

4to, — written, I believe, by a person named Cavaleii. One reason alleged by him in favor of acting it was, that two distinguished German gentlemen were then in the city, who were very anxious to witness the performance of a play of Calderon, and had not been able to do so, though they had been some time travelling in Spain, and had passed a month in Madrid, — so rarely were any plays of Calderon then represented.

<sup>25</sup> “El Mayor Monstruo los Zelos,” *Comedias*, Tom V

<sup>26</sup> Josephus de Bello Judaico, Lib I. c. 17—22, and Antiq. Judaicæ, Lib XV c 2, etc. Voltaire has taken the same story for the subject of his “Mariamne,” first acted in 1724. There is a pleasant criticism on the play of Calderon in a pamphlet published at Madrid, by Don A Duran, without his name, in 1828, 18mo, entitled, “Sobre el Influo que ha tenido la Crítica Moderna en la Decadencia del Teatro Antiguo Español,” pp. 106—112.

by a prediction that he should destroy, with his own dagger, what he most loved in the world, and that Mariamne should be sacrificed to the most formidable of monsters. At the same time we are informed, that the tetrarch, in the excess of his passion for his fair and lovely wife, aspires to nothing less than the mastery of the world,— then in dispute between Antony and Octavius Cæsar,— and that he covets this empire only to be able to lay it at her feet. To obtain his end, he partly joins his fortunes to those of Antony, and fails. Octavius, discovering his purpose, summons him to Egypt to render an account of his government. But among the plunder which, after the defeat of Antony, fell into the hands of his rival, is a portrait of Mariamne, with which the Roman becomes so enamored, though falsely advised that the original is dead, that, when Herod arrives in Egypt, he finds the picture of his wife multiplied on all sides, and Octavius full of love and despair.

Herod's jealousy is now equal to his unmeasured affection; and, finding that Octavius is about to move towards Jerusalem, he gives himself up to its terrible power. In his blind fear and grief, he sends an old and trusty friend, with written orders to destroy Mariamne in case of his own death, but adds passionately,—

Let her not know the mandate comes from *me*  
That bids her die Let her not — while she cries  
To Heaven for vengeance — name *me* as she falls

\* 385 \* His faithful follower would remonstrate, but Herod interrupts him: —

Be silent You are right; —  
But still I cannot listen to your words; —

and then goes off in despair, exclaiming, —

O mighty spheres above! O sun! O moon  
And stars! O clouds, with hail and sharp frost charged!

Is there no fiery thunderbolt in store  
 For such a wretch as I ? O mighty Jove !  
 For what canst thou thy vengeance still reserve,  
 If now it strike not ?<sup>27</sup>

But Mariamne obtains secretly a knowledge of his purpose ; and, when he arrives in the neighborhood of Jerusalem, gracefully and successfully begs his life of Octavius, who is well pleased to do a favor to the fair original of the portrait he had ignorantly loved, and is magnanimous enough not to destroy a rival, who had yet by treason forfeited all right to his forbearance.

As soon, however, as Mariamne has secured the promise of her husband's safety, she retires with him to the most private part of her palace, and there, in her grieved and outraged love, upbraids him with his design upon her life ; announcing, at the same time, her resolution to shut herself up from that moment, with her women, in widowed solitude and perpetual mourning. But the same night Octavius gains access to her retirement, in order to protect her from the violence of her husband, which he, too, had discovered. She refuses, however, to admit to *him* that her husband can have any design against her life ; and defends both her lord and herself with heroic love. She then escapes, pursued by Octavius, and at the same instant her husband enters. He follows them, and a conflict ensues instantly. The lights are extinguished, and in the confusion Mariamne falls under a blow \* from \* 386 her husband's hand, intended for his rival ; thus fulfilling the prophecy at the opening of the play, that

<sup>27</sup> Calla,  
 Que sé, que tienes razon,  
 Pero no puedo escucharla.  
 . . .  
 Esferas altas,  
 Cielo, sol, luna y estrellas,

Nubes, granizos, y escarchas,

she should perish by his dagger and by the most formidable of monsters, which is now interpreted to be Jealousy.

The result, though foreseen, is artfully brought about at last, and produces a great shock on the spectator, and even on the reader. Indeed, it does not seem as if this fierce and relentless passion could be carried, on the stage, to a more terrible extremity. Othello's jealousy — with which it is most readily compared — is of a lower kind, and appeals to grosser fears. But that of Herod is admitted, from the beginning, to be without any foundation, except the dread that his wife, after his death, should be possessed by a rival, whom, before his death, she could never have seen; — a transcendental jealousy to which he is yet willing to sacrifice her innocent life.

Still, different as are the two dramas, there are several points of accidental coincidence between them. Thus, we have, in the Spanish play, a night scene, in which her women undress Mariamne, and, while her thoughts are full of forebodings of her fate, sing to her those lines of Escriva which are among the choice snatches of old poetry found in the earliest of the General Cancioneros: —

Come, Death, but gently come and still; —  
All sound of thine approach restrain,  
Lest joy of thee my heart should fill,  
And turn it back to life again,<sup>28</sup> —

beautiful words, which remind us of the scene immediately preceding the death of Desdemona, when she

is undressing and talks with Emilia, singing, at the same time, the old song of “Willow, Willow.”

Again, we are reminded of the defence of Othello by Desdemona down to the instant of her death, in the answer \* of Mariamne to Octavius, when he \* 387 urges her to escape with him from the violence of her husband : —

My lips were dumb, when I beheld thy form ;  
 And now I hear thy words, my breath returns  
 Only to tell thee, 't is some traitor foul  
 And peijured that has dared to fill thy mind  
 With this abhorred conceit. For, Sire, my husband  
 Is my husband ; and if he slay me,  
 I am guiltless, which, in the flight you urge,  
 I could not be I dwell in safety here,  
 And you are ill informed about my griefs ;  
 Or, if you are not, and the dagger's point  
 Should seek my life, I die not through my fault,  
 But through my star's malignant potency,  
 Preferring in my heart a guiltless death  
 Before a life held up to vulgar scorn.  
 If, therefore, you vouchsafe me any grace,  
 Let me presume the greatest grace would be  
 That you should straightway leave me.<sup>29</sup>

Other passages might be adduced ; but, though striking, they do not enter into the essential interest of the drama. This consists in the exhibition of the heroic character of Herod, broken down by a cruel jealousy, over which the beautiful innocence of his wife triumphs only at the moment of her death ; while above them both the fatal dagger, like the unrelenting destiny of the ancient Greek tragedy, hangs suspended, seen only

by the spectators, who witness the unavailing struggles of its victims to escape from a fate in which, with every effort, they become more and more involved.<sup>30</sup>

Other dramas of Calderon rely for their success on a high sense of loyalty, with little or no admix-

\* 388 ture of love \* or jealousy. The most prominent of these is "The Firm-hearted Prince."<sup>31</sup> Its plot is founded on the expedition against the Moors in Africa by the Portuguese Infante Don Ferdinand, in 1437, which ended with the total defeat of the invaders before Tangier, and the captivity of the prince himself, who died in a miserable bondage in 1443; — his very bones resting for many years among the misbelievers, till they were at last brought home to Lisbon and buried with reverence, as those of a saint and martyr. This story Calderon found in the old and beautiful Portuguese chronicles of Joam Alvares and Ruy de Pina; but he makes the sufferings of the prince voluntary, thus adding to Ferdinand's character the self-devotion of Regulus, and so fitting it to be the subject of a deep tragedy, founded on the honor of a Christian patriot.<sup>32</sup>

<sup>30</sup> Mariana announces it at the outset —

Par ley de nuestros *hados*  
Vivimos a desdichas destinados

<sup>31</sup> "El Príncipe Constante," Comedias, Tom. III. It is translated into German by A W Schlegel, and has been much admired as an acting play in the theatres of Berlin, Vienna, Weimar, etc.

<sup>32</sup> Colecção de Livros Ineditos de Hist. Port., Lisboa, folio, Tom I, 1790, pp. 290-294, an excellent work, published by the Portuguese Academy, and edited by the learned Correa da Serra, formerly Minister of Portugal to the United States. The story of Don Ferdinand is also told in Mariana, Historia (Tom. II, p. 345). But the principal resource of Calderon was, no doubt, a life of the Infante, by his faithful friend and fol-

lower, Joam Alvares, first printed in 1527, of which an abstract, with long passages from the original, may be found in the "Leben des standhaften Prinzen," Berlin, 1827, 8vo, — a curious and interesting book. To these may be added, for the illustration of the Príncipe Constante, a tract by J Schulze, entitled "Ueber den standhaften Prinzen," printed at Weimar, 1811, 12mo, at a time when Schlegel's translation of that drama, brought out under the auspices of Goethe, was in the midst of its success on the Weimar stage, the part of Don Ferdinand being acted with great power by Wolf. Schulze is quite extravagant in his estimate of the poetical worth of the Príncipe Constante, placing it by the side of the "Divina Commedia"; but he discusses skilfully its merits as an acting drama, and ex-

The first scene is one of lyrical beauty, in the gardens of the king of Fez, whose daughter is introduced as enamored of Muley Hassan, her father's principal general. Immediately afterwards, Hassan enters and announces the approach of a Christian armament, commanded by the two Portuguese Infantes. He is despatched to prevent their landing, but fails, and is himself taken prisoner by Don Ferdinand in person. A long dialogue follows between the captive and his conqueror, entirely formed by an unfortunate amplification of a beautiful ballad of Góngora, \* which is made to explain the attachment of \* 389 the Moorish general to the king's daughter, and the probability — if he continues in captivity — that she will be compelled to marry the Prince of Morocco. The Portuguese Infante, with chivalrous generosity, gives up his prisoner without ransom, but has hardly done so, before he is attacked by a large army under the Prince of Morocco, and made prisoner himself.

From this moment begins that trial of Don Ferdinand's patience and fortitude which gives its title to the drama. At first, indeed, the king treats him generously, thinking to exchange him for Ceuta, an important fortress recently won by the Portuguese, and their earliest foothold in Africa. But this constitutes the great obstacle. The king of Portugal, who had died of grief on receiving the news of his brother's captivity, had, it is true, left an injunction in his will that Ceuta should be surrendered and the prince ransomed. But when Henry, one of his brothers, appears on the stage, and announces that he has come to fulfil this solemn command, Ferdinand suddenly interrupts

plains, in part, its historical elements. The lyrical portions of the Príncipe Constante were set to music by the German genius, Mendelssohn Bartholdy.

him in the offer, and reveals at once the whole of his character : —

Cease, Henry, cease ! — no farther shalt thou go , —  
 For words like these should not alone be deemed  
 Unworthy of a prince of Portugal, —  
 A Master of the Order of the Cross, —  
 But of the meanest serf that sits beneath  
 The throne, or the barbarian hind whose eyes  
 Have never seen the light of Christian faith  
 No doubt, my brother — who is now with God —  
 May in his will have placed the words you bring,  
 But never with a thought they should be read  
 And carried through to absolute fulfilment ,  
 But only to set forth his strong desire,  
 That, by all means which peace or war can urge,  
 My life should be enfranchised. For when he says,  
 " Surrender Ceuta," he but means to say,  
 " Work miracles to bring my brother home."  
 But that a Catholic and faithful king  
 Should yield to Moorish and to heathen hands  
 A city his own blood had dearly bought,  
 When, with no weapon save a shield and sword,  
 He raised his country's standard on its walls, —  
 It cannot be ! — It cannot be !<sup>23</sup>

\* 390 \* On this resolute decision, for which the old chronicle gives no authority, the remainder of the drama rests ; its deep enthusiasm being set forth in a single word of the Infante, in reply to the renewed question of the Moorish king, " And why not give up

When we read the Príncipe Constante, we seldom remember that this Don Henry, who is one of its important personages, is the highly cultivated prince who did so much to promote discoveries in India. See *ante*, Vol I. p 186. Damian de Goes says that the Prince lived a bachelor in order to devote himself to astronomy, — " propter sola astrorum studia celebs vixit " Fides, Religio, Moresque *Æthiopum*, Lovani, 1540, 4to, f 4. It should be

Ceuta?" to which Ferdinand firmly and simply answers, —

Because it is not mine to give.  
A Christian city, — it belongs to God

In consequence of this final determination, he is reduced to the condition of a common slave ; and it is not one of the least moving incidents of the drama, that he finds the other Portuguese captives among whom he is sent to work, and who do not recognize him, promising freedom to themselves from the effort they know his noble nature will make on their behalf, when the exchange which they consider so reasonable shall have restored him to his country.

At this point, however, comes in the operation of the Moorish general's gratitude. He offers Don Ferdinand the means of escape ; but the king, detecting the connection between them, binds his general to an honorable fidelity by making him the prince's only keeper. This leads Don Ferdinand to a new sacrifice of himself. He not only advises his generous friend to preserve his loyalty, but assures him, that, even should foreign means of escape be offered him, he will not take advantage of them, if, by doing so, his friend's honor would be endangered. In the mean time, the sufferings of the unhappy prince are \* increased by \* 391 cruel treatment and unreasonable labor, till his strength is broken down. Still he does not yield. Ceuta remains in his eyes a consecrated place, over which religion prevents him from exercising the control by which his freedom might be restored. The Moorish general and the king's daughter, on the other

accompany them, was the head of the expedition against Tangier, although his brother Ferdinand was associated with him in the command

side, intercede for mercy in vain. The king is inflexible, and Don Ferdinand dies, at length, of mortification, misery, and want; but with a mind unshaken, and with an heroic constancy that sustains our interest in his fate to the last extremity. Just after his death, a Portuguese army, destined to rescue him, arrives. In a night scene of great dramatic effect, he appears at their head, clad in the habiliments of the religious and military order in which he had desired to be buried, and, with a torch in his hand, beckons them on to victory. They obey the supernatural summons, entire success follows, and the marvellous conclusion of the whole, by which his consecrated remains are saved from Moorish contamination, is in full keeping with the romantic pathos and high-wrought enthusiasm of the scenes that lead to it.

CALDERON, CONTINUED — COMEDIAS DE CAPA Y ESPADA — FIRST OF ALL MY LADY — FAIRY LADY — THE SCARF AND THE FLOWER, AND OTHERS — HIS DISREGARD OF HISTORY — ORIGIN OF THE EXTRAVAGANT IDEAS OF HONOR AND DOMESTIC RIGHTS IN THE SPANISH DRAMA — ATTACKS ON CALDERON — HIS ALLUSIONS TO PASSING EVENTS — HIS BRILLIANT STYLE — HIS LONG AUTHORITY ON THE STAGE — AND THE CHARACTER OF HIS POETICAL AND IDEALIZED DRAMA

WE must now turn to some of Calderon's plays which are more characteristic of his times, if not of his peculiar genius, — his *comedias de capa y espada*. He has left us many of this class, and not a few of them seem to have been the work of his early, but ripe manhood, when his faculties were in all their strength, as well as in all their freshness. Nearly or quite thirty can be enumerated, and still more may be added, if we take into the account those which, with varying characteristics, yet belong to this particular division rather than to any other. Among the more prominent are two, entitled "It is Worse than it was" and "It is Better than it was," which, probably, were translated by Lord Bristol in his lost plays, "Worse and Worse" and "Better and Better";<sup>1</sup> — "The Pretended Astrologer," which Dryden used in his "Mock Astrologer";<sup>2</sup> — "Beware of

<sup>1</sup> "'T is Better than it was" and "Worse and Worse" "These two comedies," says Downes, (*Roscius Anglicanus*, London, 1789, 8vo, p 36,) "were made out of Spanish by the Earl of Bristol" There can be little doubt that Calderon was the source here referred to, and that the plays used were "Mejor esta que Estaba,"

and "Peor esta que Estaba" "Elvira, or the Worse not always True," also by Lord Bristol, printed in 1677, and in the twelfth volume of Dodsley's collection, is from Calderon's "No Siempre lo Peor es Cierto" But such instances are rare in the old English drama, compared with the French

<sup>2</sup> Dryden took, as he admits, "An

\* 393 "Smooth Water";— and "It is ill \* keeping a House with Two Doors";— which all indicate by their names something of the spirit of the entire class to which they belong, and of which they are favorable examples.

Another of the same division of the drama is entitled "First of all my Lady." A young cavalier from Granada arrives at Madrid, and immediately falls in love with a lady, whose father mistakes him for another person, who, though intended for his daughter, is already enamored elsewhere. Strange confusions are ingeniously multiplied out of this mistake, and strange jealousies naturally follow. The two gentlemen are found in the houses of their respective ladies,— a mortal offence to Spanish dramatic honor,— and things are pushed to the most dangerous and confounding extremities. The principle on which so many Spanish dramas turn, that

is abundantly exemplified. More than once the lady's

It is, however, a pretty good imitation of Calderon's manner, and Pepys was not far out of the way when, speaking of the version by Colonel, afterwards Sir Samuel, Tuke, he said that it was "the best for the variety and most excellent continuance of the plot to the very end, that he ever saw" (Memoirs, 1828, Vol. III p. 11, Vol.

I p. 364) The play is reprinted in Dodsley's collection, Vol. XII

secret is protected rather than the friend of the lover, though the friend is in mortal danger at the moment ; — the circumstance which gives its name to the drama. At last, the confusion is cleared up by a simple explanation of the original mistakes of all the parties, and a double marriage brings a happy ending to the troubled scene, which frequently seemed quite incapable of it.<sup>4</sup>

“The Fairy Lady”<sup>5</sup> is another of Calderon’s dramas \* that is full of life, spirit, and ingenuity. \* 394 Its scene is laid on the day of the baptism of Prince Balthasar, heir-apparent of Philip the Fourth, which, as we know, occurred on the 4th of November, 1629 ; and the piece itself was, therefore, probably written and acted soon afterwards.<sup>6</sup> It was printed in 1635. If we may judge by the number of times Calderon complacently refers to it, we cannot doubt that it was a favorite with him ; and if we judge by its intrinsic merits, we may be sure it was a favorite with the public.<sup>7</sup>

<sup>4</sup> “Antes que todo es mi Dama”

<sup>5</sup> “La Dama Duende,” *Comedias*, Tom III. The *Duende*, often called in Castilian *Trasgo*, was a spirit of a somewhat more mischievous sort than the proper *fairy*, and is described pleasantly by Lope de Vega in the adventures of his “Peregrino,” who is molested one night by the frolics of some of the gay tribe” (Lib V.) From Torquemada (Jardín de Flores Curiosas, Discurso III.) I suppose the *Trasgo* was a sort of Robin Goodfellow.

A translation of the “Dama Duende” is the first in a collection entitled “Three Comedies, translated from the Spanish,” (London, 1807, 8vo,) which has been attributed by Watt, in his *Bibliotheca*, — erroneously, I suppose, — to the third Lord Holland. All three of the plays are too freely rendered, and have the further disadvantage of being done into prose ; but the English of the translator is eminently

pure, and often happily adapted to the Spanish idiom.

The Prince Balthasar Carlos, who died, I believe, at the age of seventeen, is chiefly known to us by the many fine portraits Velasquez painted of him. His birth was matter of great rejoicing all over the Spanish dominions, as, during the nine previous years of her married life, Isabel of Fiance had borne only daughters. I have a tract of Latin, Spanish, and Italian verses, written on the occasion by Jacobus Valerius of Milan, very characteristic of the age. My copy of it was presented by the author with an autograph Latin inscription to Alfonso Carreras, one of the Royal Spanish Council in Italy.

<sup>7</sup> I should think he refers to it eight times, perhaps more, in the course of his plays. e. g. in “Mañanas de Avril

Doña Angela, the heroine of the intrigue, a widow, young, beautiful, and rich, lives at Madrid, in the house of her two brothers ; but, from circumstances connected with her affairs, her life there is so retired, that nothing is known of it abroad. Don Manuel, a friend, arrives in the city to visit one of these brothers ; and, as he approaches the house, a lady strictly veiled stops him in the street, and conjures him, if he be a cavalier of honor, to prevent her from being further pursued by a gentleman already close behind.<sup>8</sup> This lady is Doña

Angela, and the gentleman is her brother, Don \* 395 Luis, who is pursuing her only \* because he observes that she carefully conceals herself from him. The two cavaliers not being acquainted with each other,— for Don Manuel had come to visit the other brother,— a dispute is easily excited, and a duel follows, which is interrupted by the arrival of this other brother, and an explanation of his friendship for Don Manuel.

Don Manuel is now brought home, and established in the house of the two cavaliers, with all the courtesy due to a distinguished guest. His apartments, however, are connected with those of Doña Angela by a secret door, known only to herself and her confidential

y Mayo" ; "Agradecer y no Amar", "El Joseph de las Mugeres," etc. I notice it, because he rarely alludes to his own works, and never, I think, in the way he does to this one. The *Dama Duende* is well known in the French "Répertoire" as the "Esprit Follet" of Hauteroche. There is, however, an older "Esprit Follet," taken from Calderon, to which, probably, Hauteroche resorted rather than to the Spanish original. It is by Antoine le Metel, Sieur d'Ouville, (Paris, Quinet, 1642, 4to,) and an account of it may be found in the *Parfaits' Hist du Théâtre François*, (Tom VI, 1745, p. 159,) but they are wrong in attributing the mate-

rials of D'Ouville to an old "Canevas Italien." He plainly took them from Calderon, and if there was anything on the popular Italian Theatrical of the same sort, it was, no doubt, from the same source. These Italians in Paris stole very freely

<sup>8</sup> The wearing of veils by ladies in the streets of Madrid led to so much trouble, that no less than four laws were made to forbid their use,— the first in 1586, and the last in 1639. But it was all in vain. See a curious treatise on the subject, "Velos Antiguos y Modernos en los Rostros de las Mugeres, etc., por Antonio de Leon Pinelo," Madrid, 1641, 4to, ff. 137.

maid; and finding she is thus unexpectedly brought near a person who has risked his life to serve her, she determines to put herself into mysterious communication with him.

But Doña Angela is young and thoughtless. When she enters the stranger's apartment, she is tempted to be mischievous, and leaves behind marks of her wild humor that are not to be mistaken. The servant of Don Manuel thinks it is an evil spirit, or at best a fairy, — *Duende*, — that plays such fantastic tricks; disturbing the private papers of his master, leaving notes on his table, throwing the furniture of the room into confusion, and — from an accident — once jostling its occupants in the dark. At last, the master himself is confounded; and though he once catches a glimpse of the mischievous lady, as she escapes to her own part of the house, he knows not what to make of the apparition. He says: —

She glided like a spirit, and her light  
Did all fantastic seem But still her form  
Was human; I touched and felt its substance,  
And she had mortal\* fears, and, woman-like,  
Shrunk back again with dainty modesty  
At last, like an illusion, all dissolved,  
And, like a phantasm, melted quite away  
If, then, to my conjectures I give rein,  
By heaven above, I neither know nor guess  
What I must doubt or what I may believe <sup>9</sup>

\* But the tricksy lady, who has fairly frolicked \* 396  
herself in love with the handsome young cavalier, is tempted too far by her brilliant successes, and being at last detected in the presence of her astonished

brothers, the intrigue, which is one of the most complicated and gay to be found on any theatre, ends with an explanation of her fairy humors, and her marriage with Don Manuel.

“The Scarf and the Flower,”<sup>10</sup> which, from internal evidence, is to be placed in the year 1632, is another of the happy specimens of Calderon’s manner in this class of dramas; but, unlike the last, love-jealousies constitute the chief complication of its intrigue.<sup>11</sup> The scene is laid at the court of the Duke of Florence. Two ladies give the hero of the piece, one a scarf and the other a flower; but they are both so completely veiled when they do it, that he is unable to distinguish one of them from the other. The mistakes which arise from attributing each of these marks of favor to the wrong lady constitute the first series of troubles and suspicions. These are further aggravated by the conduct of the Grand Duke, who, for his own princely convenience, requires the hero to show marked attentions to a third lady; so that the relations of the lover are thrown into the greatest possible confusion, until a sudden danger to his life brings out an involuntary expression of the true lady’s attachment, which is answered with a delight so sincere on his part as to leave no doubt of his affection. This restores the confidence of the parties, and the *dénouement* is of course happy.

There are in this, as in most of the dramas of Calderon belonging to the same class, great freshness and life, and a tone truly Castilian, courtly, and grace-

<sup>10</sup> “La Vanda y la Flor,” *Comedias*, Tom V. It is admirably translated into German, by A. W. Schlegel.

<sup>11</sup> In *Jornada I.* there is a full-length description of the *Jura de Baltasar*, — the act of swearing homage to Prince

ful. Lisida, who loves Henry, the hero, and gave him the flower, finds him wearing her rival's scarf, and, from this and other circumstances, naturally accuses him of being devoted to that \* rival;— \* 397 an accusation which he denies, and explains the delusive appearance on the ground that he approached one lady as the only way to reach the other. The dialogue in which he defends himself is extremely characteristic of the gallant style of the Spanish drama, especially in that ingenious turn and repetition of the same idea in different figures of speech, which becomes more and more condensed,— and so, as Nick Bottom says, grows to a point,— the nearer it approaches its conclusion.

*Lisida.* But how can you deny the very thing  
Which, with my very eyes, I now behold?

*Henry.* By full denial that you see such thing.

*Lisida.* Were you not, like the shadow of her house,  
Still ever in the street before it?

*Henry.* I was.

*Lisida.* At each returning dawn, were you not found  
A statue on her terrace?

*Henry.* I do confess it.

*Lisida.* Did you not write to her?

*Henry.* I can't deny  
I wrote.

*Lisida.* Served not the murky cloak of night  
To hide your stolen loves?

*Henry.* That, under cover  
Of the friendly night, I sometimes spoke to her,  
I do confess.

*Lisida.* And is not this her scarf?

*Henry.* It was hers once, I think.

*Lisida.* Then what means this?  
If seeing, talking, writing, be not making love,—  
If wearing on your neck her very scarf,  
If following her and watching, be not love,—  
Pray tell me, sir, what 't is you call it?  
And let me not in longer doubt be left  
Of what can be with so much ease explained.

*Henry.* A timely illustration will make clear  
What seems so difficult. The cunning fowler,

As the bird glances by him, watches for  
 The feathery form he aims at, not where it is,  
 But on one side ; for well he knows that he  
 Shall fail to reach his fleeting mark, unless  
 He cheat the wind to give its helpful tribute  
 To his shot The careful, hardy sailor, —  
 He who hath laid a yoke and placed a rein  
 Upon the fierce and furious sea, curbing  
 Its wild and monstrous nature, — even he

\* Steers not right onward to the port he seeks,  
 But bears away, deludes the opposing waves,  
 And wins the wished-for haven by his skill.  
 The warrior, who a fortress would besiege,  
 First sounds the alarm before a neighbor fort,  
 Deceives, with military art, the place  
 He seeks to win, and takes it unawares,  
 Force yielding up its vantage-ground to craft  
 The mine that works its central, winding way  
 Volcanic, and, built deep by artifice,  
 Like Mongibello, shows not its effect  
 In those abysses where its pregnant powers  
 Lie hid, concealing all their horrors dark  
 E'en from the fire itself, but *there* begins  
 The task which *here* in ruin ends and woe, —  
 Lightning beneath and thunderbolts above. —  
 Now, if my love, amidst the realms of air,  
 Aim, like the fowler, at its proper quarry ;  
 Or sail a mariner upon the sea,  
 Tempting a doubtful fortune as it goes ;  
 Or chieftain-like contends in arms,  
 Nor fails to conquer even baseless jealousy ;  
 Or, like a mine sunk in the bosom's depths,  
 Bursts forth above with fury uncontrolled, —  
 Can it seem strange that *I* should still conceal  
 My many loving feelings with false shows ?  
 Let, then, this scarf bear witness to the truth,  
 That I, a hidden mine, a mariner,  
 A chieftain, fowler, still in fire and water,  
 Earth and air, would hit, would reach, would conquer,  
 And would crush, my game, my port, my fortress,  
 And my foe

You deem, perchance, that, flattered  
 By such shallow compliment, my injuries  
 May be forgotten with your open folly.  
 But no, sir, no ! — you do mistake me quite.  
 I am a woman ; I am proud, — so proud,  
 That I will neither have a love that comes  
 From pique, from fear of being first cast off,  
 Nor from contempt that galls the secret heart.

He who wins *me* must love me for myself,  
And seek no other guerdon for his love  
But what that love itself will give <sup>12</sup>

\* As may be gathered, perhaps, from what \* 399 has been said concerning the few dramas we have examined, the plots of Calderon are almost always marked with great ingenuity. Extraordinary adventures and unexpected turns of fortune, disguises, duels, and mistakes of all kinds, are put in constant requisition, and keep up an eager interest in the concerns of the personages whom he brings to the foreground of the scene. Yet many of his stories are not wholly invented by him. Several are taken from the books of the Old Testament, as is that on the rebellion of Absalom,<sup>13</sup> which ends with an exhibition of the

Jorn II

<sup>12</sup> This is a drama, in many parts, of

unhappy prince hanging by his hair and dying amidst reproaches on his personal beauty. A few are from Greek and Roman history, like "The Second Scipio" and "Contests of Love and Loyalty," — the last being on the story of Alexander the Great. Still more are from Ovid's "Metamorphoses,"<sup>14</sup> like "Apollo \* 400 and Climente" and "The \* Fortunes of Andromeda." And occasionally, but rarely, he seems to have sought, with painstaking care, in obscure sources for his materials, as in "Zenobia the Great," where he has used Trebellius Pollio and Flavius Vopiscus.<sup>15</sup>

But, as we have already noticed, Calderon makes everything bend to his ideas of dramatic effect; so that what he has borrowed from history comes forth upon the stage with the brilliant attributes of a masque, almost as much as what is drawn from the rich resources of his own imagination. If the subject he has chosen falls naturally into the only forms he recognizes, he indeed takes the facts much as he finds

great brilliancy and power, but one in which Calderon owed too much to Tirso

<sup>14</sup> I think there are six, at least, of Calderon's plays taken from the Metamorphoses, a circumstance worth noting, because it shows the direction of his taste. He seems to have used no ancient author, and perhaps no author at all, in his plays, so much as Ovid, who was a favorite classic in Spain, six translations of the Metamorphoses having been made there before the time of Calderon. Don Quixote, ed. Clemen-  
cin, Tom. IV, 1835, p. 407.

<sup>15</sup> It is possible Calderon may not have gone to the originals, but found his materials nearer at hand; and yet, on a comparison of the triumphal entry of Aurelian into Rome, in the third *jornada*, with the corresponding passages in Trebellius, "De Triginta Tyrannis" (c. xxix) and Vopiscus, "Aurelianus" (c. xxxii, xxxiv, etc.), it seems most likely that he had read them.

Once he went to a singular source,

or, at least, singularly indicated it. He took the story of the Sultan Saladin from the "Conde Lucanor" of Don John Manuel, (cap. 6,) and called the play he founded on it "El Conde Lucanor," making a Count Lucanor its hero, though, of course, not *the* Count who gives its title to the original. The play of Calderon has beautiful passages One with the same title, and printed as his, appears in Vol. XV of the *Comedias Escogidas*, 1661, but he protests against the outrage in the Preface to the Fourth Part of his Plays, which was published at Madrid in 1672, and in which he required the friend who published it to insert the true "Conde Lucanor," that justice might be done him by a comparison of it with the false one. Of this rare Fourth Part, I found a copy in St. Mark's Library, Venice, which had belonged to Apostolo Zeno, who was familiar with the old Spanish dramatists, and borrowed from them.

them. This is the case with "The Siege of Breda," which he has set forth with an approach to statistical accuracy, as it happened in 1624–1625;—all in honor of the commanding general, Spinola, who may well have furnished some of the curious details of the piece,<sup>16</sup> and who, no doubt, witnessed its representation. This is the case, too, with "The Last Duel in Spain," founded on the last single combat held there under royal \*authority, which was fought \*401 at Valladolid, in the presence of Charles the Fifth, in 1522; and which, by its showy ceremonies and chivalrous spirit, was admirably adapted to Calderon's purposes.<sup>17</sup>

But where the subject he selected was not thus fully fitted, by its own incidents, to his theory of the drama, he accommodated it to his end as freely as if it were of imagination all compact. "The Weapons of Beauty" and "Love the Most Powerful of Enchantments" are abundant proofs of this;<sup>18</sup> and so is "Hate and Love," where he has altered the facts in the life

<sup>16</sup> For instance, the exact enumeration of the troops at the opening of the play *Comedias*, Tom III pp 142, 149. The Protestants in this play are treated with a dignity and consideration very rare in Spanish poetry, and very honorable to Calderon Velasquez, who had travelled to Italy with the Marquis of Spinola, painted one of his grandest pictures on the same subject with this play of Calderon (Stirling's *Artists*, Vol II p 634),—Head (Hand-Book, p 152) reckons it the very best of his historical pictures.

<sup>17</sup> It ends with a voluntary anachronism,—the resolution of the Emperor to apply to Pope Paul III and to have such duels abolished by the Council of Trent. By its very last words, it shows that it was acted before the king, a fact that does not appear on its title-page. The duel is the one Sandoval describes with so much minuteness. *Hist de Carlos V.*, Anvers, 1681, folio, Lib. XI §§ 8, 9.

I ought, perhaps, to add, that above a century later—in 1641—the Duke of Medina Sidonia, on behalf of Philip IV, challenged the Duke of Braganza, then king of Portugal, to a trial by duel of his rights to the crown he had just won back from Spain, and—what is more—this challenge was defended by ecclesiastical authority in a tract of great learning and some acuteness, entitled "Justificacion moral en el Fuego de la Conciencia de la particular Batalla que el Exmo Duque de Medina Sidonia ofrecio al que fué de Bragança, por el Padre M Thomas Hurtado" (Antequera, 1641, 4to). The duel was, of course, declined by the king of Portugal.

<sup>18</sup> "Las Armas de la Hermosura," Tom I, and "El Mayor Encanto Amor," Tom V, are the plays on Coriolanus and Ulysses. They have been mentioned before.

of Christina of Sweden, his whimsical contemporary, till it is not easy to recognize her,—a remark which may be extended to the character of Peter of Aragon in his “*Tres Justicias en Uno*,” and to the personages in Portuguese history whom he has so strikingly idealized in his “*Weal and Woe*,”<sup>19</sup> and in his “*Firm-Hearted Prince*.” To an English reader, however, the “*Cisma de Inglaterra*,” on the fortunes and fate of Anne Boleyn and Cardinal Wolsey, is probably the most obvious perversion of history; for the Cardinal, after his fall from power, comes on the stage begging his bread of Catherine of Aragon, while, at the same time, Henry, repenting of the religious schism he has countenanced, promises to marry his daughter Mary to Philip the Second of Spain.<sup>20</sup>

\* 402 \* Nor is Calderon more careful in matters of morals than in matters of fact. Duels and homicides occur constantly in his plays, under the slightest pretences, as if there were no question about their propriety. The authority of a father or brother to put to death a daughter or sister who has been guilty of secreting her lover under her own roof is fully recognized.<sup>21</sup> It is made a ground of glory for the king, Don Pedro, that he justified Gutierre in the atrocious murder of his wife; and even the lady Leonore, who is to succeed to the blood-stained bed, desires, as we have seen, that no other measure of justice should be applied

<sup>19</sup> Good, but somewhat over-refined, remarks on the use Calderon made of Portuguese history in his “*Weal and Woe*” are to be found in the Preface to the second volume of Malsburg's German translation of Calderon, Leipzig, 1819, 12mo.

<sup>20</sup> *Comedias*, 1760, Tom IV. See, also, *Ueber die Kirchentrennung von England*, von F W V Schmidt, Berlin, 1819, 12mo, — a pamphlet full of curious matter, but too laudatory, so

far as Calderon's merit is concerned. Nothing will show the wide difference between Shakespeare and Calderon more strikingly, than a comparison of this play with the grand historical drama of “*Henry the Eighth*”

<sup>21</sup> Of these duels, and his notions about female honor, half the plays of Calderon may be taken as specimens, but it is only necessary to refer to “*Casa con Dos Puertas*” and “*El Escondido y la Tapada*”

to herself than had been applied to the innocent and beautiful victim who lay dead before her. Indeed, it is impossible to read far in Calderon without perceiving that his object is mainly to excite a high and feverish interest by his plot and story; and that to do this he relies too constantly upon an exaggerated sense of honor, which, in its more refined attributes, certainly did not give its tone to the courts of Philip the Fourth and Charles the Second, and which, with the wide claims he makes for it, could never have been the rule of conduct and intercourse anywhere, without shaking all the foundations of society and poisoning the best and dearest relations of life.

Here, therefore, we find pressed upon us the question, What was the origin of these extravagant ideas of domestic honor and domestic rights, which are found in the old Spanish drama from the beginning of the full-length plays in Torres Naharro, and which are thus exhibited in all their excess in the plays of Calderon?

The question is certainly difficult to answer, as are all like it that depend on the origin and traditions of national character; but — setting aside as quite groundless the suggestion generally made, that the old Spanish ideas of domestic authority might be derived from the Arabs — we find that the ancient Gothic laws, which date back to a period long before the Moorish invasion, and which fully \* represented the \* 403 national character till they were supplanted by the “Partidas” in the fourteenth century, recognized the same fearfully cruel system that is found in the old drama. Everything relating to domestic honor was left by these laws, as it is by Calderon, to domestic authority. The father had power to put to death his wife or daughter who was dishonored under his roof;

and if the father were dead, the same terrible power was transferred to the brother in relation to his sister, or even to the lover, where the offending party had been betrothed to him.

No doubt, these wild laws, though formally renewed and re-enacted as late as the reign of Saint Ferdinand, had ceased in the time of Calderon to have any force ; and the infliction of death under circumstances in which they fully justified it would then have been murder in Spain, as it would have been in any other civilized country of Christendom. But, on the other hand, no doubt these laws were in operation during many more centuries than had elapsed between their abrogation and the age of Calderon and Philip the Fourth. The tradition of their power, therefore, was not yet lost on the popular character, and poetry was permitted to preserve their fearful principles long after their enactments had ceased to be acknowledged anywhere else.<sup>22</sup>

Similar remarks may be made concerning duels. That duels were of constant recurrence in Spain in the fourteenth and fifteenth centuries, as well as earlier, we have abundant proof. But we know, too, that the last which was countenanced by royal authority occurred in the youth of Charles the Fifth ; and there is no reason to suppose that private encounters, except street brawls, were much more common among the cavaliers at Madrid in the time of Lope de Vega than they were at London and Paris.<sup>23</sup> But the tra-

Ferdinand after the conquest of Córdova in 1241

<sup>23</sup> Howell, in 1623, when he had been a year in Madrid, under circumstances to give him familiar knowledge of its gay society, and at a time when the drama of Lope was at the height of its favor, says, "One shall not hear of a duel here in an age" *Letters, eleventh edition, London, 1754, 8vo, Book I*

ditions that had come down from \* the times \* 404 when they prevailed were quite sufficient warrant for a drama which sought to excite a strong and anxious interest more than anything else. In one of the plays of Barrios there are eight, and in another twelve duels;<sup>24</sup> an exhibition that, on any other supposition, would have been absurd.

Perhaps the very extravagance of such representations made them comparatively harmless. It was, in the days of the Austrian dynasty, so incredible that a brother should put his sister to death merely because she had been found under his roof with her lover, or that one cavalier should fight another in the street simply because a lady did not wish to be followed, that there was no great danger of contagion from the theatrical example. Still, the immoral tendency of the Spanish drama was not overlooked, even at the time when Calderon's fame was at the highest. Manuel de Guerra y Ribera, one of his great admirers, in an *Aprobacion* prefixed to Calderon's plays in 1683, praised, not only his friend, but the great body of the dramas to whose brilliancy that friend had so much contributed; and the war against the theatre broke out in consequence, as it had twice in the time of Lope. Four anonymous attacks were made on the injudicious remarks of Guerra, and two more by persons who gave their names,—Puente de Mendoza and Navarro;—the last, oddly enough, replying in print to a defence of himself by Guerra, which had then been seen

Sect. 3, Letter 32 Figueira (Plaça Universal, 1615, f 270) says the same thing, speaking of the duel "Pues casi en ninguna provincia o ciudad es admitido, ni tiene lugar" A generation later, however, duels were more frequent, judging by the discussion of the laws of "the Duello" in "Solo

Madrid es Corte, por Alonso Nuñez de Castro," 1658, where it is said they are "not less common than rocks in the Mediterranean and storms on the ocean" f. 100, b Street brawls.

only in manuscript. But the whole of this discussion proceeded on the authority of the Church and the Fathers, rather than upon the grounds of public morality and social order; and therefore it ended, as previous attacks of the same kind had done, by the \* 405 triumph of the theatre;<sup>25</sup> — \* Calderon's plays and those of his school being performed and admired quite as much after it as before.

Calderon, however, not only relied on the interest he could thus excite by an extravagant story full of domestic violence and duels, but often introduced flattering allusions to living persons and passing events, which he thought would be welcome to his audience, whether of the court or the city. Thus, in "The Scarf and the Flower," the hero, just returned from Madrid, gives his master, the Duke of Florence, a glowing description, extending through above two hundred lines, of the ceremony of swearing fealty, in 1632, to Prince Balthasar, as Prince of Asturias; a passage which, from its spirit, as well as its compliments to the king and the royal family, must have produced no small effect on the stage.<sup>26</sup> Again, in "El Escondido y la Tapada," we

<sup>25</sup> Things had not been in an easy state, at any time, since the troubles already noticed (Chap. XXI.) in the reigns of Philip II and Philip III, as we may see from the Approbation of Thomas de Avellaneda to Tom. XXII., 1665, of the *Comedias Escogidas*, where that personage, a grave and distinguished ecclesiastic, thought it needful to step aside from his proper object, and defend the theatre against attacks, which were evidently then common, though they have not reached us. But the quarrel of 1682–1685, which was a violent and open rupture, can be best found in the "Apelacion al Tribunal de los Doctos," Madrid, 1752, 4to, (which is, in fact, Guerra's defence of himself written in 1683, but not before published,) and in "Discursos contra los que defienden el Uso de las Comedias,

por Gonzalo Navarro," Madrid, 1684, 4to, which is a reply to the last and to other works of the same kind. Indeed, the number of tracts published on this occasion was very large. A real attempt was made to put down the theatre, relying, perhaps, on the weakness of Charles II, and it was near to being successful.

<sup>26</sup> The description of Philip IV on horseback, as he passed through the streets of Madrid, suggests a comparison with Shakespeare's Bolingbroke in the streets of London, but it is wholly against the Spanish poet (Jorn. I.) That Calderon meant to be accurate in the descriptions contained in this play can be seen by reading the official account of the "Juramento del Príncipe Baltasar," 1632, prepared by Antonio Hurtado de Mendoza, of which the sec-

have a stirring intimation of the siege of Valencia on the Po, in 1635;<sup>27</sup> and in "Nothing like Silence," repeated allusions to the victory over the Prince of Condé at Fontarabia, in 1639.<sup>28</sup> In "Beware of Smooth Water," there is a dazzling account of the public reception of the second wife of Philip the Fourth at Madrid, in 1649, for a part of \* whose pageant, \* 406 it will be recollected, Calderon was employed to furnish inscriptions.<sup>29</sup> In "The Blood-Stain of the Rose"—founded on the fable of Venus and Adonis, and written in honor of the Peace of the Pyrenees and the marriage of the Infanta with Louis the Fourteenth, in 1660—we have whatever was thought proper to be said on such subjects by a favorite poet, both in the *loa*, which is fortunately preserved, and in the play itself.<sup>30</sup> But there is no need of multiplying examples.

ond edition was printed by order of the government, in its printing-office, 1665, 4to, or perhaps better, in a similar but less formal account of the same ceremony by Juan Gomez de Mora, 1632, 4to

<sup>27</sup> It is genuine Spanish. The hero says —

<sup>28</sup> He makes the victory more important than it really was, but his allusions to it show that it was not thought worth while to irritate the French interest, so cautious and courtly is Calderon's whole tone. It is in Tom. X. of the *Comedias*

<sup>29</sup> The account, in "Guárdate de la Agua Mansa," of the triumphal arch, for which Calderon furnished the allegorical ideas and figures, as well as the inscriptions, (both Latin and Castilian, the play says,) is very ample. (Jornada III.) To celebrate this marriage of Philip IV with Marianna of Austria, a strange book of above a hundred pages of euphuistical flattery, by the pedantic scholar Joseph Pellicer de Tovar, was printed in 1650, and entitled "Alma

de la Gloria de España, ec, Epitalamio D O C al Rey Nuestro Señor", — the only epithalamium I ever heard of filling a volume, and all in prose. For the marriage itself, the entrance into Madrid, etc., see Florez, *Reynas Catolicas*, Tom II, 2d ed 1770, pp 953, sqq.

<sup>30</sup> Here, again, we have the courtly spirit in Calderon. He insists most carefully, that the Peace of the Pyrenees and the marriage of the Infanta are *not* connected with each other, and that the marriage is to be regarded "as a *separate* affair, treated at the same time, but quite independently." But his audience knew better. Indeed, the very suggestion of the peace and the match as a joint arrangement to settle everything between the two countries came from Philip IV. Mad de Motteville, *Mémoires d'Anne d'Autriche*, 1750, Tom. V pp 295, 296, 301, 418.

From the "Viage del Rey Nuestro Señor D Felipe IV el Grande á la Frontera de Francia, por Leonardo del Castillo," Madrid, 1667, 4to,—a work of official pretensions, describing the ceremonies attending both the marriage of the Infanta and the conclusion of the peace, — it appears that, wherever Cal-

Calderon nowhere fails to consult the fashionable and courtly, as well as the truly national, feeling of his time; and in "The Second Scipio" he stoops even to gross flattery of the poor and imbecile Charles the Second, declaring him equal to that great patriot whom Milton pronounces to have been "the height of Rome."<sup>31</sup>

\* 407 \* In style and versification, Calderon has high merits, though they are occasionally mingled with the defects of his age. Brilliancy is one of his great objects, and he easily attains it. But, especially in his earlier dramas, he falls, and with apparent willingness, into the showy folly of his time, the absurd

deron has alluded to either, he has been true to the facts of history. A similar remark may be made of the "Tetis y Pelco," evidently written for the same occasion, and printed, *Comedias Escogidas*, Tom. XXIX, 1668,—a poor drama by an obscure author, Josef de Bolea, and probably one of the severals that we know, from Castillo, were represented to amuse the king and court on their journey. A strange consequence of the Peace of the Pyrenees and the marriage of Louis XIV with the Infanta is said, in a contemporary account, to have followed the next year;—I mean the canonization of that noble-hearted Spaniard, Tomas de Villanueva, who was selected for that honor by Alexander VI because he was "a saint fitted to be a mediator to intercede with God for the peace of these two mighty crowns." See "Relacion de las Fiestas que el real Convento de San Augustin de la Ciudad de Cordoba a celebrado á la Canonizacion de Sto Tomas de Villanueva," 4to, s a

p<sup>2</sup>

<sup>31</sup> This flattery of Charles II is the more disagreeable, because it was offered in the poet's old age; for Charles did not come to the throne till Calderon was seventy-five years old. But it is, after all, not so shocking as the sort of blasphemous compliments to Philip IV. and his queen in the strange *auto* called "El Buen Retiro," acted on the first Corpus Christi day after that luxurious

palace was finished, contrasting, too, as it does, with the becoming account of the burning of the *old* Buen Retiro in 1641, which is found in the "Manos Blancas no Ofenden."

One of the most marked instances of an adroit solicitation of popular applause on the Spanish stage is in the "Monstruo de la Fortuna," written jointly by Calderon, Montalvan, and Roxas. It is on the story of Felipa Catanea, the washerwoman, who rose to great political authority, for a time, at Naples, in the early part of the fourteenth century, and was then put to death, with all her family, in the most cruel and savage manner. The play in question is taken from a sort of romance made out of her history and fate by Pierre Matthieu, which was printed in French in 1618, and translated by Juan Pablo Martyr Rizo into Spanish, in 1625,—the object being, by constant allusions, to exasperate public feeling against the adventurer Concini, Maréchal d'Ancre, and his wife, in the time of Louis XIII. Owing to the troubles between France and Spain, every word of Calderon's play must have told on his Spanish audiences. There is a rich old English translation of Matthieu's book by Sir Thomas Hawkins, of which the second edition was published in 1639, under the title "Unhappy Prosperity expressed in the History of Elius Sejanus and Philippa the Cataman."

sort of euphuism which Góngora and his followers called “the cultivated style.” This is the case, for instance, in his “Love and Fortune,” and in his “Conflicts of Love and Loyalty.” But in “April and May Mornings,” on the contrary, and in “No Jesting with Love,” he ridicules the same style with great severity; and in such charming plays as “The Lady and the Maid,” and “The Loud Secret,” he wholly avoids it,—thus adding another to the many instances of distinguished men who have sometimes accommodated themselves to their age and its fashions, which at others they have rebuked or controlled.<sup>32</sup> Everywhere, however, his verses charm us by their delicious melody; everywhere he indulges himself in the rich variety of measures which Spanish or Italian poetry offered him,—octave stanzas, *terza rima*, sonnets, *silvas*, *liras*, and the different forms of the *redondilla*, with the ballad *asonantes* and *consonantes*; — showing a mastery over his language extraordinary in itself, and one which, while it sometimes enables him to rise to the loftiest tones of the national drama, seduces him at others to seek popular favor by fantastic tricks that were wholly unworthy of his genius.<sup>33</sup>

\* But we are not to measure Calderon as his \* 408 contemporaries did. We stand at a distance

<sup>32</sup> Some of the best of Calderon's plays are occasionally disfigured with the *estilo culto*, such as the “Príncipe Constante,” “La Vida es Sueño,” “El Mayor Monstruo,” and “El Médico de su Honra”, and precisely these plays we know were the works of his youth, for they all appear in the two volumes printed by his brother in 1635 and 1637.

<sup>33</sup> I think Calderon never uses blank verse, though Lope does. The narrative portions of his *Comedias*, like those of other dramatists, have sometimes been printed separately, and sold as

popular ballads; of which the Tetrarch's address in “El Mayor Monstruo,” Jorn II, beginning “Si todas quantas desdichas,” is an example (Tom V p 497). Calderon, also, besides the forms of verse noted in the text, occasionally inserts *glosas*, — a happy specimen of which may be found in “Amar después de la Muerte,” Jorn. II, beginning, “No es menester que digais,” which I select because, like other similar refinements of verse in Calderon, it is not so printed as to inform the eye what it is. Tom V. p. 370

too remote and impartial for such indulgence ; and must neither pass over his failures nor exaggerate his merits. We must look on the whole mass of his efforts for the theatre, and inquire what he really effected for its advancement,—or rather what changes it underwent in his hands, both in its more gay and its more serious portions.

Certainly Calderon appeared as a writer for the Spanish stage under peculiarly favorable circumstances ; and, by the preservation of his faculties to an age beyond that commonly allotted to man, was enabled long to maintain the ascendancy he had early established. His genius took its direction from the very first, and preserved it to the last. When he was fourteen years old he had written a piece for the stage, which, sixty years later, he thought worthy to be put into the list of dramas that he furnished to the Admiral of Castile.<sup>34</sup> When he was thirty-five, the death of Lope de Vega left him without a rival. The next year, he was called to court by Philip the Fourth, the most munificent patron the Spanish theatre ever knew ; and from this time till his death, the destinies of the drama were in his hands nearly as much as they had been before in those of Lope. Forty-five of his longer pieces, and probably more, were acted in magnificent theatres in the different royal palaces of Madrid and its neighborhood. Some must have been exhibited with great pomp and at great expense, like “The Three Greatest Wonders,” each of whose three acts was represented in the open air on a separate stage by a different company of performers ;<sup>35</sup>

<sup>34</sup> “El Carro del Cielo,” which Véa Tassis says he wrote at fourteen, and which we should be not a little pleased to see.

<sup>35</sup> The audience remained in the same

seats, but there were three stages before them. It must have been a very brilliant exhibition, and is quaintly explained in the *loc* prefixed to it.

and "Love the Greatest Enchantment," brought \*409 out upon a floating theatre which the wasteful extravagance of the Count Duke Olivares had erected on the artificial waters in the gardens of the Buen Retiro.<sup>36</sup> Indeed, everything shows that the patronage, both of the court and capital, placed Calderon forward, as the favored dramatic poet of his time. This rank he maintained for nearly half a century, and wrote his last drama, "Hado y Devisa," founded on the brilliant fictions of Boiardo and Ariosto, when he was eighty-one years of age.<sup>37</sup> He therefore was not only the successor of Lope de Vega, but enjoyed the same kind of popular influence. Between them, they held the empire of the Spanish drama for ninety years; during which, partly by the number of their imitators and disciples, but chiefly by their own personal resources, they gave to it all the extent and consideration it ever possessed.

Calderon, however, neither effected nor attempted any great changes in its forms. Two or three times, indeed, he prepared dramas that were either wholly sung, or partly sung and partly spoken; but even these, in their structure, were no more operas than his other plays, and were only a courtly luxury, which it was attempted to introduce, in imitation of the genuine opera just brought into France from Italy

<sup>36</sup> This is stated in the title, and gracefully alluded to at the end of the piece —

Fué el agua tan dichosa,  
En esta noche feíza,  
Que merecía ser Teatro

The water, however, was not very happy or gracious the first night; for a storm of wind scattered the vessels, the royal party, and a supper that was also among the floating arrangements of the occasion, prepared by Cosme Lotti, the Florentine architect. This was June 12, 1639, but the play was success-

fully acted several times during the month

The extravagance of some of these exhibitions was monstrous. The Marquis of Heliote for one royal entertainment paid sixteen thousand ducats, and for another, thirty thousand Olivares exceeded both, and to the cost of the drama in the palaces of Philip IV there was no apparent limit

<sup>37</sup> Vera Tassis makes this statement. See also F W V Schmidt, *Ueber die italienischen Heldengedichte*, Berlin, 1820, 12mo, pp 269-280.

by Louis the Fourteenth, with whose court that of Spain was now intimately connected.<sup>38</sup> But this was all. Calderon has added to the stage no new \* 410 form of dramatic composition. Nor has \* he much modified those forms which had been already arranged and settled by Lope de Vega. But he has shown more technical exactness in combining his incidents, and adjusted everything more skilfully for stage effect.<sup>39</sup> He has given to the whole a new coloring, and, in some respects, a new physiognomy. His drama is more poetical in its tone and tendencies, and has less the air of truth and reality, than that of his great predecessor. In its more successful portions, — which are rarely objectionable from their moral tone, — it seems almost as if we were transported to another and more gorgeous world, where the scenery is lighted up with unknown and preternatural splendor, and where the motives and passions of the personages that pass before us are so highly wrought, that we must have our own feelings not a little stirred and excited before we can take an earnest interest in what we witness, or sympathize in its results. But even in this he is successful. The buoyancy of life and spirit that he has infused into the gayer divisions of his drama, and the moving tenderness that pervades its graver and more tragical portions, lift us unconsciously to the height where alone his brilliant exhibitions can prevail with our imaginations, — where alone we can be interested and deluded, when we find ourselves in

<sup>38</sup> The two decided attempts of Calderon in the opera style have already been noticed. The "Laurel de Apolo" (Comedias, Tom. VI.) is called a *Fiesta de Zarzuela*, in which it is said (Jorn. I.), "Se canta y se representa", — so that it was probably partly sung and partly acted. Of the *Zarzuelas* we must speak when we come to Candomo.

<sup>39</sup> Goethe had this quality of Calderon's drama in his mind when he said to Eckermann, (Gesprache mit Goethe, Leipzig, 1837, Band I p 151,) "Seine Stucke sind durchaus bretterrecht, es ist in ihnen kein Zug, der nicht fur die beabsichtigte Wirkung calculirt wird. Calderon ist dasjenige Genie, was zugleich den grossten Verstand hatte."

the midst, not only of such a confusion of the different forms of the drama, but of such a confusion of the proper limits of dramatic and lyrical poetry.

To this elevated tone, and to the constant effort necessary in order to sustain it, we owe much of what distinguishes Calderon from his predecessors, and nearly all that is most individual and characteristic in his separate merits and defects. It makes him less easy, graceful, and natural than Lope. It imparts to his style a mannerism, which, notwithstanding the marvellous richness and fluency of his versification, sometimes wearies and sometimes offends us. It leads him to repeat from himself \* till many of his person- \* 411 ages become standing characters, and his heroes and their servants, his ladies and their confidants, his old men and his buffoons,<sup>40</sup> seem to be produced, like the masked figures of the ancient theatre, to represent, with the same attributes and in the same costume, the different intrigues of his various plots. It leads him, in short, to regard the whole of the Spanish drama as a mere form, within whose limits his imagination may be indulged without restraint; and in which Greeks and Romans, heathen divinities, and the supernatural fictions of Christian tradition, may be all brought out in Spanish fashions and with Spanish feelings, and led, through a succession of ingenious and interesting adventures, to the catastrophes their stories happen to require.

In carrying out this theory of the Spanish drama, Calderon, as we have seen, often succeeds, and often fails. But when he succeeds, his success is of no common character. He then sets before us only models

<sup>40</sup> A good many of Calderon's *graciosos*, or buffoons, are excellent, as, for instance, those in "La Vida es Sueño,"

"El Alcayde de sí mismo," "Casa con Dos Puertas," "La Gran Zenobia," "La Dama Duende," etc.

of ideal beauty, perfection, and splendor; — a world, he would have it, into which nothing should enter but the highest elements of the national genius. There, the fervid, yet grave, enthusiasm of the old Castilian heroism; the chivalrous adventures of modern, courtly honor; the generous self-devotion of individual loyalty; and that reserved, but passionate love, which, in a state of society where it was so rigorously withdrawn from notice, became a kind of unacknowledged religion of the heart; — all seem to find their appropriate home. And when he has once brought us into this land of enchantment, whose glowing impossibilities his own genius has created, and has called around him forms of such grace and loveliness as those of Clara and Doña Angela, or heroic forms like those of Tuzani, Mariamne, and Don Ferdinand, then he has reached the highest point he ever attained, or ever proposed to himself; — he has set before us the grand show of

an idealized drama, resting on the purest and  
 \* 412 \* noblest elements of the Spanish national character, and one which, with all its unquestionable defects, is to be placed among the extraordinary phenomena of modern poetry.<sup>41</sup>

<sup>41</sup> Calderon, like many other authors of the Spanish theatre, has, as we have seen, been a magazine of plots for the dramatists of other nations. Among those who have borrowed the most from him are the younger Corneille and Gozzi. Thus, Corneille's "Engagements du Hasard" is from "Los Empeños de un Acaso", "Le Feint Astrologue," from "El Astrólogo Fingido"; "Le Géolier de son mème," from "El Alcayde de sí mismo"; besides which, his "Circe" and "L'Inconnu" prove that he had well studied Calderon's show pieces. Gozzi took his "Publico Secreto" from the "Secreto á Voces", his "Eco e Narciso" from the play of the same name; and his "Due Notti

Affanose" from "Gustos y Disgustos." And so of others

I have had occasion to speak of several of the translations of Calderon, and perhaps should add here a few words on the principal of them, with their dates. A W Schlegel, 1803-1809, enlarged 1845, 2 vols, — Gries, 1815-1842, 8 vols, — Malsburg, 1819-1825, 6 vols, — Martin, 1844, 2 vols, — Eichendorff, Geistliche Schauspiele, (ten Autos,) 1846-1853, 2 vols, — two plays by a Lady, 1851, — a single one by Cardinal Diepenbrock, 1852, — and an Auto by Franz Lorinser, 1855; — all in German, and almost uniformly in the measures and manner of their originals. In Italian, fifteen plays, se-

lected with care, are translated by Pietro Monti, all but the "Principe Constante" in prose, in his *Teatro Scelto*, 4 vols., 1855. In French, *Damas-Hinnaid*, 3 vols., 1841-1844, in prose. In English, six dramas by Edward Fitzgerald, 1853, and six more, the same year, by Denis Florence McCarthy, 2 vols., whose version, often made in the measures of the original, will, I think, give an English reader a nearer idea of Calderon's versification than he will readily obtain elsewhere, and whose Preface will direct him to the other sources in our own language. But those of Fitzgerald are good, although they are in blank verse, so choice and charming is his poetical language. Indeed, I doubt whether the short Spanish measures can be made effective in English dramatic composition. The best attempt known to me is in Trench's translation of "La Vida es Sueño," at the end of a little volume on Calderon's Life and Genius, printed both in London and New York, in 1856.

Since the preceding note was published, Mr. McCarthy has given to the world translations of two plays and an *auto* of Calderon, under the title of "Love, the greatest Enchantment, the Sorceries of Sin, the Devotion of the Cross," from the Spanish of Calderon, attempted strictly in the Spanish Asso-

nante and other imitative Verse," 1861; printing, at the same time, a carefully corrected text of the Spanish originals, page by page, opposite to his translations. It is, I think, one of the boldest attempts ever made in English verse. It is, too, as it seems to me, remarkably successful. Not that *assonances* can be made fluent and graceful in English verse, or easily perceptible to an English ear, but that the Spanish air and character of Calderon are so happily and strikingly preserved. Previous to the two volumes noted above, the "Sorceries of Sin" had appeared in the "Atlantis," 1859, but in the present volume Mr. McCarthy has far surpassed all he had previously done, for Calderon is a poet who, whenever he is translated, should have his very excesses and extravagances, both in thought and manner, fully produced in order to give a faithful idea of what is grandest and most distinctive in his genius. Mr. McCarthy has done this, I conceive, to a degree which I had previously supposed impossible. Nothing, I think, in the English language will give us so true an impression of what is most characteristic of the Spanish drama, perhaps I ought to say of what is most characteristic of Spanish poetry generally.

THE most brilliant period of the Spanish drama falls within the reign of Philip the Fourth, which extended from 1621 to 1665, and embraced the last fourteen years of the life of Lope de Vega, and the thirty most fortunate years of the life of Calderon. But after this period a change begins to be apparent; for the school of Lope was that of a drama in the freshness and buoyancy of youth, while the school of Calderon belongs to the season of its maturity and gradual decay. Not that this change is strongly marked during Calderon's life. On the contrary, so long as he lived, and especially during the reign of his great patron, there is little visible decline in the dramatic poetry of Spain; though still, through the crowd of its disciples and amidst the shouts of admiration that followed it on the stage, the symptoms of its coming fate may be discerned.

Of those that divided the favor of the public with their great master, none stood so near to him as Agustin Moreto, of whom we know much less than would be important to the history of the Spanish drama. He was born at Madrid, and was baptized on the 9th of April, 1618. His best studies were no doubt those he made at Alcala, between 1634 and 1639. Later he

removed to Toledo, and entered the household of the Cardinal Archbishop, taking holy orders, and joining a brotherhood as early \* as 1659. Ten \* 414 years later, in 1669, he died, only fifty-one years old, leaving whatever of property he possessed to the poor.<sup>1</sup>

Three volumes of his plays, and a number more never collected into a volume, were printed between 1654 and 1681, though he himself seems to have regarded them, during the greater part of that time, only as specious follies or sins. They are in all the different forms known to the age to which they belong, and, as in the case of Calderon, each form melts imperceptibly into the character of some other. But the theatre was not then so strictly watched as it had been; and the religious plays Moreto has left us are, perhaps on this account, oftener connected with known facts in the lives of saints, and with known events in history, like "The Most Fortunate Brothers," which contains the story of the Seven Sleepers of Ephesus,

<sup>1</sup> The little we know of Moreto has been discovered or carefully collected by Don Luis Fernandez Gueria y Oibe, and is to be found in his excellent edition of the "Comedias Escogidas" of Moreto, filling Volume XXXIX of the Biblioteca de Autores Espanoles, 1856. The story that Moreto was concerned in the violent death of Medinilla, as suggested by Ochoa, (Teatro Espanol, Paris, Tom IV, 1838, p 248,) always incredible, gets its *coup de grace* from the date of Moreto's birth, settled by Don Luis to have occurred in 1618, only two years before Medinilla's death.

As to Moreto's works, I possess his Comedias, Tom I, Madrid, 1677 (of which Antonio notes an edition in 1654), Tom II, Valencia, 1676, and Tom III, Madrid, 1681, all in 4to;—besides which I have about a dozen of his plays, found in none of them Moreto appears as a known author in the

Lagrimas Panegiricas on Montalvan, 1639 (f 48, a), and, two years after his death, in the "Comedias Escogidas de los Mejores Ingenios," Tom XXXVI, Madrid, 1671, we have the "Santa Rosa del Perú," the first two acts of which are said to have been his last work, the remaining act being by Lami, but with no intimation when Moreto wrote the two others. This old collection of Comedias Escogidas contains forty-six plays attributed in whole or in part to Moreto,—a strong proof of his great popularity, but one of them, at least, is not his. I mean the "Condessa de Belfor," (in Tom XXV, 1666, f 18,) which is neither more nor less than Lopez's well-known "Perro del Hortelano." The earliest play known to me to have been published by Moreto is "Loque merece un soldado" in *Diferentes Comedias*, Tom. XLIV, 1650, which I possess.

both before they were enclosed in the cave and when they awoke from their miraculous repose of two centuries.<sup>2</sup> A few are heroic, such as "The Brave Justiciary of Castile," — a drama of spirit and power, on the character of Peter the Cruel, though, like most other plays in which that monarch appears, it is not one in which the truth of history is respected.

\* 415 But, in general, Moreto's dramas are of the \* old cavalier class ; and when they are not, they take, in order to suit the humor of the time, many of the characteristics of this truly national form.

In one point, however, he made, if not a change in the direction of the drama of his predecessors, yet an advance upon it. He devoted himself more to character-drawing, and often succeeded better in it than they had. His first play of this kind was "The Aunt and the Niece," printed as early as 1654. The characters are a widow, — extremely anxious to be married, but foolishly jealous of the charms of her niece, — and a vaporizing, epicurean officer in the army, who cheats the elder lady with flattery, while he wins the younger. It is curious to observe, however, that the hint for this drama — which is the oldest of the class called *figuron*, from the prominence of one not very dignified *figure* in it — is yet to be found in Lope de Vega, to whom, as we have seen, is to be traced, directly or indirectly, almost every form and shade of dramatic composition that finally succeeded on the Spanish stage.<sup>3</sup>

Moreto's next attempt of the same sort is even better known, "The Handsome Don Diego," — a

<sup>2</sup> "Los mas Dichosos Hermanos" It is the first play in the third volume, and though it does not correspond in its story with the beautiful legend as Gibbon gives it, there is a greater at-

tempt at the preservation of the truth of history in its accompaniments than is common in the old Spanish drama

phrase that has become a national proverb.<sup>4</sup> It sets forth with great spirit the character of a fop, who believes that every lady he looks upon must fall in love with him. The very first sketch of him at his morning toilet, and the exhibition of the sincere contempt he feels for the more sensible lover, who refuses to take such frivolous care of his person, are full of life and truth; and the whole ends, with appropriate justice, by his being deluded into a marriage with a cunning waiting-maid, who is passed off upon him as a rich countess.

Some of Moreto's plays, as, for instance, his "Trampa Adelante," obtained the name of *gracioso*, because the buffoon is made the character upon whom the action turns; and in one case, at least, he wrote a burlesque \* farce of no value, taking his subject \* 416 from the achievements of the Cid. But his general tone is that of the old intriguing comedy; and though he is sometimes indebted for his plots to his predecessors, and especially to Lope, yet, in nearly every instance, and perhaps in every one, he surpassed his model, and the drama he wrote superseded on the public stage the one he imitated.<sup>5</sup>

This was the case with the best of all his plays, "Disdain met with Disdain," for the idea of which he was indebted to Lope, whose "Miracles of Contempt"

<sup>4</sup> "El lindo Don Diego" But *lindo* was not, I think, then used commonly in a disparaging or doubtful sense. The Infanta and her father Philip IV called Louis XIV "lindo" when they first saw him at the Isle of Conferences before the marriage in 1660. Mad de Motteville, *Mémoires*, Tom V, 1750, pp. 398, 401.

<sup>5</sup> "The Aunt and the Niece" is from Lope's "De quando acá nos Vino," and "It cannot be" from his "Mayor Impossible." There are good remarks on these and other of Moreto's imitations

in Martinez de la Rosa, *Obras*, Paris, 1827, 12mo, Tom II pp 443-446. But the excuses there given for him hardly cover such a plagiarism as his "Valiente Justiciero" is, from Lope's "Infanzon de Illescas" Cancer y Velasco, a contemporary poet, in a little *jeu d'esprit* represents Moreto as sitting down with a bundle of old plays to see what he can cunningly steal out of them, spoiling all he steals (*Obras*, Madrid, 1761, 4to, p 113.) But in this Cancer was unjust to Moreto's talent, if not to his honesty.

has long been forgotten as an acting play, while Moreto's still maintains its place on the Spanish stage, of which it is one of the brightest ornaments.<sup>6</sup> The plot is remarkably simple and well contrived. Diana, heiress to the county of Barcelona, laughs at love and refuses marriage, under whatever form it may be urged upon her. Her father, whose projects are unreasonably thwarted by such conduct, induces the best and gayest of the neighboring princes to come to his court, and engage in tournaments and other knightly sports, in order to win her favor. She, however, treats them all with an equal coldness, and even with a pettish disdain, until, at last, she is piqued into admiration of the Count of Urgel, by his apparent neglect, which he skillfully places on the ground of a contempt like her own for all love, but which, in fact, only conceals a deep and faithful passion for herself.

\* 417 \* The charm of the piece consists in the poetical spirit with which this design is wrought out. The character of the *gracioso* is well drawn and well defined, and, as in most Spanish plays, he is his lord's confidant, and by his shrewdness materially helps on the action. At the opening, after having heard from his master the position of affairs and the humors of the lady, he gives his advice in the following lines, which embody the entire argument of the drama: —

My lord, your case I have discreetly heard,  
And find it neither wonderful nor new, —

<sup>6</sup> In 1664 Molière imitated the "Desden con el Desden" in his "Princesse d'Élide," which was represented at Versailles by the command of Louis XIV, with great splendor, before his queen and his mother, both Spanish princesses. The compliment, as far as the king was concerned in it, was a magnificent one, — on Molière's part it was a failure, and his play is now no longer acted. The original drama of Moreto,

however, is known wherever the Spanish language is spoken, and a good translation of it into German is common on the German stage. Another and different translation in Dohrn's "Spanische Dramen," (Tom II, 1842,) preserving the measures of the original, — rhymes and *asonantes*, — seems to me quite remarkable. In the same volume, too, is an equally good translation of Lope de Vega's "Milagros del Desprecio."

In short, it is an every-day affair.  
 Why, look ye, now ! In my young boyhood, sir, —  
 When the full vintage came and grapes were strewed,  
 Yea, wasted, on the ground, — I had, be sure,  
 No appetite at all. But afterwards,  
 When they were gathered in for winter's use,  
 And hung aloft upon the kitchen rafters,  
 Then nothing looked so tempting half as they ;  
 And, climbing cunningly to reach them there,  
 I caught a pretty fall and broke my ribs.  
 Now, this, sir, is your case, — the very same <sup>7</sup>

There is an excellent scene, in which the Count, perceiving he has made an impression on the lady's heart, fairly confesses his love, while she, who is not yet entirely subdued, is able to turn round and treat him with her accustomed disdain ; from all which he recovers himself with an address greater than her own, protesting his very confession to have been only a part of the show they were by agreement carrying on. But this confirms the lady's passion, which at last becomes uncontrollable, and the catastrophe immediately follows. She pleads guilty to a desperate love, and marries him.

Contemporary with Moreto, and nearly as successful among the earlier writers for the stage, was Francisco \* de Roxas, who flourished during the \* 418 greater part of Calderon's life, and may have survived him. He was born in Toledo in 1607, and in 1641 was made a knight of the Order of Santiago, but when he died is not known. Two volumes of his plays were published in 1640 and 1645, and in the Prologue to the second he speaks of publishing yet a

third, which never appeared; so that we have still only the twenty-four plays contained in these volumes, and a few others that at different times were printed separately.<sup>8</sup> He belongs decidedly to Calderon's school,—unless, indeed, he began his career too early to be a mere follower; and in poetical merit, if not in dramatic skill, takes one of the next places after Moreto. But he is very careless and unequal. His plays entitled "He who is a King must not be a Father" and "The Aspicks of Cleopatra" are as extravagant as almost anything in the Spanish heroic drama; while, on the other hand, "What Women really are" and "Folly rules here" are among the most effective of the class of intriguing comedies.<sup>9</sup> In general, he is most successful when his tone tends towards tragedy.

His best play, and one that has always kept its place on the stage, is called "None below the King." The scene is laid in the troublesome times of Alfonso the Eleventh, and is in many respects true to them. Don Garcia, the hero, is a son of Garci Bermudo, who had conspired against the father of the reigning monarch, and, in consequence of this circumstance, Garcia lives concealed as a peasant at Castañar, near Toledo, very rich, but unsuspected by the government.

<sup>8</sup> From a notice by Vera Tassis prefixed to the first volume of Calderon's *Comedias*, 1685, I infer that a play of Roxas was printed as early as 1635. Both volumes of the *Comedias de Roxas* were reprinted, Madrid, 1680, 4to, and both their *Licencias* are dated on the same day, but the publisher of the first, who dedicates it to a distinguished nobleman, is the same person to whom the second is dedicated by the printer of both *Autos* of Roxas may be found in "Autos, Loas, etc," 1655, and in "Navidad y Corpus Christi Festejados," collected by Pedro de Robles, 1664. But they are no better than those of his contemporaries generally.

Concerning an attempt to assassinate Roxas in 1638, and concerning the probable time of his death, see some curious facts in Schack's *Nachtrage*, p. 90. But it is doubtful, I think, whether this Roxas, to whom Schack refers, was the dramatist.

<sup>9</sup> His "Persiles y Sigismunda" is from Cervantes's novel of the same name. On the other hand, his "Cársarse por vengarse" is plundered, without ceremony, for the story of "Le Mariage de Vengeance," (Gil Blas, Liv. IV. c. 4,) by Le Sage, who never neglected a good opportunity of the sort.

\* In a period of great anxiety, when the king \* 419 wishes to take Algeziras from the Moors, and demands, for that purpose, free contributions from his subjects, those of Garcia are so ample as to attract especial attention. The king inquires who is this rich and loyal peasant; and his curiosity being still further excited by the answer, he determines to visit him at Castañar, *incognito*, accompanied by only two or three favored courtiers. Garcia, however, is privately advised of the honor that awaits him, but, from an error in the description, mistakes the person of one of the attendants for that of the king himself.

On this mistake the plot turns. The courtier whom Garcia wrongly supposes to be the king falls in love with Blanca, Garcia's wife; and, in attempting to enter her apartments by night, when he believes her husband to be away, is detected by the husband in person. Now, of course, comes the struggle between Spanish loyalty and Spanish honor. Garcia can visit no vengeance on a person whom he believes to be his king; and he has not the slightest suspicion of his wife, whom he knows to be faithfully and fondly attached to him. But the remotest appearance of an intrigue demands a bloody satisfaction. He determines, therefore, at once, on the death of his loving wife. Amidst his misgivings and delays, however, she escapes, and is carried to court, whither he himself is, at the same moment, called to receive the greatest honors that can be conferred on a subject. In the royal presence, he necessarily discovers his mistake regarding the king's person. From this moment, the case becomes perfectly plain to him, and his course perfectly simple. He passes instantly into the antechamber. With a single blow his victim is laid at his feet; and he returns,

sheathing his bloody dagger, and offering, as his only and sufficient defence, an account of all that had happened, and the declaration, which gives its name to the play, that “none below the king” can be permitted to stand between him and the claims of his honor.

Few dramas in the Spanish language are more poetical; fewer still, more national in their tone.

\* 420 The character of \* Garcia is drawn with great vigor, and with a sharply defined outline. That of his wife is equally well designed, but is full of gentleness and patience. Even the clown is a more than commonly happy specimen of the sort of parody suitable to his position. Some of the descriptions, too, are excellent. There is a charming one of rustic life, such as it was fancied to be under the most favorable circumstances in Spain’s best days; and, at the end of the second act, there is a scene between Garcia and the courtier, at the moment the courtier is stealthily entering his wife’s apartment, in which we have the struggle between Spanish honor and Spanish loyalty given with a truth and spirit that leave little to be desired. In short, if we set aside the best plays of Lope de Vega and Calderon, it is one of the most effective of the old Spanish theatre.<sup>10</sup>

Roxas was well known in France. Thomas Corneille imitated, and almost translated, one of his plays; and as Scarron, in his “Jodelet,” did the same with “Where there are real Wrongs there is no Jealousy,” the second comedy that has kept its place on the French stage is due to Spain, as the first tragedy and the first comedy had been before it.<sup>11</sup>

<sup>10</sup> “Del Rey abajo Ninguno” has been sometimes printed with the name of Calderon, who might well be content to be regarded as its author, but there

is no doubt who wrote it. It is, however, among the *Comedias Sueltas* of Roxas, and not in his collected works.

<sup>11</sup> T. Corneille’s play is “Don Ber-

Like many writers for the Spanish theatre, Roxas prepared several of his plays in conjunction with others. Franchi, in his eulogy on Lope de Vega, complains of it, and says that a drama thus compounded is more like a conspiracy than a comedy, and that such performances were, in their different parts, necessarily unequal and dissimilar. But this was not the general opinion of his age; and that the complaint is not always well founded, we know, not only from the example of Beaumont and Fletcher, but from the success that has attended the composition of many dramas in France in \*the nineteenth century \* 421 by more than one person. It should not be forgotten, also, that in Spain, where, from the very structure of the national drama, the story was of so much consequence, and where so many of the characters had standing attributes assigned to them, such joint partnerships were more easily carried through with success than they could be on any other stage. At any rate, they were more common there than they have ever been elsewhere.<sup>12</sup>

Alvaro Cubillo, who alludes to Moreto as his contemporary, and who was perhaps known even earlier as a successful dramatist, said, in 1654, that he had already written a hundred plays. But the whole of this great number, except ten published by himself, and a few others that appeared, if we may judge by

trand de Cigarral," (Œuvres, Paris, 1758, 12mo, Tom I p 209,) and his obligations are avowed in the Dedication. Scarron's "Jodelet" (Œuvres, Paris, 1752, 12mo, Tom II p 73) is a spirited comedy, desperately indebted to Roxas. But Scarron constantly borrowed from the Spanish theatre.

<sup>12</sup> Three persons were frequently employed on one drama, dividing its composition among them, according to its

three regular *jornadas*. In the large collection of *Comedias* printed in the latter half of the seventeenth century, in forty-eight volumes, there are, I think, about thirty such plays. Two are by six persons each. One, in honor of the Marquis Cañete, is the work of nine different poets, but it is not in any collection, it is printed separately, and better than was usual, Madrid, 1622, 4to.

his complaints, without his permission, are now lost. Of those he published himself, "The Thunderbolt of Andalusia," in two parts, taken from the old ballads about the "Infantes de Lara," was much admired in his lifetime; but "Marcela's Dolls," a simple comedy, resting on the first childlike love of a young girl, has since quite supplanted it. One of his plays, "El Señor de Noches Buenas," was early printed as Antonio de Mendoza's, but Cubillo at once made good his title to it; and yet, after the death of both, it was inserted anew in Mendoza's works;—a striking proof of the great carelessness long common in Spain on the subject of authorship.

None of Cubillo's plays has high poetical merit, though several of them are pleasant, easy, and natural. The best is "The Perfect Wife," in which the gentle and faithful character of the heroine is drawn with skill, and with a true conception of what is lovely in woman's nature. Two of his religious plays, on the other hand, are more than commonly extravagant and absurd; one of them—"Saint Michael"—\* 422 containing, in the first act, the story \* of Cain and Abel; in the second, that of Jonah; and in the third, that of the Visigoth king, Bamba, with a sort of separate conclusion in the form of a vision of the times of Charles the Fifth and his three successors.<sup>18</sup>

But the Spanish stage, as we advance in Calderon's

<sup>18</sup> The plays of Cubillo that I have seen are,—ten in his "Enano de las Musas" (Madrid, 1654, 4to), five in the Comedias Escogidas, printed as early as 1660, and two or three more scattered elsewhere. The "Enano de las Musas" is a collection of his works, containing many ballads, sonnets, etc., and an allegorical poem on "The Court of the Lion," which, Antonio says, was

published as early as 1625, and which seems to have been liked, and to have gone through several editions. But none of Cubillo's poetry is so good as his plays. See *Prólogo* and *Dedication* to the *Enano*, and *Montalvan's* list of writers for the stage at the end of his "Para Todos." Cubillo was alive in 1660.

life, becomes more and more crowded with dramatic authors, all eager in their struggles for popular favor. One of them was Francisco de Leyba, or Leira, whose "Mutius Scævola" is an absurdly constructed and wild historical play ; while, on the contrary, his "Honor the First Thing" and "The Lady President" are pleasant comedies, enlivened with short stories and apogues, which he wrote with naturalness and point.<sup>14</sup> Another dramatist was Cancer y Velasco, whose poems are better known than his plays, and whose "Muerte de Baldovinos" runs more into caricature and broad farce than was commonly tolerated in the court theatre.<sup>15</sup> And yet others were Antonio Enriquez Gomez, son of a Portuguese Jew, who wrote twenty-two plays, but inserted in his "Moral Evenings with \* the \* 423 Muses"<sup>16</sup> only four, all of little value, except

<sup>14</sup> There are a few of Leyba's plays in a collection published at Madrid, 1826-1834, and in the *Comedias Escogidas*, and I possess a few of them in pamphlets. But I do not know how many he wrote, and I have no notices of his life. He is sometimes called Antonio de Leyba, unless, indeed, there were two of the same surname.

<sup>15</sup> *Obras de Don Gerónimo Cancer y Velasco*, Madrid, 1761, 4to. The first edition is of 1651, and Antonio sets his death at 1655. In a broadside which I possess, issued 24th May, 1781, by the Inquisition at Seville, the "Muerte de Baldovinos" is prohibited "por escandalosa y obscena," and in the Index of 1790, this drama, the "Vandolero de Flandes," and finally the "Obras de Cancer," are all, in separate articles, put under censure. A play, however, which he wrote in conjunction with Pedro Rosete and Antonio Martinez, was evidently intended to conciliate the Church, and well calculated for its purpose. It is called "El Mejor Representante San Gines," and is found in Tom XXIX, 1668, of the *Comedias Escogidas*, (slightly perhaps indebted to Lope's "Fingido Verdadero,") — San Gines being a Roman actor, converted to

Christianity, and undergoing martyrdom in the presence of the spectators in consequence of being called on to act a play written by Polycarp, which was ingeniously constructed so as to defend the Christians. The tradition is absurd enough certainly, but the drama may be read with interest throughout, and parts of it with pleasure. It has a love-intrigue brought in with skill. Cancer, I believe, wrote plays without assistance only once or twice. Certainly, twelve written in conjunction with Moreto, Matos Fragoso, and others, are all by him that are found in the *Comedias Escogidas*. Five *entremeses* by him, printed in 1659, are in a volume in the Bibliothèque de l'Arsenal at Paris, which contains others by Pedro Rosete, Luis Velez, Andres Gil Enriquez, and Antonio Solís.

<sup>16</sup> "Academias Morales de las Musas," Madrid, 4to, 1660, but my copy was printed at Barcelona, 1704, 4to. See, too, in the *Piólogo* to his "San-sion," Ruan, 1656, the titles of his twenty-two plays. He wrote other works, "Politica Angelica," Rohan, 1647, "Luis Dado de Dios," Paris, 1645, etc.

“The Duties of Honor”; — Antonio Sigler de Huerta, who wrote “No Good to Ourselves without Harm to Somebody Else”; — and Zabaleta, who, though he made a satirical and harsh attack upon the theatre, could not refuse himself the indulgence of writing for it.<sup>17</sup>

If we now turn from these to a few whose success was more strongly marked, none presents himself earlier than Fernando de Zarate, a poet who was much misled by the bad taste of his time, though his talent was such that he ought to have resisted it. Thus this eminently Spanish folly is very obvious in his best plays, as, for instance, in his otherwise good drama, “He that talks Most does Least,” and even in his “Presumptuous and Beautiful,” which has continued to be acted down to our own days.<sup>18</sup>

<sup>17</sup> “Flor de las Mejores Comedias,” Madrid, 1652, 4to. Baena, Hijos de Madrid, Tom. III p 227 A considerable number of the plays of Zabaleta may be seen in the forty-eight volumes of the Comedias Escogidas, 1652, etc One of them, “El Hijo de Marco Aurelio,” on the subject of the Emperor Commodus, was acted in 1644, and, as the author tells us, being received with little favor, and complaints being made that it was not founded in truth, he began at once a life of that Emperor, which he calls a translation from Herodian, but which has claims neither to fidelity in its version, nor to purity in its style It remained long unfinished, until one morning in 1664, waking up and finding himself struck entirely blind, he began, “as on an elevation,” to look round for some occupation suited to his solitude and affliction His play had been printed in 1658, in the tenth volume of the Comedias Escogidas, and he now completed the work that was to justify it, and published it in 1666, announcing himself on the title-page as a royal chronicler But it failed, as his drama had failed before it In the “Vexámen de Ingenios” of Cancer,

where the failure of another of Zabaleta’s plays is noticed, (Obras de Cancer, Madrid, 1761, 4to, p 111,) a punning epigram is inserted on his personal ugliness, the amount of which is, that, though his play was dear at the price paid for a ticket, his face would repay the loss to those who should look on it.

<sup>18</sup> The plays of Zarate are, I believe, easiest found in the Comedias Escogidas, where twenty-three or more of them occur, — the earliest in Tom. XIV, 1661, and “Quen habla mas obra menos” in Tom XLIV In the Index Expurgatorius of 1790, p 288, it is intimated that Fernando de Zarate is the same person with Antonio Enríquez Gómez; — a mistake founded, probably, on the circumstance, that a play of Enríquez Gómez, who was of Jewish descent, was printed with the name of Zarate attached to it, as others of his plays were printed with the name of Calderon Amador de los Ríos, Judíos de España, Madrid, 1848, 8vo, p 575. Besides, Schack found an *autograph* play of Zarate in Duran’s collection, (Nachtrage, p 61,) proving, of course, that Zarate was a real person, and the play printed as Zarate’s, which

\* Another of the writers for the theatre at this time was Miguel de Barrios, one of those unhappy children of Israel, who, under the terrors of the Inquisition, concealed their religion, and suffered some of the worst penalties of unbelief from the jealous intolerance which everywhere watched them. His family was Portuguese, but he himself was born in Spain, and served long in the Spanish armies. At last, however, when he was in Flanders, the temptations to a peaceful conscience were too strong for him. He escaped to Amsterdam, and died there in the open profession of the faith of his fathers, about the year 1699. His plays were printed as early as 1665, but the only one worth notice is "The Spaniard in Oran"; longer than it should be, but not without merit.<sup>19</sup>

Diamante was among those who wrote dramas especially accommodated to the popular taste, while Calderon was still at the height of his reputation. Their number is considerable. Two volumes were collected by him and published in 1670 and 1674, and yet many others still remain in scattered pamphlets and in manuscript.<sup>20</sup> They are in all the forms, and in all the

has caused, I suppose, this confusion, is "Lo que obligan los Zelos," and is distinctly claimed as his own by Enriquez Gomez in the *Prólogo* to his "Sanson," which, of course, he would not have done if Zarate were merely his own pseudonyme. All that is said, to prove Zarate and Enriquez Gomez to be the same person, by Castro, in the *Biblioteca de Rivadeneyra*, (Tom. XVII. pp. lxxxix, xc,) goes, therefore, for nothing.

<sup>19</sup> His "Coro de las Musas," at the end of which his plays are commonly added separately, was printed at Brussels in 1665, 4to, and in 1672. In my copy, which is of the first edition, and which once belonged to Mr. Southey, is the following characteristic note in his handwriting. "Among the Lansdowne MSS. is a volume of poems by

this author, who, being a 'New Christian,' was happy enough to get into a country where he could profess himself a Jew." There is a long notice of him in Barbosa, *Biblioteca Lusitana*, Tom. III p. 464, and a still longer one in Amador de los Rios, *Judios de España*, Madrid, 1848, pp. 608, etc.

<sup>20</sup> The "Comedias de Diamante" are in two volumes, 4to, Madrid, 1670 and 1674; but in the first volume eight plays are paged together, and for the four others there is a separate paging, though, as the whole twelve are recognized in the *Tassa* and in the table of contents, they are no doubt all his. There is a MS. play of his in the collection of the Duke of Ossuna, dated May 25, 1656, and he seems to have been alive in 1684. He was born at Madrid in 1626.

varieties of tone, then in favor. Some of them, like "Santa Teresa," are religious. Others are historical, like "Mary Stuart." Others are taken from the old national traditions, like "The Siege of Zamora," which is on the same subject with the second part of Guillen de Castro's "Cid," but much less poetical. Others are \* *zarzuelas*, or dramas chiefly sung, of which the best specimen by Diamante is his "Alpheus and Arethusa," prepared with an amusing *ba* in honor of the Constable of Castile. There are more in the style of the *capa y espada* than in any other. But none of them has any marked merit. The one that has attracted most attention, out of Spain, is "The Son honoring his Father"; a play on the quarrel of the Cid with Count Lozano, which, from a mistake of Voltaire, was long thought to have been the model of Corneille's "Cid," while in fact the reverse is true, since Diamante's play was produced above twenty years after the great French tragedy, and is deeply indebted to it.<sup>21</sup> Like most of the dramatists of his time, Diamante was a follower of Calderon, and inclined to the more romantic side of his character and school; and, like so many Spanish poets of all times, he finished his career in unnoticed obscurity. Of the precise period of his death no notice has been found, but it was probably near the end of the century.

Passing over such writers of plays as Monteser, Ge-

<sup>21</sup> The "Cid" of Corneille dates from 1636, and Diamante's "Honrador de su Padre" is found earliest in the eleventh volume of the *Comedias Escogidas*, licensed 1658. Indeed, it may well be doubted whether Diamante was a writer for the stage so early as 1636, for I find no play of his printed before 1657. Another play on the subject of the Cid, partly imitated from this one of Dia-

mante, and with a similar title, — "Honrador de sus Hijas," — is found in the *Comedias Escogidas*, Tom. XXIII, 1662. Its author is Francisco Polo, of whom I know only that he wrote this drama, whose merit is very small, and whose subject is the marriage of the daughters of the Cid with the Counts of Carrion, and their subsequent ill-treatment by their husbands, etc.

ronymo de Cuellar, and not a few others, who flourished in the latter half of the seventeenth century, we come to a pleasant comedy entitled "The Punishment of Avarice," written by Juan de la Hoz, a native of Madrid, who was made a knight of Santiago in 1653, and Regidor of Burgos in 1657, after which he rose to good offices about the court, and was living there as late as 1709. How many plays he wrote, we are not told; but the only one now remembered is "The Punishment of Avarice." It is founded on the third tale of María de Zayas, which bears the same name, and from which its general outline and all the principal incidents are taken<sup>22</sup>

But the miser's character is \* much more fully and poetically drawn in the \* 426 drama than it is in the story. Indeed, the play is one of the best specimens of character-drawing on the Spanish stage, and may, in many respects, bear a comparison with the "Aulularia" of Plautus, and the "Avare" of Molière.

The sketch of the miser by one of his acquaintance in the first act, ending with "He it was who first weakened water," is excellent; and, even to the last scene, where he goes to a conjurer to recover his lost money, the character is consistently maintained and well developed.<sup>23</sup> He is a miser throughout, and, what is more,

<sup>22</sup> Huerta, who reprints the "Castigo de la Miseria" in the first volume of his "Teatro Hespañol," expresses a doubt as to who is the inventor of the story, Hoz or María de Zayas. But there is no question about the matter. The "Novelas" were printed at Zaragoza, 1637, 4to, and their *Apobacion* is dated in 1635. See, also, Baena's "Hijos de Madrid," Tom. III, p. 271. In the *Prólogo* to Candalmo's plays, (Madrid, Tom. I, 1722,) Hoz is said to have written the third act of Candalmo's "San Bernardo," left unfinished at its author's death in 1704, and Schack

found an autograph play by him dated in 1708. If this were the case, Hoz must have lived to a good old age.

<sup>23</sup> The first of these scenes is taken, in a good degree, from the "Novelas," ed. 1637, p. 86, but the scene with the astrologer is wholly the poet's own, and parts of it are worthy of Ben Jonson. It should be added, however, that the third act of the play is technically superfluous, as the action really ends with the second. But we could not afford to part with it, so full is it of spirit and humor. The tale of María de Zayas is plundered after his fashion — that is,

he is a Spanish miser. The moral is better in the prose tale, as the *intrigante*, who cheats him into a marriage with herself, is there made a victim of her crimes no less than he is; while in the drama she profits by them, and comes off with success at last,—a strange perversion of the original story, for which it is not easy to give a good reason. But in poetical merit there is no comparison between the two.

Juan de Matos Fragoso, a Portuguese, who lived in Madrid at the same time with Diamante and Hoz, and died in 1692, enjoyed quite as much reputation with the public as they did, though he often writes in the very bad taste of the age. But he never printed more than one volume of his dramas, so that they are now to be sought chiefly in separate pamphlets, and in collections made for other purposes than the claims of the individual authors found in them. Those which are

most known are his “Mistaken Experiment,” \* 427 founded on \* the “Impertinent Curiosity” of the first part of *Don Quixote*; his “Fortune through Contempt,” a better-managed dramatic fiction; and his “Wise Man in Retirement and Peasant by his own Fireside,” which is commonly accounted the best of his works.<sup>24</sup>

“The Captive Redeemer,” however, in which he was assisted by another well-known author of his time, Sebastian de Villaviciosa, is on many accounts more interesting and attractive. It is, he says, a true story.

mutilated and abridged — by Scarron, in his “*Chatiment de l’Avarice*”, — *Nouvelles Tragiques*, Paris, 1752, 12mo, Tom I pp 165–205

<sup>24</sup> This play, it should be noted, is much indebted to Lope’s “*Villano en su Rincon*”, and it may be well also to add, that the “*Desprecio Agradecido*,” the second play in Parte XXV. of Lope’s

*Comedias, Çaragoça*, 1647, is published in Vol XXXIX of the *Comedias Escogidas* as the work of Matos, and from that copied first into Garcia Suelto’s collection, and then into Ochoa’s. Matos Fragoso must have been a writer for the stage fifty-nine years at least, for Schack found a MS of one of his plays dated 1634 (Nachtrage, p 92).

It is certainly a heart-rending one, founded on an incident not uncommon during the barbarous wars carried on between the Christians in Spain and the Moors in Africa, — relics of the fierce hatreds of a thousand years.<sup>25</sup> A Spanish lady is carried into captivity by a marauding party, who land on the coast for plunder, and instantly escape with their prey. Her lover, in despair, follows her, and the drama consists of their adventures till both are found and released. Mingled with this sad story, there is a sort of underplot, which gives its name to the piece, and is very characteristic of the state of the theatre and the demands of the public, or at least of the Church. A large bronze statue of the Saviour is discovered to be in the hands of the infidels. The captive Christians immediately offer the money, sent as the price of their own freedom, to rescue it from such sacrilege ; and, at last, the Moors agree to give it up for its weight in gold ; but when the value of the thirty pieces of silver, originally paid for the person of the Saviour himself, has been counted into one scale, it \* is found to \* 428 outweigh the massive statue in the other, and enough is still left to purchase the freedom of the captives, who, in offering their ransoms, had in fact, as they supposed, offered their own lives. With this triumphant miracle the piece ends. Like the other dramas of Fragoso, it is written in a great variety of

<sup>25</sup> I have already noticed plays of Lope and Cervantes that set forth the cruel condition of Christian Spaniards in Algiers, and must hereafter notice the great influence this state of things had on Spanish romantic fiction. But it should be remembered here, that many dramas were founded on it, besides those I have had occasion to mention. One of the most striking is by Moreto, which has some points of re-

semblance to the one spoken of in the text. It is called "El Azote de su Patria," (Comedias Escogidas, Tom XXXIV, 1670,) and is filled with the cruelties of a Valencian renegade, who seems to have been an historical personage. The popular ballads bear testimony to the same state of things Duran, Romancero General, Tom I pp xiv and 136-150.

measures, which are managed with skill, and are full of sweetness.<sup>26</sup>

The last of the good writers for the Spanish stage with its old attributes is Antonio de Solís, the historian of Mexico. He was born on the 18th of July, 1610, in Alcalá de Henares, and completed his studies at the University of Salamanca, where, when only seventeen years old, he wrote a drama. Five years later he had given to the theatre his "Gitanilla," or "The Little Gypsy Girl," founded on the story of Cervantes, or rather on a play of Montalvan borrowed from that story; — a graceful fiction, which has been constantly reproduced, in one shape or another, ever since it first appeared from the hand of the great master. "One Fool makes a Hundred" — a pleasant *figuron* play of Solís, which was soon afterwards acted before the court — has less merit, and is somewhat indebted to the "Don Diego" of Moreto. But, on the other hand, his "Love à la Mode," which is all his own, is among the good plays of the Spanish stage, and furnished materials for one of the best of Thomas Corneille's.

In 1642, Solís prepared, for a festival at Pamplona, — on occasion of the birth of a son to the Viceroy of Navarre, whom Solís was then serving as secretary, — a dramatic \* entertainment on the story

<sup>26</sup> In the *Comedias Escogidas*, there are at least twenty-five plays written wholly or in part by Matos, the earliest of which is in Tom V, 1653. From the conclusion of his "Pocos bastan si son Buenos," (Tom XXXIV, 1670,) and, indeed, from the local descriptions in other parts of it, there can be no doubt that Matos Fragoso was at one time in Italy, and very little that this drama was written at Naples, and acted before the Spanish Viceroy there. One volume of the plays of Matos Fragoso, called the first, was printed at Madrid, 1658, 4to. Other separate plays are in Suelto's collection, but not, I think,

the best of them Villavicosa wrote a part of "Solo el Piadoso es mi Hijo," of "El Letiado del Cielo," of "El Redentor Cautivo," etc. The apologue of the barber, in the second act of the last, is, I think, taken from one of Leyba's plays, but I have it not now by me to refer to, and such things were too common at the time on a much larger scale to deserve notice, except as incidental illustrations of a well-known state of literary morals in Spain. Fragoso's life is in Barbosa, Tom II, pp 695-697. I have eighteen of his plays in separate pamphlets, besides those in the *Comedias Escogidas*.

of Orpheus and Eurydice, in which the tone of the Spanish national theatre is fantastically confounded with the genius of the old Grecian mythology, even more than was common in similar cases ; but the whole ends, quite contrary to all poetical tradition, by the rescue of Eurydice from the infernal regions, and an intimation that a second part would follow, whose conclusion would be tragical ; — a promise which, like so many others of the same sort in Spanish literature, was never fulfilled.

As his reputation increased, Solís was made one of the royal secretaries, and, while acting in this capacity, wrote an allegorical drama, partly resembling a morality of the elder period, and partly a modern masque, in honor of the birth of one of the princes, which was acted in the palace of the Buen Retiro. The title of this wild, but not unpoetical opera is “Triumphs of Love and Fortune”; and Diana and Endymion, Psyche and Venus, Happiness and Adversity, are among its dramatic personages ; though a tone of honor and gallantry is as consistently maintained in it, as if its scene were laid at Madrid, and its characters taken from the audience that witnessed the performance. It is the more curious, however, from the circumstance, that the *loa*, the *entremeses*, and the *saynete*, with which it was originally accompanied, are still attached to it, all written by Solís himself.<sup>27</sup>

In this way he continued, during the greater part of his life, one of the favored writers for the private theatre of the king and the public theatres of the capital ; the dramas he produced being almost uniformly marked

<sup>27</sup> The “Triunfos de Amor y Fortuna” appeared as early as 1660, in Tom XIII of the Comedias Escogidas “Un Bobo hace ciento” is one of the

by a skilful complication of their plots, which were not always original; by a somewhat broad humor; and by a purity of style and harmony of versification very rare in his time. But at last, like many other Spanish poets, he began to think such occupations sinful; and, after much deliberation, he resolved on a life of religious retirement, and submitted to the tonsure.

\* 430 From this time he \* renounced the theatre. He even refused to write *autos sacramentales*, when he was applied to, in the hope that he might be willing to become a successor to the fame and fortunes of his great master; and, giving up his mind to devout meditation and historical studies, seems to have lived contentedly, though in seclusion and poverty, till his death, which happened in 1686. A volume of his minor poems, published afterwards, which are in all the forms then fashionable, has little value, except in a few short dramatic entertainments, several of which are characteristic and amusing.<sup>28</sup>

Later than Solís, but still partly his contemporary, was Francisco Banzes Candamo. He was a gentleman of ancient family, and was born in 1662, in Asturias,—that true soil of the old Spanish cavaliers. His education was careful, if not wise; and he was early sent to court, where he received, first a pension, and afterwards several important offices in the financial administra-

<sup>28</sup> The “Varias Poesias” of Solís were edited by Juan de Goveneche, who prefixed to them an ill-written life of their author, and published them at Madrid, 1692 (4to), but there are also editions of 1716 and 1732. His *Comedias* were first printed in Madrid, 1681, as Tom XLVII of the *Comedias Escogidas*. The “Gitanilla,” of which I have said that it has been occasionally reproduced from Cervantes, is to be found in the “Spanish Gypsy” of Rowley and Middleton, in the “Preciosa,” a pleasant German play by P. A. Wolff,

and in Victor Hugo’s “Notre Dame de Paris”, besides which certain resemblances to it in the “Spanish Student” of Professor Longfellow are noticed by the author Tobin, the author of the “Honey Moon,” who was a lover of Spanish literature, made an analysis of this play of Solís, intending to adapt it to the English stage. But he died young in 1804, and left this, like other literary projects, only in outline. See his *Memoirs* by Miss Benger, 8vo, London, 1820, pp 107, 171,—a graceful tribute of woman’s love.

tion, whose duties, it is said, he fulfilled with good faith and efficiency. But at last the favor of the court deserted him; and he died in 1704, under circumstances of so much wretchedness, that he was buried at the charge of a religious society in the place to which he had been sent in disgrace.

His plays, or rather two volumes of them, were printed in 1722; but in relation to his other poems, a large mass of which he left to the Duke of Alva, we only know, that, long after their author's death, a bundle of them was sold for a few pence, and that an inconsiderable collection of such of them as could be picked up from different sources \* was \* 431 printed in a small volume in 1729.<sup>29</sup> Of his plays, those which he most valued are on historical subjects,<sup>30</sup> such as "The Recovery of Breda" and "For his King and his Lady"; but the most successful was, no doubt, his "Esclavo en Grillos de Oro." He wrote for the theatre, however, in other forms, and several of his dramas are curious, from the circumstance that they are tricked out with the *loas* and *entremeses* which served originally to render them more attractive to the multitude. Nearly all his plots are ingenious, and, though involved, are more regular in their structure than was

<sup>29</sup> Candamo's plays, entitled "Poesías Cómicas, Obras Póstumas," were printed at Madrid, in 1722, in 2 vols., 4to. His miscellaneous poems, "Poesías Lyricas," were published in Madrid, in 18mo, but without a date on the title-page, while the Dedication is of 1729, the *Licencias* of 1720, and the *Fe de Erratas*, which ought to be the latest of all, is of 1710. This, however, is a specimen of the confusion of such matters in Spanish books, a confusion which, in the present instance, is carried into the contents of the volume itself, the whole of which is entitled "Poesías Lyricas," though it contains idyls, epistles, ballads, and part of three cantos of

an epic on the expedition of Charles V. against Tunis, nine cantos having been among the papers left by its author to the Duke of Alva. The life of Candamo, prefixed to the whole, is very poorly written. Huerta (Teatro, Parte III. Tom. I p 196) says he himself bought a large mass of Candamo's poetry, including six cantos of this epic, for two reals, no doubt, a part of the manuscripts left to the Duke. He puts Candamo's death, 8th of September, 1709. The date in the text is from the poor Life prefixed to his *Obras Lyricas*, and is, I think, right.

<sup>30</sup> He boasts of them in the opening of his "Cesar Africano."

common at the time. But his style is swollen and presumptuous, and there is, notwithstanding their ingenuity, a want of life and movement in most of his plays that prevented them from being effective on the stage.

Candamo, however, should be noted as having given a decisive impulse to a form of the drama which was known before his time, and which served at last to introduce the genuine opera; I mean the *zarzuela*, which took its name from that of one of the royal residences near Madrid, where they were first represented with great splendor for the amusement of

Philip the Fourth, by command of his brother \* 432 Ferdinand.<sup>31</sup> They are, in fact, plays \* of various kinds,—shorter or longer; *entremeses* or full-length comedies;—often in the nature of *vaudevilles*, but all in the national tone, and yet all accompanied with music.

The first attempt to introduce dramatic performances with music was made, as we have seen, about 1630, by Lope de Vega, whose eclogue “Selva sin Amor,” wholly sung, was played before the court, with a showy apparatus of scenery prepared by Cosmo Lotti, an Italian architect, and “was a thing,” says the poet, “new in

<sup>31</sup> Ferdinand was the gay and gallant Cardinal Archbishop of Toledo who commanded the armies of Spain in Flanders and presided in her councils there. He died in 1641. (Stirling's *Artists of Spain*, Vol II p 529) He loved the theatre as his brother did, and in these lenten entertainments sought to please him. At first, only airs were introduced into the play, but gradually the whole was sung (Ponz, *Viage de España*, Madrid, 12mo, Tom VI, 1782, p 152 Signorelli, *Storia dei Teatri*, Napol, 1813, 8vo, Tom IX p 194) One of these *zarzuelas*, in which the portions that were sung are distinguished from the rest, is to be

found in the “Ocios de Ignacio Alvarez Pellicer de Toledo,” s 1 1685, 4to, p 26. Its tendency to approach the Italian opera is apparent in its subject, which is “The Vengeance of Diana,” as well as in the treatment of the story, in the theatrical machinery, etc., but it has no poetical merit. A small volume, by Andreas Dávila y Heredia, (Valencia, 1676, 12mo,) called “Comedia sin Música,” is intended to ridicule the beginnings of the opera in Spain, but it is a prose satire, of little consequence in any respect (See Chaps XXIII note 1, XXIV note 38) Nor are two or three other of his trifles any better

Spain.” Short pieces followed soon afterward, *entre-meses*, that were sung in place of the ballads between the acts of the plays, and of which Benavente was the most successful composer before 1645, when his works were first published. But the earliest of the full-length plays that was ever sung was Calderon’s “Púrpura de la Rosa,” which was produced before the court in 1660, on occasion of the marriage of Louis the Fourteenth with the Infanta Maria Theresa,—a compliment to the distinguished personages of France who had come to Spain in honor of that great solemnity, and whom it was thought no more than gallant to amuse with something like the operas of Quinault and Lulli, which were then the most admired entertainments at the court of France.

From this time, as was natural, there was a tendency to introduce singing on the Spanish stage, both in full-length comedies and in farces of all kinds; as may easily be observed in Matos Fragoso, in Solís, and in most of the other writers contemporary with the latter part of Calderon’s career. At last, under the management of Diamante and Candamo, a separate modification of the drama grew up, the subjects for which were generally taken from ancient mythology, like those of the “Circe” and “Arethusa”; and when they were not so taken, as in Diamante’s \*“Birth \* 433 of Christ,” they were still treated in a manner much like that observed in the treatment of their fabulous predecessors.

From this form of the drama to that of the proper Italian opera was but a step, and one the more easily taken, as, from the period when the Bourbon family succeeded the Austrian on the throne, the national characteristics heretofore demanded in whatever ap-

peared on the Spanish stage had ceased to enjoy the favor of the court and the higher classes. As early as 1705, therefore, something like an Italian opera was established at Madrid, where, with occasional intervals of suspension and neglect, it has ever since maintained a doubtful existence, and where, of course, the old *zarzuelas* and their kindred musical farces have been more and more discountenanced, until, in their original forms at least, they have ceased to be heard.<sup>32</sup>

Another of the poets who lived at this time and wrote dramas that mark the decline of the Spanish theatre is Antonio de Zamora, who has sometimes been said to have been originally an actor; who was afterwards in the office of the Indies and in the royal household; and whose dramatic career begins before the year 1700, though he did not die till after 1722, and probably had his principal success in the reign of Philip the Fifth, before whom his plays were occasionally performed in the Buen Retiro, as late as 1744.

Two volumes of his dramas were collected and published, with a solemn dedication and consecration of them to their author's memory, on the ground of rendering unto Cæsar the things which are Cæsar's. They are only seventeen in number, each longer than \* 434 had been common on \* the Spanish stage in its best days, and, in général, very heavy. Those that are on religious subjects sink into farce, with the

exception of “Judas Iscariot,” which is too full of wild horrors to permit it to be amusing. The best of the whole number is, probably, the one entitled “All Debts must be paid at Last,” which is an alteration of Tirso de Molina’s “Don Juan,” skilfully made; — a remarkable drama, in which the tread of the marble statue is heard with more solemn effect than it is in any other of the many plays on the same subject.

But notwithstanding the merit of this and two or three others, especially the “Hechizado por Fuerza,” it must be admitted that Zamora’s plays— of which above forty are extant, and of which many were acted at the court with applause — are very wearisome. They are crowded with long directions to the actors, and imply the use of much imperfect machinery; both of them unwelcome symptoms of a declining dramatic literature. Still, Zamora writes with facility, and shows that, under favorable circumstances, he might have trodden with more success in the footsteps of Calderon, whom he plainly took for his model. But he came too late, and, while striving to imitate the old masters, fell into their faults and extravagances, without giving token of the fresh spirit and marvellous invention in which their peculiar power resides.<sup>33</sup>

Others followed the same direction with even less success, like Pedro Francisco Lanini, Antonio Martinez, Pedro de Rosete, and Francisco de Villegas;<sup>34</sup> but the person who continued longest in the paths opened by Lope and Calderon was Joseph de Cañi-

<sup>34</sup> These and many others, now en-

tirely forgotten, are found in the old collection of *Comedias Escogidas*, published between 1652 and 1704, e.g. of Lanini, nine plays, of Martinez, eighteen, and of Rosete and Villegas, eleven each. zares, a poet of Madrid, born in 1676, who began to write for the stage when he was only fourteen years old, — who was known as one of its most \* 435 \* favored authors for above forty years, pushing his success far into the eighteenth century, — and who died in 1750. His plays are nearly all in the old forms.<sup>35</sup> A few of those on historical subjects are not without interest, such as “The Tales of the Great Captain,” “Charles the Fifth at Tunis,” and “The Suit of Fernando Cortés.” The best of his efforts in this class is, however, “El Picarillo en España,” on the adventures of a sort of Faulconbridge, Frederic de Bracamonte, who claimed that his father had been unjustly deprived of the Canaries, which he had held for John II., as if he were himself their king. But Cañizares, on the whole, had most success in plays founded on character-drawing, introduced a little be-

<sup>35</sup> Two volumes of the plays of Cañizares were collected, but more can still be found separate, and many are lost. In Moratín's list, the titles of above seventy are brought together. Notices of his life are in Baena, Tom III p 69, and in Huerta, Teatro, Parte I. Tom II p 347.

Cañizares was, at one time, a soldier, like so many others of his cultivated and accomplished countrymen, for Spaniards, from the time of Alfonso el Sabio to that of Charles IV, have, it should always be remembered, united, to a degree elsewhere unknown, the practical earnestness that belongs to the lives of statesmen and soldiers with the grace and glory of letters. Garcilasso de la Vega, sacrificed in the south of France, Lope de Vega, fighting in the Armada, Cervantes at Lepanto, Ercilla in the Andes, Caldeón in Catalonia, Mendoza at the Council of Trent, Quevedo at Naples, and a hundred others, vouch for this singular union in a way not to be mistaken or overlooked. They account, too, I think, for many of the imperfections of Spanish literature, and for the frequent failure of its authors to

finish what they had begun, for even many of those who had not grave duties to interrupt or break off their literary aspirations had their thoughts occupied and distracted with other purposes in life, to which they had been trained as to their main duties, rather than to anything letters could offer. The religious element, too, with its severe demands and cruel intolerance, should come into any fair estimate of the difficulties encountered by men of elegant culture and tastes in Spain, with the diversion it necessarily pressed upon their inclinations and lives. Luis de Leon, Villegas, Juan de Avila, Zurita, Morales, and numberless more, are cases in point, if the whole national character were not in fact a consistent exhibition of it. So that it seems to me much more remarkable that Spanish literature became what we now find it to have been, than that some of its departments had so little success, and that so many individuals failed to accomplish what they had begun. It shows a great force of genius in the Spanish people, I think, that they got on at all and made a literature.

fore his time by Moreto and Roxas, and commonly called, as we have noticed, "Comedias de Figuron." His happiest specimens in this class are "The Famous Kitchen-Wench," taken from the story of Cervantes, "The Mountaineer at Court," and "Dómine Lucas," where he drew from the life about him, and selected his subjects from the poor, presumptuous, decayed nobility, with which the court of Madrid was then infested.<sup>36</sup>

Still, with this partial success as a poet, and with a popularity that made him of consequence to the actors, Cañizares shows more distinctly than any of his predecessors or contemporaries the marks of a declining drama. As we turn over the seventy or eighty plays he has left us, we are constantly reminded of the towers and temples of the South of Europe, which, during the Middle Ages, \* were built \* 436 from fragments of the nobler edifices that had preceded them, proving at once the magnificence of the age in which the original structures were reared, and the decay of that of which such relics and fragments were the chief glory. The plots, intrigues, and situations in the dramas of Cañizares are generally taken from Lope, Calderon, Moreto, Matos Fragoso, and his other distinguished predecessors, to whom, not

<sup>36</sup> The "Dómine Lucas" of Cañizares has no resemblance to the lively play with the same title by Lope de Vega, in the seventeenth volume of his *Comedias*, 1621, which, he says in the Dedication, is founded on fact, and which was reprinted in Madrid, 1841, 8vo, with a Preface, attacking, not only Cañizares, but several of the author's contemporaries, in a most truculent manner. The "Dómine Lucas" of Cañizares, however, is worth reading, particularly in an edition where it is accompanied by its two *entremeses*, improperly called *suynetes*, — the whole newly arranged for representation in

the Buen Retiro, on occasion of the marriage of the Infanta María Luisa with the Archduke Peter Leopold, in 1765

The "Dómine Lucas," which attacks awkward slovenly men of letters making high pretensions, has given a nickname to the whole class it ridicules "Así se vió en Roma llamar *Trasones* a todos los valdrones, — *Tartufos* en Francia á todos los hipócritas, — y acá en España en viendo algún estudiantón estrafalarlo le apelidamos, *Domine Lucas*" *Reflexiones sobre la Lección crítica*, ec., por J. P. Forner, Madrid, 1786, p. 43.

without the warrant of many examples on the Spanish stage, he resorted as to rich and ancient monuments, which could still yield to the demands of his age materials such as the age itself could no longer furnish from its own resources.<sup>37</sup>

It would be easy to add the names of not a few other writers for the Spanish stage who were contemporary with Cañizares, and, like him, shared in the common decline of the national drama, or contributed to it. Such were Juan de Vera y Villaroel, Inez de la Cruz, Antonio Tellez de Azevedo, and others yet less distinguished while they lived, and long ago forgotten. But writers like these had no real influence on the character of the theatre to which they attached themselves. This, in its proper outlines, always remained as it was left by Lope de Vega and Calderon, who, by a remarkable concurrence of circumstances, maintained, as far as it was in secular hands, an almost unquestioned control over it, while they lived, and, at their death, had impressed upon it a character which it never lost, till it ceased to exist altogether.<sup>38</sup>

<sup>37</sup> The habit of using too freely the works of their predecessors was common on the Spanish stage from an early period. Cervantes says, in 1617, (Persiles, Lib III c 2,) that some companies kept poets expressly to new-vamp old plays, and so many had done it before him, that Cañizares seems to have escaped censure, though nobody, certainly, had gone so far.

Don Ramon Mesonero Romanos has continued the work he began on the school of Lope de Vega (see *ante*, Chap.

XXI, note 25) by publishing in Rivadeneira's *Biblioteca* (Tom XLVII and XLIX, 1858, 1859) two more volumes of it, coming down to Cañizares. The plays, amounting to above sixty, are, as might be expected from the period, of very unequal merit. But we are glad to have them. The literary notices and alphabetical lists that open each volume are, also, valuable for their facts, but ill-written and showing little judgment or taste.

CHARACTER OF THE SPANISH DRAMA.—THE AUTOR, OR MANAGER — THE WRITERS FOR THE STAGE — THE ACTORS, THEIR NUMBER, SUCCESS, AND CONDITION — PERFORMANCES BY DAYLIGHT.— THE STAGE — THE COURTYARD, MOSQUETEROS, GRADAS, CAZUELA, AND APOSENTOS — THE AUDIENCES — PLAY-BILLS, AND TITLES OF PLAYS — REPRESENTATIONS, BALLADS, LOAS, JORNADAS, ENTREMESES, SAYNETES, AND DANCES — BALLADS DANCED AND SUNG — XACARAS, ZARABANDAS, AND ALEMANAS — POPULAR CHARACTER OF THE WHOLE — GREAT NUMBER OF WRITERS AND PLAYS

THE most prominent, if not the most important, characteristic of the Spanish drama, at the period of its widest success, was its nationality. In all its various forms, including the religious plays, and in all its manifold subsidiary attractions, down to the recitation of old ballads and the exhibition of popular dances, it addressed itself more to the whole people of the country which produced it than any other theatre of modern times. The Church, as we have seen, occasionally interfered, and endeavored to silence or to restrict it. But the drama was too deeply seated in the general favor to be much modified, even by a power that overshadowed nearly everything else in the state; and during the whole of the seventeenth century,— the century which immediately followed the severe legislation of Philip the Second and his attempts to control the character of the stage,— the Spanish drama was really in the hands of the mass of the people, and its writers and actors were such as the popular will required them to be.<sup>1</sup>

<sup>1</sup> *Mariana*, in his treatise “*De Spectaculis*,” Cap. VII, (Tractatus Septem, Coloniae Agrippinæ, 1609, folio,) ear-

At the head of each company of actors was their *Autor*. The name descended from the time of \* 438 Lope de Rueda, \* when the writer of the rude farces then in favor collected about him a body of players to perform what should rather be called his dramatic dialogues than his proper dramas, in the public squares; — a practice soon imitated in France, where Hardy, the “Author,” as he styled himself, of his own company, produced, between 1600 and 1630, about five hundred rude plays and farces, often taken from Lope de Vega, and whatever was most popular at the same period in Spain.<sup>2</sup> But while Hardy was at the height of his success and preparing the way for Corneille, the canon in *Don Quixote* had already recognized in Spain the existence of two kinds of authors, — the authors who wrote and the authors who acted; <sup>3</sup> — a distinction familiar from the time when Lope de Vega appeared, and one that was never afterwards overlooked. At any rate, from that time actors and managers were quite as rarely writers for the stage in Spain as in other countries.<sup>4</sup>

The relations between the dramatic poets and the managers and actors were not more agreeable in Spain than elsewhere. Figueroa, who was familiar with the

churches, or to represent sacred plays anywhere; and that the theatres should be closed on Sundays. But he produced no effect against the popular passion.

<sup>2</sup> For Hardy and his extraordinary career, which was almost entirely founded on the Spanish theatre, see the “Parfaits,” or any other history of the French stage. Corneille, in his “Remarks on Melite,” says that, when he began, he had no guide but a little common sense and the example of Hardy, and a few others no more regular than he was. The example of Hardy led Corneille directly to Spain for materials, and there, as we know, he sought them freely.

<sup>4</sup> Villegas was one of the last of the authors who were managers. He wrote, we are told, fifty-four plays, and died about 1600 (Roxas, Viage, 1614, f 21). After this, the next example of any prominence is Claramonte, who was an *autor* when he wrote for the stage, and died about 1622. The managing *autor* was sometimes the object of ridicule in the play his own company performed, as he is in the “Tres Edades del Mundo” of Luis Velez de Guevara, where he is the *gracioso* *Comedias Escogidas*, Tom XXXVIII, 1672.

subject, says that the writers for the theatre were obliged to flatter the heads of companies, in order to obtain a hearing from the public, and that they were often treated with coarseness and contempt, especially when their plays were read and adapted to the stage in presence of the actors who were to perform them.<sup>5</sup> Solorzano — himself a dramatist — gives similar accounts, and adds the story of a poet, who was not only rudely, but cruelly, abused by \* a company of players, to whose humors their *autor* or manager had abandoned him.<sup>6</sup> And even Lope de Vega and Calderon, the master-spirits of the time, complain bitterly of the way in which they were trifled with and defrauded of their rights and reputation, both by the managers and by the booksellers.<sup>7</sup> At the end of the drama, its author therefore sometimes announced his name, and, with more or less of affected humility, claimed the work as his own.<sup>8</sup> But this was not a custom. Almost uniformly, however, when the audience was addressed at all,— and that was seldom neglected at the conclusion of a drama,—

<sup>7</sup> See the Preface and Dedication of the “Arcadia,” by Lope, as well as other passages noted in his Life; — the letter of Calderon to the Duke of Veragua, — his Life by Vera Tassis, etc. It should be noted, however, that the price of a play was rising. In Lope’s time, as we have seen, (*ante*, p. 270, note 33,) it was five hundred rials, but in Calderon’s time it was eight hundred, even for the first offered by an author and before its merits were known. —

<sup>8</sup> Thus, Mira de Mescua, at the conclusion of “The Death of St Lazarus” (Comedias Escogidas, Tom. IX, 1657, p. 167,) says. —

Here ends the play  
Whose wondrous tale Mira de Mescua wrote  
To warn the many. Pray forgive our faults

And Francisco de Leyba finishes his “Amadis y Niquea” (Comedias Escogidas, Tom. XL, 1675, f 118) with these words —

Don Francis Leyba humbly bows himself,  
And at your feet asks, — not a victor shout, —  
But rather pardon for his many faults

In general, however, as in the “Mayor Venganza” of Alvaro Cubillo, and in the “Caer para levantarse” of Matos, Cancer, and Moreto, the annunciation is simple, and made, apparently, to protect the rights of the author, which, in the seventeenth century, were so little respected.

it was saluted with the grave and flattering title of "Senate."

Nor does the condition of the actors seem to have been one which could be envied by the poets who wrote for them. Their numbers and influence, indeed, soon became imposing, under the great impulse given to the drama in the beginning of the seventeenth century. When Lope de Vega first appeared as a dramatic writer at Madrid, the only theatres he found were two unsheltered court-yards, which depended on such strolling companies of players as occasionally deemed it for their interest to visit the capital. Before he died, there were, besides the court-yards in Madrid,

several theatres of great magnificence in the  
\* 440 royal palaces, and multitudinous \* bodies of

actors, comprehending in all above a thousand persons.<sup>9</sup> And half a century later, at the time of Calderon's death, when the Spanish drama had taken all its attributes, the passion for its representations had spread into every part of the kingdom, until there was hardly a village, we are told, that did not possess some kind of a theatre.<sup>10</sup> Nay, so pervading and uncontrolled was the eagerness for dramatic exhibitions, that, notwithstanding the scandal it excited, secular comedies of a very equivocal complexion were represented by performers from the public theatres in some of the principal monasteries of the kingdom.<sup>11</sup>

Add to this that Manzana (De Spectaculis, c. 7) says that the *entremeses* and other exhibitions

Of course, out of so large a body of actors, all struggling for public favor, some became famous. Among the more distinguished were Agustin de Roxas, who wrote the gay travels of a company of comedians; Roque de Figueroa, Melchor de Villalba, and Rios, Lope's favorites; Pinedo, much praised by Tirso de Molina and Cascales; Alonso de Olmedo and Sebastian Prado, who were rivals for public applause in the time of Calderon; Juan Rana, who was the best comic actor during the reigns of Philip the Third and Philip the Fourth, and amused the audiences by his own extem-  
poraneous wit, delighting Lady Fanshawe, when he was nearly eighty years old; the two Morales and Josefa Vaca, wife of the elder of them; Barbara Coronel, the Amazon, who preferred to appear as a man; Maria de Cordoba, praised by Quevedo and the Count Villamediana; and Maria Calderon, who, as the mother of \* the second Don John of Austria, \* 441 figured in affairs of state, as well as in those of the stage. These and some others enjoyed, no doubt, that ephemeral, but brilliant, reputation which is generally the best reward of the best of their class; and enjoyed it to as high a degree, perhaps, as any persons that have appeared on the stage in more modern times.<sup>12</sup>

between the acts of the plays, performed in the most holy religious houses, were often of a gross and shameless character, — a statement which occurs partly in the same words, in his treatise "De Rege," Lib III c 16. In his "Juegos Publicos," a translation made by himself from his "De Spectaculis," but differing from that work somewhat, he says (c 12) that the grossly indecent Zarabandas were sometimes danced in nunneries during the Corpus Christi. But perhaps the most bold and offensive instance of the misuse of a church for dramatic purposes was when the "Casa Confusa," a very free play of the Count de Lemos, now lost, was acted in the church of San Blas at Lerma before Philip III and his court in 1618, ending with the scandalous and voluptuous dance of the Zarabanda. But, regarded as a body, the Spanish actors seem to have been anything but respectable. In general, they were of a low and vulgar cast in society, — so low, that, for this reason, they were at one period forbidden to have women associated with them.<sup>13</sup> The rabble, indeed, sympathized with them, and sometimes, when their conduct called for punishment, protected them by force from the arm of the law ; but between 1644 and 1649, when their number in the metropolis had become very great, and they constituted no less than forty companies, full of disorderly persons and vagabonds, their character did more than anything else to endanger the privileges of the drama, which with difficulty evaded the restrictions their riotous lives

Pinedo, too, is in Cascales, Tabla III, 1616. One of the best actors of the best period was Sebastian Prado, mentioned above, the same who, as head of a company, went to Paris after the marriage of Louis XIV with the Spanish Infanta, in 1660, and played there twelve years (Chappuzeau, Théâtre Français, 1674, 12mo, pp 213, 214); — one of the many proofs of the fashion and spread of Spanish Literature at that time (C Pellicer, Tom I p 39.) For Juan Rana, or Arana, see Lady Fanshawe's Memoirs, (London, 1829, 8vo, p 236,) and for Pedro Morales, see Navarrete, Vida de Cervantes (p 530) María de Córdova is often mentioned with admiration, especially by

conduct is to be found in its results. Many of them, filled with compunction at their own shocking excesses, took refuge at last in a religious life, like Prado, who became a devout priest, and Francisca Baltasara, who died a hermit, almost in the odor of sanctity, and was afterwards made the subject of a religious play.<sup>15</sup>

They had, besides, many trials. They were obliged to learn a great number of pieces to satisfy the demands for novelty, which were more exacting on the Spanish stage than any other; their rehearsals were severe and their audiences rude. Cervantes says that their life was as hard as that of the Gypsies;<sup>16</sup> and Roxas, who knew all there was to be known on the subject, says that slaves in Algiers were better off than they were.<sup>17</sup>

To all this we must add, that they were poorly paid, and that their managers were almost always in debt. But, like other forms of vagabond life, its freedom from restraints made it attractive to not a few loose persons, in a country like Spain, where it was difficult to find liberty of any sort. This attraction, however, did not last long. The drama fell in its consequence and popularity as rapidly as it had risen. Long before the end of the century, it ceased to encourage or protect such numbers of idlers as were at one time needed to sus-

\* 443 \* During the whole of the successful period of the drama in Spain, its exhibitions took place in the daytime. On the stages of the different palaces, where, when Howell was in Madrid, in 1623,<sup>20</sup> there were regular representations once a week or oftener, it was sometimes otherwise; but the religious plays and *autos*, with all that were intended to be really popular, were represented in broad daylight, — in the winter at two, and in the summer at three, in the afternoon, every day in the week.<sup>21</sup> Till near the middle of the seventeenth century, the scenery and general arrangements of the theatre were probably as good as they were in France when Corneille appeared, or perhaps better; but in the latter part of it, the French stage

The one he saw was acted by the light of six enormous wax *flambeaux* in silver chandeliers of prodigious size and magnificence. The audience, of course, was small and formal, grave and stiff as possible. See

his letter, October 21, 1659, to his sister, Mad de Motteville, in her *Mémoires d'Anne d'Autriche*, ed 1750, Tom V pp 360–362. From 1622 to 1685, plays were constantly acted in some of the palaces before the court, — oftener, I think, on Sundays and Thursdays than on other days. The price paid the actors sounds rather mean for royalty, — two and three hundred rials at first, or from ten to thirteen and a third dollars, — later, more. When the Prince of Wales, afterwards Charles I, was there in 1623, on the madcap expedition with Buckingham, there was especial splendor in the representation of plays before him. Plays were also acted during the progresses or journeys of the King and the Infantes, — once in the Alhambra, and twice on board galleys in the bays of Villafranca and Tarragona, — so great was the passion for the stage in the seventeenth century Schack, *Nachtrage*, 1854, pp 66–76.

was undoubtedly in advance of that at Madrid, and Madame d'Aulnoy makes herself merry by telling her friends that the Spanish sun was made of oiled paper, and that in the play of "Alcina" she saw the devils quietly climbing ladders out of the infernal regions, to reach their places on the stage.<sup>22</sup> Plays that required more elaborate arrangements and machinery were called *comedias de ruido*, — noisy or showy dramas, — and are treated with little respect by Figueroa and Luis Velez de Guevara, because it was thought unworthy of a poetical spirit to depend for success on means so mechanical.<sup>23</sup>

\* The stage itself, in the two principal the- \* 444

the ground of the court-yard, where it was erected,  
and there was no attempt at a separate orchestra, —  
the musicians coming to the forepart of the scene  
whenever they were wanted. Immediately in front  
of the stage were a few benches, which afforded the  
best places for those who bought single tickets, and  
behind them was the unencumbered portion of the  
court-yard, where the common file were obliged to  
stand in the open air. The crowd there was generally  
great, and the persons composing it were called, from  
their standing posture and their rude bearing, *mosque-

plays.<sup>24</sup> One of their body, a shoemaker, who in 1680 reigned supreme in the court-yard over the opinions of those around him, reminds us at once of the critical trunk-maker in Addison.<sup>25</sup> Another, who was offered a hundred rials to favor a play about to be acted, answered proudly, that he would first see whether it was good or not, and, after all, hissed it.<sup>26</sup> Sometimes the author himself addressed them at the end of his play, and stooped to ask the applause of this lowest portion of the audience. But this was rare.<sup>27</sup>

\* 445 \* Behind the sturdy *mosqueteros* were the *gradas*, or rising seats, for the men, and the *cazuela*, or "stewpan," where the women were strictly enclosed, and sat crowded together by themselves. Above all these different classes were the *desvanes* and *aposentos*, or balconies and rooms, whose open, shop-like windows extended round three sides of the court-yard in different stories, and were filled by those persons of both sexes who could afford such a luxury, and who not unfrequently thought it one of so much consequence, that they held it as an heirloom from generation to generation.<sup>28</sup> The *aposentos* were, in fact, com-

In the same way, Antonio de Huerta, speaking of his "Cinco Blancas de Juan Espera en Dios," (*Ibid*, Tom. XXXII, 1669, p 179,) addresses them. —

And should it now a victor cry deserve,  
Señores Mosqueteros, you will here,  
In charity, rouschsafe to give me one, —  
That is, in case the play has pleased you well.

Perhaps we should not have expected such a condescension from Solis, but he stooped to it. At the conclusion of his well-known "Doctor Carlino," (*Comedias*, 1716, p 262,) he turns to them, saying —

And here expires my play. If it has pleased,  
Let the Señores Mosqueteros cry a victor  
At its burial

Calderon did the same at the end of his "Galan Fantasma," but in jest. Everything, indeed, that we know about the *mosqueteros* shows that their influence was great on the theatre in the theatre's best days. In the eighteenth century we shall find it governing everything.

It was deemed a distinction to have free access to the theatre ; and persons who cared little about the price of a ticket struggled hard to obtain it.<sup>30</sup> Those who paid at all paid twice,—at the outer door, where the manager sometimes collected his claims in person, and at the inner one, where an ecclesiastic collected what belonged to the hospitals, under the gentler name of alms.<sup>31</sup> The audiences were often noisy and unjust. Cervantes intimates this, and Lope directly complains of it. Suarez de Figueroa says, that rattles, crackers, bells, whistles, and keys were all put in requisition, \* when it was desired to make an uproar ; \* 446 and Benavente, in a *loa* spoken at the opening of a theatrical campaign at Madrid by Roque, the friend of Lope de Vega, deprecates the ill-humor of all the various classes of his audience, from the fashionable world in the *aposentos* to the *mosqueteros* in the court-yard ; though he adds, with some mock dignity, that he little fears the hisses which he is aware must

<sup>29</sup> Guillen de Castro, “Mal Casados de Valencia,” Jorn. II. It may be worth notice, perhaps, that the traditions of the Spanish theatre are still true to its origin,—*aposentos*, or apartments, being still the name for the boxes; *patio*, or court-yard, that of the pit, and *mosqueteros*, or musketeers, that of the persons who fill the pit, and who still claim many privileges, as the successors of those who stood in the heat of the old court-yard. As to the *cazuela*, Breton de los Hereros, in his spirited

follow such a defiance.<sup>32</sup> When the audience meant to applaud, they cried “*Victor!*” and were no less tumultuous and unruly than when they hissed.<sup>33</sup> In Cervantes’s time, after the play was over, if it had been successful, the author stood at the door to receive the congratulations of the crowd as they came out; and, later, his name was placarded and paraded at the corners of the streets with an annunciation of his triumph.<sup>34</sup>

Cosme de Oviedo, a well-known manager at Granada, was the first who used advertisements for announcing the play that was to be acted. This was about the year 1600. Half a century afterwards, the condition of such persons was still so humble, that one of the best of them went round the city and posted his play-bills himself, which were, probably, written, and not printed.<sup>35</sup> From an early period they seem to have given to acted plays the title which full-length

— that of *comedia famosa*; though we must except from this remark the case of Tirso de Molina, who amused himself with calling more than one of his successful performances “Comedia *sin fama*,”<sup>36</sup> — a play without repute. But this was, in truth, a matter of mere form, soon understood by the public, who needed no especial excitement to bring them to theatrical entertainments, for which they were constitutionally eager. Some of the audience went early to secure good places, and amused themselves with the fruit and confectionery carried round the court-yard for sale, or with watching the movements of the laughing dames who were enclosed within the balustrade of the *cazuela*, and who were but too ready to flirt with all in their neighborhood. Others came late; and if they were persons of authority or consequence, the actors waited for their appearance till the disorderly murmurs of the groundlings compelled them to begin.<sup>37</sup>

At last, though not always till the rabble had been composed by the recitation of a favorite ballad, or by some popular air on the guitars, one of the more respectable actors, and often the manager himself, appeared on the stage, and, in the technical phrase, “threw out the *loa*,” or compliment,<sup>38</sup> — a peculiarly

<sup>36</sup> This title he gave to “Como han de ser los Amigos,” “Amor por Razon de Estado,” and some others of his plays. It may be noted that a full-length play was sometimes called *Gran Comedia*, as twelve such are in Tom XXXI of “Las Mejores Comedias que hasta oy han salido,” Barcelona, 1638. Calderon called his full-length plays *gran comedia*, perhaps because Lope’s had been called *famosa*.

<sup>38</sup> Cigarrales de Toledo, Madrid, 1624, 4to, p 99. There is a good deal of learning about *loas* in Pinciano, “Filosofia

Antigua,” Madrid, 1596, 4to, p 413, and Salas “Tragedia Antigua,” Madrid, 1633, 4to, p 184. Luys Alfonso de Carvallo, in his *Cisne de Apolo*, 1602, f 124, defines the *Loa* thus “Aora le llaman *loa* por loar en el la comedia, el auditorio o festividad en que se hace, mas ya le podremos asi llamar, porque han dado los poetas en alabar alguna cosa como el silencio, un numero, lo negro, lo pequeno y otras cosas en que se quieren señalar y mostrar sus ingenios, aunque todo deve ir ordenado al fin que yo dixe que es, captar la benevolencia y atencion del auditorio.” But after all, as a general idea of the *loa*, Sir Richard Fanshawe is right, when, in his trans-

Spanish form of the prologue, of which we have abundant specimens from the time of Naharro, who \* 448 calls them *intróytos*, \* or overtures, down to the final fall of the old drama. They are prefixed to all the *autos* of Lope and Calderon; and though, in the case of the multitudinous secular plays of the Spanish theatre, the appropriate *loas* are no longer found regularly attached to each, yet we have them occasionally with the dramas of Tirso de Molina, Calderon, Antonio de Mendoza, and not a few others.

The best are those of Agustin de Roxas, whose "Amusing Travels" are full of them, and those of Quiñones de Benavente, found among his "Jests in Earnest." They were in different forms, dramatic, narrative, and lyrical, and on very various subjects and in very various measures. One of Tirso's is in praise of the beautiful ladies who were present at its representation; <sup>39</sup> — one of Mendoza's is in honor of the capture of Breda, and flatters the national vanity upon the recent successes of the Marquis of Spinola; <sup>40</sup> — one by Roxas is on the glories of Seville, where he made it serve as a conciliatory introduction for himself and his company, when they were about to act there; <sup>41</sup> — one by Sanchez is a jesting account of the actors who were to perform in the play that was to follow it; <sup>42</sup> — and one by Benavente was spoken by Roque de Figueroa, when he began a series of repre-

lation of Mendoza's "Querer por solo querer," he speaks of the prologue as called by the Spaniards *loa*, i.e. the praise, because therein the spectators are commended to *curry favor with them*. 1671 Music was freely introduced into the *loas*. Renjifo, ed 1727, p 166.

<sup>40</sup> It gives an account of the reception of the news at the palace, (Obras

sentations at court, and is devoted to a pleasant exposition of the strength of his company, and a boastful announcement of the new dramas they were able to produce.<sup>43</sup>

\* Gradually, however, the *loas*, whose grand \* 449 object was to conciliate the audience, took more and more the popular dramatic form ; and at last, like several by Roxas, Mira de Mescua, Moreto, and Lope de Vega,<sup>44</sup> differed little from the farces that followed them.<sup>45</sup> Indeed, they were almost always fitted to the particular occasions that called them forth, or to the known demands of the audience ; — some of them being accompanied with singing and dancing, and others ending with rude practical jests.<sup>46</sup> They are, therefore, as various in their tone as they are in their forms ; and, from this circumstance, as well as from their easy national humor, they became at last an important part of all dramatic representations.

The first *jornada* or act of the principal performance followed the *loa*, almost as a matter of course, though, in some instances, a dance was interposed ; and in

<sup>43</sup> *Joco-Seria*, 1653, ff 77, 82. In another he parodies some of the familiar old ballads (ff 43, etc.) in a way that must have been very amusing to the *mosqueteros*, a practice not uncommon in the lighter dramas of the Spanish stage, most of which are lost. Instances of it are found in the *entremes* of "Melisenda," by Lope (*Comedias*, Tom I, Valladolid, 1609, p 333), and two burlesque dramas in *Comedias Escogidas*, Tom XLV, 1679, — the first entitled "Traycion en Propria Sangre," being a parody on the ballads of the "Infantes de Lara," and the other entitled "El Amor mas Verdadero," a parody on the ballads of "Durandarte" and "Belarma", — both very extravagant and dull, but showing the tendencies of the popular taste not a whit the less.

<sup>44</sup> These curious *loas* are found in a rare volume, called "Autos Sacramen-

tales, con Quatro Comedias Nuevas y sus Loas y Entiemeses," Madrid, 1655, 4to.

<sup>45</sup> A *loa* entitled "El Cuerpo de Guaidia," by Luis Enriquez de Fonseca, and performed by an amateur company at Naples on Easter eve, 1669, in honor of the queen of Spain, is as long as a *saynete*, and much like one. It is — together with another *loa* and several curious *bayles* — part of a play on the subject of Virgilius, entitled "The Spanish Hannibal," and to be found in a collection of his poems, less in the Italian manner than might be expected from a Spaniard who lived and wrote in Italy. Fonseca published the volume containing them all at Naples, in 1683, 4to, and called it "Ocios de los Estudios", a volume not worth reading, and yet not wholly to be passed over.

others, Figueroa complains that he had been obliged still to listen to a ballad before he was permitted to reach the regular drama which he had come to hear;<sup>47</sup> — so importunate were the audience for what was lightest and most amusing. At the end of the first act, though perhaps preceded by another dance, came the first of the two *entremezes*, — a sort of “crutches,” as the editor of Benavente well calls them, “that were given to the heavy *comedias* to keep them from falling.”

Nothing can well be gayer or more free than these favorite entertainments, which were generally written in the genuine Castilian idiom and spirit.<sup>48</sup> At first, they were farces, or parts of farces, taken from

\* 450 \* Lope de Rueda and his school; but afterwards, Lope de Vega, Cervantes, and the other writers for the theatre, composed *entremezes* better suited to the changed character of the drama in their times.<sup>49</sup> Their subjects were generally chosen from the adventures of the lower classes of society, whose manners and follies they ridiculed; many of the earlier of the sort ending, as one of the Dogs in Cervantes’s dialogue complains that they did too often, with vulgar scuffles and blows.<sup>50</sup> But later, they became more poetical, and were mingled with allegory, song, and dance; taking, in fact, whatever forms and tone were deemed most attractive. They seldom exceeded a few minutes in length, and never had any other purpose than to relieve the atten-

<sup>49</sup> The origin of *entremezes* is dis-

tinctly set forth in Lope’s “Arte Nuevo de hacer Comedias”, and both the first and third volumes of his collection of plays contain *entremezes*, besides which, several are to be found in his Obras Seltas, — almost all of them amusing. The *entremezes* of Cervantes are at the end of his *Comedias*, 1615.

tion of the audience, which it was supposed might have been taxed too much by the graver action that had preceded them.<sup>51</sup> With this action they had, properly, nothing to do ; — though in one instance Calderon has ingeniously made his *entremes* serve as a graceful conclusion to one of the acts of the principal drama.<sup>52</sup>

The second act was followed by a similar *entremes*, music, and dancing ;<sup>53</sup> and after the third, the poetical part of the entertainment was ended with a *saynete* or *bonne bouche*, first so called by Benavente, but differing from the *entremeses* only in name, and written best by Cancer, Deza y Avila, and Benavente himself, — in short, by those who best succeeded in the *entremeses*.<sup>54</sup> Last of all came a national dance, which \* never failed to delight the audience of all classes, and served to send them home in good-humor when the entertainment was over.<sup>55</sup>

Dancing, indeed, was very early an important part of theatrical exhibitions in Spain, even of the religious, and its importance has continued down to the present day. This was natural. From the first intimations of history and tradition in antiquity, dancing was the favorite amusement of the rude inhabitants of the country ;<sup>56</sup> and, so far as modern times are concerned,

<sup>51</sup> A good many are to be found in the "Joco-Seria" of Quiñones de Benavente

<sup>52</sup> "El Castillo de Lindabridus," end of Act I. There is an *entremes* called "The Chestnut Girl," very amusing as far as the spirited dialogue is concerned, but immoral enough in the story, to be found in Chap. 15 of the "Bachiller Trapaza."

<sup>54</sup> C. Pellerer, *Origen*, Tom. I. p. 277. The *entremeses* of Cancer are to be found in his *Obras*, Madrid, 1761, 4to ; and among the *Autos*, etc., 1655, referred to in note 44, — those of Deza y Avila, in his "Donayres de Tersiocre,"

1663, and those of Benavente, in his "Joco-Seria," 1653. The volume of Deza y Avila — marked Vol I., but I think the only one that ever appeared — is almost filled with light, short compositions for the theatre, under the name of *bayles*, *entremeses*, *saynetes*, and *mogigangas*, the last being a sort of *mumming*. Some of them are good, all are characteristic of the state of the theatre in the middle of the seventeenth century.

<sup>56</sup> The *Gaditanæ puellæ* were the most famous, but see, on the whole subject

dancing has been to Spain what music has been to Italy, a passion with the whole population. In consequence of this, it finds a place in the dramas of Enzina, Vicente, and Naharro ; and, from the time of Lope de Rueda and Lope de Vega, appears in some part, and often in several parts, of all theatrical exhibitions. An amusing instance of the slight grounds on which it was introduced may be found in “The Gran Sultana” of Cervantes, where one of the actors says,—

There ne'er was born a Spanish woman yet  
But she was born to dance ,

and a specimen is immediately given in proof of the assertion.<sup>57</sup>

Many of these dances, and probably nearly all of them, that were introduced on the stage, were accompanied with words, and were what Cervantes calls “recited dances.”<sup>58</sup> Such were the well-known \* 452 “Xacaras,” — \* roistering ballads, in the dialect of the rogues, — which took their name from

of the old Spanish dances, the notes to Juvenal, by Rupeiti, Lipsie, 1801, 8vo, Sat XI vv 162–164, and the curious discussion by Salas, “Nueva Idea de la Tragedia Antigua,” 1633, pp 127, 128 Gifford, in his remarks on the passage in Juvenal, (Satires of Decimus Junius Juvenalis, Philadelphia, 1803, 8vo, Vol. II , p 159,) thinks that it refers to “neither more nor less than the *fandango*, which still forms the delight of all ranks in Spain,” and that in the phrase “*testarum creptus*” he hears “the clicking of the castanets, which accompanies the dance”

<sup>57</sup> Jornada III Everybody danced. The Duke of Lerma was said to be the best dancer of his time, being premier to Philip IV , and afterwards a cardinal (Don Quixote, ed. Clemencin, Tom VI , 1839, p 272 ) Philip IV , the Duke's master, too, is said to have been an extraordinary dancer. See Discursos sobre el Arte del Danzado, by Juan Gomez de Blas, 12mo, 1642, cited by Gayangos. Cervantes was evidently

a lover of dancing, and sometimes uses happy phrases about it “Danza como el pensamiento,” he says of a charming little girl in Don Quixote, Parte II c 48 See also the “Gitanilla” in several places

<sup>58</sup> “Danzas *habladas*” is the singular phrase applied to a pantomime with singing and dancing in Don Quixote, Parte II c 20 The *bayles* of Fonseca, referred to in a preceding note (45), are a fair specimen of the singing and dancing on the Spanish stage in the middle of the seventeenth century One of them is an allegorical contest between Love and Fortune , another, a discussion on Jealousy , and the third, a wooing by Peter Crane, a peasant, carried on by shaking a purse before the damsel he would win , — all three in the ballad measure, and none of them extending beyond a hundred and twenty lines, or possessing any merit but a few jests Renjifo says (ed 1727, p 175) that the *bayles* were always short and merry.

the bullies who sung them, and were at one time rivals for favor with the regular *entremeses*.<sup>59</sup> Such, too, were the more famous “Zarabandas”; graceful, but voluptuous dances, that were known from about 1588, and, as Mariana says, received their name from a devil in woman’s shape at Seville, though elsewhere they are said to have derived it from a similar personage found at Guayaquil in America.<sup>60</sup> Another dance, full of mad revelry, in which the audience were ready sometimes to join, was called “Alemana,” probably from its German origin, and was one of those whose discontinuance Lope, himself a great lover of dancing, always regretted.<sup>61</sup> Another was “Don Alonso el Bueno,” so named from the ballad that accompanied it; and yet others were called “El Caballero,” “La Carretería,” “Las Gambetas,” “Hermano Bartolo,” and “La Zapata.”<sup>62</sup>

Most of them were free or licentious in their tendency. Guevara says that the Devil invented them all; and Cervantes, in one of his farces, admits that

<sup>59</sup> Some of them are very brutal, like one at the end of “Crates y Hipparchia,” Madrid, 1636, 12mo; one in the “Enano de las Musas”, and several in the “Ingeniosa Helena”. The best are in Quiñones de Benavente, “Jocoseria,” 1633, and Solis, “Poesías,” 1716. There was originally a distinction between *bayles* and *danzas*, now no longer recognized, — the *danzas* being graver and more decent. See a note of Pellicer to Don Quixote, Parte II. c 48, partly discredited by one of Clementin on the same passage.

<sup>60</sup> Covarrubias, ad verbum *Zarabanda* Pellicer, Don Quixote, 1797, Tom. I pp clu-clvi, and Tom V p 102. There is a list of many ballads that were sung with the *zarabandas* in a curious satire entitled “The Life and Death of La Zarabanda, Wife of Anton Pintado,” 1603, — the ballads being given as a bequest of the deceased lady (C Pellicer, Origen, Tom I. pp. 129-131,

136-138) Lopez Pinciano, in his “Filosofía Antigua Poética,” 1596, pp 418-420, partly describes the *zarabanda*, and expresses his great disgust at its indecency, and in the Preface to Florndo de Castilla, 1588, (see *post*, Chap XXVII, note,) a book is cited, called “La Vida de la Zarabanda, rama publica de Guaiacan. Even the author of the spurious Second Part of the Guzman de Alfarache (Lab III cap 7) is shocked at its voluptuous coarseness.

<sup>61</sup> Dorotea, Acto I sc 8

<sup>62</sup> Other names of dances are to be found in the “Diablo Cojuelo,” Traneo I, where all of them are represented as inventions of the Devil on Two Sticks, but these are the chief. See, also, Covarrubias, Art *Zapato* Figueroa, who published his *Plaça Universal* in 1615, is equally severe on all public dancing, and, after abusing it through two pages, ends thus “En suma es un ejercicio hallado por el Demomo.” f. 200, b.

the Zarabanda, which was the most obnoxious \* 453 to censure, could, indeed, \* have had no better origin.<sup>63</sup> He, however, was not so severe in his judgment on others. He declares that the dances accompanied by singing were better than the *entremeses*, which, he adds disparagingly, dealt only in hungry men, thieves, and brawlers.<sup>64</sup> But whatever may have been individual opinions about them, they occasioned great scandal, and, in 1621, kept their place on the theatre only by a vigorous exertion of the popular will in opposition to the will of the government. As it was, they were for a time restrained and modified ; but still no one of them was absolutely exiled, except the licentious Zarabanda, — many of the crowds that thronged the court-yards thinking, with one of their leaders, that the dances were the salt of the plays, and that the theatre would be good for nothing without them.<sup>65</sup>

Indeed, in all its forms, and in all its subsidiary attractions of ballads, *entremeses* and *saynetes*, music, and dancing, the old Spanish drama was essentially a popular entertainment, governed by the popular will. In any other country, under the same circumstances, it would hardly have risen above the condition in which it was left by Lope de Rueda, when it was the amusement of the lowest classes of the populace. But the Spaniards have always been a poetical people. There is a romance in their early history, and a picturesqueness in their very costume and manners, that cannot be mistaken. A deep enthusiasm runs, like a vein of pure and rich ore, at

<sup>63</sup> Cuevas de Salamanca. There is a curious *bayle entremesado* of Moreto, on the subject of Don Rodrigo and La Cava, in the Autos, etc., 1655, f 92 ; and another, called "El Médico," in the "Ocios de Ignacio Alvarez Pellicer," s 1 1685, 4to, p 51.

the bottom of their character, and the workings of strong passions and an original imagination are everywhere visible among the wild elements that break out on its surface. The same energy, the same fancy, the same excited feelings, which, in the fourteenth, fifteenth, and sixteenth centuries, produced the most various and rich popular ballads of modern times, were not yet stilled or quenched in the seventeenth. The same national character, which, under Saint Ferdinand \* and his successors, drove the Moorish \* 454 crescent through the plains of Andalusia, and found utterance for its exultation in poetry of such remarkable sweetness and power, was still active under the Philips, and called forth, directed, and controlled a dramatic literature which grew out of the national genius and the condition of the mass of the people, and which, therefore, in all its forms and varieties, is essentially and peculiarly Spanish.

Under an impulse so wide and deep, the number of dramatic authors would naturally be great. As early as 1605, when the theatre, such as it had been constituted by Lope de Vega, had existed hardly more than fifteen years, we can easily see, by the discussions in the first part of *Don Quixote*, that it already filled a large space in the interests of the time ; and from the *Prólogo* prefixed by Cervantes to his plays in 1615, it is quite plain that its character and success were already settled, and that no inconsiderable number of its best authors had already appeared. Even as early as this, dramas were composed in the lower classes of society. Villegas tells us of a tailor of Toledo who wrote many ; Guevara gives a similar account of a sheep-shearer at Ecija ; and Figueroa, of a well-known tradesman of Seville ; — all in full accordance with the

representations made in *Don Quixote* concerning the shepherd *Chrisóstomo*, and the whole current of the story and conversations of the actors in the "Journey" of *Roxas*.<sup>66</sup> In this state of things, the number of writers for the theatre went on increasing out of all proportion to their increase in other countries, as appears from the lists given by *Lope de Vega*, in 1630; by *Montalvan*, in 1632, when we find seventy-six dramatic poets living in Castile alone; and by *Antonio*, about 1660. During the whole of this century, therefore, we may regard the theatre as a part of the popular character in Spain, and as having become, in the proper sense of the word, more truly a national theatre than any other that has been produced in modern times.<sup>67</sup>

\* 455 \* It might naturally have been foreseen, that, upon a movement like this, imparted and sustained by all the force of the national genius, any accidents of patronage or opposition would produce little effect. And so in fact it proved. The ecclesiastical authorities always frowned upon it, and sometimes

<sup>67</sup> Two facts may be mentioned as illustrations of the passion of Spaniards for their national drama

The first is, that the wretched captives on the coast of Barbary solaced themselves with it in those vast *Banos* which were then prison-houses at night. One instance of this we have noticed as early as 1575, when *Cervantes* was in *Algiers* (*ante*, Chap XI). Another is noticed as having occurred in 1589 (see *Gallego*, "Criticón" No IV, 1835, p 43). And another shows that, in 1646, they must have been of frequent occurrence at *Tunis*, for the Moorish prince already referred to (Chap XVII. note 30) had been present, as if it were

nothing remarkable, at the representation of such a Spanish play the night before he escaped. Indeed, I have no doubt that the acting of Spanish plays both at *Algiers* and *Tunis* was a common solace of the Christian captives there.

The other fact is, that so many *dramas* were written by persons in the opposite or higher classes of society. Perhaps the most amusing instance of this indulgence is to be found in the case of the *Duque de Estiada*, who lived from 1589 to about 1650, and who says, in his autobiography, that, during his exile, he wrote a considerable number of plays, six *on his own adventures*, — so true was it that everybody from tailors to princes wrote plays upon all sorts of subjects, from the most solemn in the *Scriptures* down to the most frivolous in their own lives. *Memorial Histórico*, Tom XII, Madrid, 1860, p 504.

placed themselves so as directly to resist its progress; but its sway and impulse were so heavy, that it passed over their opposition, in every instance, as over a slight obstacle. Nor was it more affected by the seductions of patronage. Philip the Fourth, for above forty years, favored and supported it with princely munificence. He built splendid saloons for it in his palaces; he wrote for it; he acted in improvised dramas. The reigning favorite, the Count Duke Olivares, to flatter the royal taste, invented new dramatic luxuries, such as that of magnificent floating theatres, constructed by Cosme Lotti, on the sheets of water in the gardens of the Buen Retiro.<sup>674</sup> All royal entertainments seemed in fact, for a time, to take a dramatic tone, or tend to it. But still the popular character of the theatre itself was unchecked and unaffected;—still the plays acted in the royal residences, before the principal persons in the kingdom, were the same with those performed before the populace in the court-yards of Madrid;—and when other times and other princes came, the old Spanish drama left the halls and palaces, where it had been so long flattered, with as little of a \*courtly air as that with which it \* 456 had originally entered them.<sup>68</sup>

<sup>674</sup> Something of the same sort had been done in the preceding reign, when the Duke de Lerma caused a floating stage to be erected on the Tormes, and had the “Casa Confusa” of his son-in-law, the Conde de Lenos, acted on it in presence of Philip III, whose *privado* the Duke de Lerma then was. But the mad folly of the Conde Duque de Olivares on the waters of the Buen Retiro, carried out as it was by the curious inventions of the Florentine architect, undoubtedly surpassed in wasteful and fantastic extravagance anything that could have been undertaken at Salamanca, or wherever else on the Tormes this whimsical exhibition — of which

I have seen only a very slight notice—may have occurred C Pellicer, *Teatro*, Tom II p 135

<sup>68</sup> Mad d'Aulnoy, fresh from the stage of Racine and Molière, then the most refined and best appointed in Europe, speaks with great admiration of the theatres in the Spanish palaces, though she ridicules those granted to the public (*Voyage*, etc., ed 1693, Tom III p 7, and elsewhere) But Mad de Villars, French Ambassador at the same period, who says that she went often with the Queen to these palatial representations, gives a very different account of them “Rien n'est si détestable,” she says in one of her

The same impulse that made it so powerful in other respects filled the old Spanish theatre with an almost incredible number of cavalier and heroic dramas, dramas for saints, sacramental *autos*, *entremeses*, and farces of all names. Their whole amount, at the beginning of the eighteenth century, has been estimated to exceed thirty thousand, of which four thousand eight hundred by unknown authors had been, at one time, collected by a single person in Madrid.<sup>69</sup> Their character and merit were, as we have seen, very various. Still, the circumstance that they were all written substantially for one object and under one system of opinions gave them a stronger air of general resemblance than might otherwise have been anticipated. For it should never be forgotten, that the Spanish drama in its highest and most heroic forms was still a popular entertainment, just as it was in its farces and ballads. Its purpose was, not only to please all classes, but to please all equally ; — those who paid three maravedís, and stood crowded together under a hot sun in the court-yard, as well as the rank and fashion, that lounged in their costly apartments above, and amused themselves hardly less with the motley scene of the audiences in the *patio* than with that of the actors on the stage.<sup>70</sup> Whether the story this

letters, and in another, dated March, 1680, giving an account of a play thus acted at noonday, she says “L'on y mouroit de froid” (Lettres, ed 1760, pp 79 and 81) One way, however, in which the kings patronized the drama was, probably, not very agreeable to the authors, if it were often practised, I mean that of requiring a piece to be acted nowhere but in the royal presence This was the case with Gerónimo de Villayzan's “Sufrir mas por querer mas” *Comedias por Diferentes Autores*, Tom XXV, Zaragoza, 1633, f 145 b

<sup>70</sup> These rooms and balconies, from which the favored and rich witnessed the plays as they were acted, seem early to have been fitted up in a costly manner Antonio Pérez, whose troubles began in 1579, — that is, before the theatre came into the hands of Lope de Vega, — had a “palco” which was fitted up with tapestries, and cost him “treinta reales diarios,” — this luxury being thought of consequence enough to be entered in the inventory of his effects after he had been arrested by order of Philip II — See *post*, Chap. XXXVII

mass of people saw enacted were probable or not, was to them a matter of small consequence. But it was necessary \* that it should be interesting. \* 457 Above all, it was necessary that it should be Spanish ; and therefore, though its subject might be Greek or Roman, Oriental or mythological, the characters represented were always Castilian, and Castilian after the fashion of the seventeenth century,— governed by Castilian notions of gallantry and the Castilian point of honor.

It was the same with their costumes. Coriolanus was dressed like Don John of Austria ; Aristotle came on the stage with a curled periwig and buckles in his shoes, like a Spanish Abbé ; and Madame d'Aulnoy says, the Devil she saw was dressed like any other Castilian gentleman, except that his stockings were flame-colored and he wore horns.<sup>71</sup> But however the actors might be dressed, or however the play might confound geography and history, or degrade heroism by caricature, still, in a great majority of cases, dramatic situations are skilfully produced ; the story, full of bustle and incident, grows more and more urgent as it advances ; and the result of the whole is, that, though we may sometimes have been much offended, we are sorry we have reached the conclusion, and find on looking back that we have almost always been excited, and often pleased.

The Spanish theatre, in many of its attributes and characteristics, stands, therefore, by itself. It takes no cognizance of ancient example ; for the spirit of antiquity could have little in common with materials so modern, Christian, and romantic. It borrowed nothing from the drama of France or of Italy ; for it was

<sup>71</sup> *Relation du Voyage d'Espagne*, ed. 1693, Tom. I. p. 55.

in advance of both when its final character was not only developed, but settled. And as for England, though Shakespeare and Lope were contemporaries, and there are points of resemblance between them which it is pleasant to trace and difficult to explain, still they and their schools, undoubtedly, had not the least influence on each other.<sup>74</sup> The Spanish drama is, therefore, entirely national. Many of its best subjects

are taken from the chronicles and traditions

\* 458 familiar to the audience \* that listened to them,

and its prevalent versification reminded the hearers, by its sweetness and power, of what had so often moved their hearts in the earliest outpourings of the national genius. With all its faults, then, this old Spanish drama, founded on the great traits of the national character, maintained itself in the popular favor as long as that character existed in its original attributes; and even now it remains one of the most striking and one of the most interesting portions of modern literature.

<sup>74</sup> One reason, I suppose, was the hatred of the two nations for each other during the reigns of Elizabeth and James, and those of the Philips. Still it is odd and amusing to compare the "Castelvines y Monteses" of Lope de Vega, published 1647, and the "Bandidos de Verona" of Roxas, 1679, with the "Romeo and Juilet" of Shake-

peare, 1597. There is a curious notice of Lope's play in Grey's Notes on Shakespeare, 1754, Vol II pp 249-262, and a translation of the whole play of Lope, made with skill and taste by F W Cossens, 4to, London, 1869, printed at the Chiswick press, but not published. Unhappily the original was not worth the trouble.

EPIC poetry, from its general dignity and pretensions, is almost uniformly placed at the head of the different divisions of a nation's literature. But in Spain, though the series of efforts in that direction begins early and boldly, and has been continued with diligence down to our own times, little has been achieved that is worthy of memory. The Poem of the Cid is, indeed, the oldest attempt at narrative poetry in the modern languages of Western Europe that deserves the name ; and, composed, as it must have been, above a century before the appearance of Dante, and two centuries before the time of Chaucer, it is to be regarded as one of the most remarkable outbreaks of poetical and national enthusiasm on record. But the few similar attempts that were made at long intervals in the periods immediately subsequent, like those we witness in "The Chronicle of Fernan Gonzalez," in "The Life of Alexander," and in "The Labyrinth" of Juan de Mena, deserve to be mentioned chiefly in order to mark the progress of Spanish culture during the lapse of three centuries. No one of them showed the power of the grand old narrative Poem of the Cid.

At last, when we reach the reign of Charles \* 460 the Fifth, \* or rather, when we come to the immediate results of that reign, it seems as if the national genius had been inspired with a poetical ambition no less extravagant than the ambition for military glory which their foreign successes had stirred up in the masters of the state. The poets of the time, or those who regarded themselves as such, evidently imagined that to them was assigned the task of worthily celebrating the achievements, in the Old World and in the New, which had really raised their country to the first place among the powers of Europe, and which it was then thought not presumptuous to hope would lay the foundation for a universal monarchy.

In the reign of Philip the Second, therefore, we have an extraordinary number of epic or rather narrative poems,—in all above twenty,—full of the feelings which then animated the nation, and devoted to subjects connected with Spanish glory, both ancient and recent,—poems in which their authors endeavored to imitate the great Italian epics, already at the height of their reputation, and fondly believed they had succeeded. But the works they thus produced, with hardly more than a single exception, belong oftener to patriotism than to poetry; the best of them being so closely confined to matters of fact, that they come with nearly equal pretensions into the province of history, while the rest fall into a dull, chronicling style, which makes it of little consequence under what class they may chance to be arranged.

The first of these historical poems is the “Carolea” of Hierónimo Sempere, published in 1560, and devoted to the victories and glories of Charles the Fifth, whose name, in fact, it bears. The author was a merchant,—

a circumstance strange in Spanish literature,— and it is written in the Italian *ottava rima*; the first part, which consists of eleven cantos, being devoted to the wars in Italy, and ending with the captivity of Francis the First; while the second, which consists of nineteen more, contains the contest in Germany, the Emperor's visit to Flanders, and his coronation at Bologna.

\* The whole fills two volumes, and ends abruptly \* 461 with the promise of another, devoted to the capture of Tunis; a promise which, happily, was never redeemed.<sup>1</sup>

The next narrative poem in the order of time was published by Luis de Capata, only five years later. It is the “Carlo Famoso,” devoted, like the last, to the fame of Charles the Fifth, and, like that, more praised than it deserves to be by Cervantes, when he places both of them among the best poetry in Don Quixote's library. Its author declares that he was thirteen years in writing it; and it fills fifty cantos, comprehending above forty thousand lines in octave stanzas. But never was poem avowedly written in a spirit so prosaic. It gives year by year the life of the Emperor, from 1522 to his death at Yuste in 1558; and, to prevent the possibility of mistake, the date is placed at the top of each

<sup>1</sup> “La Carolea,” Valencia, 1560, 2 tom 12mo. The first volume ends with accounts of the city of Valencia, in the course of which he commemorates some of its distinguished families and some of its scholars, particularly Luis Vives. Notices of Sempere are to be found in Ximeno, Tom I p 135, in Fuster, Tom I p 110, and in the notes to Polo's “Diana,” by Cerdá, p. 380.

A poem entitled “Conquista de la Nueva Castilla,” first published at Paris in 1848, 12mo, by J A Sprecher de Bernegg, may, perhaps, be older than the “Carolea.” It is a short narrative

poem, in two hundred and eighty-three octave stanzas, apparently written about the middle of the sixteenth century, by some unknown author of that period, and devoted to the glory of Francisco Pizarro, from the time when he left Panamá, in 1524, to the fall of Atabapla. It was found in the Imperial Library at Vienna, among the manuscripts there, but it seems to have been edited with very little critical care. It does not, however, deserve more than it received. It is wholly worthless,— not better than we can easily suppose to have been written by one of Pizarro's rude followers.

page, and everything of an imaginative nature or of doubtful authority is distinguished by asterisks from the chronicle of ascertained facts. Two passages in it are interesting, one of which gives the circumstances of the death of Garcilasso, and the other an ample account of Torralva, the great magician of the time of Ferdinand and Isabella; — the same person who is commemorated by Don Quixote when he rides among the stars. Such, however, as the poem is, Çapata had great confidence in its merits, and boastfully published it at his own expense. But it was unsuccessful, and he died regretting his folly.<sup>2</sup>

\* 462 \* Diego Ximenez de Ayllon, of Arcos de la Frontera, who served as a soldier under the Duke of Alva, wrote a poem on the history of the Cid, and dedicated it, in 1579, to his great leader. But this, too, was little regarded at the time, and is now hardly remembered.<sup>3</sup> Nor was more favor shown to Hippólico Sanz, a knight of the Order of Saint John, in Malta, who shared in the brave defence of that island against the Turks in 1565, and wrote a poetical history of that

<sup>2</sup> "Carlo Famoso de Don Luis de Çapata," Valencia, 1565, 4to. At the opening of the fiftieth canto, he congratulates himself that he has "reached the end of his thirteen years' journey", but, after all, is obliged to hurry over the last fourteen years of his hero's life in that one canto. For Garcilasso, see Canto XLI, and for Torralva's story, which strongly illustrates the Spanish character of the sixteenth century, see Cantos XXVIII, XXX, XXXI, and XXXII, with the notes of the commentators to Don Quixote, Parte II c. 41. Çapata figured as a knight, I think, at the famous festivities of Bins in 1549. Calvete de Estrella, *Viage, ec., Anveres*, folio, 1552, f. 196.

<sup>3</sup> Antonio (Bib. Nov., Tom. I. p. 323) gives the date and title, and little else. My copy, which is the only one of the poem known to me, is printed at

Alcalá de Henares, 1579, 4to, 149 leaves, double columns. It is dedicated to the great Duke of Alva, under whom its author had served, and consists chiefly of the usual traditions about the Cid, told in rather flowing, but insipid, octave stanzas.

In the Library of the Society of History at Madrid, MS. D. No. 42, is a poem in double *redondillas de arte mayor*, by Fray Gonzalo de Arredondo, on the achievements both of the Cid and of the Count Fernan Gonzalez, the merits of each being nicely balanced in alternate cantos. It is hardly worth notice, except from the circumstance that it was written as early as 1522, when the unused license of Charles V to print it was given. Fray Arredondo is also the author of "El Castillo Inexpugnable y Defensorio de la Fé," Burgos, 1528, fol.

defence, under the name of "La Maltea," which was published in 1582.<sup>4</sup>

Other poems were produced during the same period, not unlike those we have just noticed; — such as Espinosa's continuation of the "Orlando Furioso," which is not entirely without merit; and "The Decade on the Passion of Christ," by Coloma, which is grave and dignified, if nothing else; — both of them in the manner of the contemporary Italian heroic and narrative poems. But neither obtained much regard when it first appeared, and neither of them can now be said to be remembered. Indeed, there is but one long poem of the age of Philip the Second, which obtained an acknowledged reputation from the first, and has preserved it ever since, both at home and abroad; — I mean the "Araucana."<sup>5</sup>

\* Its author, whose personal character is im- \* 463 pressed on every part of his poem, was Alonso

<sup>4</sup> Ximeno, Tom I p 179, and Velazquez, Diez, p 385

<sup>5</sup> Nicolas de Espinosa's second part of the "Orlando Furioso" is better known, as there are editions of it in 1555, 1556, 1557, and 1559, the one of 1556 being printed at Antwerp in 4to. Juan de Coloma's "Década de la Passion," in ten books, *terza rima*, was printed in 1576, 18mo, ff 166, at Caller (Cagliari) in Sardinia, where its author was Viceroy, and on which island this is said to have been the first book that was ever printed. The last statement is, I suppose, not true, or the fact would have been set forth in the license to print granted by Coloma himself, because that license declares formally that the Rev. Nicolas Cañellas, Vicar-General of Caller, had already, with much cost and toil, introduced printing into the island. The manuscript is certified to have been examined and approved by a commission of Cardinals at Rome, — probably a compliment to the high position of the author. The book, of which I have a copy, is neatly printed for the time.

See, also, Rodriguez, Bib. Valentina, pp 251, 252, and Ximeno, Tom I p 175. It is praised by Cervantes in his "Galatea," and is a sort of harmony of the Gospels, not without a dignified movement in its action, and interspersed with narratives from the Old Testament. The story of St. Veronica, (Lib. VII,) and the description of the Madonna as she sees her son surrounded by the rude crowd and ascending Mount Calvary under the burden of his cross, (Lib VIII,) are passages of considerable merit. Coloma says he chose the *terza rima* "because it is the gravest verse in the language, and the best suited to any grave subject." In a poem in the same volume, on the Resurrection, he has, however, taken the octave rhyme, and half a century earlier, the *terza rima* had been rejected by Pedro Fernandez de Villegas, as quite unfitted for Castilian poetry. See *ante*, Vol I p 445, 6, note. There are poems by Coloma in the *Cancionero* of 1554, noticed *ante*, Vol. I. p. 393, note 8

de Ercilla, third son of a gentleman of Biscayan origin, — a proud circumstance, to which the poet himself alludes more than once.<sup>6</sup> He was born in 1533, at Madrid, and his father, a member of the council of Charles the Fifth, was able, from his influence at court, to have his son educated as one of the pages of the prince who was afterwards Philip the Second, and whom the young Ercilla accompanied in his journeys to different parts of Europe between 1547 and 1551. In 1554, he was with Philip in England, when that prince married Queen Mary;<sup>7</sup> and news having arrived there, as he tells us in his poem, of an outbreak of the natives in Chili which threatened to give trouble to their conquerors, many noble Spaniards then at the English court volunteered, in the old spirit of their country, to serve against the infidels.

Among those who presented themselves to join in this romantic expedition was Ercilla, then twenty-

\* 464 one years \* old. By permission of the prince, he says, he exchanged his civil for military service, and for the first time girded on his sword in earnest. But the beginning of the expedition was not auspicious. Aldrete, a person of military experience, who was in the suite of Philip, and under whose standard they had embarked in the enterprise, died on the way; and after their arrival, Ercilla and his friends

<sup>6</sup> In Canto XXVII. he says “Behold the rough soil of ancient Biscay, whence it is certain comes that nobility now extended through the whole land, behold Bermeo, the head of Biscay, surrounded with thorn-woods, and above its port the old walls of the house of Ercilla, a house older than the city itself”

<sup>7</sup> On this occasion there were great rejoicings in Spain, for it was believed that the English heresy was now at an end. At Toledo, in 1555, there was published by Juan del Angulo, *Tratado*

*Primero* of the “Flor de las Solemnies Alegrías que se fizieron en la Imperial Ciudad de Toledo por la Conversión del Reyno de Inglaterra” (4to, ff 31.) The solemnities and frolics of the occasion are described, and the verses in old-fashioned *villancicos* and flowing *redondillas* are given, or at least a part of them, for the *Segundo Tratado* seems never to have been printed. An account of it may be found in the Spanish translation of this History, Tom III pp. 561, 562.

were sent, under the less competent leading of a son of the viceroy of Peru, to achieve the subjugation of the territory of Arauco,—an inconsiderable spot of earth, but one which had been so bravely defended against the Spaniards by its inhabitants as to excite respect for their heroism in many parts of Europe.<sup>8</sup> The contest was a bloody one; for the Araucans were desperate and the Spaniards cruel. Ercilla went through his part of it with honor, meeting the enemy in seven severe battles, and suffering still more severely from wanderings in the wilderness, and from long exposure to the harassing warfare of savages.

Once he was in greater danger from his countrymen and from his own fiery temper than he was, perhaps, at any moment from the common enemy. In an interval of the war, when a public tournament was held in honor of the accession of Philip the Second to the throne, some cause of offence occurred during the jousting between Ercilla and another of the cavaliers. The mimic fight, as had not unfrequently happened on similar occasions in the mother country, was changed into a real one; and, in the confusion that followed, the young commander, who presided at the festival, rashly ordered both the principal offenders to be put to death,—a sentence which he reluctantly changed into imprisonment and exile, though not until after Ercilla had been actually placed on the scaffold for execution.

\* When he was released, he seems to have \* 465 engaged in the romantic enterprise of hunting down the cruel and savage adventurer, Lope de

<sup>8</sup> "Arauco," says Ercilla, "is a small province, about twenty leagues long and twelve broad, which produces the most warlike people in the Indies, and is therefore called The Unconquered State." Its people are still proud of their name. Luis de Belmonte, in his

preface to the play in honor of the Marquis of Cañete, 1622, (noticed *post*), says, when speaking of the smallness of the Araucan territory "Its soil is nourished with the bones of Spaniards. Alexander conquered the east with fewer soldiers than Arauco has cost Chili."

Aguirre; but he did not arrive in the monster's neighborhood till the moment when his career of blood was ended. From this time we know only, that, after suffering from a long illness, Ercilla returned to Spain in 1562, at the age of twenty-nine, having been eight years in America. At first, his unsettled habits made him restless, and he visited Italy and other parts of Europe; but in 1570 he married a lady connected with the great family of Santa Cruz, Doña María de Bazan, whom he celebrates at the end of the eighteenth canto of his poem. About 1576, he was made gentleman of the bedchamber to the Emperor of Germany,—perhaps a merely titular office; and about 1580, he was again in Madrid and in poverty, complaining loudly of the neglect and ingratitude of the king whom he had so long served, and who seemed now to have forgotten him. During the latter part of his life we almost entirely lose sight of him, and know only that he began a poem in honor of the family of Santa Cruz, and that he died as early as 1595.

Ercilla is to be counted among the many instances in which Spanish poetical genius and heroism were one feeling. He wrote in the spirit in which he fought; and his principal work is as military as any portion of his adventurous life. Its subject is the very expedition against Arauco which occupied eight or nine years of his youth; and he has simply called it “*La Araucana*,” making it a long heroic poem in thirty-seven cantos, which, with the exception of two or three trifles of no value, is all that remains of his works. Fortunately, it has proved a sufficient foundation for his fame. But though it is unquestionably a poem that discovers much of the sensibility of genius, it has great defects; for it was written when the elements

of epic poetry were singularly misunderstood in Spain, and Ercilla, misled by such models as the “Carolea” and “Carlo Famoso,” fell easily into serious mistakes.

The first division of the Araucana is, in fact, a versified \* history of the early part of the \* 466 war. It is geographically and statistically accurate. It is a poem, thus far, that should be read with a map, and one whose connecting principle is merely the succession of events. Of this rigid accuracy he more than once boasts; and, to observe it, he begins with a description of Arauco and its people, amidst whom he lays his scene, and then goes on through fifteen cantos of consecutive battles, negotiations, conspiracies, and adventures, just as they occurred. He composed this part of his poem, he tells us, in the wilderness, where he fought and suffered; taking the night to describe what the day had brought to pass, and writing his verses on fragments of paper, or, when these failed, on scraps of skins; so that it is, in truth, a poetical journal, in octave rhymes, of the expedition in which he was engaged. These fifteen cantos, written between 1555 and 1563, constitute the first part, which ends abruptly in the midst of a violent tempest, and which was printed by itself in 1569.

Ercilla intimates that he soon discovered such a description of successive events to be monotonous; and he determined to intersperse it with incidents more interesting and poetical. In his second part, therefore, which was not printed till 1578, we have, it is true, the same historical fidelity in the main thread of the narrative, but it is broken with something like epic machinery; such as a vision of Bellona, in the seventeenth and eighteenth cantos, where the poet witnesses in South America the victory of Philip the Second at

Saint Quentin, the day it was won in France ; — the cave of the magician Fiton, in the twenty-third and twenty-fourth cantos, where he sees the battle of Lepanto, which happened long afterwards, fought by anticipation ;<sup>9</sup> — the romantic story of Tegualda in the twentieth, and that of Glaura in the twenty-fourth : so that, when we come to the end of the second part, — which concludes, again, with needless abruptness, we find that we have enjoyed more poetry than we had in the first, if we have made less rapid progress in the history.

\* 467 \* In the third part, which appeared in 1590, we have again a continuation of the events of the war, though with episodes such as that in the thirty-second and thirty-third cantos, — which the poet strangely devotes to a defence, after the manner of the old Spanish chronicles, of the character of Queen Dido from the imputations cast on it by Virgil, — and that in the thirty-sixth, in which he pleasantly gives us much of what little we know concerning his own personal history.<sup>10</sup> In the thirty-seventh and last, he leaves all his previous subjects, and discusses the right of public and private war, and the claims of Philip the Second to the crown of Portugal ; ending the whole poem, as far as he himself ended it, with touching complaints of his own miserable condition and disappointed hopes, and his determination to give the rest of his life to penitence and devotion.

This can hardly be called an epic. It is an historical

<sup>9</sup> Such visions were, at the time, supposed to be common. Pedro Nicolas Factor, a painter who died in 1583, and who is remarkable for having been canonized, claimed to have had several such, — among the rest one of this same battle of Lepanto, which he saw at Valencia while it was fighting in Greece. *Stirling's Artists*, Vol I pp 368–379.

<sup>10</sup> The accounts of himself are chiefly in Cantos XIII, XXXVI, and XXXVII ; and besides the facts I have given in the text, I find it stated (*Seman Pintoresco*, 1842, p 195) that Ercilla in 1571 received the Order of Santiago, and in 1578 was employed by Philip II on an inconsiderable mission to Saragossa.

poem, partly in the manner of Silius Italicus, yet seeking to imitate the sudden transitions and easy style of the Italian masters, and struggling awkwardly to incorporate with different parts of its structure some of the supernatural machinery of Homer and Virgil. But this is the unfortunate side of the work. In other respects Ercilla is more successful. His descriptive powers, except in relation to natural scenery, are remarkable, and, whether devoted to battles or to the wild manners of the unfortunate Indians, have not been exceeded by any other Spanish poet. His speeches, too, are often excellent, especially the remarkable one in the second canto, given to Colocólo, the eldest of the Caciques, where the poet has been willing to place himself in direct rivalry with the speech which Homer, under similar circumstances, has given to Ulysses in the first book of the *Iliad*.<sup>11</sup> \*And his characters, so far as the \*468 Araucan chiefs are concerned, are drawn with force and distinctness, and lead us to sympathize with the cause of the Indians rather than with that of the invading Spaniards. Besides all this, his genius and sensibility often break through, where we should least expect it, and his Castilian feelings and character still oftener; the whole poem being pervaded with that deep sense of loyalty which was always a chief ingredient in Spanish honor and heroism, and which, in Ercilla, seems never to have been chilled by the ingratitude of the master to whom he devoted his life, and to whose glory he consecrated this poem.<sup>12</sup>

<sup>11</sup> The great praise of this speech by Voltaire, in the *Essay* prefixed to his “*Henriade*,” 1726, first made the Araucana known beyond the Pyrenees, and if Voltaire had read the poem he pretended to criticise, he might have done

something in earnest for its fame (See his *Works*, ed. Beaumarchais, Paris, 1785, 8vo, Tom. X pp 394–401) But his mistakes are so gross as to impair the value of his admiration

<sup>12</sup> The best edition of the Araucana

The Araucana, though one third longer than the Iliad, is a fragment; but, as far as the war of Arauco is concerned, it was soon completed by the addition of two more parts, embracing thirty-three additional cantos,—the work of a poet by the name of Osorio, who published it in 1597. Of its author, a native of Leon, we know only that he describes himself to have been young when he wrote it, and that in 1598 he gave the world another poem, on the wars of the knights of Malta and the capture of Rhodes. His continuation of the Araucana was several times printed, but has long since ceased to be read. Its more interesting portions are those in which the poet relates, with apparent accuracy, many of the exploits of Ercilla among the Indians;—the more absurd are those in which, under the pretext of visions of Bellona, an account is given of the conquest of Oran by Cardinal Ximenes, and that of Peru by the Pizarros, \* 469 neither of which has anything to do with \* the main subject of the poem. Taken as a whole, it is nearly as dull and chronicling as anything of its class that preceded it.<sup>18</sup>

is that of Sancha, Madrid, 1776, 2 tom 12mo, and the most exact life of its author is in Alvarez y Baena, Tom I p. 32 Hayley published an abstract of the poem, with bad translations of some of its best passages, in the notes to his third epistle on Epic Poetry (London, 1782, 4to), but there is a better and more ample examination of it in the "Carakteie der vornehmsten Dichter aller Nationen," Leipzig, 1793, 8vo, Band II Theil I pp 140 and 349. As to the ingratitude of Philip II it is not remarkable. He had no poetical side to his character. Paton tells us he was "enemigo de la poesia." See his address "Al Letor" of the Proverbios Morales de Alonso de Varros, Baeza, 1615. Paton knew what he said

<sup>18</sup> The last edition of the continua-

tion of the Araucana, by Diego de Sainsteban Osorio, of which I have any knowledge, was printed with the poem of Ercilla at Madrid, 1733, folio. Osorio also published "Primera y Segunda Parte de las Gueiras de Malta y Toma de Rodas," Madrid, 1599, 8vo, ff 297. But it is not better than the continuation of the Araucana. There is a copy in the Bibliothèque de l' Arsenal, Paris.

In 1862 there was published a poem not unlike the Araucana, I mean the "Puren Indomito." It was contemporary with the invasion of Arauco and Puren, being a small part of that devoted country, it is, as was Ercilla's poem, an account of the Spanish attempt to conquer it. The author of the "Puren Indomito," was Alvarez de Toledo, a captain in the expedition he

But there is one difficulty about both parts of this poem, which must have been very obvious at the time. Neither shows any purpose of doing honor to the commander in the war of Arauco, who was yet a representative of the great Mendoza family, and a leading personage at the courts of Philip the Second and Philip the Third. Why Osorio should have passed him over so slightly is not apparent; but Ercilla was evidently offended by the punishment inflicted on him after the unfortunate tournament, and took this mode of expressing his displeasure.<sup>14</sup> A poet of Chili,

describes, and his poem, extending to twenty-four cantos and eighteen hundred octave stanzas, is as purely dry narrative as a mere description of facts can make it. It ends abruptly in the middle of a stanza. Being apparently accurate in its dates, it has sometimes been cited as a trustworthy authority in the history of Chili, but it was never published until 1862, when it was printed from a manuscript in the National Library at Madrid, by the house of Frank, in Paris and Leipzig, as the first volume of a "Biblioteca Americana, collection d'ouvrages inédits ou rares," — a series, which, if it is not opened brilliantly, may, it is hoped, be continued.

<sup>14</sup> The injustice, as it was deemed by many courtly persons, of Ercilla to Garcia de Mendoza, fourth Marquis of Cañete, who commanded the Spaniards in the war of Arauco, may have been one of the reasons why the poet was neglected by his own government after his return to Spain, and was certainly a subject of remark in the reigns of Philip III. and IV. In 1613, Christóval Suárez de Figueroa, the well-known poet, published a life of the Marquis, and dedicated it to the profligate Duke of Lerma, then the reigning favorite. It is written with some elegance and some affectation in its style, but is full of flattery to the great family of which the Marquis was a member, and when its author reaches the point of time at which Ercilla was involved in the trouble at the tournament, already noticed, he says "There arose a dif-

ference between Don Juan de Pineda and Don Alonso de Ercilla, which went so far, that they drew their swords. Instantly a vast number of weapons sprang from the scabbards of those on foot, who, without knowing what to do, rushed together and made a scene of great confusion. A rumor was spread, that it had been done in order to cause a revolt, and from some slight circumstances it was believed that the two pretended combatants had arranged it all beforehand. They were seized by command of the general, who ordered them to be beheaded, intending to infuse terror into the rest, and knowing that severity is the most effectual way of insuring military obedience. The tumult, however, was appeased; and as it was found, on inquiry, that the whole affair was accidental, the sentence was revoked. The becoming rigor with which Don Alonso was treated caused the silence in which he endeavored to bury the achievements of Don Garcia. He wrote the wars of Arauco, carrying them on by a body without a head, — that is, by an army, with no intimation that it had a general. Ungrateful for the many favors he had received from the same hand, he left his rude sketch without the living colors that belonged to it, as if it were possible to hide the valor, virtue, forecast, authority, and success of a nobleman whose words and deeds always went together and were alike admirable. But so far could passion prevail, that the account thus given remained in the minds of many as if it were an apocry-

\* 470 therefore, Pedro de Oña, attempted, \* so far as Ercilla was concerned, to repair the wrong, and, in 1596, published his "Arauco Subjugated," in nineteen cantos, which he devoted expressly to the honor of the neglected commander. Oña's success was inconsiderable, but was quite as much as he deserved. His poem was once reprinted; but, though it consists of sixteen thousand lines, it stops in the middle of the events it undertakes to record, and has never been finished. It contains consultations of the infernal powers, like those in Tasso, and a love-story, in imitation of the one in Ercilla; but it is mainly historical, and ends at last with an account of the capture of "that English pirate, Richerte Aquines," — no doubt Sir Richard Hawkins, who was taken in the Pacific in 1594, under circumstances not more unlike those which Oña describes than might be expected in a poetical version of them by a Spaniard.<sup>15</sup>

phal one, whereas, had it been dutifully written, its truth would have stood authenticated to all. For, by the consent of all, the personage of whom the poet ought to have written was without fault, gentle, and of great humanity, and he who was silent in his praise strove in vain to dim his glory." *Hechos de Don Garcia de Mendoza, por Chr Suarez de Figueroa, Madrid, 1613, 4to, p 103*

The theatre seemed especially anxious to make up for the deficiencies of the greatest narrative poet of the country. In 1622, a play appeared, entitled "Algunas Hazañas de las muchas de Don Garcia Hurtado de Mendoza", a poor attempt at flattery, which, on its title-page, professes to be the work of Luis de Belmonte, but, in a sort of table of contents, is ascribed chiefly to eight other poets, among whom are Antonio Mna de Mescua, Luis Velez de Guevara, and Guillen de Castro. Of the "Arauco Domado" of Lope de Vega, printed in 1629, and the humble place assigned in it to Ercilla, I have spoken, *ante*, p 207. To these should be added two others, namely, the "Gobernador

Prudente" of Gaspar de Avila, in Tom. XXI of the *Comedias Escogidas*, printed in 1664, in which Don Garcia arrives first on the scene of action in Chili, and distinguishes his command by acts of wisdom and clemency, and in Tom. XXII, 1665, the "Españoles en Chili," by Francisco Gonzalez de Bustos, devoted in part to the glory of Don Garcia's father, and ending with the impalement of Caupolican and the baptism of another of the principal Indians, each as characteristic of the age as was the homage of all to the Mendoza.

<sup>15</sup> "Arauco Domado, compuesto por el Licenciado Pedro de Oña, Natural de los Infantes de Engol en Chile, etc., impreso en la Ciudad de los Reyes," (Lima,) 1596, 12mo, and Madrid, 1605. Besides which, Oña wrote a poem on the earthquake at Lima in 1599. Antonio is wrong in suggesting that Oña was not a native of America.

Gayangos adds, that in 1639 there was printed at Seville a poem by Oña, entitled "Ignacio de la Cantabria," which is, in fact, a mere life of Saint

But as the marvellous discoveries of the conquerors of America continued to fill the world with their fame, and to claim at home no small part of the interest that had so long been given to the national achievements in \* the Moorish wars, it was natural that \* 471 the greatest of all the adventurers, Hernando Cortés, should come in for his share of the poetical honors that were lavishly scattered on all sides. In fact, as early as 1588, Gabriel Lasso de la Vega, a young cavalier of Madrid, stirred up by the example of Ercilla, published a poem, entitled "The Valiant Cortés," which six years later he enlarged and printed, anew under the name of "La Mexicana"; and in 1599, Antonio de Saavedra, a native of Mexico, published his "Indian Pilgrim," which contains a regular life of Cortés in above sixteen thousand lines, written, as the author assures us, on the ocean, and in seventy days. Both are mere chronicling histories; but the last is not without freshness and truth, from the circumstance that it was the work of one familiar with the scenes he describes, and with the manners of the unhappy race of men whose disastrous fate he records.<sup>16</sup>

In the same year with the "Valiant Cortés" appeared the first volume of the lives of some of the early discoverers and adventurers in America, by Juan de Castellanos, an ecclesiastic of Tunja in the kingdom

Ignatius Loyola, that has no other merit than facile octave verses. The "Arauco Domado" is reprinted in the Biblioteca of Rivadeneyra, Tom XXIX, and there is a notice of Oña in the Preface to that volume, 1854. He wrote his Arauco at Lima.

<sup>16</sup> "Cortés Valeroso, por Gabriel Lasso de la Vega," Madrid, 1588, 4to, and "La Mexicana," Madrid, 1594, 8vo. Tragedies said to be much like those of Virues, and other works, which I have not seen, are also attributed to him.

(Hijos de Madrid, Tom II p 264)  
"El Peregrino Indiano, por Don Antonio de Saavedra Guzman, Viznieto del Conde del Castellar, nacido en Mexico," Madrid, 1599, 12mo. It is in twenty cantos of octave stanzas; and though we know nothing else of its author, we know, by the laudatory verses prefixed to his poem, that Lope de Vega and Vicente Espuñel were among his friends. It brings the story of Cortés down to the death of Guatimozin.

of New Granada; but one who, like many others that entered the Church in their old age, had been a soldier in his youth, and had visited many of the countries, and shared in many of the battles, he describes. It begins with an account of Columbus, and ends, about 1560, with the expedition of Orsua and the crimes of Aguirre, which Humboldt has called the most dramatic episode in the history of the Spanish conquests, and of which Southey has made an interesting, though painful story. Why no more of the poem of Castellanos

was published does not appear. More was \* 472 known to exist; \* and at last the second and third parts were found, and, with the testimony of Ercilla to the truth of their narratives, were published in 1847, bringing their broken accounts of the Spanish conquests in America, and especially in that part of it since known as Colombia, down to about 1588. The whole, except the conclusion, is written in the Italian octave stanza, and extends to nearly ninety thousand lines, in pure, fluent Castilian, which soon afterwards became rare; but in a chronicling spirit, which, though it adds to its value as history, takes from it all the best characteristics of poetry.<sup>17</sup>

Other poems of the same general character followed. One on the discovery and settlement of La Plata is by Centenera, who shared in the trials and sufferings of the original conquest,—a long, dull poem, in twenty-eight cantos, full of credulity, and yet not without value as a record of what its author saw and learned

<sup>17</sup> The poem of Castellanos is singularly enough entitled "*Elegias de Vá-  
rones Ilustres de Indias*," and we have some reason to suppose it originally consisted of four parts (Antonio, Bib Nov, Tom I, p. 674.) The first was printed at Madrid, 1589, 4to, but the second and third, discovered, I believe,

in the National Library of that city, were not published till they appeared in the fourth volume of the *Biblioteca de Aribau*, Madrid, 1847, 8vo. *Elegias* seems to have been used by Castellanos in the sense of *eulogies*. Of their author the little we know is told by himself.

in his wild adventures. It contains, in the earlier parts, much irrelevant matter concerning Peru, and is throughout a strange mixture of history and geography, ending with three cantos devoted to "Captain Thomas Candis, captain-general of the queen of England," in other words, Thomas Cavendish, half gentleman, half pirate, whose overthrow in Brazil, in 1592, Centenera thinks a sufficiently glorious catastrophe for his long poem.<sup>18</sup> Another similar work on an expedition into New \*Mexico was written by \*473 Gaspar de Villagra, a captain of infantry, who served in the adventures he describes, and published his account in 1610, after his return to Spain. But both belong to the domain of history rather than to that of poetry.<sup>19</sup>

No less characteristic of the national temper and

<sup>18</sup> "Argentina, Conquista del Rio de la Plata y Tucuman, y otros Sucesos del Peru," Lisboa, 1602, 4to. There is a love-story in Canto XII, and some talk about enchantments elsewhere, but, with a few such slight exceptions, the poem is evidently pretty good geography, and the best history the author could collect on the spot. I know it only in the reprint of Barcia, who takes it into his collection entirely for its historical claims. Figueroa (*Plaça Universal*, 1615, f. 345, b) calls Captain Cavendish "Candi," and puts him and "Ricarte Aquines"—Sir Richard Hawkins—with Dragut and other Barbary pirates, who were so much hated in Spain.

One thing has much struck me in this and all the poems written by Spaniards on their conquests in America, and especially by those who visited the countries they celebrate. It is, that there are no proper sketches of the peculiar scenery through which they passed, though much of it is among the most beautiful and grand that exists on the globe, and must have been filling them constantly with new wonder. The truth is, that, when they describe woods and rivers and mountains, their descrip-

tions, often eloquent, would as well fit the Pyrenees or the Guadalquivir as they do Mexico, the Andes, or the Amazon. Perhaps this deficiency is connected with the same causes that have prevented Spain from ever producing a great landscape painter. At any rate, it is a strong contrast to the state of English literature, where two of the most remarkable productions of modern times, resting in no small degree on descriptions of nature, are to be traced to the connection of England and America,—I mean the "Tempest" and "Robinson Crusoe." And yet neither Shakespeare nor Defoe ever visited the scenery their genius peopled with such marvellous creations. (See *post*, Chap. XXXI, near the end, on descriptive poetry.)

<sup>19</sup> "La Conquista del Nuevo Mexico, por Gaspar de Villagra," was printed at Alcalá in 1610, 8vo. It is in thirty-four cantos of blank verse, with a coarse portrait of the author prefixed, giving his age as fifty-five. There must be more than thirteen thousand dull verses, in which history and pagan machinery are mixed up in the wildest way. I have seen it only in the Bibliothèque de l'Arsenal, Paris.

genius than these historical and heroic poems were the long religious narratives in verse produced during the same period and later. To one of these — that of Coloma on "The Passion of Christ," printed in 1576 — we have already alluded. Another, "The Universal Redemption," by Blasco, first printed in 1584, should also be mentioned. It fills fifty-six cantos, and contains nearly thirty thousand lines, embracing the history of man from the creation to the descent of the Holy Spirit, and reading in many parts like one of the old Mysteries.<sup>20</sup> A third poem, by Mata, not unlike the last, extends through two volumes, and is devoted to the glories of Saint Francis and five of his followers; a collection of legends in octave stanzas, put together without order or effect, the first of which sets forth the meek Saint Francis in the disguise of a knight-errant.

None of the three has any value.<sup>21</sup>

\* 474 \* The next in the list, as we descend, is one of the best of its class, if not the very best. It is the "Monserrate" of Virues, the dramatic and lyric poet, so much praised by Lope de Vega and Cervantes. The subject is taken from the legends of the Spanish Church in the ninth century. Garin, a hermit living

<sup>20</sup> "Universal Redencion de Francisco Hernandez Blasco," Toledo, 1584, 1589, 4to, Madrid, 1609, 4to, Alcalá, 1612. He was of Toledo, and claims that a part of his poem was a revelation to a nun. A Second Part, by his brother Luis Hernandez Blasco, still longer, appeared in 1613, at Alcalá, which I have never seen. Gayangos says it is in twenty-five cantos, making five thousand eight hundred octave stanzas, or more than fifty thousand lines.

<sup>21</sup> "El Cavallero Assisio, Vida de San Francisco y otros Cinco Santos, por Gabriel de Mata," Tom I., Bilbao, 1587, with a woodcut of St Francis on the title-page, as a knight on horseback

and in full armor, Tom II., 1589, 4to. A third volume was promised, but it never appeared. The five saints are St Anthony of Padua, Sta Buenaventura, St Luis the Bishop, Sta Bernadina, and Sta Clara, all Minorites. St Anthony preaching to the fishes, whom he addresses (Canto XVII.), as *hermanos peces*, is very quaint.

Gayangos notices an allegorical poem of Mata, entitled "Cantos Morales," which was printed at Valladolid in 1594, and of which he gives extracts, that approach nearer to poetry than anything in the Life of St Francis. It is in thirteen cantos, each of which has a long prose exposition of its moral meaning.

on the desolate mountain of Monserrate, in Catalonia, is guilty of one of the grossest and most atrocious crimes of which human nature is capable. Remorse seizes him. He goes to Rome for absolution, and obtains it only on the most degrading conditions. His penitence, however, is sincere and complete. In proof of it, the person he has murdered is restored to life, and the Madonna, appearing on the wild mountain where the unhappy man had committed his crime, consecrates its solitudes by founding there the magnificent sanctuary which has ever since made the Monserrate holy ground to all devout Spaniards.

That such a legend should be taken by a soldier and a man of the world as a subject for poetry would hardly have been possible in the sixteenth century in any country except Spain. But many a soldier there, even in our own times, has ended a life of excesses in a hermitage as rude and solitary as that of Garin;<sup>22</sup> and in the time of Philip the Second, it seemed nothing marvellous that one who had fought at the battle of Lepanto, and who, by way of distinction, was commonly called “the Captain \* Virues,” should \* 475 yet devote the leisure of his best years to a poem on Garin’s deplorable life and revolting adventures. Such, at least, was the fact. The “Monserrate,” from the moment of its appearance, was successful. Nor has its success been materially diminished at any

<sup>22</sup> In a hermitage on a mountain near Córdova, where about thirty hermits lived in stern silence and subjected to the most cruel penances, I once saw a person who had served with distinction as an officer at the battle of Trafalgar, and another who had been of the household of the first queen of Ferdinand VII. The Duke de Rivas and his brother, Don Angel, — now (1862) wearing the title himself, but more distinguished as a poet, and for his eminent merits in

the diplomatic and military service of his country, than for his high rank, — who led me up that rude mountain, and filled a long and beautiful morning with strange sights and adventures and stories, such as can be found in no country but Spain, assured me that cases like those of the Spanish officers who had become hermits were still of no infrequent occurrence in their country. This was in 1818.

period since. It has more of the proper arrangement and proportions of an epic than any other of the serious poems of its class in the language; and in the richness and finish of its versification, it is not surpassed, if it is equalled, by any of those of its age. The difficulties Virues had to encounter lay in the nature of his subject and the low character of his hero; but in the course of twenty cantos, interspersed with occasional episodes, like those on the battle of Lepanto, and the glories of Monserrate, these disadvantages are not always felt as blemishes, and, as we know, have not prevented the "Monserrate" from being read and admired in an age little inclined to believe the legend on which it is founded.<sup>23</sup>

The "Benedictina," by Nicholas Bravo, was published in 1604, and seems to have been intended to give the lives of Saint Benedict and his principal followers, in the way in which Castellanos had given the lives of Columbus and the early American adventurers, but was probably regarded rather as a book of devotion for the monks of the brotherhood, in which the author held a high place, than as a book of poetry. Certainly, to the worldly, that is its true character. Nor can any other than a similar merit be assigned to two poems for which the social position of their author, Valdivielso, insured a wider temporary reputation.

<sup>23</sup> Of Virues a notice has been already given, (*ante*, p. 64,) to which it is only necessary to add here that there are editions of the Monserrate of 1588, 1601, 1602, 1609, and 1805, the last (Madrid, 8vo) with a Preface written, I think, by Mayans y Siscar. A poem by Francisco de Ortega, on the same subject, appeared about the middle of the eighteenth century, in small quarto, without date, entitled "Origen, Antiguedad é Invencion de nuestra Señora de Monserrate." It is entirely worth-

less. Not so the "Azucena Silvestre" of Zorrilla, 1845, which is a graceful version of the same legend.

In the "Jahrbuch für Rörschansche und Englische Literatur," (Berlin, 1860, pp. 139–163,) is an excellent life of Virues, and a judicious and tasteful criticism of his works, by the Baron von Munch-Bellinghausen, which I should have been glad to have received earlier, — before I had printed my account of the dramas of Virues, in Chap. VIII. of this Period.

The first is on the history of Joseph, the husband of Mary, written, apparently, \* because \* 476 Valdivielso himself had received in baptism the name of that saint. The other is on the peculiarly sacred image of the Madonna, preserved by a series of miracles from contamination during the subjugation of Spain by the Moors, and ever since venerated in the cathedral of Toledo, to whose princely archbishop Valdivielso was attached as a chaplain. Both of these poems are full of learning and of dulness, enormously long, and comprehend together a large part of the history, not only of the Spanish Church, but of the kingdom of Spain.<sup>24</sup>

Lope's religious epic or narrative poems, of which we have already spoken, appeared at about the same time with those of Valdivielso, and enjoyed the success that attended whatever bore the name of the great popular author of his age. But better than anything of this class produced by him was the "Christiada" of Diego de Hojeda, printed in 1611, and taken in a slight degree from the Latin poem with the same title by Vida, but not enough indebted to it to impair the author's claims to originality. Its subject is very simple. It opens with the Last Supper, and it closes with the

<sup>24</sup> "La Benedictina de F. Nicolas Bravo," Salamanca, 1604, 4to. Bravo was a professor at Salamanca and Madrid, and died in 1648, the head of a rich monastery of his order in Navarre (Antonio, Bib. Nov., Tom. II, p. 151). Of Valdivielso I have spoken, *ante*, Chap. XXI. His "Vida, etc. de San Josef," printed 1607 and 1647, makes above seven hundred pages in the edition of Lisbon, 1615, 12mo., and his "Sagrario de Toledo," Barcelona, 1618, 12mo., fills nearly a thousand, — both in octave stanzas, as are nearly all the poems of their class. The San Josef is reprinted in the Biblioteca de Rivedreyra, Tom. XXIX., 1854. The

"Exposicion parafrastica del Psalterio" exists, I think, only in the edition of Madrid, 1623, 4to.

Before the Benedictina, I might have noticed the "Historia de San Ramon de Peñafort," ec., "en coplas Castellanas," by Vicente Miguel de Moradell, Barcelona, 1603, of which I found a copy in the Bibliothèque de l'Arsenal at Paris, but it is among the poorest of the devout poems of the period, though the language is not wanting in purity. I might, also, notice "La Divina Semana," — a poem on the Creation, divided into seven days, by Joan Dossi, (Barcelona, 1610, 12mo, ff. 248,) — but it is too poor

Crucifixion. The episodes are few and appropriate, except one,— that in which the dress of the Saviour in the garden is made an occasion for describing all human sins, whose allegorical history is represented as if woven with curses into the seven ample folds of the mantle laid on the shoulders of the expiatory \* 477 victim, who thus \* bears them for our sake.

The vision of the future glories of his Church granted to the sufferer is, on the contrary, happily conceived and well suited to its place ; and still better are the gentle and touching consolations offered him in prophecy. Indeed, not a little skill is shown in the general structure of the poem, and its verse is uncommonly sweet and graceful. If the characters were drawn with a firmer hand, and if the language were always sustained with the dignity its subject demands, the “Christiada” would stand deservedly at the side of the “Monserrate” of Virues. Even after making this deduction from its merits, no other religious poem in the language is to be placed before it.<sup>25</sup>

In the same year, Alonso Diaz, of Seville, published a pious poem on another of the consecrated images of the Madonna ; and afterwards, in rapid succession, we have heroic poems, as they are called, on Loyola, and on the Madonna, both by Antonio de Escobar ;— one on the creation of the world, by Azevedo, but no more an epic than the “Week” of Du Bartas, from which it is imitated ;— one on the story of Tobias, by Caudi-

<sup>25</sup> “La Christiada de Diego de Hojeda,” Sevilla, 1611, 4to, reprinted in Rivedeneyra’s “Biblioteca,” Tom XVII, 1851. It has the merit of having only twelve cantos, and, if this were the proper place, it might well be compared with Milton’s “Paradise Regained” for its scenes with the devils, and with Klopstock’s “Messiah” for the scene of the crucifixion. Of the author we

know only that he was a native of Seville, but went young to Lima, in Peru, where he wrote this poem, and where he died at the head of a Dominican convent founded by himself (Antonio, Bib Nov, Tom I p 289). There is a *refacimento* of the “Christiada,” by Juan Manuel de Berriozabal, printed Madrid, 1841, 18mo, in a small volume, not, however, an improvement on the original.

villa Santaren ;— and one on “The Brotherhood of the Five Martyrs of Arabia,” by Rodriguez de Vargas ; the last being the result of a vow to two of their number, through whose intercession the author believed himself to have been cured of a mortal disease. But all these, and all of the same class that followed them, — the “David” of Uziel, — Calvo’s poem on “The Virgin,” — Salgado’s on St. Nicolas de Tolentino, — Vivas’s “Life of Christ,” — Juan Dávila’s “Passion of the Man-God,” — the “Samson” of Enriquez Gomez, — the “St. Thomas” of Diego Saenz, — another heroic poem on Loyola, by Camargo, — and another “Christiad,” by Encisso, — which, taken \*to\* 478 together, bring the list down to the end of the century, — add nothing to the claims or character of Spanish religious narrative poetry, though they add much to its cumbersome amount.<sup>26</sup>

<sup>26</sup> “Poema Castellano de nuestra Señora de Aguas Santas, por Alonso Diaz,” Seville, 1611, cited by Antonio (Bib. Nov., Tom. I p. 21) — “San Ignacio de Loyola, Poema Heróico,” Valladolid, 1613, 8vo, and “Historia de la Virgen Madre de Dios,” 1608, afterwards published with the title of “Nueva Jerusalén Maria,” Valladolid, 1625, 18mo, both by Antonio de Escobar y Mendoza, and both the work of his youth, since he lived to 1668 (Ibid., p. 115.) The last of these poems, my copy of which is of the fourth edition, absurdly divides the life of the Madonna according to the twelve precious stones that form the foundations of the New Jerusalem in the twenty-first chapter of the Revelation, each *fundamento*, as the separate portions or books are called, being subdivided into three cantos, and the whole filling above twelve thousand lines of octave stanzas, which are not always without merit, though they generally have very little — “Creacion del Mundo de Alonso de Azevedo,” Roma, 1615, 12mo, pp. 270, praised by Rosell in the Preface to Rivadeneyra’s collection, Vol. XXIX, where it is reprinted. — “Historia de Tobias, Poema por el

Licenciado Caudivilla Santaren de Astorga,” Barcelona, 1615, 12mo It makes about twelve hundred octave stanzas, of very pure Castilian (the author boasting that he was of Toledo, which he calls “patria nna,” c. xi), but still I find no notice of it, and know no copy of it except my own — “La Verdadela Hermandad de los Cinco Martires de Arabia, por Damian Rodriguez de Vargas,” Toledo, 1621, 4to It is very short for the class to which it belongs, containing only about three thousand lines, but it is hardly possible that any of them should be worse — “David, Poema Heróico del Doctor Jacobo Uziel,” Venetia, 1624, pp. 440, a poem in twelve cantos, on the story of the Hebrew monarch whose name it bears, written in a plain and simple style, evidently imitating the flow of Tasso’s stanzas, but without poetical spirit, and in the ninth canto absurdly bringing a Spanish navigator to the court of Jerusalem — “La Mejor Muger Madre y Virgen, Poema Sacro, por Sebastian de Nieve Calvo,” Madrid, 1625, 4to It ends in the fourteenth book with the victory of Lepanto, which is attributed to the intercession of the Madonna and the

\* 479 \* Of an opposite character to these religious poems are the purely, or almost purely, imaginative and romantic poems of the same period, whose form yet brings them into the same class. Their number is not large, and nearly all of them are connected more or less with the fictions which Ariosto, in the beginning of the sixteenth century, had thrown up like brilliant fireworks into the Italian sky, and which had drawn to them the admiration of all Europe, and especially of all Spain. There a translation of the "Orlando Furioso," poor indeed, but popular, had been published by Urrea before 1550. An imitation soon followed, — the one already alluded to as made by Es-

virtue of the rosary. — "El Santo Milagroso Angustinianno San Nicolas de Tolentino," Madrid, 1628, 4to, by Fr Fernando Camargo y Salgado, praised by Gayangos — "Giandezas Divinas, Vida y Muerte de nuestro Salvador, etc., por Fr Duran Vivas," found in scattered papers after his death, and arranged and modernized in its language by his grandson, who published it (Madrid, 1643, 4to), a worthless poem, more than half of which is thrown into the form of a speech from Joseph to Pontius Pilate — "Pasion del Hombre Dios, por el Maestro Juan Dávila," Leon de Francia, 1661, folio, written in the Spanish *décimas* of Espinol, and filling about three-and-twenty thousand lines, divided into six books, which are subdivided into *estancias*, or resting-places, and these again into cantos — "Sanson Nazareno, Poema Eróico, por Ant Enriquez Gomez," Ruan, 1656, 4to, thoroughly infected with Gongorism, as is another poem by the same author, half narrative, half lyrical, called "La Culpa del Primer Peregrino," Ruan, 1644, 4to — "San Ignacio de Loyola, Poema Heróico, escrivialo Hernando Dominguez Camargo," 1666, 4to, a native of Santa Fé de Bogotá, whose poem, filling nearly four hundred pages of octave rhymes, is a fragment published after his death — "La Thomasiada al Sol de la Iglesia y su Doctor Santo Thomas de Aquino, ec., por El Padre Fray Diego Saenz," Guatemala,

1667, 4to, ff 161, a life of Thomas of Aquinas, in various verse, but, as one of the *aprovaciones* says, "it is composed of solid and massive theology" — "La Christiada, Poema Sacro y Vida de Jesu Christo, que escrivió Juan Francisco de Enciso y Monçon," Cadiz, 1694, 4to; deformed, like almost everything of the period when it appeared, with the worst taste — To these might be added two poems by Alonso Martin Braones; — one called "Epitome de los Triunfos de Jesus," Sevilla, 1686, 4to, and the other "Epitome de las Glorias de María," Sevilla, 1689, 4to. Each consists of exactly five hundred octave stanzas, very dull, but not in a style so obscure as was then common. The first repeats two hundred and fifty times the name of Jesus, and the last repeats as often the name of Mary, facts which their author announces as the chief merits of his poems

But if any one desires to know how numerous are the narrative poems of Spain, he needs only to read over the "Catalogo de Poemas Castellanos heroicos, religiosos, historicos, fabulosos y satiricos," prefixed by Don Cayetano Rosell to Vol XXIX of Rivadeneyra's Biblioteca, 1854. There are nearly three hundred of them, and although, after the Italian masters, and especially Tasso, became known in Spain, there were many attempts made to imitate them, yet not one strictly epic poem was produced, except Prince Esquilache's.

pinosa in 1555. It is called “The Second Part of the Orlando, with the True Event of the Famous Battle of Roncesvalles, and the End and Death of the Twelve Peers of France.” But at the very outset its author tells us that “he sings the great glory of Spaniards, and the overthrow of Charlemagne and his followers,” adding significantly, “This history will relate the truth, and not give the story as it is told by that Frenchman, Turpin.” Of course, we have, instead of the fictions to which we are accustomed in Ariosto, the Spanish fictions of Bernardo del Carpio and the rout of the Twelve Peers at Roncesvalles,—all very little to the credit of Charlemagne, who, at the end, retreats, disgraced, to Germany. But still, the whole is ingeniously connected with the stories of the “Orlando Furioso,” and carries on, to a considerable extent, the adventures of the personages who are its heroes and heroines.

Some of the fictions of Espinosa, however, are very extravagant and absurd. Thus, in the twenty-second \* canto, Bernardo goes to Paris and over- \* 480 throws several of the paladins; and in the thirty-third, whose scene is laid in Ireland, he disenchants Olympia and becomes king of the island;—both of them needless and worthless innovations on the story of Bernardo, as it comes to us in the old Spanish ballads and chronicles. But in general, though it is certainly not wanting in giants and enchantments, Espinosa’s continuation of the Orlando is less encumbered with impossibilities and absurdities than the similar poem of Lope de Vega; and, in some parts, is very easy and graceful in its story-telling spirit. It ends with the thirty-fifth canto, after going through above fourteen thousand lines in *ottava rima*; and yet,

after all, the conclusion is abrupt, and we have an intimation that more may follow.<sup>27</sup>

<sup>27</sup> "Segunda Parte de Orlando," etc., por Nicolas Espinosa, Zaragoza, 1555, 4to, Anveres, 1556, 4to, etc. The Orlando of Ariosto, translated by Urrea, was published at Lyons in 1550, folio, (the same edition, no doubt, which Antonio gives to 1556,) and is treated with due severity by the curate in the scrutiny of Don Quixote's library, and by Clemencin in his commentary on that passage (Tom I p 120) Among the other faults of this translation it omits several passages in the original, adds others, and deals much too freely with the whole. Ex gr in Canto III forty-five stanzas are cut down to two, and the canto itself made part of the second, so that there is a change in the numbering of the cantos after this to the last, which Urrea makes the forty-fifth, while Ariosto has forty-six. In Canto XXIV he does not translate Ariosto's disparagement of the famous gift of Constantine to the Pope, out of fear, I suppose, of the Inquisition. In Canto XXXV he adds seventy stanzas in honor of Spain. And so on

Gayangos notes two other translations of the Orlando, one in prose by Diego Vazquez de Contreras in 1585, and the other in verse, indeed, but in verse which, from his account of it, is much like prose, by Hernando de Alcozer, and which was published in 1550, probably, I think, after Urrea's

Not connected with the preceding poems by their subjects, but, from their general style of versification, belonging to the same class, are several serious rhymed books of chivalry, three of which should be slightly noticed.

Of the first I have seen only a single copy. I found it in the Imperial Library at Vienna, which is uncommonly rich in old Spanish books, chiefly in consequence of an acquisition made between 1670 and 1675 of a curious and valuable collection which seemed to have been made in Madrid by an amateur—the Marques de Cábrega—who lived in the period preceding. The poem to which I refer is entitled "Libro primero de los famosos hechos del Príncipe Celidon de Iberia por Gonçalo Gomez de Luque, natural de la Ciudad de Cordoba" (Alcalá, 1583, 4to.) It is a wild tale of chivalry in verse, be-

ginning with the marriage of Altello, Prince of Spain, to Aurelia, daughter of Aurelius the Emperor of Constantinople, and extends through forty books and above four thousand five hundred octave stanzas of extravagant and uninteresting adventures. In the Prólogo the author calls it "*pequeñuela obra*," and at the end promises a continuation, which, happily, never appeared. The language is good,—almost as good as he boasts it to be, when he says —

Canto blandos versos que corriendo  
Van con pie delicado e sonoro

The next is the "Florando de Castilla, Lauro de Cavalleros," ec., (Alcalá, 1588, 4to, ff 168,) in ottava rima. It is by the Licentiate Hieronymo de Huerta, afterwards physician to Philip IV, and author of several works noted by Antonio. The Florando is an account of a Spanish cavalier descended from Hercules, who, after giving himself up to an effeminate and luxurious life, is roused by his great ancestor, in a dream, to become a wandering knight so fair, and after travelling through many countries and encountering the usual number of adventures with discourteous adversaries, giants, and enchanters, achieves his destiny, and the whole ends as might have been foreseen, though somewhat abruptly. Gayangos praises it for its poetry, and pronounces it "*obra no vulgar*." Antonio says it was translated into Latin, but does not say the Latin version was printed (N. Ant., Bib. Nov., Tom I p 587, and Mayans y Siscar, Cartas de Varios Autores, Tom II, 1773, p 36.) It is reprinted in the Biblioteca de Autores Españoles, (Tom. XXXVI, 1855,) and is in thirteen cantos, making about four hundred octave stanzas. It seems to me to be a poor romance, in imitation of Ariosto. In the Preface to the reprint of 1855, Huerta is said to have been born in 1573; but as the *aprovaçion* of Ercilla to the Florando is dated June 27, 1587, making him only fourteen years old when his *privilegio* was granted, I suppose there is some mistake in the matter. Huerta wrote several other works, but the one to which his name may best be trusted is, I think, a translation of Pliny's Natural History, of which parts were published

\* But no more came from the pen of Espinosa. \* 481  
 Others, however, continued the same series of fictions, if they did not take up the thread where he left it. An Aragonese nobleman, Martin de Bolea, wrote an "Orlando Enamorado"; — and Garrido de Villena of Alcalá, who, in 1577, had made known to his countrymen the "Orlando Innamorato" of Boiardo, in a Spanish dress, published, six years afterwards, his "Battle of Roncesvalles"; \* a poem which \* 482 was followed, in 1585, by one of Agustín Alonso, on substantially the same subject. But all of them are now neglected or forgotten.<sup>28</sup>

in 1599 and 1603, but I have a copy of the whole printed in 1624 and 1629, in two volumes, folio. It is written in vigorous Spanish, and was no doubt an important contribution to the intellectual resources of his country, but the illustrations that accompany it in the form of miserable woodcuts show how imperfect was the state of science at that time in Spain, and how much it needed more than Pliny or Huerta could do for it.

The third of these poetical Romances is not unlike the two others. At any rate it is quite as grave and quite as extravagant. It is entitled "Genealogia de la Toledana discreta," (Alcalá, 1604,) and is only the First Part, as announced by its author, Eugenio Martínez, who dedicates it to his native city, Toledo. It begins in England, which, he says, is "poblada de Española y Griega gente," and his purpose, announced in his Prólogo, is "to give an account of all the illustrious houses in Spain." But he fills thuty-four books and about three thousand octave stanzas with a congeries and confusion of stories and adventures, which concern only imaginary personages, and have no relation to any known families either in Spain or in any other country of the world. The poem gets its name from a Toledan princess, Sacridea, who is found in England in the third canto, calling for help from all true cavaliers against her cousin, who seeks to usurp her royal rights; but she is not more prominent afterwards than several of the other figures, who appear and dis-

appear, it is not easy to tell why. The style is better, I think, than that of the "Celdon de Iberia," — the verse flowing and the language pure, — and it seems to have enjoyed some success, for I find editions noted as of 1599 and 1608. But I have never seen any copy of it, except my own, which is of 1604. How long the "Toledana discreta" would have been, if the author had continued it as he begins, it is impossible to conjecture, for, as he does not reach his subject in this First Part, he might have gone on in the same way forever, and found no end in wandering mazes lost. He, however, may have stopped, as Antonio intimates, from taking a religious turn, for he printed a poem entitled "Vida y Martirio de Santa Inez," Alcalá, 1592, written after the Toledana.

II p. 54, and Gayangos *ad loc.*) — The "Orlando Enamorado" of Boiardo is by Francisco Garrido de Villena, 1577, and the "Verdadero Suceso de la Batalla de Roncesvalles" is by the same, 1583 (Antonio, Bib. Nov., Tom. I p. 428) — "Historia de las Hazañas y Hechos del Invencible Caballero Bernardo del Carpio, por Agustín Alonso," Toledo, 1585 (Felicíer (Don Quixote, Tom. I p. 58, note) says he had seen one copy of this book, and Clemencín says he never saw any. — I have never met with either of those referred to in this note.

Not so the “*Angélica*” of Luis Barahona de Soto, or, as it is commonly called, “The Tears of Angelica.” The first twelve cantos were published in 1586, and received by the men of letters of that age with an extraordinary applause, which has continued to be echoed and re-echoed down to our own times. Its author was a physician in an obscure village near Seville, but he was known as a poet throughout Spain, and praised alike by Diego de Mendoza, Silvestre, Herrera, Cetina, Mesa, Lope de Vega, and Cervantes,— the last of whom makes the curate hasten to save “The Tears of Angelica” from the flames, when Don Quixote’s library was carried to the court-yard, crying out, “Truly, I should shed tears myself, if such a book had been burnt; for its author was one of the most famous poets, not only of Spain, but of the whole world.” All this admiration, however, was extravagant; and in Cervantes, who more than once steps aside from the subject on which he happens to be engaged to praise Soto, it seems to have been the result of a sincere personal friendship.

The truth is, that the *Angelica*, although so much praised, was never finished or reprinted, and is now rarely seen and more rarely read. It is a continuation of the “*Orlando Furioso*,” and relates the story of the heroine after her marriage, down to the time when she recovers her kingdom of Cathay, which had been violently wrested from her by a rival queen. It is extravagant in its adventures, and awkward in its machinery, especially in whatever relates to Demogorgon and

the agencies under his control. But its chief  
\* 483 fault is its dulness. Its \* whole movement is as  
far as possible unlike the brilliant life and gay-  
ety of its great prototype; and, as if to add to the

wearisomeness of its uninteresting characters and languid style, one of De Soto's friends has added to each canto a prose explanation of its imagined moral meanings and tendency, which, in a great majority of cases, it seems impossible should have been in the author's mind when he wrote the poem.<sup>29</sup>

Of the still more extravagant continuation of the "Orlando" by Lope de Vega, we have already spoken ; and of the fragment on the same subject by Quevedo, it is not necessary to speak at all. But the "Bernardo" of Balbuena, which belongs to the same period, must not be overlooked. It is one of the two or three favored poems of its class in the language ; written in the fervor of the author's youth, and published in 1624, when his age and ecclesiastical honors made him doubt whether his dignity would permit him any longer to claim it as his own.

It is on the constantly recurring subject of Bernardo del Carpio ; but it takes from the old traditions only the slight outline of that hero's history, and then fills up the space between his first presentation at the court of his uncle, Alfonso the Chaste, and the death of Roland at Roncesvalles, with enchantments and giants, travels through the air and over the sea, in countries known and in countries impossible, amidst adventures as wild as the fancies of Ariosto, and more akin to his free and joyous spirit than anything else of the sort in the language. Many of the descriptions are rich and

<sup>29</sup> "Primera Parte de la Angélica de Luis Barahona de Soto," Granada, 1586, 4to. My copy contains a MS. license to reprint from it, dated July 15, 1805 ; but, like many other projects of the sort in relation to old Spanish literature, this one was not carried through. A notice of De Soto is to be found in Sedano (Parnaso, Tom II, p. xxxi), but the pleasantest idea of him and of his agree-

able social relations is to be gathered from a poetical epistle to him by Chustóval de Mesa (Rimas, 1611, f. 200), — from several poems in Silvestre (ed. 1599, ff. 325, 333, 334), — and from the notices of him by Cervantes in his "Gatalea," and in the Don Quixote, (Parte I c. 6, and Parte II c. 1,) together with the facts collected in the two last places by the commentators.

beautiful ; worthy of the author of “The Age of Gold” and “The Grandeur of Mexico.” Some of the \* 484 episodes are \* full of interest in themselves, and happy in their position. Its general structure is suited to the rules of its class,—if rules there be for such a poem as the “Orlando Furioso.” And the versification is almost always good ;—easy where facility is required, and grave or solemn, as the subject changes and becomes more lofty. But it has one capital defect. It is fatally long,—thrice as long as the Iliad. There seems, in truth, as we read on, no end to its episodes, which are involved in each other till we entirely lose the thread that connects them ; and as for its crowds of characters, they come like shadows, and so depart, leaving often no trace behind them, except a most indistinct recollection of their wild adventures.<sup>30</sup>

NARRATIVE POEMS ON SUBJECTS FROM CLASSICAL ANTIQUITY — BOSCAN, MEN<sup>doza</sup>, SILVESTRE, MONTEMAYOR, VILLEGRAS, PEREZ, CEPEDA, GÓNGORA, VILLAMEDIANA, PANTALEON, AND OTHERS — NARRATIVE POEMS ON MISCELLANEOUS SUBJECTS — SALAS, SILVEIRA, ZARATE — MOCK-HEROIC NARRATIVE POEMS — ALDANA, CHRESPO, VILLAVICIOSA AND HIS MOSQUEA — SERIOUS HISTORICAL POEMS — CORTEREAL, RUFO, VEZILLA CASTELLANOS AND OTHERS, MESA, CUEVA, EL PINCIANO, MOSQUERA, VASCONCELLOS, FERREIRA, FIGUEROA, ESQUILACHE — FAILURE OF NARRATIVE AND HEROIC POETRY ON NATIONAL SUBJECTS

THERE was little tendency in Spain, during the sixteenth and seventeenth centuries, to take subjects for the long narrative and heroic poems that were so characteristic of the country from ancient history or fable. Shorter and in general more interesting tales, imbued with the old national spirit, were, however, early attempted out of classical materials. The "Leander" of Boscan, a gentle and pleasing poem, in about three thousand lines of blank verse, is to be dated as early as 1540, and is one of them. Diego de Mendoza, Boscan's friend, followed, with his "Adonis, Hippomenes, and Atalanta," but in the Italian octave stanza, and with less success. Silvestre's "Daphne and Apollo" and his "Pyramus and Thisbe," both of them written in the old Castilian verse, are of the same period and more attractive, but they were unfortunate in their effects, if they provoked the poems on "Pyramus and Thisbe" by Montemayor and by Antonio Villegas, or that on "Daphne" by Perez, in the second book of his continuation of the "Diana."<sup>1</sup>

<sup>1</sup> The story of "Leander" fills a large part of the third book of Boscan and Garcilasso's Works in the original edition of 1543 — Diego de Mendoza's

\* 486 \* The more formal effort of Romero de Cepeda on "The Destruction of Troy," published in 1582, is not better than the rest. It has, however, the merit of being written more in the old national tone than almost anything of the kind ; for it is in the ancient stanza of ten short lines, and has a fluency and facility that make it sound sometimes like the elder ballad poetry. But it extends to ten cantos, and is, after all, the story to which we have always been accustomed, except that it makes *Aeneas* — against whom the Spanish poets and chroniclers seem to have entertained a thorough ill-will — a traitor to his country and an accomplice in its ruin.<sup>2</sup>

"Adonis," which is about half as long, and on which the old statesman is said to have valued himself very much, is in his Works, 1610, pp 48–65 — Silvestre's poems, mentioned in the text, with two others, something like them, make up the whole of the second book of his Works, 1599 — Montemayor's "Pyramus," in the short ten-line stanzas, is at the end of the "Diana," in the edition of 1614 — The "Pyramus" of Ant de Villegas is in his "Inventario," 1577, and is in *terza rima*, which, like the other Italian measures attempted by him, he manages awkwardly — The "Daphne" of Perez is in various measures, and better deserves reading in old Bart Yong's version of it than it does in the original — I might have added to the foregoing the "Pyramus and Thisbe" of Castillejo, (Obras, 1598, ff 68, etc,) pleasantly written in the old Castilian short verse, when he was twenty-eight years old, and living in Germany, but it is so much a translation from Ovid, that it hardly belongs here.

<sup>2</sup> Obras de Romero de Cepeda, Sevilla, 1582, 4to. The poem alluded to is entitled "El Infelice Robo de Elena Reyna de Esparta por Paris, Infante Troyano, del qual sucedió la Sangrienta Destrucción de Troya." It begins *ab ovo Leda*, and, going through about two thousand lines, ends with the death of six hundred thousand Trojans. The shorter poems in the volume

are sometimes agreeable. The next year, 1583, he published, partly in prose and partly in ballad verse, which is not always bad, a small popular book entitled "La antigua, memorable y sangrienta destrucción de Troya, recopilada de diversos autores," (Toledo, 1583, 12mo, 150 ff,) but Lucas Gracian certified to its harmlessness in 1581, and the colophon is dated 1584, — so that it was probably written before his "Infelice Robo de Helena," and published after it. It is poor enough. From some of the descriptions of Helen, Ajax, etc., one might suppose that Cepeda was their personal acquaintance, and was drawing from the life. But this is not worse than Berosus and Dares Phrygius, in whom he confides implicitly, relying on them as sufficient authorities to contradict Homer.

The poem of Manuel de Gallegos, entitled "Gigantomachia," and published at Lisbon, 1628, 4to, is also, like that of Cepeda, on a classical subject, being devoted to the war of the Giants against the Gods. Its author was a Portuguese, who lived many years at Madrid in intimacy with Lope de Vega, and wrote occasionally for the Spanish stage, but returned at last to his native country, and died there in 1665. His "Gigantomachia," in about three hundred and forty octave stanzas, divided into five short books, is written, for the period when it appeared, in a pure style, but is a very dull poem.

\* But with the appearance of Góngora, simplicity such as Cepeda's ceased in this class of poems almost entirely. Nothing, indeed, was more characteristic of the extravagance in which this great poetical heresiarch indulged himself than his monstrous narrative poem,— half jesting, half serious, and wholly absurd,— which he called “The Fable of Polyphemus”; and nothing became more characteristic of his school than the similar poems in imitation of the Polyphemus which commonly passed under the designation he gave them,— that of *Fábulas*. Such were the “Phaeton,” the “Daphne,” and the “Europa” of his great admirer, Count Villamediana. Such were several poems by Pantaleon, and, among them, his “Fábula de Eco,” which he dedicated to Góngora. Such were Moncayo’s “Atalanta,” a long heroic poem in twelve cantos, published as a separate work; and his “Venus and Adonis,” found among his miscellanies. And such, too, were Villalpando’s “Love Enamored, or Cupid and Psyche”; and several more of the same class and with the same name;— all worthless, and all published between the time when Góngora appeared and the end of the century.

Gayangos mentions an earlier “Gigantomachia” by Francisco de Sandoval, (Zaragoza, 1630,) and adds, that he published a volume of poems, entitled “Rasgos de Ocio,” 8vo, without date

A narrative poem in a hundred and thirty-four octave stanzas, by Doctor Antonio Gual, was published at Naples, apparently in 1637, to win the favor of the Duchess of Medina de las Torres, wife of the Viceroy. I have a copy of it, but can find no notice of it or of its author. It is an extravagant and incredible love-story, sometimes gracefully told,— sometimes with such affectations as were common during the reign of Gongorism,— but, on the whole, it is better than the average of its class.

\* These poems are all to be found in the works of their respective authors, elsewhere referred to, except two. The first is the “Atalanta y Hipomenes,” by Moncayo, Marques de San Felice, (Zaragoza, 1656, 4to,) in octave stanzas, about eight thousand lines long, in which he manages to introduce much of the history of Aragon, his native country, a general account of its men of letters, who were his contemporaries, and, in canto fifth, all the Aragonese ladies he admired, whose number is not small. The other poem is the “Amor Enamorado,” which Jacinto de Villalpando published (Zaragoça, 1655, 12mo) under the name of “Fabio Clemente”; and which, like the last, is in octave stanzas, but only about half as long.

\* 488 \* Of heroic poems on miscellaneous subjects, a few were produced during the same period, but none of value. The first that needs to be mentioned is that of Yague de Salas, on "The Lovers of Teruel," published in 1616, and preceded by an extraordinary array of laudatory verses, among which are sonnets by Lope de Vega and Cervantes. It is on the tragical fate of two young and faithful lovers, who, after the most cruel trials, died at almost the same moment, victims of their passion for each other,—the story on which, as we have already noticed, Montalvan founded one of his best dramas. Salas calls his poem a tragic epic, and it consists of twenty-six long cantos, comprehending not only the sad tale of the lovers themselves, which really ends in the seventeenth canto, but a large part of the history of the kingdom of Aragon and the whole history of the little town of Teruel. He declares his story to be absolutely authentic; and in the Preface he appeals for the truth of his assertion to the traditions of Teruel, of whose municipality he had formerly been syndic and was then secretary.

But his statements were early called in question,

See, also, Latassa, Bib. Nueva, Tom. III. p. 272. To these should be added the "Fábula de Cupido y Psyches," by Don Gabriel de Henao Monzazaz, (Zaragoza, 1620, 12mo, pp. 102,) not better than its fellows, and the *Fábulas* of Theseus and Ariadne, and of Hipponomes and Atalanta, by Miguel Colodrero de Villalobos, a young man of Baena, who published at Cordoba, in 1629, a small volume of poems, chiefly sonnets, epigrams, etc., which was succeeded in 1642 by another, called affectionately "Golosinas de Ingenios," or Sweetmeats for Wits.—He admired and followed Góngora, and addressed one of his poems to him.

Gayangos mentions several other po-

ems of the same sort, such as "La Luna y Endimion," by Marcelo Diaz Calle-cerrada, "La Atalanta," by Cespedes, "Jupiter y Europa," by Jusepe La-porta, etc., but none seems to be worth more than a passing notice. An attempt was made in the eighteenth century to revive something like this style of narrative poetry, or a parody on it, in "El Fabulero por Francisco Nieto Molina," (Madrid, 1764, 4to,) where we have jesting versions of the stories of Polyphemus, Arethusa, Leander, etc., often written in a better style than was common in his time; but like his "Perro-maquia," published in 1765, they are of small value.

and, to sustain them, he produced, in 1619, the copy of a paper which he professed to have found in the archives of Teruel, and which contains, under the date of 1217, a full account of the two lovers, with a notice of the discovery and reinterment of their unchanged bodies in the church of San Pedro, in 1555. This seems to have quieted the doubts that had been raised ; and for a long time afterwards, poets and tragic writers resorted freely to a story so truly Spanish in its union of love and religion, as if its authenticity were no longer questionable. But since 1806, when the facts and documents in relation to it were collected and published, there seems no reasonable doubt that the whole is a fiction, founded on a tradition already used by Artieda in a dull drama, and still floating about at the time when Salas lived, to \* which, \* 489 when urged by his sceptical neighbors, he gave a distinct form. But the popular faith was too well settled to be disturbed by antiquarian investigations, and the remains of the lovers of Teruel in the cloisters of Saint Peter are still visited by faithful and devout hearts, who look upon them with sincere awe, as mysterious witnesses left there by Heaven, that they may testify, through all generations, to the truth and beauty of a love stronger than the grave.<sup>4</sup>

<sup>4</sup> “Los Amantes de Teruel, Epopeya Trágica, con la Restauracion de España por la Parte de Sobrarbe y Conquista del Reino de Valencia, por Juan Yague de Salas,” Valencia, 1616, 12mo. The latter part of it is much occupied with a certain Friar John and a certain Friar Peter, who were great saints in Teruel, and with the conquest of Valencia by Don Jaume of Aragon. The poetry of the whole, it is not necessary to add, is naught. The antiquarian investigation of the truth of the story of the lovers is in a modest pamphlet entitled “Noticias Históricas sobre los Amantes de Teruel,

por Don Isidro de Antillon” (Madrid, 1806, 18mo), — a respectable Professor of History in the College of the Nobles at Madrid (Latassa, Bib. Nueva, Tom. VI p 123). It leaves no reasonable doubt about the forgery of Salas, which, moreover, is done very clumsily. Ford, in his admirable “Hand-Book of Spain,” (London, 1845, 8vo, p 874,) implies that the tomb of the lovers is still much visited. It stands now in the cloisters of St. Peter, whither, in 1709, in consequence of alterations in the church, their bodies were removed, — much decayed, says Antillon, not-

The attempt of Lope de Vega, in his “Jerusalem Conquered,” to rival Tasso, turned the thoughts of other ambitious poets in the same direction, and the quick result was two so-called epics that are not quite forgotten. The first is the “Macabeo” of Silveira, a Portuguese, who, after living long at the court of Spain, accompanied the head of the great house of the Guzmans when that nobleman was made viceroy of Naples, and published there, in 1638, this poem, to the composition of which he had given twenty-two years. The subject is the restoration of Jerusalem by Judas Maccabæus,—the same which Tasso had at one time chosen for his own epic. But Silveira had not the genius of Tasso. He has, it is true, succeeded in filling twenty cantos with octave stanzas, as Tasso did; but there the resemblance stops. The “Macabeo,” \* 490 besides being \* written in the affected style of Góngora, is wanting in spirit, interest, and poetry throughout.<sup>5</sup>

The other contemporary poem of the same class is better, but does not rise to the dignity of success. It is by Zarate, a poet long attached to Rodrigo Calderon, the adventurer who, under the title of Marques de Siete Iglesias, rose to the first places in the state in the time of Philip the Third, and employed Zarate as one of his secretaries. Zarate, however, was gentle and wise, and, having occupied himself much with poetry in the days

withstanding the claim set up that they are imperishable. The story of the lovers of Teruel has often been resorted to, and, among others in our own time, by Juan Eugenio Harzenbusch, in his drama, “Los Amantes de Teruel,” and by an anonymous author in a tale with the same title, that appeared at Valencia, 1838, 2 tom 18mo. In the Preface to the last, another of the certificates of Yague de Salas to the truth of the story is produced for the first

time, but adds nothing to its probability. See *ante*, pp 316–319

<sup>6</sup> “El Macabeo, Poema Heróico de Miguel de Silveira,” Nápoles, 1638, 4to. Castro (Biblioteca, Tom I p 626) makes Silveira a converted Jew, and Barbosa places his death in 1636, but the dedication of his “Sol Vencido,” a short, worthless poem, written to flatter the Vice-Queen of Naples, is dated 20th April, 1639, and was printed there that year

of his prosperity, found it a pleasant resource in the days of adversity. In 1648, he published “The Discovery of the Cross,” which, if we may trust an intimation in the “Persiles and Sigismunda” of Cervantes, he must have begun thirty years before, and which had undoubtedly been finished and licensed twenty years when it appeared in print. But Zarate mistook the nature of his subject. Instead of confining himself to the pious traditions of the Empress Helena and the ascertained achievements of Constantine against Maxentius, he has filled up his canvas with an impossible and uninteresting contest between Constantine and an imaginary king of Persia on the banks of the Euphrates, and so made out a long poem, little connected in its different parts, and, though dry and monotonous in its general tone, unequal in its execution; some portions of it being simple and dignified, while others show a taste almost as bad as that which disfigures the “Macabeo” of Silveira, and of quite the same sort.<sup>6</sup>

But there was always a tendency to a spirit of caricature \* in Spanish literature,—perhaps \* 491 owing to its inherent stateliness and dignity; for these are qualities which, when carried to excess, almost surely provoke ridicule. At least, as we know, parody appeared early among the ballads, and was always prominent in the theatres; to say nothing of romantic fiction, where *Don Quixote* is the great

<sup>6</sup> “Poema Heróico de la Invencion de la Cruz, por Fr Lopez de Zarate,” Madrid, 1648, 4to, twenty-two cantos and four hundred pages of octave stanzas. The infernal councils and many other parts show it to be an imitation of Tasso. The notice of his life by Sedano (*Parnaso*, Tom. VIII. p xxiv)

is sufficient; but that by Antonio is more touching, and reads like a tribute of personal regard. Zarate died in 1658, above seventy years old. *Semanario Pintoresco*, 1845, p. 82. Cervantes praises him beyond all reason in his *Persiles y Sigismunda*, Lib. IV. cap. 6, and elsewhere.

monument of its glory for all countries and for all ages.<sup>7</sup>

That the long and multitudinous narrative poems of Spain should call forth mock-heroics was, therefore, in keeping with the rest of the national character; and though the number of such caricatures is not large, they have a merit quite equal to that of their serious prototypes. The first in the order of time seems to be lost. It was written by Cósme de Aldana, who, in the latter part of the sixteenth century, was attached to the Grand Constable Velasco, when he was sent to govern Milan. In his capacity of poet, Aldana unhappily plied his master with flattery and sonnets, till one day the Constable fairly besought him to desist, and called him "an ass." The cavalier could not draw his sword on his friend and patron, but the poet determined to avenge the affront offered to his genius. He did so in a long poem, entitled the "Asneida," which, on every page, seemed to cry out to the governor, "You are a greater ass than I am." But it was hardly finished when the unhappy Aldana died, and the copies of his poem were so diligently sought for and so faithfully destroyed, that it seems to be one of the few books we should be curious to see, which, after having been once printed, have entirely disappeared from the world.<sup>8</sup>

<sup>7</sup> The continual parody of the *gracioso* on the hero shows what was the tendency of the Spanish stage in this particular. But there are also plays that are entirely burlesque, such as "The Death of Baldovinos," at the end of Cancer's Works, 1651, which is a parody on the old ballads and traditions respecting that paladin, and the "Cavallero de Olmedo," a favorite play, by Francisco Felix de Monteser, which is in the volume entitled "Mejor Libro de las Mejores Comedias," Madrid, 1653, and

which is a parody of a play with the same title in the Comedias de Lope de Vega, Vol XXIV, Zaragoza, 1641.

<sup>8</sup> Cósme was editor of the poems of his brother, Francisco de Aldana, in 1593 (Antonio, Bib Nov, Tom I p 256) He wrote in Italian and printed at Florence as early as 1578; but Velasco did not go as governor to Milan till after 1586 (Salazar, Dignidades, f 131) The only account I have seen of the "Asneida" is in Figueroa's "Pasagero," 1617, f.

\* The next mock-heroic has also something mysterious about it. It is called “The Death, Burial, and Honors of Chrespina Marauzmana, the Cat of Juan Chrespo,” and was published at Paris in 1604, under what seems to be the pseudonyme of “Cintio Merctisso.” The first canto gives an account of Chrespina’s death; the second, of the *pésames* or condolences offered to her children; and the third and last, of the public tributes to her memory, including the sermon preached at her interment. The whole is done in the true spirit of such a poem,—grave in form, and quaint and amusing in its details. Thus, when the children are gathered round the death-bed of their venerable mother, among other directions and commands, she tells them very solemnly:—

Up in the concave of the tiles, and near  
 That firm-set wall the north wind whistles by,

127. Its loss is probably not a great one, says Gayangos, if we are to judge by a volume of poems which he published at Madrid in 1591, entitled “*Invectiva contra el Vulgo y su Maldicion*”, which is full of bad taste. It may be found reprinted in the *Biblioteca de Autores Españoles*, Tom. XXXVI, 1855. I have a copy of the unhappy collection of poems that provoked the Constable’s ire. It is in

thirteen leaves, printed in Milan without date, and is entitled “*Versos de Cósme de Aldana a su Capitan General y Señor, el illustriss y excellentiss Señor Juan Fernandez Velasco, Condestable de Castilla*” The flattery, no doubt, outweighs the poetry — It is not in the *Biblioteca de Rivadeneyra*.

Much better known than the Chrespina is the "Mosquea," by Villaviciosa;—a rich and fortunate ecclesiastic, who was born at Siguenza in 1589, and died at Cuenca in 1658. The Mosquea, which is the war of the flies and the ants, was printed in 1615; but though the author lived so long afterwards, he left nothing else to mark the genius of which this poem gives unquestionable proof. It is, as may be imagined, an imitation of the "Batrachomyomachia," attributed to Homer, and the storm in the third canto is taken, with some minuteness in the spirit of its parody, from the storm in the first book of the *Aeneid*. Still the Mosquea is as original as the nature of such a poem requires it to be. It has, besides, a simple and well-constructed fable; and notwithstanding it is protracted to twelve cantos, the curiosity of the reader is sustained to the last.

A war breaks out in the midst of the festivities of a tournament in the capital city of the flies, which the false ants had chosen as a moment when they could advantageously interrupt the peace that had long subsisted between them and their ancient enemies. The

heathen gods are introduced, as they are in the *Iliad*, — the other insects become allies in the great quarrel, after the manner of all heroic poems, — the neighbouring chiefs come in, — there is an *Achilles* on one side, and an *Æneas* on the other, — the characters of the principal personages are skilfully drawn and sharply distinguished, — and the catastrophe is a tremendous battle, filling the last two \*cantos, in \* 494 which the flies are defeated and their brilliant leader made the victim of his own rashness. The faults of the poem are its pedantry and length. Its merits are the richness and variety of its poetical conceptions, the ingenious delicacy with which the minutest circumstances in the condition of its insect heroes are described, and the air of reality, which, notwithstanding the secret satire that is never entirely absent, is given to the whole by the seeming earnestness of its tone. It ends, precisely where it should, with the expiring breath of the principal hero.<sup>11</sup>

No other mock-heroic poem followed that of Villaviciosa during this period, except "The War of the Cats," by Lope de Vega, who, in his ambition for universal conquest, seized on this, as he did on every other department of the national literature. But the "Gatomachia," which is one of the very best of his efforts, has already been noticed. We turn, therefore, again to the true heroic poems, devoted to national subjects, whose current flows no less amply and gravely, down to the middle of the seventeenth century, than it did when it first began, and continues through its whole

<sup>11</sup> The first edition of the "Mosquea" was printed in small 12mo at Cuenca, when its author was twenty-six years old; — the third is Sancha's, Madrid, 1777, 12mo, with a life, from which it appears, that, besides being a faithful officer of the Inquisition himself, and

making a good fortune out of it, Villaviciosa exhorted his family, by his last will, to devote themselves in all future time to its holy service with grateful zeal. See, also, the Spanish translation of Sismondi, Sevilla, 8vo, Tom. I., 1841, p. 354.

course no less characteristic of the national genius and temper than we have seen it in the poems on Charles the Fifth and his achievements.

The favorite hero of the next age, Don John of Austria, son of the Emperor, was the occasion of two poems, with which we naturally resume the examination of this curious series.<sup>12</sup> The first of them is

<sup>12</sup> A vast number of tributes were paid by contemporary men of letters to Don John of Austria, but among them none is more curious than a Latin poem in two books, containing seventeen or eighteen hundred hexameters, the work of a negro, who had been brought as an infant from Africa, and who by his learning rose to be Professor of Latin and Greek in the school attached to the cathedral of Granada. He is the same person noticed by Cervantes as "el negro Juan Latino," in a poem prefixed to the Don Quixote. His volume of Latin verses on the birth of Ferdinand, the son of Philip II, on Pope Pius V, on Don John of Austria, and on the city of Granada, making above a hundred and sixty pages in small quarto, printed at Granada in 1573, is not only one of the rarest books in the world, but is one of the most remarkable illustrations of the intellectual faculties and possible accomplishments of the African race. The author himself says he was brought to Spain from Ethiopia, and was, until his emancipation, a slave to the grandson of the famous Gonsalvo de Córdova. His Latin verse is respectable, and, from his singular success as a scholar, he was commonly called Joannes Latinus, a *sobriquet* under which he is frequently mentioned. He was respectably married to a lady of Granada, who fell in love with him, as Eloisa did with Abelard, while he was teaching her, and after his death, which occurred later than 1573, his wife and children erected a monument to his memory in the church of Sta. Ana, in that city, inscribing it with an epitaph, in which he is styled "Filius *Aethiopum*, prolesque nigerrima patrum." (Antonio, Bib. Nov., Tom. I. p. 716. Don Quixote, ed. Clemencin, Tom. I. p. lx, note.) Andreas Schottus in his "Hispaniae Bibliotheca sive de Academis et Bib-

liotheceis," (1608,) speaking of the city of Granada, says "Hic Joannes Latinus *Aethiops*, (res prodigiosa) nostra tempestate rhetorica per multos annos publice docuit, juventutemque instituit, et poema edidit in victoriam Joannis Austriaci navalem" p. 29

There is a play entitled "Juan Latino" by Diego Ximenez de Enciso, in the second volume of the "Comedias Escogidas," (Madrid, 1652,) which gives a full sketch of him. In the first act he is a slave of the Duke of Sesa, ill enough treated, kicked about and cuffed. In the second, he is tutor to Doña Ana de Carlobal, sister to an ecclesiastic of rank, and makes love to her through his Spanish verses, and in other ways after the Spanish fashion. In the third, he rises to distinction, obtains his chair in the University, and, favored by Don John of Austria, is enfranchised by the Duke of Sesa, who, however, manumits him very reluctantly, on the ground that it is his great glory to hold so distinguished a man as his property. Addressing Don John, Juan Latino is made to say, (f. 57,) in the fervor of his gratitude —

Yo prometo a vuestra Altéza,  
Que he de quitar a la Fama  
Una pluma con que escriva  
Sus memorables hazañas  
Y, como muchos poemas  
Toman nombre del que cantan,  
Llamaré Austria mi libro,  
Pues canta Don Juan de Austria

This promise, of course, was made by the poet half a century or more after it had been fulfilled.

It may not be amiss here to add, that another negro is celebrated in a play, written with skill in good Castilian, and claiming, at the end, to be founded in fact. It is called "El Valiente Negro en Flandes," by Andres de Claramonte, actor and playwright, and is found in Tom. XXXI, 1638, of the collection of Comedias printed at Bar-

on \*the battle of Lepanto, and was published \* 495 in 1578, the year of Don John's untimely death.

The author, Cortereal, was a Portuguese gentleman of rank and fortune, who distinguished himself as the commander of an expedition against the infidels on the coasts of Africa and Asia, in 1571, and died before 1593 ; but, being tired of fame, passed the last twenty years of his life at Evora, and devoted himself to poetry and to the kindred arts of music and painting.

It was amidst the beautiful and romantic nature that surrounded him during the quiet conclusion of his bustling \* life, that he wrote three long \* 496 poems ; — two in Portuguese, which were soon translated into Spanish and published ; and one, originally composed in Spanish, and entitled “The Most Happy Victory granted by Heaven to the Lord Don John of Austria, in the Gulf of Lepanto, over the Mighty Ottoman Armada.” It is in fifteen cantos of blank verse, and is dedicated to Philip the Second, who, contrary to his custom, acknowledged the compliment by a flattering letter. The poem opens with a dream brought to the Sultan from the infernal regions by the goddess of war, and inciting him to make an attack on the Christians ; but excepting this, and the occasional use of similar machinery afterwards, it is merely a dull historical account of the war, ending with the great sea-fight itself, which is the subject of the last three cantos.<sup>18</sup>

celona and Saragossa. The negro in question, however, was not, like Juan Latino, a native African, but was a slave born in Merida, and was distinguished only as a soldier, serving with great honor under the Duke of Alva, and enjoying the favor of that severe general.

<sup>18</sup> “ Felicissima Victoria concedida del Cielo al Señor Don Juan d' Austria,

etc , compuesta por Hierónimo de Cortereal, Cavallero Portugues,” s 1 1578, 8vo, with curious woodcuts , probably printed at Lisbon. (Life, in Barbosa, Tom II p 495 ) His “Sucedo do Segundo Cerco de Diu,” in twenty-one cantos, on the siege, or rather defence, of Diu, in the East Indies, in 1546, was published in 1574, and translated into Spanish by the well-known poet, Pedro

The other contemporary poem on Don John of Austria was still more solemnly devoted to his memory. It was written by Juan Gutierrez Rufo, a person much trusted in the government of Córdova, and expressly sent by that city to Don John, whose service he seems never afterwards to have left. He was, as he tells us, especially charged by the prince to write his history, and received from him the materials for his task. The result, after ten years of labor, was a long chronicling poem called the “Austriada,” printed in 1584. It begins, in the first four cantos, with the rebellion of the Moors in the Alpuxarras; and then, after giving us the birth and education of Don John, as

the general sent to subdue them, goes on with  
 \* 497 his subsequent life and adventures,\* and ends,  
 in the twenty-fourth canto, with the battle of Lepanto and the promise of a continuation.

When it was thus far finished, which was not till after the death of the prince to whose glory it is dedicated, it was solemnly presented, both by the city of Córdova and by the Cortes of the kingdom, in separate letters, to Philip the Second, asking for it his especial favor, as for a work “that it seemed to them must last for many ages.” The king received it graciously, and gave the author five hundred ducats, regarding it, perhaps, with secret satisfaction, as a funeral monument to one whose life had been so brilliant that his death was not unwelcome. With such patronage, it soon passed through three editions; but it had no real merit, ex-

de Padilla, who published his version in 1597. His “Naufrago e Lastimoso Suceso da Perdiçāo de Manuel de Souza de Sepúlveda,” etc., (Lisboa, 1594, 4to, ff 206,) in seventeen cantos, was translated into Spanish by Francisco de Contreras, with the title of “Nave Trágica de la India de Portugal,” 1624. cept in the skilful construction of its octave stanzas, and in some of its historical details, and was, therefore, soon forgotten.<sup>14</sup>

In the neighborhood of the city of Leon there are — or in the sixteenth century there were — three imperfect Roman inscriptions cut into the living rock ; two of them referring to Curienus, a Spaniard, who had successfully resisted the Imperial armies in the reign of Domitian, and the third to Polma, a lady, whose marriage to her lover, Canioseco, is thus singularly recorded. On these inscriptions, Vezilla Castellanos, a native of the territory where the persons they commemorate are supposed to have lived, has constructed a romantic poem, in twenty-nine cantos, called “Leon in Spain,” which he published in 1586.

Its main subject, however, in the last fifteen cantos, is the tribute of a hundred damsels, which the usurper Mauregato covenanted by treaty to pay annually to the \* Moors, and which, by the assistance of the apostle Saint James, King Ramiro successfully refused to pay any longer. Castellanos, therefore, passes lightly over the long period intervening between the time of Domitian and that of the war of Pelayo, giving only a few sketches from its Christian history, and then, in the twenty-ninth canto, brings to a conclusion so much of his poem as relates to the Moorish tribute, without, however, reaching the

<sup>14</sup> “La Austrriada de Juan Rufo, Jurado de la Ciudad de Córdova,” Madrid, 1584, 12mo, ff. 447. There are editions of 1585, 1586, and 1587, and it is extravagantly praised by Cervantes, in a prefatory sonnet, and in the scrutiny of Don Quixote’s library. Rufo, when, on some occasion, he was to be presented to Philip II, said he had prepared himself fully for the reception, but lost all presence of mind, from the severity of that monarch’s appear-

ance (Baltasar Porreño, *Dichos y Hechos de Philip II*, Bruselas, 1666, 12mo, p. 39). The best of Rufo’s works is his Letter to his young Son, at the end of his “Apotegmas,” already noticed ; — the same son, Luis, who afterwards became a distinguished painter at Rome. The “Austrriada” is reprinted, with a good prefatory notice of the author, by Don Cayetano Rosell, in Vol. XXIX of the *Biblioteca de Rivadeneyra*, 1854.

ultimate limit he had originally proposed to himself. But it is long enough. Some parts of the Roman fiction are pleasing, but the rest of the poem shows that Castellanos is only what he calls himself in the Preface, — “a modest poetical historian, or historical poet; an imitator and apprentice of those who have employed poetry to record such memorable things as kindle the minds of men and raise them to a Christian and devout reverence for the saints, to an honorable exercise of arms, to the defence of God’s holy law, and to the loyal service of the king.”<sup>15</sup> If his poem have any subject, it is the history of the city of Leon.

In the course of the next four years after the appearance of this rhymed chronicle of Leon, we find no less than three other long poems connected with the national history: one by Miguel Giner, on the siege of Antwerp by Alexander Farnese, who succeeded the unfortunate Don John of Austria as generalissimo of Philip the Second in the war of the Netherlands; — another, in twenty-one cantos, by Edward or Duarte Diaz, a Portuguese, on the taking of Granada by the Catholic sovereigns; — and the third by Lorenzo de Zamora, on the history of Saguntum and of its siege by Hannibal, in which, preserving the outline of that early story so far as it was well settled, he has wildly mixed up love-scenes, tournaments, and adventures, \* 499 suited only to the age of \* chivalry. Taken together, they show how strong was the passion

<sup>15</sup> “Primera y Segunda Parte del Leon de España, por Pedro de la Vezilla Castellanos,” Salamanca, 1586, 12mo, ff 369. The story of the gross tribute of the damsels has probably some foundation in fact, one proof of which is, that the old General Chronicle (Parte III c 8) seems a little unwilling to tell a tale so discreditable to Spain.

Mariana admits it, and Lobera, in his “Historia de las Grandezas, ec., de Leon,” (Valladolid, 1596, 4to, Parte II c. 24,) gives it in full, as unquestionable. Leon is still often called Leon de *Espana*, as it is in the poem of Castellanos, to distinguish it from Lyons in France, Leon de *Francia*.

for narrative verse in Spain, where, in so short a time, it produced three such poems.<sup>16</sup>

To a similar result we should arrive from the single example of Christóval de Mesa, who, between 1594 and 1612, published three more national heroic poems;—the first on the tradition, that the body of Saint James, after his martyrdom at Jerusalem, was miraculously carried to Spain and deposited at Compostella, where that saint has ever since been worshipped as the especial patron of the whole kingdom;—the second on Pelayo and the recovery of Spain from the Moors down to the battle of Covadonga;—and the third on the battle of Tolosa, which broke the power of Mohammedanism and made sure the emancipation of the whole Peninsula. All three, as well as Mesa's elaborate translations of the *Æneid* and *Georgics*, which followed them, are written in *ottava rima*, and all three are dedicated to Philip the Third.

Of their author we know little, and that little is told chiefly by himself in his pleasant poetical epistles, and especially in two addressed to the Count of Lemos and one to the Count de Castro. From these we learn, that, in his youth, he was addicted to the study of Fernando de Herrera and Luis de Soto, as well as to the teachings of Sanchez, the first Spanish scholar of

I p 730),—besides which, Diaz, who was long a soldier in the Spanish service, and wrote good Castilian, published, in 1592, a volume of verse in Spanish and Portuguese. — "De la His-

toria de Sagunto, Numancia, y Cartago, compuesta por Lorencio de Zamora, Natural de Ocaña," Alcalá, 1589, 4to, — nineteen cantos of *ottava rima*, and about five hundred pages, ending abruptly and promising more. It was written, the author says, when he was eighteen years old, but though he lived to be an old man, and died in 1614, having printed several religious books, he never went further with this poem. (Antonio, Bib Nov, Tom II p 11) But he published a volume of miscellaneous poetry at Madrid, in 1592, 4to, entitled "Varias Obras," some of which are in Portuguese and some in Italian.

his time ; but that, later, he lived five years in Italy, much connected with Tasso, and from this time belonged entirely to the Italian school of Spanish poetry, to which, as his works show, \* he had always been inclined. But, with all his efforts, — and they were not few, — he found little favor or patronage. The Count de Lemos refused to carry him to Naples as a part of his poetical court, and the king took no notice of his long poems, which, indeed, were no more worthy of favor than the rest of their class that were then jostling and crowding one another in their efforts to obtain the royal protection.<sup>17</sup>

Juan de la Cueva followed in the footsteps of Mesa. His "Bética," printed in 1603, is an heroic poem, in twenty-four cantos, on the conquest of Seville by Saint Ferdinand. Its subject is good, and its hero, who is the king himself, is no less so. But the poem is a failure ; heavy and uninteresting in its plan, and cold in its execution ; — for Cueva, who took his materials chiefly from the General Chronicle of Saint Ferdinand's

<sup>17</sup> "Las Navas de Tolosa," twenty cantos, Madrid, 1594, 12mo, — "La Restauracion de España," ten cantos, Madrid, 1607, 12mo, — "El Patron de España," six books, Madrid, 1611, 12mo, with Rimas added. My copy of the last volume is one of the many proofs that new title-pages with later dates were attached to Spanish books that had been some time before the public. Mr. Southey, to whom this copy once belonged, expresses his surprise, in a MS note on the fly-leaf, that the *last* half of the volume should be dated in 1611, while the *first* half is dated in 1612. But the reason is, that the title-page to the "Rimas" comes at p 94, in the middle of a sheet, and could not conveniently be cancelled and changed, as was the title-page to the "Patron de España," with which the volume opens. Mesa's translations are later ; — the *Aeneid*, Madrid, 1615, 12mo ; and the *Eclogues* of Virgil, to which he added a few more Rimas and

the poor tragedy of "Pompeo," Madrid, 1618, 12mo. The *ottava rima* seems to me very cumbrous in both these translations, and unsuited to their nature, though we are reconciled to it, and to the *terza rima*, in the *Metamorphoses* of Ovid, by Viana, a Portuguese, printed at Valladolid, in 1589, 4to, one of the happiest translations made in the pure age of Castilian literature. The *Iliad*, which Mesa is also supposed to have translated, was never printed. In one of his epistles, (Rimas, 1611, f 201,) he says he was bred to the law ; and in another, (f 205,) that he loved to live in Castile, though he was of Estremadura. In many places he alludes to his poverty and to the neglect he suffered, and in a sonnet in his last publication, (1618, f. 113,) he shows a poor, craven spirit in flattering the Count de Lemos, with whom he was offended for not taking him to Naples. After this we hear nothing of him.

son, was not able to mould them, as he strove to do, into the form of the “Jerusalem Delivered.” The task was, in fact, quite beyond his power. The most agreeable portion of his work is that which involves the character of Tarfira, a personage imitated from Tasso’s Clorinda ; but, after all, the romantic episode of which she is the heroine has great defects, and is too much interwoven with the principal thread of the story. The general plan \* of the poem, however, is less encumbered in its movement and more epic in its structure than is common in those of its class in Spanish literature ; and the versification, though careless, is fluent, and generally harmonious.<sup>18</sup>

A physician and scholar of Valladolid, Alfonso Lopez, — commonly called El Pinciano, from the Roman name of his native city, — wrote in his youth a poem on the subject of Pelayo, but did not publish it till 1605, when he was already an old man. It supposes Pelayo to have been misled by a dream from Lucifer to undertake a journey to Jerusalem, and, when at the Holy Sepulchre, to have been undeceived by another dream, and sent back for the emancipation of his country. This last is the obvious and real subject of the poem, which has episodes and machinery enough to explain all the history of Spain down to the time of Philip the Third, to whom the “Pelayo” is dedicated. It is long, like the rest of its class, and, though ushered into notice with an air of much scholarship and pretension, it is written with little skill in the versification,

<sup>18</sup> “Conquista de la Bética, Poema Heróico de Juan de la Cueva,” 1603, reprinted in the fourteenth and fifteenth volumes of the collection of Fernandez, (Madrid, 1795, with a Preface, which is, I think, by Quintana, and is very good. A notice of Cueva occurs in the Spanish translation of Sismondi, Tom.

and is one of the most wearisome poems in the language.<sup>19</sup>

In 1612 two more similar epics were published. The first is "La Numantina," which is on the siege of Numantia and the history of Soria, a town standing in the neighborhood of Numantia, and claiming to be its successor. The author, Francisco Mosquera de Barnuevo, who belonged to an ancient and distinguished

family there, not only wrote this poem of \* 502 \* fifteen cantos in honor of the territory

where he was born, but accompanied it with a prose history, as a sort of running commentary, in which whatever relates to Soria, and especially the Barnuevos, is not forgotten. It is throughout a very solemn piece of pedantry, and its metaphysical agencies, such as Europe talking to Nemesis, and Antiquity teaching the author, seem to be a good deal in the tone of the old Mysteries, and are certainly anything but poetical. The other epic referred to is by Vasconcellos, a Portuguese, who had an important command and fought bravely against Spain when his country was emancipating itself from the Spanish yoke, but still wrote with purity, in the Castilian, seventeen cantos, nominally on the expulsion of the Moriscos, but really on the history of the whole Peninsula, from the time of the first entrance of the Moors down to the final exile of the last of their hated descendants by Philip the Third. But neither of these poems is now remembered, and neither deserves to be.<sup>20</sup>

<sup>19</sup> "El Pelayo del Princiano," Madrid, 1605, 12mo, twenty cantos, filling above six hundred pages, with a poor attempt at the end, after the manner of Tasso, to give an allegorical interpretation to the whole. Still, in the course of the next thirty years, two or three attempts were made that should be noticed.

The first of them is by a Portuguese lady, Bernarda Ferreira, and is called “Spain Emancipated”; a tedious poem, in two parts, the earlier of which appeared in 1618, and the latter in 1673, long after its author’s death. It is, in fact, a rhymed chronicle,— to the first part of which the dates are regularly attached,— and was intended, no doubt, to cover the whole seven centuries of Spanish history from the outbreak of Pelayo

He says “it was a book of his youth, printed when his hairs were gray”, but it shows none of the judgment of mature years

“La Liga deshecha por la Expulsion de los Moriscos de los Reynos de España,” Madrid, 1612, 12mo It was printed, therefore, long before Vasconcellos fought against Spain, and contains fulsome compliments to Philip III, which must afterwards have given their author no pleasure. (Barbosa, Tom II p 701) The poem consists of about twelve hundred octave stanzas.

“La España Defendida,” by Christ. Suarez de Figueroa, Madrid, 1612, 12mo, and Naples, 1644, belongs to the same date, making, in fact, three heroic poems in one year This last is on the story of Bernardo del Carpio, and ends with the death of Orlando, — the whole divided into fourteen books, and making about fourteen hundred octave stanzas

Gayangos notes here five or six heroic or narrative poems, that belong to the same period, and, though of little value, and only a part of the crowd that might be enumerated and that are found

in Rosell’s list, should yet, perhaps, have some notice

The oldest is of 1568, by Balthasar de Vargas, and is entitled “Breve Relacion, ec, de la Jornada del Duque de Alva desde España hasta Flandes,” — a mere compliment, and a very poor one, to the Duke on his expedition to Flanders, which did so much to ruin Spain

The next, “La Iffanta [sic] Coronada,” by João Soarez de Alarcam, (Alarcón,) 1606, is on the story of the unhappy Inez de Castro

The third is “La Murgetana,” by Gaspar García Oriolano, 1608, on the conquest of Murcia by Jaime I of Aragon

The fourth is on a sea-fight of the Marquis de Sta Cruz, published in 1624, by Diego Duque de Estrada

The fifth is on another sea-fight, but won by Don Fadrique de Toledo, and was published in 1624 by Gabriel de Ayrolo Calan.

And the last is by Simeon Zapata, on the expulsion of the Moriscos, which it defends in the spirit of that ruthless act of tyranny It was printed in 1635, and translated at once into Italian.

to the fall of Granada, but it is finished no further than the reign of Alfonso the Wise, where it stops abruptly.

The second attempt is one of the most absurd known in literary history. It was made by Vera y Figueroa, Count de la Roca, long the Minister of Spain at Venice, and the author of a pleasant prose treatise on the Rights and Duties of an Ambassador. He began by translating Tasso's "Jerusalem Delivered," but, just as his version was ready to be published, he changed his purpose, and accommodated the whole work — history, poetical ornaments, and all — to the delivery of Seville from the Moors by Saint Ferdinand. The transformation is as complete as any in Ovid, but certainly not as graceful; — a fact singularly apparent in the second book, where Tasso's beautiful and touching story of Sophronia and Olindo is travestied by the corresponding one of Leocadia and Galindo. As if to make the whole more grotesque and give it the air of a grave caricature, the Spanish poem is composed throughout in the old Castilian *redondillas*, and carried through exactly twenty books, all running parallel to the twenty of the "Jerusalem Delivered."

The last of the three attempts just referred to, and the last one of the period that needs to be noticed, is

the "Naples Recovered" of Prince Esquilache,  
\* 504 which, \* though written earlier, dates, by its

publication, from 1651. It is on the conquest of Naples in the middle of the fifteenth century by Alfonso the Fifth of Aragon, who seems to have been selected as its hero, in part at least, because the Prince of Esquilache could boast his descent from that truly great monarch.

The poem, however, is little worthy of its subject. The author avowedly took great pains that it should

have no more books than the *Æneid*; that it should violate no historical proprieties; and that, in its episodes, machinery, and style, as well as in its general fable and structure, it should be rigorously conformed to the safest epic models. He even, as he declares, had procured for it the crowning grace of a royal approbation before he ventured to give it to the world. Still it is a failure. It seems to foreshadow some of the severe and impoverishing doctrines of the next century of Spanish literature, and is written with a squeamish nicety in the versification that still further impairs its spirit; so that the last of the class to which it belongs, if it be not one of the most extravagant, is one of the most dull and uninteresting.<sup>21</sup>

<sup>21</sup> "Hespaña Libertada, Parte Primera, por Doña Bernarda Ferreira de Laceida, dirigida al Rey Catolico de las Hespañas, Don Felipe Tercero deste Nombre, *nuestro Señor*," (Lisboa, 1618, 4to,) was evidently intended as a compliment to the Spanish usurpers, and in this point of view is as little creditable to its author as it is in its poetical aspect. Parte Segunda was published by her daughter, Lisboa, 1673, 4to. Bernarda de Lacerda was a lady variously accomplished. Lope de Vega, who dedicated to her his eclogue entitled "Filia," the last work he ever published, (Obras Suetas, Tom X p 193,) compliments her on her writing Latin with purity. She published a volume of poetry, entitled "Soledades de Busaco," in Portuguese, Spanish, and Italian, in 1634, a good German translation of a part of which may be found in Blumenkranz religiöser Poesien aus Sprachen des Sudens von C. B. Schlüter, Paderborn, 1855. She died in 1644.

"El Fernando, ó Sevilla Restaurada, Poema Heróico, escrito con los Versos de la Gerusalemme Liberata, ec, por Don Juan Ant de Vera y Figueroa, Conde de la Roca," ec, Milan, 1632, 4to, pp 654. He died in 1658. Antonio, *ad verb.* See further about him in Vol III., Appendix C.

"Nápoles Recuperada por el Rey

Don Alonso, Poema Heróico de D Francisco de Borja, Príncipe de Esquilache," ec Zaragoza, 1651, Amberes, 1658, 4to. A notice of his honorable and adventurous life will be given, when we speak of Spanish lyrical poetry, where he was more successful than he was in epic.

In the same year, 1651, another poem, on the subsequent conquest of Naples by Gonsalvo de Cordova, appeared at Granada (4to, ff 138, making about six hundred octave stanzas). It is a sort of life of the Great Captain; but though it contains an intimation of his death, it really ends with his departure from Naples for the last time. It is quite dull, and is entitled "Napolisea, Poema Heróico, ec, por Don Francisco de Trillo y Figueroa." He wrote lyrical poetry, a volume of which, under the title of "Poesias Varras," was printed at Granada in 1652,—some parts of it national and simple in its style, some affected and *culto*, like Góngora, whom he imitated.

There were two or three other poems called heroic that appeared after these; but they do not need to be recalled. One of the most absurd of them is the "Orfeo Militar," in two parts, by Joan de la Victoria Ovando, the first being on the siege of Vienna by the Turks, and the second on that of Buda, both printed in 1688, 4to, at Malaga, where

\* 505 \* It is worth while, as we finish our notice of this remarkable series of Spanish narrative and heroic poems, to recollect how long the passion for them continued in Spain, and how distinctly they retained to the last those ambitious feelings of national greatness which originally gave them birth. For a century, during the reigns of Philip the Second, Philip the Third, and Philip the Fourth, they were continually issuing from the press, and were continually received with the same kind, if not the same degree, of favor that had accompanied the old romances of chivalry, which they had helped to supersede. Nor was this unnatural, though it was extravagant. These old epic attempts were, in general, founded on some of the deepest and noblest traits in the Castilian character; and if that character had gone on rising in dignity and developing itself under the three Philips, as it had under Ferdinand and Isabella, there can be little doubt that the poetry built upon it would have taken rank by the side of that produced under similar impulses in Italy and England. But, unhappily, this was not the case. These Spanish narrative poems, devoted to the glory of their country, were produced when the national character was on the decline; and as they sprang more directly from the essential elements of that character, and depended more on its spirit, than did the similar poetry of any other people in modern times, so they now more visibly declined with it.

It is in vain, therefore, that the semblance of the feelings which originally gave them birth is

their author enjoyed a military office, but neither, I think, was much read beyond the limits of the city that produced them. His "Ocios de Castalia," a volume chiefly of lyrical verse and chiefly in the Italian manner, which

was printed at Malaga in 1663, is not better. He says in it, that he wrote his first poems in 1642, and that he served at Naples and at Vienna, and I find that he was alive in 1688, beyond which I have no notice of him.

continued to the \*last; for the substance is \* 506 wanting. We mark, it is true, in nearly every one of them, a proud patriotism, which is just as presumptuous and exclusive under the weakest of the Philips as it was when Charles the Fifth wore half the crowns of Europe; but we feel that it is degenerating into a dreary, ungracious prejudice in favor of their own country, which prevented its poets from looking abroad into the world beyond the Pyrenees, where they could only see their cherished hopes of universal empire disappointed, and other nations rising to the state and power their own was so fast losing. We mark, too, throughout these epic attempts, the indications to which we have been accustomed of what was most peculiar in Spanish loyalty,—bold, turbulent, and encroaching against all other authority exactly in proportion as it was faithful and submissive to the highest; but we find it is now become a loyalty which, largely as it may share the spirit of military glory, has lost much of the sensitiveness of its ancient honor. And finally, though we mark in nearly every one of them that deep feeling of reverence for religion which had come down from the ages of contest with the infidel power of the Moors, yet we find it now constantly mingling the arrogant fierceness of worldly passion with the holiest of its offerings, and submitting, in the spirit of blind faith and devotion, to a bigotry whose decrees were written in blood. These multitudinous Spanish heroic poems, therefore, that were produced out of the elements of the national character when that character was falling into decay, naturally bear the marks of their origin. Instead of reaching, by the fervid enthusiasm of a true patriotism, of a proud loyalty, and of an enlightened religion, the elevation

to which they aspire, they sink away, with few exceptions, into tedious, rhyming chronicles, in which the national glory fails to excite the interest that would belong to an earnest narrative of real events, without gaining in its stead anything from the inspirations of poetical genius.
